

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

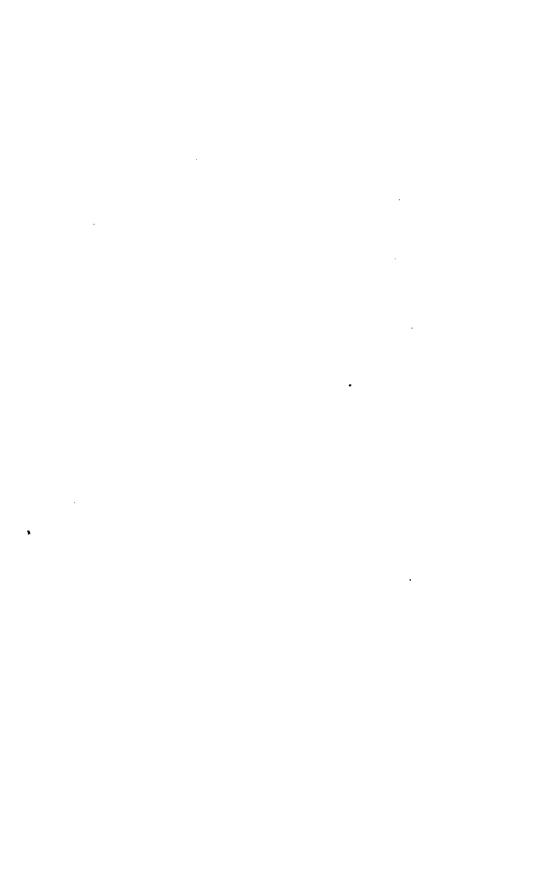

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

NAMES OF INVALID PENSIONERS, &c.

LETTER

THE SECRETARY OF THE INTERIOR,

PURNISHING

The names and residences of invalid pensioners.

May 10, 1858.—Ordered to be printed.

DEPARTMENT OF THE INTERIOR, May 10, 1858.

Sin: In compliance with the resolution of the House of Representatives calling for a report of "the names and residences of all the invalid pensioners of the United States who have been admitted to the rolls since March 3, 1849; the time when their pensions commenced; the amount of pension per annum received by each, distinguishing each according to grade, with reference to the several acts of Congress under which said pensions are allowed," I herewith enclose a statement of the same, together with the letter of the Commissioner of Pensions of date May 8, 1858.

I am, very respectfully, your obedient servant,

J. THOMPSON,

Secretary.

Hon. JAMES L. ORR, Speaker of the House of Representatives.

Pension Office, May 8, 1858.

SIR: I have the honor to return herewith the resolution of the House of Representatives of the 9th of February last, which you referred to this office on the 11th, and, in compliance with your directions, endorsed thereon, have caused to be prepared and herewith submit a tabular statement showing "the names and residence of all the invalid pensioners of the United States who have been admitted to the rolls since March 3, 1849; the time when their pensions commenced; the amount of pension per annum received by each, distinguishing each 'according to grade, with reference to the several acts of Congress under which said pensions are allowed."

For greater convenience, of reference this statement has been arranged in alphabetical order, both as to States and the names of pen-

sioners in each.

I have the honor to be, very respectfully, your obedient servant, GEO. C. WHITING, Commissioner.

Hon. JACOB THOMPSON. Secretary of the Interior. News and residence of all the invalid pensioners of the United States who have been admitted to the rells since March 3, 1849; the time when their pensions commenced; the amount of pension per meson recrived by each, distinguishing each according to grade, with reference to the several acts of Congress under which said pensions are allowed.

ALABAMA.

ESTIMATES—TREASURY EXTENSION, CUSTOM-HOUSES, AND MARINE HOSPITALS.

LETTER

FROM

THE SECRETARY OF THE TREASURY.

ASKING FOR

Appropriations, to be expended in the prosecution of certain public buildings.

MAY 10, 1858.—Referred to the Committee on Ways and Means.

TREASURY DEPARTMENT, May 10, 1858.

SIR: I herewith transmit a communication from the construction bureau of this department, asking for certain appropriations, to be expended in the prosecution of certain public buildings. The principal sums were estimated for in the report of that officer, which accompanied my annual report to Congress. The reasons for an increased estimate in some instances are set forth in the accompanying communication.

This branch of the public service has been conducted with a proper regard to the existing state of the treasury. When the works are progressing under contracts there is no discretion with the department to limit their progress; but in other cases the expenditure is limited to such amounts as will prevent injury to the works in progress from a total suspension of them.

I am, sir, very respectfully, your obedient servant,

HOWELL COBB, Secretary of the Treasury.

Hon. James L. Orr, Speaker House of Representatives, Washington, D. C.

TREASURY DEPARTMENT,

May 6, 1858.

Sin: In my annual report to you on the condition of the severe buildings being erected under the Treasury Department, I had th honor to call attention to the appropriations requird to be made, to carry on the works with economy—having a proper regard to the permitted of the per

cuniary embarrassment of the treasury.

Since that period (September 30,) the works have progressed wit increased vigor, owing to the abundance and comparative cheapnes of materials and labor, consequent upon the hard times. The resul has been, that larger expenditures have been made than could the be anticipated. As most of the works are being done by contract, i was impossible to restrain the increased expenditures.

From this cause the unexpended balances that were expected to be available for the first two quarters of the next fiscal year are greatly reduced, and, in some instances entirely expended. Owing to the increased vigor in prosecuting the works, many of them will be fix ished, if the necessary appropriations are now made, before the next

meeting of Congress.

In view of these circumstances, and to avoid damages which the contractors will not fail to demand if the works are suspended, an at the same time to save the large amounts now annually paid for ren of buildings, which those in question are designed to replace, I would most respectfully recommend that Congress be requested to make the following appropriations: All designed to complete in every particular, all the buildings named except the custom-houses at New Orleans and Charleston, and the Treasury extension, of which latter the sum asked will finish the south, and a portion of the west wing.

I also subjoin estimates in gross, accompanied by others in detail of the amounts necessary to fence, grade, and furnish those building that are now completed, or that will be finished before the next meet

ing of Congress.

I have the honor to be, very respectfully, your obedient servant,

A. H. BOWMAN,

Eng., in charge Treas'y Dep't.

Hon. Howell Cobb, Secretary of the Treasury.

Appropriations necessary to continue the following works during the fiscal year ending June 30, 1859.

| Treasury extension | \$500,000 | 00 | |
|----------------------------------|-----------|----|----------------|

ENLARGEMENT OF CHARLESTOWN NAVY YARD.

LETTER

PROM

THE SECRETARY OF THE NAVY,

IN ANSWER TO

A resolution of the House calling for information in reference to the purchase of lands for the enlargement of the Charlestown navy yard.

MAY 12, 1858.—Referred to the Committee on Naval Affairs.

NAVY DEPARTMENT, May 8, 1858.

Sn: In compliance with the resolution of the House of Representatives of the 4th instant, I have the honor to transmit herewith opies of all communications and documents on file in this office "having reference to the propriety of the purchase of lands by the goverament of the United States for the enlargement of the Charlestown mvy yard, viz:

No. 1. Letter from Mrs. Shaw to Secretary Graham, March 24, 1852. No. 2. Letter from Bureau of Yards and Docks to Secretary Graham,

March 27, 1852.

No. 3. Letter from the Bureau of Yards and Docks to Secretary Kennedy, January 13, 1853.

No. 4. Letter from Commodore Stringham to Bureau of Yards and

Docks, November 30, 1855.

No. 5. Letter from Bureau of Yards and Docks to Commodore Stringham, December 3, 1855.

No. 6. Letter from Commodore Stringham to Bureau of Yards and

Docks, December 13, 1855.

No. 7. Letter from same to same, with papers A, B, C, April 12, 1856.

No. 8. Letter from Bureau of Yards and Docks to Commodore

Stringham, April 18, 1856.

No. 9. Extract from annual report of the Bureau of Yards and Docks to Secretary of the Navy, with estimates, November 18, 1856.

No. 10. Letter from Commodore Stringham to Bureau of Yards and Docks, October 2, 1857.

No. 11. Letter from same to same, February 8, 1858.

The letters 1, 2, and 3 relate to the purchase of land for marine barracks at the Charlestown navy yard.

I am, sir, very respectfully, your obedient servant, ISAAC TOUCEY.

Hon. James L. Orr. Speaker of the House of Representatives.

No. 1.

NEW HAVEN, CONNECTICUT, March 24, 1852.

SIR: I own about two acres of land in Charlestown, Massachusetts, and as it is situated near the navy yard, it has frequently been mentioned to me that it might be desirable for the Navy Department to purchase it as a site for a marine barrack. I now wish to dispose of the property, and am recommended by a friend to offer it to you. A plat of the lot, with the adjoining grounds, has been left with Commodore Smith, who is, I am informed, so well acquainted with everything connected with the locality, as to make it unnecessary for me to do more than to refer to him for further particulars.

I have an offer of \$25,000 for the lot, but as the offer is incumbered with inconvenient conditions, I would prefer selling to the government for \$20,000 cash, if payment is made within a reasonable time. There is \$1,200 worth of soil on the land that may be removed, and could be used in the yard, if advisable, when much has already been sold from

the same.

I am, respectfully,

MARY B. SHAW.

Hon. WM. A. GRAHAM, Secretary of the Navu.

No. 2.

BUREAU OF YARDS AND DOCKS, March 27, 1852.

SIR: The letter of Mrs. Shaw of the 24th instant, referred to this

bureau, has been received.

The chief of the bureau has the honor to state that he is well acquainted with the premises offered for sale by Mrs. Shaw, and is of opinion that it would answer for marine barracks if they are to be placed outside of the navy yard. This is the only piece of ground I know of near the yard suitable and available for that purpose. The plan of the ground left by Commander Glynn is in the bureau. There is upon this ground good soil for grading the navy yard, to the amount of perhaps \$1,200, which makes its possession very desirable.

I would, therefore, respectfully recommend that an agreement be made, conditioned upon the granting by Congress of the appropriation which has been recommended by the commanding officer of marines, if he shall advise its purchase, at the price asked by the proprietors of the land.

I have the honor to be, very respectfully, your obedient servant,

JOSEPH SMITH.

Hon. WILLIAM A. GRAHAM, Secretary of the Navy.

No. 3.

BUREAU OF YARDS AND DOCKS, January 13, 1853.

Sm: I have the honor to acknowledge the reference to this bureau of Commander J. Glynn's letter of the 12th inst., in which he again, at the request of Mrs. Mary Shaw, offers to sell to the department the piece of land she owns near the Boston navy yard.

piece of land she owns near the Boston navy yard.

The bureau, on the 27th March, 1852, on the reference of Mrs. Shaw's offer to sell the land in question, recommend the purchase of the property conditioned upon Congress making the necessary ap-

propriation.

The commanding officer of marines having strongly urged the purchase of this property, which is the only piece of ground near the navy yard suitable for marine barracks, and available for that purpose, I respectfully recommend that Congress be asked to make the necesary appropriation, and that the land be purchased upon the terms offered by Mrs. Shaw.

Commander Glynn's letter is herewith returned.

I have the honor to be, with great respect, your obedient servant,

JOSEPH SMITH.

Hon. John P. Kennedy, Secretary of the Navy.

No. 4.

NAVY YARD, BOSTON, November 30, 1855.

&R: Please find enclosed a drawing of some land adjoining the way yard, to be sold in a few days.

The situation (indicated by the red lines) is such that I should think desirable for the government to purchase it.

I am, respectfully, your obedient servant,

S. H. STRINGHAM, Commandant.

Com. Joseph Smith, Chief of Bureau of Yards and Docks, Washington. No. 5.

Bureau of Yards and Docks, December 3, 1855.

COMMODORE: Your letter of the 30th ultimo, with the tracing enclosed, has been received. The information afforded by your letter or the tracing is not sufficient to enable the bureau to present the subject to the Secretary of the Navy for his action. Be pleased to describe the land in question more fully; state the probable quantity to be sold; its value, in your judgment; the present owners, and whether to be sold at public sale or otherwise, and the price now asked.

Respectfully, your obedient servant,

JOS. SMITH.

Com S. H. STRINGHAM, Commanding Navy Yard, Boston.

No. 6.

NAVY YARD, BOSTON, December 13, 1855.

SIR: After much investigation, I am convinced that government would not be benefitted by the purchase of the land mentioned in my communication of 30th ultimo.

The title is in dispute, and the amount of land which would be

added is very small.

I am, respectfully, your obedient servant,

S. H. STRINGHAM, Commandant.

Com. Joseph Smith, Chief of Bureau of Yards and Docks, Washington.

No. 7.

United States Navy Yard, Boston, Commandant's Office, April 12, 1856.

SIR: I have the honor to enclose herewith a communication, with a plan of certain property now offered to the government; also a letter from the parties offering the same.

As this party is now individual, and not a corporation, as heretofore, and as the property is desirable for the yard, as it seems to me, I would recommend its purchase, if the price named is deemed reasonable. You are, however, better acquainted with the property and its value to the government than myself, and the question, therefore, of interest to the government can be well determined by yourself.

I am, respectfully, your obedient servant,

S. H. STRINGHAM, Commandant.

Com. Joseph Smith, Chief of Bureau of Yards and Docks, Washington, D.C.

A.

Boston, April 4, 1856.

SIR: We, the undersigned, proprietors of the wharf estate lying immediately west of the navy yard, in Charlestown, contemplate selling the property, or making very considerable alterations and improvements with a view to active mercantile pursuits.

The superficial contents are about one hundred and twenty-five thousand feet. The price we are now willing to accept is one dollar

per foot.

We understand that the project of purchasing this estate has engaged the attention of some of the officers of the United States, and we believe that the navy yard will be much benefitted by an extension of its water-line on its western front; indeed, it is perfectly obvious that the berth next our wharf cannot be conveniently used by a national ship without encroaching upon our right in a manner which has been tolerated heretofore, because the degree of annoyance was not excessive; but if we carry out our contemplated improvements, we shall be constrained to object very decidedly to a continuance of the trespass.

The price we now name is, we know, less than that paid for other wharf estates in immediate proximity; and considering the extremely limited water front now unimproved in Boston and Charlestown, on Charles river, we verily believe that this property will bring one dollar per foot at public auction. Not desiring to be ourselves the sole judges of the value, we shall be perfectly content to submit the question of price to the judgment of three or more competent and impartial men, it being understood that the price we have named is not to be made known to them, but the price they shall fix shall be substituted, whether more or less.

We desire, most respectfully, to submit that this valuable property is now sought by other parties with whom we have forborne to treat, until we know definitely whether the government will purchase it, and hence we hope that we may be favored with a reply to this proposal,

un early day.

We are, sir, your obedient servants,

C. S. DARROW, GEO. W. WHITE.

Com. S. H. Stringham, United States Navy Yard, Charlestown.

Respectfully forwarded.

S. H. STRINGHAM, Commandant. В

NAVY YARD, BOSTON, March 11, 1856.

Sis: In obedience to your order to prepare a plan showing the general dimensions of the wharf belonging to Messrs. White & Darrow, adjoining this yard, and its location with reference to the shear wharf, building slip, &c., I have the honor to submit the enclosed tracing. The portion of the yard shown upon this plan is drawn in black lines, and the property of Messrs. White & Darrow in red lines.

In addition to the local works, the plan shows the position occupied by the frigate Merrimac while receiving her mizzenmast. The plan is drawn to the scale of eighty feet to an inch.

Very respectfully, your obedient servant,

JÓS. E. BILLINGS, Civil Engineer.

Com. S. H. Stringham, Comd'g Navy Yard, Boston.

Respectfully forwarded.

S. H. STRINGHAM, Commandant.

No. 8.

Bureau of Yards and Docks, April 18, 1856.

COMMODORE: Your letter of the 12th instant has been received. There is no appropriation under which the land in question can be purchased, nor has any estimate been made for it. Nothing, therefore, can be done in the matter this year.

Respectfully, your obedient servant,

JOS. SMITH.

Com. S. H. STRINGHAM, Comd'g Navy Yard, Boston,

No. 9.

Extract from the annual report of the Chief of the Bureau of Yards and Docks, dated 18th November, 1856, explanatory of the estimates submitted for the year ending 30th June, 1858.

BOSTON NAVY YARD.

"12th. Extension of water front of yard.—The peculiar position of the property which it is proposed to purchase, renders its possession by the government extremely desirable. The direction of the line separating this property from the yard is such as to cross one of the launching slips, and passes so near the shear wharf that if the property should be improved by the proprietors in the manner they propose doing, it will seriously incommode and interrupt the operations at the principal wharf for fitting out ships. The acquisition of this property will add materially to the deep water front, where accommodations are much needed and are at present very contracted. An appropriation for this object is strongly urged."

Amount estimated for the purchase of water front, \$80,000.

No. 10.

NAVY YARD, BOSTON, Commandant's Office, October 2, 1857.

Sin: I herewith enclose a plan of the estate adjoining to the navy

vard.

It will be perceived that the "Merrimac," as she lies by the shear wharf, projects nearly by one-half her length beyond the limits belonging to the United States; and before the "Roanoke" was taken into dock, the intrusion upon private property was still greater.

I am, respectfully, your obedient servant,

S. H. STRINGHAM, Commandant.

Com. Jos. Smith,

Chief of Bureau of Yards and Docks, Washington.

No. 11.

NAVY YARD, BOSTON, Commandant's Office, February 8, 1858.

Six: I enclose herewith a copy of a communication, of this month's date, from the owners of the wharf estate adjoining that of the navy yard.

By reference to a former communication upon this subject, it will be seen from the accompanying plan that the "Merrimac" protruded slightly beyond the limits of the government property, but it was by the consent of the proprietors given to me.

The various communications received by me upon the subject have

been forwarded to the bureau, in substance.

Respectfully, your obedient servant,
S. H. STRINGHAM,
Commandant.

Com. Jos. SMITH, Chief of Bureau of Yards and Docks. D.

CHARLESTOWN, February, 1858.

SIR: Understanding that the Secretary of the Navy has not submitted to Congress, at the present session, an estimate of the expenses of enlarging the navy yard at Charlestown, now under your command, we feel constrained to address you again with reference to our wharf estate.

We have many times remonstrated against the occupancy of our property by the government, and very frequently intimated our desire to be justly compensated for the innovation on our rights, to which we have reluctantly submitted; but knowing well that every officer of the government, who has become cognizant of the precise facts, has been convinced that the public interest demanded the annexation of our estate to the navy yard, we have forborne to make that strenuous opposition to the infringement of our right which we might have done, in the hope and expectation that a purchase of the property by the United States would supersede any action of the kind. The probability of such a consummation being now postponed indefinitely, we respectfully protest against the further use of the space belonging to us by the vessels of the government; and we beg leave to urge upon your attention the justice of our claim to compensation for the past, and a suitable arrangement for the future pay, if the trespass is continued.

We also avail ourselves of this occasion to notify the government, through yourself, as commander of the yard, that we propose to make such use of our wharf property during the approaching season as will utterly preclude our sparing space for the accommodation of the public ships, as we have heretofore done.

Very respectfully, your obedient servants,

CHAS. S. DARROW, GEO. W. WHITE.

Commodore S. H. STRINGHAM.

LETTER

FROM

THE SECRETARY OF THE INTERIOR,

COMMUNICATING

Estimates for clerk hire, office rent, &c., &c.

MAY 12, 1858.—Referred to the Committee of Ways and Means.

GENERAL LAND OFFICE, May 10, 1858.

SIR: I have the honor to submit the following as an estimate of the amount which will be required under the seventh section of the act of 18th August, 1856, (Session Laws, page 91,) for "such reasonable compensation for additional clerical services and extraordinary expenses incident to said offices" as the Secretary of the Interior shall deem just and proper.

"For clerk hire, office rent, fuel and lights at the several district land offices of the land States and Territories, to be apportioned in such manner as in the judgment of the Secretary of the Interior the

public interest may require, \$134,440."

In explanation of the estimate for California and Oregon, I have to state, that in California an allowance has heretofore been made, on account of the impossibility of obtaining offices there at any reasonable rent, and the amount has been paid out of the appropriation for incidental expenses of the district land offices; and in Oregon the allowance is made under the sixth section of the act of 17th July, 1854; but as there were balances on hand which were deemed sufficient for the usual purposes and expenses of the district offices, the general estimate submitted in letter of 25th September did not include any appropriations for expenses of depositing or incidental expenses of those offices.

In the estimate for California and Oregon it was not designed to appropriate to this purpose the whole amount asked for, unless it should be absolutely necessary, and in case of a balance to apportion it amongst other districts in which the appropriation upon our estimate should fall short of the actual amount required for office rent, which was in many cases inserted here without such data as would

enable us with certainty to determine in advance the precise amount that would actually be required. The matter of rent is here regarded as cognizable under the broad terms of the statute requirements, especially in view of the fact that years ago this office had recommended an allowance for rent so as to give the department control, to some extent, at least, in requiring that the archives be kept in safe places.

With great respect,

THOS. H. HENDRICKS,

Commissioner.

Hon. J. Thompson, Secretary of the Interior.

> DEPARTMENT OF THE INTERIOR, Washington, May 10, 1858.

SIR: I have the honor herewith to submit the estimate by the Commissioner of the General Land Office of an appropriation which will be required during the fiscal year ending the 30th June, 1859, to enable the Secretary of the Interior to carry into effect the seventh section of the act of Congress approved August 18, 1856, entitled "An act making appropriations for certain civil expenses of the government," &c., and respectfully recommend that the appropriation be made as follows, viz:

For clerk hire, office rent, fuel and lights at the several district land offices of the land States and Territories, under the seventh section of the act of Congress of August 18, 1856, to be apportioned in such manner as the judgment of the Secretary of the Interior may

require, \$134,440.

Very respectfully, your obedient servant,

J. THOMPSON, Secretary.

Hon. Jas. L. Orr, Speaker of the United States House of Representatives.

CLAIMS FOR INDIAN DEPREDATIONS IN NEW MEXICO.

LETTER

FROM THE

SECRETARY OF THE INTERIOR,

TRANSMITTING

A report upon claims for depredations by Indians in New Mexico.

MAY 12, 1858.—Referred to the Committee on Indian Affairs,

DEPARTMENT OF THE INTERIOR, May 11, 1858.

SE: I have the honor to submit herewith, as directed by the sixth section of the act "making appropriations for the current and contingent expenses of the Indian department, and for fulfilling treaty stipulations with various Indian tribes, for the year ending June 30, one thousand eight hundred and fifty-seven," approved August 18, 1856, a report upon "claims for depredations by Indians in the Territory of New Mexico, heretofore made and filed in this department."

These claims were investigated under instructions from my predecessor, Hon. R. McClelland, by the late Commissioner of Indian Affairs, but his report was not submitted to this department until the 2d of March, 1857, too late for transmission to the last Congress. The whole subject was subsequently referred, for re-examination, to the Commissioner of Indian Affairs, who, on the 21st ultimo, submitted a report, a copy of which is herewith enclosed, concurring in the conclusions of Mr. Manypenny's report, but suggesting, for reasons therein set forth, the propriety of appointing a commission to examine and adjudicate these claims.

It will be obvious, I think, upon an examination of the abstracts of the evidence heretofore filed in these claims, that this department is not in possession of the information essential to an intelligent decision upon their merits. The testimony is not only meagre in substance and irregular in form, but is presented under such circumstances to leave the department entirely without the means of judging what weight should be attached to the statements of the witnesses. In view of these facts, and of the large amount that will be required

to satisfy these claims, should Congress feel called upon to pay them, I am of the opinion that a commission should be sent out to investigate them. Should this be done it would be desirable that Congress should prescribe such rules for taking testimony as might appear to be necessary to prevent frauds upon the government.

In conclusion, I would state that the claims, so far presented and examined, amount to five hundred and two thousand, nine hundred and eighty-six dollars and sixty-eight cents, but the department is informally advised that claims to a much larger amount will eventually

be presented.

With great respect, your obedient servant,

J. THOMPSON, Secretary.

Hon. James L. Orr, Speaker of the House of Representatives.

> DEPARTMENT OF THE INTERIOR, Office Indian Affairs, April 21, 1858.

SIR: In obedience to your directions of the 25th of July last, I have caused a re-examination to be made of the depredation claims of citizens of New Mexico, which were sent up to your predecessor by Colonel Manypenny on the 2d of March, 1857, with a report, and I have now the honor to report that the examination then made seems to have been a thorough and careful one, and I see no reason why any changes in

the conclusions arrived at by him should be made.

In this connexion I would avail myself of the opportunity to remark that these matters can never, in my opinion, be adjusted in a manner securing justice to the claimants and preventing fraud upon the government without the intervention of a commission; and would, therefore, most respectfully suggest for your consideration whether it would not be advisable and proper to recommend to Congress such a course, whereby the parties giving evidence may be brought in immediate contact with the commissioners, and they be thus enabled to decide what weight should be attached to their statements, as well as have the various other advantages, which will readily occur to your mind, of being enabled, from being in person present, to arrive at correct decisions.

The papers submitted by you are herewith returned.

Very respectfully, your obedient servant,

CHARLES E. MIX,

Acting Commissioner.

Hon. J. THOMPSON, Secretary of the Interior.

INDEX TO BRIEFS OF CLAIMS.

DEPARTMENT OF THE INTERIOR, Office Indian Affairs, March 2, 1857.

SIR: In obedience to your verbal directions, I have the honor to transmit herewith for your action, as contemplated by the 6th section of the act of Congress, approved August 18, 1856, sundry claims heretofore filed in the department, for alleged depredations by Indians in the Territory of New Mexico.

The number of claims is 244, which I have arranged in three classes

as follows:

Class No. 1, containing 121 claims, and amounting in the aggregate to the sum of \$304,221.

Class No. 2, containing 88 claims, and amounting in the aggregate

to the sum of \$139,652 50.

Class No. 3, containing 35 claims, and amounting in the aggregate to the sum of \$59,113 18.

Each class is accompanied with a statement of the nature of every

claim, and an abstract of the testimony filed in support of it.

The claims in the first class are all barred by the statute, not having been filed within three years after the alleged depredation was committed; the claims in the second class are not shown to have been committed by Indians in amity with the United States, or upon parties lawfully in the Indian country, and do not, therefore, come within the provisions of the intercourse act; the claims of the third class are apparently within the provisions of that act, but it is to be observed that the testimony in relation to them, as well as that relating to the claims embraced in the other classes, is all of an ex parte character, the claimants very frequently testifying the one for the other, and the parties being wholly unknown, it is impossible to express an intelligent opinion as to the degree of credibility to be attached to the proofs submitted.

Very respectfully, your obedient servant,
GEO. W. MANYPENNY, Commissioner.

Hon. R. McCLELLAND, Secretary of the Interior.

CLASS No. 1.

The 17th section of the Intercourse Act of 1834 provides that claims for indemnity for depredations alleged to have been committed by Indians in amity with the United States shall be presented within three years after the commission of the offence; otherwise the same shall be barred.

The following claims, embraced in class No. 1, have not been presented within said time:

1. NAZARIO LUCERO.

Claims indemnity for three mules, valued at \$180 in the aggregate, alleged to have been taken by a party of Gila-Apache Indians, on the 26th of March, 1851. The affidavit of Bernardo Chavis confirms the statements of the claimant in regard to the loss of the property by the hands of the Indians—papers presented on the 23d of August, 1854, and this claim is therefore barred by the limitation of the statute of 1834. No conventional arrangements were made with said Indians at the date of the alleged depredations.

2. JULIAN LUCERO.

Claims indemnity for 36 oxen, valued at \$720 in the aggregate, alleged to have been stolen by a party of Apache Indians on the 7th of July, 1849. The affidavit of Juan Antonio Fajardo confirms the statement of the claimant in regard to the loss of the property by the lands of the Indians—papers presented on the 23d of August, 1854, and is therefore barred by the limitation of the statute of 1834. No conventional arrangements were made with said Indians at the date of the alleged depredations.

3. Joses de Jesus Lugan.

Claims indemnity for property stolen, consisting of three thousand theep, one mule, one mare, two jackasses, and one rifle, valued at \$7,582 in the aggregate, alleged to have been stolen by a party of Navajoe Indians, in March, 1849. The affidavits of Jesus Garcia and Vicente Lopez confirm the statements of the claimant in regard to the loss of the property by the hands of the Indians—papers presented on the 30th of December, 1854, and this claim is therefore barred by the limitation of the statute of 1854. No conventional arrangements were made with said Indians at the date of the alleged depredations.

4. Francisco Thomas Baco, administrator of Domengo Baco, deceased.

Claims indemnity for two mules valued at \$300 in the aggregate, alleged to have been stolen by a party of Navajoe Indians on the 25th March, 1851. The affidavit of Antonio Andres Gonzales confirms the statement of the claimant in regard to the loss of the property by the hands of the Indians—papers presented on the 13th of October, 1854, and this claim is therefore barred by the limitation of the statute of 1834. Conventional arrangements were made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

5. Antonio Matias Ortiz.

Claims indemnity for six thousand two hundred and thirty sheep, two mares, and one mule, valued at \$15,675 in the aggregate, alleged

to have been stolen by a party of Mescalero Apache Indians, on the 14th of December, 1849. The affidavits of Vincente Lopez and Carlos Griego confirm the statements of the claimant in regard to the loss of the property by the hands of the Indians—papers presented on the 30th of December, 1854, and this claim is therefore barred by the limitation of the statute of 1834. No conventional arrangements were made with said Indians at the date of the alleged depredations.

6. HOBAN ROMERO.

Claims indemnity for two mules, two horses, and one mare, valued at \$450 in the aggregate, alleged to have been stolen by a party of Cheyenne Indians, on the 15th of February, 1852. The affidavits of Loretto Chavez and Carpeo Martin confirm the statements of the claimant in regard to the loss of the property by the hands of the Indians—papers presented on the 28th July, 1855, and this claim is therefore barred by the limitation of the statute of 1834. Conventional arrangements were made with these Indians on the 17th September, 1851, but annuities of provisions, goods, &c., not applicable to the payment of claims.

7. JUAN IGNACIO MARTIN.

Claims indemnity for eight mules and one horse, valued at \$780 in the aggregate, alleged to have been stolen by a party of Jiccarilla Apache Indians on the 12th of September, 1851, and on the 15th of July, 1854. The affidavits of Horace Long Tranquiline Gallegos and Manuel Gregorio Gomes confirm the statements of the claimant in regard to the loss of the property by the hands of the Indians—papers presented on the 20th of December, 1854. Part of the claim is barred by the limitation of the statute of 1834, and, in the opinion of Governor Merewether, these Indians occupied a hostile attitude at the date of the alleged depredations. Conventional arrangements of amity were made with the Apache nation in 1852, but giving no annuities; another was made with the Jiccarillas in September, 1855—not yet ratified.

8. Enacio Ruis.

Claims indemnity for one horse, valued at \$50, alleged to have been stolen by a party of Apache Indians on the 15th of February, 1849. The affidavit of José Rafael Candelaino confirms the statement in regard to the loss of the property by the hands of the Indians—papers presented on the 16th of August, 1854, and this claim is therefore barred by the limitation of the statute of 1834. No conventional arrangements were made with said Indians at the date of the alleged depredations.

9. MANUEL ANTONIO ROMERO.

Claims indemnity for one mule, valued at \$80, alleged to have been stolen by a party of Apache Indians, on the 15th of February, 1849.

The affidavit of Ignacio Kiviz confirms the statement of the claimant in regard to the loss of the property by the hands of the Indians—paper presented on the 16th of August, 1854, and this claim is therefore barred by the limitation of the statutes of 1834. No conventional arrangements were made with said Indians at the date of the alleged depredations.

10. José Maria Gonzales.

Claims indemnity for one horse and articles of personal property, valued at \$108 in the aggregate, alleged to have been stolen by a party of Apache Indians, on the 10th of December, 1849. The affidavit of José Romero confirms the statement of the claimant in regard to the loss of property by the hands of the Indians—paper presented on the 19th of July, 1854, this claim is therefore barred by the limitation of the statute of 1834. No conventional arrangements were made with said Indians at the date of the alleged depredations.

11. Bernardo Chavis.

Claims indemnity for three mules and six horses, valued at \$540 in the aggregate, alleged to have been stolen by a party of Gila Apache Indians, on the 26th of March, 1851. The affidavit of Nasario Lucero confirms the statement of the claimant in regard to the loss of the property by the hands of the Indians—papers presented on the 23d of August, 1854, and this claim is barred by the limitation of the statute of 1834. No conventional arrangements were made with said Indians at the date of the alleged depredations.

12. JOHN JOSEPH COPONLARA.

Claims indemnity for seventy-two mules and five horses, valued at \$6,510 in the aggregate, alleged to have been stolen by a party of Apache Indians, in November, 1847. The affidavits of Tiburcio Hernandez and Esteban Tenori, in confirmation of the statement of the claimant, except as to the value of the property—papers presented on the 27th of August, 1854, and this claim is therefore barred by the limitation of the statute of 1834. No conventional arrangements were made with said Indians at the date of the alleged depredations.

JAMES H. QUINN AND LUCIAN B. MAXWELL.

Claim indemnity for thirty mules, fifty horses, and six hundred buckskins, valued at \$7,200 in the aggregate, alleged to have been stolen by a party of Jiccarilla Apache Indians, on the 12th of June, 1848. The affidavits of Peter Joseph and Faustin Truhill, in confirmation of the statements of the claimant—papers presented on the 10th of March, 1854, and this claim is therefore barred by the limitation of the statute of 1834. No conventional arrangements were made with said Indians at the date of the alleged depredations.

14. CHARLES S. RUMLEY.

Claims indemnity for five yoke of cattle, three horses, and other articles of personal property, valued at \$4,788 50 in the aggregate, alleged to have been stolen by a party of Navajoe Indians in the month of August, 1851. The affidavits of Henry L. Dodge and Charles H. James, in confirmation of the statements of the claimant—paper presented on the 6th of December, 1854, and this claim is therefore barred by the limitation of the statute of 1834. Conventional arrangements of amity existed at the time of the depredations, but no annuities were provided thereby.

15. HENRY CONNELLY.

Claims indemnity for eighty-five mules, valued at \$6,800 in the aggregate, alleged to have been stolen by a party of Jiccarilla Apache Indians in the month of July, 1850. The affidavit of Edward F. Mitchell, in confirmation of the statements of the claimant—papers presented on the 27th of February, 1854, and this claim is therefore barred by the limitation of the statute of 1834. No conventional arrangements were made with said Indians at the date of the alleged depredations.

16. A. B. ROHMANN.

Claims indemnity for thirty-five mules, valued at \$2,625 in the aggregate, alleged to have been stolen by a party of Mescalero Apache Indians in July, 1848. The affidavit of José Maria Bostales and Pablo Melenare, in confirmation of the statements of the claimant—papers presented on the 29th of December, 1856, and this claim is therefore barred by the limitation of the statute of 1834. No conventional arrangements were made with said Indians at the date of the alleged depredations.

17. RAPARL LEMA.

Claims indemnity for two hundred sheep, valued at \$500 in the aggregate, alleged to have been stolen by a party of Navajoe Indians on the 24th of December, 1848. The affidavit of Ramon Chaves, in confirmation of the statements of the claimant—papers presented on the 23d of August, 1854, and this claim is therefore barred by the limitation of the statute of 1834. No treaty was made with the said Indians at the date of the alleged depredations.

18. PRDRO TONES.

Claims indemnity for one mule and eleven horses, valued at \$600 in the aggregate, alleged to have been stolen by a party of Navajoe Indians on the 18th of March, 1848. The affidavit of Florentine Castillo, in confirmation of the statements of the claimant—papers pre-

sented on the 13th of June, 1854, and this claim is therefore barred by the limitation of the statute of 1834. No conventional arrangements were made with said Indians at the date of the alleged depredations.

19. Thomas Biggs.

Claims indemnity for one hundred and ten mules, valued at \$7,150 in the aggregate, alleged to have been stolen by a party of Navajoe Indians on the 20th of June, 1847. The affidavits of Ramon Martenes and Preston Beck, in confirmation of the statements of the claimant—papers presented on the 13th of June, 1854, and this claim is therefore barred by the limitation of the statutes of 1834. No conventional arrangements were made with said Indians at the date of the alleged depredations.

20. JUAN PUBLO GUTARES.

Claims indemnity for three horses, ten cows, and two oxen, valued at \$600 in the aggregate, alleged to have been stolen by a party of Navajoe Indians on the 18th of January, 1847. The affidavit of Ambrosic Garcia, in confirmation of the claimant's statements—papers presented on the 16th August, 1854, and this claim is therefore barred by the limitation of the statutes of 1834. No conventional arrangements were made with said Indians at the date of the alleged depredations.

21. José Tenorio.

Claims indemnity for thirty-one head of cattle, valued at \$600 in the aggregate, alleged to have been stolen by a party of Navajoe Indians on the 14th of January, 1851. The affidavit of Francisco Gutreres and Juan Christobal Chaves, in confirmation of the statements of the claimant—papers presented on the 12th of August, 1854, and this claim is therefore barred by the limitation of the statute of 1834. Conventional arrangements were made with said Indians at the date of the alleged depredations, but no annuities were Provided thereby.

22. Julien Lucero.

Claims indemnity for five head of cattle and one horse, valued at 168 in the aggregate, alleged to have been stolen by a party of Navalue Indians on the 15th of August, 1847. The affidavit of José Luna, confirmation of the statements of the claimant—papers presented on the 23d of August, 1854, and this claim is therefore barred by the limitation of the statute of 1834. No conventional arrangements were made with said Indians at the date of the alleged depredations.

23. VINCENTE JARAMILLO.

Claims indemnity for nine mules and two horses, valued at \$795 in the aggregate, alleged to have been stolen by a party of Navajoe In-

dians on the 15th of February, 1847. The affidavit of Jesus Abato, in confirmation of the statements of the claimant—papers presented on the 22d of July, 1854, and this claim is therefore barred by the limitation of the statute of 1834. No conventional arrangements were made with said Indians at the date of the alleged depredations.

24. VINCENTE JARAMILLO.

Claims indemnity for four hundred sheep, valued at \$800 in the aggregate, alleged to have been stolen by a party of Navajoe Indians, on the 15th of March, 1852. Claims indemnity for six mules, valued at \$100 each; one horse, at \$100, and one ox, at \$20, amounting in the aggregate to \$720, alleged to have been stolen by a party of Jiccarillo Apache Indians on the 25th of August, 1854. The affidavits of Manuel Martine, and Manuel Antonio Mestas, in confirmation of the statements of the claimant—papers presented on the 28th December, 1854. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

43. MANUEL CHAVIS.

Claims indemnity for seven head of oxen, valued at \$350, and two horses, at \$80, amounting in the aggregate to \$430, alleged to have been stolen by a party of Apache Indians in the year 1852. The affidavits of José Telles, Pablo Melendiez, and José Yres Garcia, in contradiction of the statements of the claimant—papers presented on the 27th of June, 1855. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

44. José Maria Roderques.

Claims indemnity for one yoke of oxen, at \$60, and 5 head of oxen, at \$30 each, amounting in the aggregate to \$210, alleged to have been stolen by a party of Apache Indians in the years 1852 and 1854. The affidavits of Manuel Chavis and José Telles are not conclusive in regard to the identity of the Indians, as they did not know them—papers presented on the 27th of June, 1855 A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

45. PABLO MALENDEZ.

Claims indemnity for one mare and colt, valued at \$60, alleged to have been stolen by a party of Apache Indians in the year 1852. The affidavits of José Maria Roderques and Manuel Chavis are unsatisfactory and inconclusive—papers presented on the 27th June, 1855. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuits were provided thereby.

46. José Telles.

Claims indemnity for one horse, valued at \$35, alleged to have been stolen by a party of Apache Indians in the summer of 1852. The affidavits of José Yres Garcia and Francisco Parea are unsatisfactory and inconclusive—papers presented on the 27th of June, 1855. A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

47. José Telles.

Claims indemnity for one mare and colt, valued at \$55, alleged to have been stolen by a party of Apache Indians in the year 1853. The affidavits of José Yres Garcia and Juan Carrera in contradiction of the statements of the claimant in regard to the time of the commission of the injury; the claimant says it was in 1853, and the affidavits that it was in 1852—papers presented on the 27th of June, 1855. A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

48. José Yres Garcia.

Claims indemnity for two horses, valued at \$35 each, amounting in the aggregate to \$70, alleged to have been stolen by a party of Apache Indians in the years 1852 and 1854. The affidavits of Juan José Carrera and Manuel Chavis are not deemed conclusive, as they do not clearly identify the Indians—papers presented on the 27th of June, 1855. A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

49. Juan José Carrera.

Claims indemnity for one horse, valued at \$50, alleged to have been stolen by a party of Apache Indians in the year 1852. The affidavits of José Telles and José Yres Garcia are not deemed conclusive—papers presented on the 27th June, 1855. A treaty of amity was made with the Apaches at the date of the alleged depredation, but no annuities were provided thereby.

50. Francisco Parea.

Claims indemnity for two yoke of oxen, valued at \$50 per yoke, amounting in the aggregate to \$100, alleged to have been stolen by a party of Apache Indians in the year 1852. The affidavits of José Telles and José Yres Garcia are not deemed conclusive—papers presented on the 27th June, 1855. A treaty of amity was concluded with said Indians at the date of the alleged depredation, but no annuities were were provided thereby.

It will be perceived that the claims, numbered 43 and 50 inclusive, rest upon the testimony of the claimants alone, who exchange their evidence so as to become witnesses for and in behalf of each other.

51. Antonio Constante.

Claims indemnity for property, consisting of ninety-six oxen, two horses, eight wagons, a bill of merchandize, cooking utensils, &c., valued at \$7,418 in the aggregate, alleged to have been stolen by a party of Apache Indians on the 28th of January, 1852. The affidavits of Julian Medina, José Manuel Vigil, José Gregora Martin, and Juan Bte. Frangillo, in confirmation of the statements of the claimant—papers presented on the 26th of September, 1855. A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

67. Francisco Lopez.

Claims indemnity for 4 oxen, valued at \$30 each, and 14 cows, at \$25 each, amounting in the aggregate to \$470, alleged to have been stolen by a party of Jiccarilla Apaches on the 19th of November, 1854. The affidavits of Francisco Urioste and José Dolores Archuleta, in confirmation of the statements of the claimant—papers presented

H. Ex. Doc. 123—4

on the 10th of February, 1855. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

68. MESSRS. MAJORS & RUSSEL, (by agent.)

Claim indemnity for two hundred and forty-nine head of cattle, valued at \$40 per head, amounting to \$9,960, alleged to have been stolen by a party of Mescalero Apaches on the 9th of December, 1854. The affidavits of William B. Tipton, Thomas F. Tipton, Robert Williams, Leonardo Lopez, R. Raymond, and John Bentley, are contradictory; someof the affiants state that the depredation was committed on the 8th, and others that it occurred on the 9th of December, 1854—papers presented on the 26th of January, 1855. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

69. José Dolores Fernandez.

Claims indemnity for seven cows, valued at \$25 each, and three bulls, at \$15 each, amounting in the aggregate to \$220, alleged to have been stolen by a party of Jiccarilla Apaches on the 16th of May, 1855. The affidavits of Felipe Garcia and Juan Domingo Sanches, in confirmation of the statements of the claimant—papers presented on the 3d of June, 1855. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

70. Antonio José Garcia.

Claims indemnity for eight head of cattle, valued at \$25 per head, amounting to \$200, alleged to have been stolen by a party of Gila Apaches on the 7th of February, 1853. The affidavits of Carmen Garcia and Francisco Esteban Lencero, in confirmation of the statements of the claimant—papers presented on the 23d of August, 1854. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

71. TIMOTHY McGOWAN.

Claims indemity for a large amount of corn, fodder, tobacco, &c., making in the aggregate the sum of \$10,755, alleged to have been stolen by a party of Gila Apaches in the year 1853. No evidence has been offered in support of this claim, and the statements of the claimant are contradicted by Governor Merriwether from facts within his personal knowledge—papers presented on the 16th May, 1855. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

72. DIEGO BACA.

Claims indemnity for two horses, valued at \$75 each, and three mules, at \$100 each, amounting in the aggregate to \$450, alleged to have been stolen by a party of Apache Indians on the 10th of July, 1854, and the 19th of July, 1853. The affidavits of Oliver P. Hovey, Ramond Garcia, and Ronaldo Baca contradict the statements of the claimant—papers presented on the 17th of August, 1854. A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

73. MAJOR G. MORRIS.

Claims indemnity for two mules and one cow, valued at \$175, alleged to have been stolen by a party of Apache Indians, on the 22d of September and the 4th of October, and on the 29th of September, 1852. The affidavit of Albino Lopez, in confirmation of the statements of the claimant—papers presented on the 5th of April, 1853. A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

74. MAJOR J. B. RICHARDSON.

Claims indemnity for two horses, valued at \$80 each; two horses, at \$75 each; and one mule, at \$90, amounting in the aggregate to \$400, alleged to have been stolen by a party of Apache Indians on the 7th of February, the 8th of September, and the 1st of November, 1852. The affidavits of John Ward and Thomas Burke, in support of the claim—papers presented on the 3d of August, 1853. A treaty of amity was concluded with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

75. HUGH STEVENSON.

Claims indemnity for fifteen oxen, valued at \$40 each, one horse, at \$100, and one mule, at \$80, amounting in the aggregate to \$780, alleged to have been stolen by a party of Apache Indians on the 7th of February, 1852. The affidavits of Thomas Burke and John Ward, in support of the claim—papers presented on the 3d of August, 1853. No conventional arrangements were concluded with said Indians at the date of the alleged depredations.

76. SAMUEL RHINE, FOR RHINE & BROTHERS.

Claims indemnity for one hundred and seventy-five head of cattle, twenty-nine horses, four mules, thirteen guns, thirteen saddles, bridles, &c., and nineteen pistols, amounting in value to \$10,058 in the aggregate, alleged to have been stolen by a party of Apache Indians on the 3d August, 1853. The affidavits of James H. West and William S. Speid confirm the statements of the claimant, and also the affidavit

of James Earp, (who was one of the party that went to rescue the property from the Indians,) is confirmatory; M. Steck (Indian agent) states that he arrested (at or about that time) some chiefs of said tribe, who acknowledged that their people had been concerned in said robbery—papers presented 15th December, 1853. Conventional arrangements were made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

77. JULIAN LUCERO.

Claims indemnity for twenty cows, valued at \$30 each; six hundred and twenty-two sheep, at \$250 each; thirty goats, at \$2 each; seven mules, at \$100 each, and three horses, at \$60 each, amounting in the aggregate to \$3,095, alleged to have been stolen by parties of Jiccarilla Apache Indians and Utah Indians on the 15th September, 6th February, 1855, and 24th February, 1855. The affidavits of Juan Benito Valdez and Jesus Sanches partly confirm the statements of the claimant—papers presented on the 26th September, 1855. Conventional arrangements were made with the said Indians, at the date of the alleged depredations, but no annuities were provided thereby.

78. JOSÉ BENITA MARTINEZ.

Claims indemnity for eleven horses, valued at \$50 each; one horse worth \$100; and eight mules, at \$100, amounting to \$1,450, alleged to have been stolen by a party of Jiccarilla Apache Indians in April, 1855. The affidavits of José Manuel Vigil and Francisco Gallegos confirm the statements of the claimant—papers presented on the 26th September, 1855. Conventional arrangements were made with said Indians at the time of the alleged depredations, but no annuities were provided thereby.

79. PABLO BACCA AND OTHERS.

Claim indemnity for twenty-five horses, at \$70 each, and seven mules, at \$75 each, amounting to \$2,275 in the aggregate, alleged to have been stolen in July, 1852, by a party of Jiccarilla Apache Indians. The affidavits of José Inasis Sandoval, José Jesus Aragon, and Francisco Simeros, in support of this claim. Conventional arrangements were made with said Indians at the date of the alleged depredations, but no annuities were provided thereby. Papers presented on the 25th January, 1855.

80. HOPPIN & HUBBELL.

Claim indemnity for twenty-seven mules and two horses, valued at \$3,500 in the aggregate, alleged to have been stolen by a party of Gila Apache Indians on the 12th of August, 1852. The affidavits of Henry Skillman, Maxmillian Ponce, John R. Talles, Louis Bartels, and T. McGowan, confirm the statements of the claimants—papers

presented on the 20th of September, 1852. Conventional arrangements were made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

81. JOHN PETERS.

Claims indemnity for one horse and one mule valued, at \$130 in the aggregate, alleged to have been stolen by a party of Jiccarilla Apache Indians on the 20th of July, 1853. No evidence to substantiate the statements of the claimant—papers presented on the 30th of July, 1853. A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

82. ALEXANDER VALLE.

Claims indemnity for five horses, valued at \$415 in the aggregate, alleged to have been stolen by a party of Jiccarilla Apache Indians on the 22d of July, 1853. No evidence to substantiate the statements of the claimant. This claim was presented on the 28th July, 1853. A treaty of amity was made with said Indians at the date of the aleged depredation, but no annuities were provided thereby.

83. José Anto Lena.

Claims indemnity for six horses, valued at \$170 in the aggregate, alleged to have been stolen by a party of Jiccarilla Apache Indians on the 22d July, 1853. No evidence to substantiate the statements of the claimant. Claim presented on the 28th of July, 1853. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

84. José Gonzales.

Claims indemnity for two horses, valued at \$65 in the aggregate, alleged to have been stolen by a party of Jiccarilla Apache Indians on the 20th of May, 1853. No evidence to substantiate the statements of the claimant. This claim was presented on the 13th of June, 1853. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

85. MANUEL CHAVIS.

Claims indemnity for four horses and three mules, valued at \$600 in the aggregate, alleged to have been stolen by a party of Jiccarilla Apache Indians on the 5th of May, 1853. No evidence has been presented in support of this claim—papers presented on the 19th of May, 1853. A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

86. JUAN DOMINGO VALDEZ.

Claims indemnity for two mules and other articles of personal property, valued at \$132, alleged to have been stolen by a party of Jiccarilla Apache Indians on the 27th of October, 1854. The affidavits of Lorenzo Valdez and Gabriel Valdez, in confirmation of the statements of the claimant. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

87. LACOME & BROTHER.

Claim indemnity for bill of merchandise, amounting to \$692, alleged to have been stolen by a party of Utah Indians on the 25th July, 1850. The affidavit of Z. Baptiste Lacome, in confirmation of the statements of the claimant—papers presented on the 30th of August, 1850. Conventional arrangements were made with said Indians at the date of the alleged depredation, but no annuities provided thereby.

88. JOSÉ ALBINO BACA.

Claims indemnity for sixty-five mules, valued at \$5,200 in the aggregate, alleged to have been stolen by a party of Navajoe Indians on the 22d of November, 1851. No evidence to substantiate the statements of the claimant—papers presented on the 5th of December, 1851. Conventional arrangements were made with said Indians at the date of the alleged depredation, but no annuities provided thereby.

CLASS No. 3.

The 17th section of the intercourse act of 1834 provides that claims for depredations committed upon the property of citizens of the United States, under certain restrictions, by Indians in amity with the United States, shall be paid.

The following claims, embraced in Class No. 3, apparently come

within the provisions of said act:

1. Antonio Sandoval.

Claims indemnity for two thousand six hundred head of sheep, valued at \$2 50 per head, amounting to \$6,500, alleged to have been stolen by a party of Navajoe Indians on the 10th of December, 1850. The affidavit of Jesus Baca, in confirmation of the statements of the claimant—papers presented on the 7th of October, 1853.

This claim apparently conforms to the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided

therehv

2. JOHN M. FRANCISCO.

Claims indemnity for merchandise, valued at \$199, alleged to have been stolen by a party of Utah Indians on the 14th of October, 1852. The affidavit of William L. Proffitt, in confirmation of the statements of the claimant—papers presented on the 21st of November, 1853.

This claim apparently conforms to the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

3. JESUS MARIA SANCHEZ.

Claims indemnity for six mares, valued at \$180, alleged to have been stolen by a party of Utahs, on the 2d February, 1854. Juan Benito Valdez confirms, by affidavit, said statement of claimant papers presented October 21, 1854.

This claim apparently comes within the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

4. FELIZ PEDILLA.

Claims indemnity for four mules, three horses, &c., worth, in all, \$73, alleged to have been stolen from him by a party of Cheyenne Indians on the 15th of February, 1854. Petition supported by the affdavit of Juan Antonio Duran and Rafael Romero.

This claim apparently comes within the provisions of the intercourse act of 1834. Papers presented on the 26th September, 1855. Conrentional arrangements were made with said Indians at the date of the alleged depredation, but the annuities provided thereby, being of goods, provisions, &c., not of money, cannot be appropriated for the above object.

5. REV. JOHN LAURY.

Claims indemnity for three horses, one jack, one ox, and seven attle, all amounting to \$615, alleged to have been taken from him on 26th June, 1855, by Jiccarilla Apaches. Supported by the testimony of Rafael Vigil, Pablo Moya, and Maria Chavis—papers presented on 27th September, 1855.

This claim apparently comes within the provisions of the intercourse act of 1834. A treaty of amity was made with the Apaches at the date of the alleged depredation, but no annuities were provided thereby.

6. VINCENTE MONTOZA.

Claims indemnity for one mare and three oxen, valued at \$115, alleged to have been stolen on the 20th September, 1852, by the Navajoes. Supported by the testimony of Juan Maria Montoza and José Maria Marten—papers presented on the 24th August, 1854. Apparently this claim comes within the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

7. RAFAEL APODOCO.

Claims indemnity for loss by the Navajoes, on the 19th August, 1851, for twelve horses, two mules, and two jackasses, valued at \$800, supported by the testimony of Francisco Sandoval, alleged to have been stolen August 19, 1851, by a party of Navajoes—papers presented 7th October, 1853. This case apparently comes within the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

8. JUAN BENITO VALDEZ.

Claims indemnity for mules, horses, sheep, &c., stated in aggregate to be worth \$4,511, (though it sums up but \$4,503,) alleged to have been stolen at different periods, during the years 1852, 1853, 1854, and 1855, (a small portion not presented within three years, therefore barred.) by the Utah Indians. Supported by the testimony of Rodriguez Vigil, Felipe Archuletta, Manuel Mansananez, José Borego, Jesus Sanches, and Juan Antonio Valdez—papers presented September 26, 1855. This case apparently comes within the provisions of the intercourse act of 1834, with the exception of property to the value of \$253 50, barred by the statute of 1834. A treaty of amity was made with said Indians, but no annuities were provided thereby.

9. Jesus Maria Sanchez.

Claims indemnity for horses, sheep, &c., valued at \$3,305, alleged to have been stolen by the Utah Indians at several periods during the years 1854 and 1855, supported by the testimony of Juan Bantesto Valdez and Juan Antonio Valdez—(Gov. Merriwether remarks, "no settlement at Conegos in 1854; goats and sheep not worth \$2 50; singular, witness should have a personal knowledge of the three depredations committed at different times and places distant from each other")—papers presented September 26, 1855. This claim apparently comes within the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

10. JUAN MANUEL ORGIN.

Claims indemnity for horses, sheep, goats, &c., valued at \$1,568 50, alleged to have been stolen by the Utahs on March 16, 1855. Supported by the testimony of Juan Herrera and Juan Valdez—(Governor M. says sheep were worth but \$2)—papers presented September 26, 1855.

This claim apparently comes within the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

11. José Andres Sandoval.

Claims indemnity for one horse and one mule, valued at \$220 in the aggregate, alleged to have been stolen by a party of Navajoe Indians in the month of March, 1851—papers presented in February, 1852, supported by the testimony of José Greego, José M. Sandoval, and Vincente Romero. This claim apparently comes within the provisions of the intercourse act of 1834. Conventional arrangements were made with said Indians at the date of the alleged depredation, but no anamities were provided thereby.

12. José Antonio Montozo.

Claims indemnity for one mule, valued at \$300, said to have been stolen by a party of Navajoes on December 24, 1853. Supported by the testimony of Pedro José Martin and José Tenorio—the papers were presented in August, 1854. This claim apparently comes within the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

13. Antonio Serafin Luzero.

Claims indemnity for ten horses, seven mares, and one mule, valued at \$1,350, said to have been stolen by a party of Navajoes on 28th July, 1851. Supported by the testimony of Anastasio Luzero and Manuel Gonzales—papers presented on 4th June, 1854. This claim apparently comes within the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

14. MANUEL ROMERO.

Claims indemnity for eleven mares and three horses, valued at \$525, said to have been stolen by the Navajoes on March 25, 1852. Supported by the affidavits of Isidro Patrone and Vincente Lopez—papers presented 23d June, 1854. This claim apparently comes within the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

15. Ignatio Miera.

Claims indemnity for eleven horses and six mules, valued at \$910, and to have been stolen from him by a party of Navajoes on January 15, 1854. Supported by the affidavits of Juan Miera and José

Archiveque—papers presented 4th June, 1854. This claim apparently comes within the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

16. José Albino Baca.

Claims indemnity for fifty-seven mules, valued at \$4,275, said to have been stolen from him by a party of Navajoes on the 16th of October, 1851. Supported by the affidavits of Juan Aragon, José Tafolla, and Miguel Montoza—papers presented July 22, 1854. This claim apparently comes within the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

17. José Francisco Aragon.

Claims indemnity for one horse, valued at \$100, alleged to have been stolen by a party of Navajoe Indians in November, 1852. The affidavits of Margarite Hernandez, Cenon Torres, and Antonio Seredra confirm the statements of the claimant—papers presented on the 24th of February, 1855. This claim apparently conforms to the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

18. JUAN DE JESUS VIGIL.

Claims indemnity for twelve hundred sheep, thirty-six horses, three mules, and one rifle, valued at \$5,580 in the aggregate, alleged to have been stolen by a party of Utah and Apache Indians on the 6th and 8th of February, 1855. The affidavits of Antonio José Valdez, Francisco Valdez, and Juan Benito Valdez confirm the statements of the claimant—papers presented on the 31st of January, 1856. This claim apparently conforms to the provisions of the intercourse act of 1834. Treaties of amity were made with said tribes of Indians at the date of the alleged depredations, but no annuities were provided thereby.

19. VINCENTE MARTINEZ.

Claims indemnity for thirteen horses, valued at \$491 in the aggregate, alleged to have been stolen by a party of Utah and Jiccarilla Apache Indians on the 28th of February, 1855. The affidavits of Antonio José Garcia and Manuel Antonio Legura confirm the statements of the claimant—papers presented on the 26th of December, 1855. This claim apparently conforms to the provisions of the intercourse act of 1834. Treaties of amity were made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

20. Fd. Thomas Cabeza de Barca.

Claims indemnity for forty-two horses, seven mules, four hundred and eight sheep, and twenty-six goats, valued at \$2,695 in the aggregate, alleged to have been stolen by a party of Navajoe Indians in March, 1852 and 1853. The affidavits of José Maria Lopez, Patrine Silva, Arapito Tafolla, and Marcelon Tafolla confirm the statements of the claimant—papers presented on the 6th of July, 1854. This claim apparently conforms to the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

21. José Ruivali.

Claims indemnity for eleven cows and four oxen, valued at \$470 in the aggregate, alleged to have been stolen by a party of Navajoe Indians on the 26th of June, 1851. The affidavits of José Maria Luzero and José Maria Aragon confirm the statements of the claimant—papers presented on the 1st of June, 1854. This claim apparently conforms to the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

22. José Tenorio.

Claims indemnity for one horse, valued at \$100, alleged to have been stolen by a party of Navajoe Indians on the 24th of December, 1853. The affidavit of Pedro José Martin confirms the statements of the claimant—papers presented on the 25th of August, 1854. This claim apparently conforms to the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

23. ROMAN CHAVEZ.

Claims indemnity for three horses and one mule, valued at \$240 in solvan jo Aird v Aq usiois useq savy of passils of Tomas Gurille and Florencia de la Garca confirm the statements of the claimant—papers presented on the 25th of August, 1854. This claim apparently conforms to the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

24. ALEXANDER DUVALL.

Claims indemnity for one mule, valued at \$60, alleged to have been stolen by a party of Gila Apache Indians in February, 1855. The affidavit of Gabriel la Flour confirms the statements of the claimant, and M. Steck, the agent, certifies that some of the above tribe of

Indians stole a certain mule from near the Apache agency on the 15th February, 1855, and that they acknowledged it to be the property of the claimant—papers presented 31st July, 1855. This claim apparently conforms to the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredation, but no annuities were provided thereby.

25. LORENZO MONTANIO.

Claims indemnity for one horse, eight oxen, two mules, amounting in value to \$420 in the aggregate, alleged to have been stolen by a party of Navajoe Indians on the 29th December, 1851. The affidavit of Pedro Aranda confirms the statements of the claimant—papers presented 7th October, 1853. This claim apparently conforms to the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

26. Pedro Armijo.

Claims indemnity for two horses and one mule, valued at \$150 in the aggregate, alleged to have been stolen by a party of Navajoe Indians on the 8th September, 1851. The affidavit of Antonio José Armijo confirms the statements of the claimant—papers presented on the 7th October, 1853. The claim apparently conforms to the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

27. José Loretto Chaves.

Claims indemnity for two mules, valued at \$100; one mule at \$50, one horse, at \$60, amounting to \$310, alleged to have been stolen by a party of Cheyenne Indians on the 20th January, 1853. The affidavit of Joaquin Sandoval confirms the statements of the claimant—papers presented on the 13th February, 1855. This claim apparently conforms to the provisions of the intercourse act of 1834. Conventional arrangements were made with said Indians at the date of the alleged depredations, but the annuities provided thereby, being of goods, provisions, &c., not of money, cannot be appropriated to the above object.

28. Estabran Aragon.

Claims indemnity for eighty mares, eleven mules, and ten horses, amounting in value to \$3,370, alleged to have been stolen by a party of Navajoe Indians on the 25th July, 1851. The affidavits of Secundo Heron and Seraphine Lacers confirm the statements of the claimant—papers presented on the 4th June, 1854. This claim apparently conforms to the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

29. GUSTAVUS A. J. NORL.

Claims indemnity for three horses, one mule, sixty head of sheep, and sundry articles of merchandise, amounting in the aggregate to \$660 15, alleged to have been stolen by a party of Navajoe Indians on the 15th November, 1853. The affidavit of Romualdo Anaza confirms the statements of the claimant—papers presented on the 17th August, 1854. This claim apparently conforms to the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

30. WILLIAM KRONIG.

Claims indemnity for seven oxen, seven cows, and one calf, and seven horses and one wagon, valued at \$1,080 in the aggregate, alleged to have been stolen by a party of Utah Indians on the 24th of December, 1854, and on the 19th of January, 1855. The affidavits of Joseph J. Jenks, Lorenzo Romero, and Juan Lauto Martin, in confirmation of the statements of the claimant—papers presented on the 30th of April, 1855. This claim apparently conforms to the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

31. THOMAS LUASO.

Claims indemnity for thirty cows, nine horses, and other articles of personal property, valued at \$2,110 in the aggregate, alleged to have been stolen by a party of Utah Indians on the 19th January, 1855. The affidavits of José Marceline Bacca and A. P. Tibbitts confirm the statements of the claimant—papers presented on the 30th of April, 1855. This claim apparently conforms to the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

32. José Marcelina Bacca.

Claims indemnity for one hundred and seventeen fanegos of corn, and other articles of personal property, valued at \$1.953 50 in the aggregate, alleged to have been stolen by a party of Utah Indians on the 19th of January, 1855. The affidavits of A. P. Tibbitts and Samuel C. Harrison confirm the statements of the claimant—papers presented on the 30th April, 1855. This claim apparently conforms to the provisions of the intercourse act of 1834. (Harrison is represented to be a bad character.) A treaty of amity was made with said Indians at the date of the alleged depredations, but no a_nuities were provided thereby.

33. LEVIN MITCHELL.

Claims indemnity for forty head of cattle, valued at \$1,470 in the aggregate, alleged to have been stolen by a party of Utah Indians on the 27th of December, 1854. The affidavits of Samuel Harrison and others confirm the statements of the claimant—papers presented on the 30th April, 1855. This claim apparently conforms to the provisions of the intercourse act of 1834. (Harrison is represented to be a man of bad character.) A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

34. LUCIEN B. MAXWELL.

Claims indemnity for two thousand one hundred sheep, valued at \$8,400, alleged to have been stolen on the 2d March, 1855, by the Arapahoes. Supported by the affidavits of James H. Quinn, John Jeantel, Pedro Lama, Gourgap Paper, and Latapié Jean. Agent Carson pronounces the value put upon the sheep as not an overestimate, and vouches for the respectability of some of the witnesses.—papers presented 9th May, 1855. This claim apparently conforms to the provisions of the act of 1834. Conventional arrangements were made with said Indians at the date of the alleged depredations, but the annuities provided thereby, being in goods, provisions, &c., not of money, cannot be appropriated for the above object.

35. José Marcelino Bacca.

Claims indemnity for seventy-three head of cattle, thirteen horses, and two mules, valued at \$4,015 in the aggregate, alleged to have been stolen by a party of Utah Indians on the 25th December, 1854. The affidavits of J. W. Atwood and John Jurnagan, in support of the statements of the claimant—papers presented 18th January, 1855. This claim apparently conforms to the provisions of the intercourse act of 1834. A treaty of amity was made with said Indians at the date of the alleged depredations, but no annuities were provided thereby.

WAGON ROAD FROM FORT DEFIANCE TO THE COLORADO RIVER.

LETTER

FROM

THE SECRETARY OF WAR.

TRANSMITTING

The report of the superintendent of the wagon road from Fort Defiance to the Colorado river.

MAY 12, 1858.—Ordered to be printed.

WAR DEPARTMENT, Washington, May 10, 1858.

SIR: Referring to my letter of the 24th ultimo, in relation to the report of Edward F. Beale, esq., superintendent of the wagon road from Fort Defiance to the Colorado river, I have now the honor to transmit a copy of said report and of the accompanying map.

Very respectfully, your obedient servant,

JOHN B. FLOYD, Secretary of War.

Hon. James L. Orr, Speaker of the House of Representatives.

WASHINGTON, April 26, 1858.

Six: I have the honor to transmit herewith my daily journal of the survey made last summer and winter of a wagon road from Fort Defiance to the Colorado river or State line of California, near the 35th parallel. With this journal I send also an itinerary from Albuquerque, in New Mexico, to California. This itinerary gives distances as they exist, no air lines or imaginary curves, but every turn of our wheels recorded by the odometer attached. Latitudes and longitudes of almost all the camps are given. It is proper that I should call your attention to the fact, that to go by Fort Defiance, and thence to Zuñi, our starting point, is an unnecessary loss of time and a very great increase

of distance to no purpose. Complying with my instructions, however, I proceeded to Fort Defiance, and thence to Zuñi, but my train I sent by the direct road from the Gallo river to Zuñi, saving not less than sixty miles. Accompanying my journal is a table showing the thermometer at its highest elevation and lowest depression during the day on our outward journey in the months of September and October, and another kept on my return in January and February for the same A comparison of the two established the interesting fact, that one may travel the road in winter and summer without suffering the extremes of heat or cold. The journal which I send you is a faithful history of each day's work, written at the camp fire at the close of every day. I have not altered or changed it in any respect whatever, as I desired to speak of the country as it impressed me on the spot, so as to be as faithful in my description of it as possible. You will therefore find it very rough, but I hope those who may follow in my footsteps over the road may find it correct in every particular. have written it for the use of emigrants more than for show, and if it answers the purpose of assisting them I shall be well satisfied. have described things as I found them in the seasons in which I passed; more or less water in the summer, more or less snow in winter, may be found by those who follow me. I am not responsible for the seasons, but I am for all my statements in relation to the country over which we passed. As far as the San Francisco mountain the road needs scarcely any other improvement than a few bridges. one place alone a bridge at the Cañon Diablo would save twenty-five or thirty five miles' travel, and on the whole road its length might be shortened by subsequent explorations and by straightening elbows one hundred miles. As this will inevitably become the great emigrant road to California, as well as that by which all stock from New Mexico will reach this place, it is proper that the government should put it in such a condition as to relieve the emigrant and stock drivers of as many of the hardships incident to their business as possible. this purpose I would recommend that water dams be constructed at short intervals over the entire road. With these and a few bridges and military posts I do not doubt that the whole emigration to the Pacific coast would pursue this one line, instead of being divided and scattered over a half a dozen different routes. The advantage to the traveller, and the economy to the government of having one line instead of a dozen to protect, would fully repay all the expenses attending the construction of the road. I presume there can be no further question as to the practicability of the country near the thirty-fifth parallel for a wagon road, since Aubrey, Whipple, and myself, have all travelled it successfully with wagons, neither of us in precisely the same line, and yet through very much the same country. You will find by my journal that we encamped sometimes without wood and sometimes without water, but never without abundant grass. Starting with a drove of three hundred and fifty sheep, that number was increased by births upon the road, but not one was lost during the journey. In our first journey we groped, as it were, in the dark, and the weather being warm, did not care to leave the valleys for the wood, which is generally found on the hill-sides; and it is particularly worthy of note, that all the waters discovered were directly on the line of the road, and found almost without search and at short distances apart.

It is not to be questioned, that if so much was discovered on the first journey, a great deal more remains to be found upon a little exploration.

In preference to artesian wells, I propose to supply a deficiency of water by a system of dams across ravines and cañons, such as are used in Mexico and in portions of the State of Virginia, abundant evidences existing throughout the country that rains fall in sufficient quantities during the year to keep them full. In Mexico dams of this kind are used in the irrigation of large tracts of territory, which are dependent entirely upon this means for the supply of that element and for their crops. I cannot too urgently call your attention to this method of procuring abundant supplies of water, not only on the road to California, but on other emigrant routes where water may be scarce; it has the advantage over other artificial means of obtaining water, of returning a certainty for the expenditure of money, and of answering every purpose to be expected of wells of any kind, to say nothing of its being more economical.

In the journey of the year, during which I have been engaged upon this work, I have not lost a man, nor was there the slightest case of sickness in camp; the medicine chest proved only an incumbrance. My surgeon having left me, at the commencement of the journey, I did not employ, nor did I have need of one on the entire road. Even in midwinter, and on the most elevated portions of the road, not a tent was spread, the abundant fuel rendering them unnecessary for warmth and comfort.

I regard the establishment of a military post on the Colorado river as an indispensable necessity for the emigrant over this road; for, although the Indians, living in the rich meadow lands, are agricultural, and consequently peaceable, they are very numerous, so much so that we counted 800 men around our camp on the second day after our arrival on the banks of the river. The temptation of scattered emigrant parties with their families, and the confusion of inexperienced teamsters, rafting so wide and rapid a river with their wagons and families, would offer too strong a temptation for the Indians to withstand.

Another appropriation of \$100,000, to build bridges, cut off elbows, and to straighten the road from point to point, and make other improvements and explorations, will be required for the present year.

I feel assured that the public lands, which would be brought into the market and sold within three years after the opening of this road, will repay four-fold the appropriation asked.

I have the honor to be, very respectfully, your obedient servant,

E. F. BEALE, Superintendent.

Hon. John B. Floyd, Secretary of War.

The foregoing barometrical observations were made with one of "Green's cistern barometers," as both of my "sphon (Bunsais") barometers" were broken before we reached Zuffi, N. M. The observations were principally taken by Messrs. King and Porter, and a few by myself.

Respectfully,

C. E. THORBURN, Lieutenant United States Navy, and Assistant.

E. F. Beale,
Superintendent of the wagon road from Fort Defiance to the Colorado river.

June 25, 1857.—Left San Antonio at 1 p. m., and encamped at the beautiful spring of the San Lucas, having made sixteen miles, the camels carrying, each, including pack saddles, nearly five hundred and seventy-six pounds. This being the first day, and the animals not having performed any service for a long time, they seemed tired on our arrival at camp; but I hope, as we proceed, and they harden in flesh, to find them carrying their burdens more easily. Unfortunately, the only men in America who understand them, and who are thoroughly acquainted with the mode of packing and journeying with them, are some Turks, who came over with them, and who left at San Antonio, refusing to go so long a journey, and alleging that they had been badly treated by the government, not having received the pay due them since January. It seems the appropriation having been exhausted, no one is authorized to pay them, although they left their own country under special contract with officers of the government, and have performed their duties very faithfully. I have placed the camels under the immediate charge of Mr. Breckenridge, jr., assisted by Messrs. Morley and Via.

June 26.—Called up the men at 3 o'clock a. m., and after breakfasting, started at quarter to 5. After travelling a few miles, Mr. Alexander was sent by Mr. Breckenridge to overtake me and report that two of the camels had been taken sick and could not proceed. I sent back a wagon to relieve them of their loads, and hope to have them in camp by sundown. Thus far the camels have not been able to keep up with the wagons, but I trust they will prove better travellers as they become more accustomed to the road. Some of them have not been worked since their arrival, and are, consequently, very soft in flesh. Having travelled nineteen miles through a very pretty country, and through the village of Castroville, we encamped on the Hondo, at 1.30 p. m. Water good and abundant, and grass fair.

Hondo, at 1.30 p m. Water good and abundant, and grass fair.

I met here Mr. McLanahan, of California, who has just returned overland. This gentleman having travelled by both overland routes, northern and southern, prefers very much that of the Central or Cochotope Pass. He followed on my trail, made in 1853, and carried through, with great success, thirteen wagons and a considerable amount of stock.

The camels arrived at 3 o'clock, with the exception of the two sick, which got in shortly afterwards.

Supper over, I went to the stream, which I found to be fine, clear water, in large pools, but not running at this time. The pools were filled with fish, and in a short time my creel was quite full of fine bass, which, in this country, are called trout.

June 27.—Raised camp at 3 a. m., and started at 5. Travelled all day through a beautiful country. The prairies were covered with the most luxuriant grass and flowers. For stock raising or grazing purposes of any kind, the country we have seen to-day is decidedly the finest I have ever met with. Timber quite abundant, and the country sufficiently rolling to relieve it of the usual monotony of flat regions. Post oak and mesquite is the principal growth of timber. The former is useful as food for almost all quadrupeds, especially when the bean is plentiful, which is eaten with the greatest avidity by them, and is

very sweet and nutritious. In the Great Basin, I have frequently eaten bread made by the Indians from this bean, and found it excellent. The pipels made from it is preferable to that of corn

lent. The pinole made from it is preferable to that of corn.

Encamped at 1 p. m. I was anxious to go on four miles further, to the Sabañal, but the camels not being able to keep up, I encamped here on the Comanche creek. The water, which is only found in mud holes, is bad, and the grass only tolerable.

To-day we have travelled twenty-two and a half miles.

June 28.—Raised camp at 1 a. m., and started before daybreak. Our early start was occasioned by an accident to the guard watch, so that we were called at 1 o'clock, instead of our usual hour, 3. The first part of our journey to-day carried us through a country very much like that of yesterday. After travelling five miles we came to the Sabañal, a fine stream of water in large pools, and very clear and sweet. I fished in it for a short time, but only caught two fine fish. There was abundant evidence that the pools were filled with fish; but

I presume my bait was not sufficiently attractive.

Passing over about fifteen miles, during which distance grass was very abundant, we arrived at the Rio Frio, and found the water not such as the name would indicate, and confined at the crossing to one large pool. Rising abruptly from the water to the height of about thirty-five or forty feet, and extending for the distance of a quarter of a mile, has a very remarkable rocky bluff, making the otherwise uninteresting appearance of the place quite striking and picturesque. After crossing the Rio Frio, the country seems to change in character very materially—the soil becomes gravelly, the mesquite less abundant, and the grass, though good, not so luxuriant. Encamped at 12 o'clock, about two miles from the river, there being no grass at the crossing. We find it better to keep our water kegs filled, and camp at a distance from the regular stopping places, on account of the grass.

The distance made to-day is twenty and a half miles.

The camels got into camp at half-past three, some of the most heavily loaded being quite tired. As soon as they arrive they are turned loose to graze, but appear to prefer to browse on the mesquite bushes and the leaves of a thorny shrub, which grows in this country everywhere, to the finest grass. They are exceedingly docile, easily managed, and I see, so far, no reason to doubt the success of the ex-

periment.

June 29.—Started at 5 a. m., and found the morning cool, with a fine, fresh breeze blowing. During the night the appearance of things promised rain, but it ended in clouds and lightning. We passed through the town of Blacksburg, a straggling village of some dozen inhabitants. About noon we watered the animals at the Nueces river, which exists here only in one pool of about thirty yards in length and eight or ten feet in width. The bed of the river indicates that at times it must be of considerable magnitude, though now, with the exception I have mentioned, entirely dry at the crossing.

At 2 p. m. we encamped on Turkey creek, where we found the best water I have seen in Texas. The country we have passed through to-day is much more rolling than that of any previous day's travel, and the grass equally good. The road has been excellent all day.

A detachment of dragoons from Fort Clarke, which has been out on

an Indian scout, passed, and encamped near us.

June 30 .- Started at 4.45 a. m., and travelled for the first ten miles through fine grass to Elm creek, where we found a very little water in s mud hole. After leaving Elm creek there was no appearance of grass, but the road was very fine. At 11 we arrived, hot and dusty, at the stream of Los Moros, and refreshed ourselves by bathing in the cool, clear waters of the creek. Encamped within a few hundred yards of Fort Clarke, where we were most hospitably received and entertained by the officers. Having replenished our provisions I shall start again in the morning.

Distance made to-day twenty-five miles.

July 1.—I left Fort Clarke at 10, having started the wagons and camels on at 5 a. m. We travelled over a very dry and uninteresting country to the Piedras Puitados, a creek containing some fine pools of water, and well stocked with fish, where we encamped early, the animals having had no grass yesterday. Caught a few fish this evening. The distance made to-day but seven miles. Our whole stock of conversation to-day has been of the genial cordiality with which we were received at Fort Clarke, and the hope we may some

day have it in our power to return it.

July 2.—Started at 4.30 a.m., and travelled about five miles, when we stopped to water at a mud hole in the prairie. Three miles further on we came to the Sycamore creek, and found a fine pool of clear water, at which a large flock of wild turkeys were quietly drinking. Our appearance started them quietly on through the brushwood, where Mr. Thorburn followed them, wounding one, which, however, to our disappointment, got off. The country begins to assume a more arid appearance, though the grass is still plentiful, but dry. On our left the mountains of Mexico have been in plain view all day, a relief to the eye after travelling so long on the level plains and broad plateaus over which our road has carried us.

Captain Lee and his wife, who are on their road to his post at Fort Davis, joined us to-day, and we encamped together at a water hole of This river, like all others we have heretofore met the San Felipe. with in Texas, exists at this season, at least, only in holes, sometimes We found the water, however, sweet, and tolerably cool.

The camels are doing better to-day, and arrived shortly after the I am very much encouraged to see how eagerly they seek the bushes for food instead of grass, which certainly indicates their ability to subsist much easier than horses and mules in countries where forage is scarce. We encamped at 12.30, and caught some fine fish.

Distance made to-day twenty-four miles.

July 3.—Raised camp at 3 a. m., and started at 4. Travelled ten or twelve miles to Devil's river, a clear, broad, and shallow stream of infinite beauty and picturesqueness. The bottom through which it runs, about a quarter of a mile in width, is filled with a fine growth of cotton wood and mesquite. The stream itself is a hundred yards or so in width, three feet in depth, and the bottom of hard rock. On either side the banks are steep, and in many places entirely precipitous. having the appearance of ruins, fortifications, and regular mason

work. As our line of wagons ascended the hill the camels appeared on the further side, winding down the steep road, and made a picture well worthy the pen of a great artist. The steep, grey rocks, the beautiful green bottom or meadow, the clear sparkling stream, the loose animals, the wagons and teams, and then old Mahomet, with the long line of his grave and patient followers, winding cautiously, picking step by step their way down the road on the opposite side, was a very interesting and beautiful scene. We encamped here, and will remain until four in the evening, when we shall water the animals, and go on until ten at night, hoping to reach water again to-morrow at noon; the distance from Devil's river to the next water being forty miles. It is at present promising rain, which may give us water on the road. At 4 o'clock a smart shower of rain relieved the sultriness of the evening, and while still raining we started, (5 o'clock,) and journeyed until eleven, when we encamped for the All were sleepy and tired, and except the sentinels threw

themselves on the ground, and were soon fast asleep.

July 4.—Awoke this morning at our usual hour (3 o'clock,) to find it pouring in torrents. Everything was wet and disagreeable. Blankets were rolled up and thrust into the wagons, and the men cursing their mules with unusual vigor, as if they were the cause of our discomfort; hitched up in the twilight of the morning and prepared for a start. All day long it rained a cold relentless torrent, accompanied with gusts of wind which drove the chilled water through everything. Clothing and blankets offered no protection, and the party was soon thoroughly drenched. No emotions of patriotism availed to warm one against such a storm. The men sat shivering in dogged silence on their mules, which shivered and humped themselves in It was a terrible fourth of July, and the recollection of the jolly times our fellow-countrymen were enjoying at home made our toilsome and miserable day all the more so. Occasionally a wagon would stick deep in softened soil, and then more mules had to be hitched to pull it out, ropes hauled on, wheels pried up, and, of course, all this involved the necessity of straightening one's neck, and bending the body from that peculiar curve which is generally adopted in rain storms; so that we had more cursing, and strange oaths, we had not hitherto heard, were brought out in very great force. Altogether it was a wretched day, and the journey of forty miles without water was made through a deluge. In the very road itself, there was a stream larger and deeper than any we had seen since leaving San Antonio, except Devil's river. At last, when near the summit of Dead Man's Pass, and about noon, we broke the pole of a wagon and were brought to a dead halt. The teams I ordered unhitched and turned loose just where they stood, and some of the men sought what little shelter the wagons afforded, while others, with difficulty, raised a fire with the damp material at hand. Fortunately at this time (12 o'clock) it A plentiful supply of coffee, bacon and bread, aided ceased raining. somewhat by a couple of bottles of brandy, which was the remainder of a halt dozen presented to me by a friend, the day I left Philadelphia. restored warmth, animation and good humour. In the course of two hours more, the men went cheerfully to work at mending the road, and repairing the broken wagon. The sun came out in the afternoon, and our camp was soon as cheerful as it had been the reverse. Arms were cleaned and put in order, for we had encamped upon the scene of an Indian massacre, seven whites of a party of nine having been slain here by the Comanches. The camels, much to my surprise, have kept up remarkably well to-day, and have stood the storm better than I thought they would, in fact, apparently as well as the mules. We have made but ten miles to-day, after unremitting labor to man and beast of seven hours.

July 5.—Raised camp at 5 a. m., and travelled eleven miles and a half to the second crossing of Devil's river, where we stopped to breakfast, and turned the animals loose to graze. Our road this morning was, for the most part, rocky, and where it was not was rendered heavy by yesterday's rain. This morning we have rain again, in showers, and a dark leaden sky, which threatens us with another bad day. At 9.30 encamped within a few hundred yards of the river. Grass indifferent.

The camels got in an hour after us.

This morning we found at our camp, for the first time, a shrub, of which we are to see a great deal between this and the end of our journey, and in many places shall find no other wood. It is known as greasewood, and I was delighted to see the camels eagerly seek it, and eat it with the greatest apparent relish. It is certainly very gratifying to find these animals eating, by their own preference, the coarse and bitter herbs, hitherto of no value, which abound always in the most sterile and desolate parts of every road, so far as discovered, which traverses the broad extent of wilderness between the eastern States and our Pacific possessions.

Started at 3, and travelled until 6 p. m.

We passed a military station on Devil's river, but saw none of the officers. It is, I believe, an infantry post, which, of course, is very useful in protecting this portion of the Indian territory; foot soldiers being especially well adapted to the pursuit of tribes always mounted on the best horse flesh to be stolen in Texas and Mexico.

We also passed this evening the scenes of several Indian murders, and the graves of the victims. We followed up the bed of the river, over a very rough road, to Pecan spring, where we encamped for the night.

Distance made to-day twenty-one and a half miles—a very good

journey, considering the condition of the roads.

July 5.—We were up last night at 11 o'clock, and the men had already commenced to put the harness on the mules; our wagon-master, Davis, having mistaken the bright moonlight for daybreak. I had not been in bed long when I was told that the men were hitching up, and on sending for Mr Davis he was made aware, for the first time, of his error, and, greatly to his surprise, informed of the hour. We had gone too far in one thing, however, to correct it—the mules had already been fed their usual morning's allowance of corn, and had eaten it.

At 4 o'clock we started, and travelled until 8.30 a.m., up the valley of the river. The work was very hard on the animals; the

rain having made the ground exceedingly heavy, and in many places washed out deep holes and gullies. At 8.30 we encamped at the spring at the head of the river, and shall leave the river this evening entirely.

We have before us another forty mile stretch without water, and shall travel as much as possible of it this evening, and if we find no water in holes on the road, shall make a dry camp, and reach How-

ard's spring in the morning.

The camels are rapidly improving; they are now becoming accustomed to the road, and getting over the first soreness occasioned by the want of use. To-day they travelled quite as fast as we did, and came into camp nearly at the same time. Encamped this evening at a water hole in the prairie, after travelling all the afternoon in a drizzling rain, which made us quite uncomfortable, though, considering the fact that it gives us water where no other is to be found, we were willing to submit to the little discomfort of sleeping in damp clothes upon the wet ground.

We passed to-day the graves of a party who were killed by Indians

last fall. Distance made twenty-five miles.

July 7.—We started at 4.30 a. m., and travelled twelve miles, when we encamped for breakfast. Our crossing place was called Cedar bluffs. The grass is very fine, and water abundant in holes, filled by the late rain. We were passed on the road this morning by the monthly El Paso mail, on its way up, by which I received, forwarded by some of my friends at San Antonio, a box of about two feet square, for which the moderate charge of twenty dollars was made. The dangers of this road, however, justified any price for such matters. Scarcely a mile of it but has its story of Indian murder and plunder; in fact, from El Paso to San Antonio is but one long battle ground—a surprise here, robbery of animals there. Every spring and watering-place has its history or anecdote connected with Indian violence and bloodshed. The country through which we have travelled to-day is entirely destitute of timber, except the mesquite bush, which grows almost everywhere in Texas. The road, though rolling, is excellent.

July 8.—Up at half past two, and off at daybreak without breakfast. We travelled eleven miles to Howard's spring, where we stopped to breakfast and water the animals. This place seems to have been famous for Indian surprises. Near it we passed the graves of seven who had been killed by the savages, and still nearer, within a hundred yards or so, the bones of a sergeant and some two or three dragoons, who were here killed by them. The bodies had, apparently, been disinterred by animals, and the ghastly remains of the poor fellows who had perished there were scattered on the ground. Captain Lee (U. S. army) gave us the history of the fight, which occurred some months ago.

Howard's spring is a small hole containing, apparently, about a quarter of a barrel of water, but in reality inexhaustible. It is directly under a bluff of rock in the bed of a dry creek, and to get at the water it is necessary to descend about eight feet by rude steps cut in the rock; the water has to be passed up in buckets, and the animals

watered from them. There is but little grass here, and no timber but greasewood and mesquite, and not much of that; a few stunted cedars that grow around the bluff of the spring are neither large

enough for shade or fuel.

The rain has brought the grass forward wonderfully, and with it an abundance of beautiful flowers, so that the prairie for the last few days has been filled with perfune and richly colored flowers, which would have been no disgrace to the most costly hothouse. The whole of the country is vastly improved by these grateful showers, which have clothed it everywhere with verdure, and filled the air with fragrance.

Of large game we have seen but little, but turkeys and partridges abound in great numbers; in fact, the whistle of "Bob White" is with

us all the time.

The camels came into camp with us. We find one great trouble, and the only one, in managing them, is that we know nothing about the method of packing them, and have it all to learn. In consequence of our want of knowledge in this particular, we have several with sore backs, which, however, I am glad to observe, heal much more apidly than similar abrasures on the backs of horses or mules. soon as we discover one to be getting sore it is immediately freed of its burden, and in a day or two is ready for service again. **kem almost** entirely indifferent to the best grass, and to prefer any kind of bush to it. To-day we find another food they seem particularly to relish, the name of which we do not know. The wild grape vine is a great favorite with them, and as it grows plentifully, they will fare well on it. It seems that they like most the herbs and boughs of bitter bushes, which all other animals reject. The more I see of them the more interested in them I become, and the more I am convinced of their usefulness. Their perfect docility and patience under difficulties renders them invaluable, and my only regret at present is that I have not double the number.

After remaining a few hours at Howard's spring we resumed our march, and soon regained the plain. At the crest of the hill, as we came upon the level land again, we found a new made grave, probably another added to the long list of Indian victims with which the

entire trail is filled.

We encamped without water on the open prairie: grass good, but no timber whatever.

This evening many of our party have seen Indians, but for me, "Ah! sinner that I am, I was not permitted to witness so glorious a sight." I encourage the young men, however, in the belief that deer, bushes, &c., which they have mistaken for Indians, are all veritable Comanches, as it makes them watchful on guard at night.

July 9.—Raised camp at 3 a. m., and off before daybreak. We travelled fifteen miles and encamped two miles from Fort Lancaster, on Live Oak creek. While at breakfast, some of the officers called and invited us to the post, of which kindness we shall avail ourselves. The camels got off before us this morning, and arrived at camp at the same time. We are busy to-day repairing their saddles and doctoring their wounded backs, and to effect this purpose I shall go no

further, but remain here until to-morrow. Live Oak creek is a clear and beautiful stream of sweet and cool water; the grass very fine, and wood, (oak, mesquite, and willow,) abundant. Just before descending into the valley of the stream we came to a very steep, rocky hill, overlooking a valley of great beauty and graceful shape. The sides of the hills were covered with the most brilliant verdure and flowers, and our long train, as it wound down the steep descent, and became stretched out on the winding road through the valley, presented a scene of uncommon beauty. It was about sunrise when we arrived at the hill, and the view was so striking that Thorburn and I remained behind to enjoy it until the whole train had passed some distance into the valley.

July 10.—A short time after arriving at camp, yesterday, we received a message from the post informing us of the death of the little son of our travelling companion. Captain Lee, (U. S. A.) This determined us to remain to-day at the post, in order to be present with my men at the funeral. We had all become deeply interested in the fate of the child, which, for the past week, had lingered at the door of death, sometimes giving hopes of recovery, and again relapsing, until all hope was entirely lost. It was buried to-day at 2 o'clock in the afternoon, and our train, which was hitched up and ready for the road, immediately afterwards moved on, and travelled to the Pecos spring, a distance of twelve and a half miles from our previous camp. We crossed the Pecos river eight miles from the fort, and found it a turbid, swift running stream, of about three feet in depth and twenty-five in width, the water of which is brackish and unpleasant to both sight and taste.

We were received kindly by the officers at Fort Lancaster, and but for the melancholy occasion of our delay should have passed an

agreeable day.

July 11.—Travelled all the day up the valley of the Pecos, which has an average width of about three miles, and is chiefly remarkable for the castellated appearance of the hills on each side. There is no timber, and even the mesquite is smaller than usual, though we find the grass abundant and excellent in quality. The river runs through banks so steep that it was noon before we found a place to water our animals. We encamped then and breakfasted, having made nearly thirteen miles. This afternoon we shall make as much more.

Encamped again this afternoon on the Pecos, having made to-day twenty-four miles. We found the grass only tolerably good, and the

water decidedly bad.

The camels are now keeping up easily with the train, and came into camp with the wagons. My fears as to their feet giving out, as. I had been led to believe from those who seemed to know, have so far proved entirely unfounded, though the character of the road is exceedingly trying to brutes of any kind. My dogs cannot travel at all upon it, and after going a short distance run to the wagons and beg to be taken in. The camels, on the contrary, have not evinced the slightest distress or soreness; and this is the more remarkable, as mules or horses, in a very short time, get so sore-footed that shoes are indispensable. The road is very hard and firm, and strewn all

over it is a fine, sharp, angular, flinty gravel-very small, about the size of a pea—and the least friction causes it to act like a rasp upon the opposing surface. The camel has no shuffle in his gait, but lifts his feet perpendicularly from the ground, and replaces them, without sliding, as a horse or other quadrupeds do. This, together with the warsely granulated and yielding nature of his foot, which, though very tough, like gutta percha, yields sufficiently without wearing off. enables them to travel continuously in a country where no other barefooted beast would last a week.

July 12.—Journeyed from 4 to 81 a. m., and encamped again upon the Pecos, having made nine miles. One of Captain Lee's men went to the river to fish, and soon returned with a cat fish weighing fiftyseven pounds. I had it carefully weighed by our own steelyards. This started us all to fishing, but we were not so successful; in truth, took nothing. We leave the Pecos this evening, and are all glad of it. A more stupid and uninteresting river cannot be imagined—rapid, muddy, brackish, timberless, and hard to get at. We shall go out this evening about fifteen miles and make a dry camp, that is, without water.

Encamped on the prairie. Mr. Williams, geologist, while some distance from camp, and busy in the pursuit of his scientific investigations, came suddenly on two Indians. The rule in this country being to shoot on first sight, it was rather an awkward predicament.

To the Indians, who were as much surprised as the stone-breaker, the affair was equally embarrassing. One party was armed with musket and revolver, with the pleasant remembrance that the last time he attempted to fire it it refused to go off. The other party had bows and arrows, the former most probably unstrung, as they are usually carried when not expecting immediate use for them. Fortunately there were no seconds on the ground to make the fight imperative, so that after regarding each other attentively for a while they started off briskly in different directions, and the affair was thus "settled honorably to both parties." Our horses stampeded twice last night, but did not go far. Grass very indifferent, and no wood. Francisco, teamster, crushed his hand in the wheel.

July 13.—Started at 4 a m. and travelled over an almost level country until we came to the Escondido spring. This water is beautifully clear, though slightly brackish. There is sufficient grass here, but of a coarse innutritious quality. We breakfasted and remained We breakfasted and remained at the spring until noon, when we left for Comanche spring, and travelled over a very fine and level road for eighteen miles. Encamped at Comanche springs, where there was running water about five feet deep, but no timber. We caught some very fine fish. Here the great Comanche trail, on their inroads to Mexico on horse stealing excursions, passes, and thousands of stolen horses have been carried

by this road to the Indian country.

July 14.—Raised camp at 4.45 a.m., and travelled ten miles, to Leon spring. Here we found a succession of deep pools of slightly brackish water, but very clear. The road this morning has been excellent, with plenty of grass, but of a coarse quality, and no timber, but a little dwarf mesquite. Our next camp will be a dry one, the

nearest water being forty miles distant. We shall remain here until two or three in the afternoon, and then travel until dark, and camp wherever night overtakes us. The camels came into camp about an hour after us to-day, not having been packed in time to start with us

this morning.

Leon spring was supposed by our guide to be five hundred feet deep; everybody said so. We exploded this popular fallacy by a very simple process, to wit, sounding it. We found it deep enough to save it from any exaggeration, viz., twenty-five feet. We started again at 3 p. m., and travelled until 10 at night, when we encamped on the prairie. At midnight we were awakened by a stampede of all our loose animals, which during the night we had close to the wagons, under a strong guard. When the stampede first took place I thought but little of it, knowing the animals would not run far, and that the guard would soon bring them back; but presently, mingling with the sound of the horses' receding footsteps, we heard in rapid succession This was startling, as we were in the midst of the Indian country, and it became evident that the Indians had run off our horses. Immediately I ordered all hands called, and taking with me five men, who were quickly mounted on the team animals always kept hitched to the wagons, started out in the darkness to the place where the shots had been fired, and expecting to find some of our horse-guard killed by the Comanches. We had not gone far, however, before we found our men and the animals, with the exception of six, and discovered that the report of fire-arms we had heard was from the accidental discharge of two barrels of a revolver in the hands of one of our Mexi-Much relieved, and with our animals driven before us, we returned to camp and to our blankets. The stampede has been of service in one respect, it has shown who are willing to fight, and who Some who have been very loud in the desire to see an Indian skirmish were not as forward last night as I could have desired. grass is excellent, but there is no wood.

We have made to-day twenty-eight miles.

July 15.—We raised camp at 3 a. m., and prepared a party to go and follow the trail of the animals which we failed to recover last night. At daylight, however, by the aid of glasses, we discovered them grazing on the side of the mountain, about four miles off, so that the party prepared to take their trail was spared the trouble of hunting them up. We encamped at noon at the Hackberry, a mere mud hole, but containing sufficient water for our animals, with tolerable grass, but no timber. Started again at 11, and having watered on the road at a mud hole, arrived at Barilla spring at about 4. The water at this place is delicious, especially after the brackish stuff we have been drinking.

Our camp this evening is a very pleasant one, on the side of a rugged mountain, and overlooking a green and pretty valley almost shut in by mountains. It is a great relief, after travelling so long over these monotonous plains to find oneself in the mountains again, and

in the region of cool, clear streams and springs.

Distance made to-day twenty miles.

Grass good, but no wood.

July 16.—Raised camp at 4, and travelled all the morning through a succession of beautiful valleys, and in the midst of the most enchanting scenery. On both sides of the road the mountain rises to a great height, and is of the most rugged character. On some places, the rock, for miles, is entirely perpendicular for hundreds of yards in height, reminding one very strongly of the palisades along the Hudson; and in others assumes a smooth appearance, but always beautiful. I followed down a chasm, as it seemed, for half a mile, until the rock narrowed to a width of some twenty yards. Here I discovered, to my surprise and delight, a spring of pure and cold water, which found its way through the crevices of the rock, and after running a short distance sank again.

Our camp to-day is near the summit of the Wild Rose Pass, and although the grass is not very good, it is the most pleasant we have

had since leaving Fort Clarke.

The camels arrived nearly as soon as we did. It is a subject of constant surprise and remark to all of us, how their feet can possibly stand the character of the road we have been travelling over for the last ten days. It is certainly the hardest road on the feet of barefooted animals I have ever known. As for food, they live on anything, and thrive. Yesterday they drank water for the first time in twenty-six hours, and although the day had been excessively hot they seemed to care but little for it. Mark the difference between them and mules; the same time, in such weather, without water, would set the latter wild, and render them nearly useless, if not entirely break them down.

We started again at 4, and encamped on the Simpia, the stream which runs through the Wild Rose Pass. This evening our ride has been very pleasant, and the scenery still more beautiful than this morning. Oak trees of small growth covered every inch of the mountain not occupied by the solid rock, and the contrast between the gigantic, dark brown rocks, covered with red and grey moss, and the green foliage of the trees, and the still richer green of the cottonwoods and willows which fringed the streamlet on whose bed we are travelling, made a charming character of scenery, and delighted every one in camp.

The road through the pass we found most excellent, and so nearly level that it was impossible, without an examination of the matter, to

say which way it inclined.

We have encamped this evening about four miles from Fort Davis, on the spot where two soldiers from the post and the guide were

killed, and a drummer boy taken prisoner by the Indians.

The valley is not over a quarter of a mile in width until arriving at our present camp, where it opens to the width of a mile, and the steep palisaded sides of the mountain fall off and give way to an undulating, hilly country, covered everywhere with the finest grass.

Our travelling companions, Captain Lee and his wife, left us here and went on to Fort Davis. To-morrow we shall pass half a day at the post, and then off again for El Paso.

Distance made to-day 231 miles. Grass rather good, and wood

tolerably abundant.

July 17.—Raised camp at sunrise, and went on to Fort Davis, where we were kindly entertained by the officers. Having two wagons to be repaired, I determined to go no further to day.

Distance made about five miles.

July 18.—Employed most of the day at the blacksmith's shop, in driving the repairs of the wagons. In the afternoon we bade adieu to our hospitable friends at the post, and came out about ten miles to Bald Rock spring, where we found excellent water, but no wood or grass. We encamped here for the night.

July 19.—Travelled all the morning through rolling hills, bounded by rocky and palisaded mountains on our left, and quite near us, and on the right, but at a great distance, another range apparently of the same character. Everywhere the grass is excellent in the prairie.

At noon we encamped at Bauell springs, where we found a scanty

supply of tolerably good water, but no wood.

At 2 we started again, and found a rolling country, and good travelling all the evening to Ojo de las Muertas, (Spring of the Dead.) We passed the grave of a man who had been killed by the Indians, which had the usual pile of stones, to prevent exhumation by the wolves; a shingle at one end, and a sharp stick at the other.

I am convinced water may be found by sinking wells twelve feet, or less by half, at Smith's run, which we crossed, and at several other places on the road. The camels are travelling finely. It is worthy of especial note, and I mention it here, while it is fresh in my mind, that since our leaving San Antonio, where my experience commenced with them, I have never seen or heard of one stumbling, or even making a blunder.

July 20.—Raised camp at 4, and travelled until 6 a. m., when we discovered water, about the distance of two miles off the road. It was a mud hole, but served us to water the mules, and was very acceptable, as the nearest known water to that at which we encamped last night is thirty-six miles distant. About noon we found another mud hole, a most grateful piece of success, as it saves much suffering, and long marches, without water, with the thermometer at 95°.

We encamped at the mud hole, and shall leave this evening, and go on about ten miles further, and make a dry camp, with the view of breakfasting to-morrow at Van Horn's Wells. Our ride this morning has been utterly destitute of interest. The travelling has been most excellent, generally on elevated plateaus, or across broad and level valleys; but entirely without timber of any description. The grass for the most part good, though a little parched and dry.

We have travelled for the past few days parallel with two ranges of mountains, one on each side of us. They present a barren, rugged

and repulsive aspect, and are without timber.

Distance made this morning sixteen and a half miles.

We encamped on the prairie at dark, after making eight miles. We saw two Indians this evening, evidently watching our train, and most likely meditating horse thieving operations against us.

Grass tolerably good; but no wood or water. Whole distance made

to-day twenty-four and a half miles.

July 21.—We raised camp at 4 a.m., and travelled nine miles to

Van Horn's Wells—a pool of water of fair quality, but barely sufficient for our animals. I long to reach a good running stream again, where they can drink without struggling and fighting each other for every mouthful. But for this scarcity of water, this country would excel any other in the world for cattle raising. The grass is superabundant, and of most excellent quality, almost everywhere; but the want of a large supply of water is an insurmountable difficulty, and will

remain so, until Pope's experiment succeeds.

Our road this morning has been over a country almost level, but not at all interesting. The camels are now being rapidly lightened of their loads, as we have eaten almost all our forage. In consequence, they frequently reach camp before the wagons, and can always do so, if hurried at all. We shall leave our present camp this evening, and go on fifteen miles further, which will bring us near to Eagle springs. To-night we shall make another dry camp, as the drive would be too far for our animals to go on to the next water, without rest.

We encamped for the night on the plains, within ten miles of Eagle

spring. Grass excellent; but neither wood nor water.

Distance made to-day twenty-two miles.

July 22.—Raised camp at 5 a. m., and travelled ten miles to Eagle springs. The country is easy for wagons, although our road passes to the right and left of very rough ranges of mountains. The valleys between them, however, are broad and level. I think the average width will be ten miles. The most disagreeable feature is the entire want of wood; the mountains being stupendous masses of rock, entirely destitute of timber and running streams, which we generally associate with mountains, and rendering their appearance forbidding in the extreme.

Our encampment this morning is at the scene of quite a number of Indian devilments. Four men were murdered here by them at one time, and various others at different periods, to say nothing of the numerous bands of cattle, mules, and horses which they have taken from emigrants and others passing here.

The spring rises at the base of Eagle mountain, which is a huge

The spring rises at the base of Eagle mountain, which is a huge pile of perpendicular cliff, palisaded at the top, and rising gradually without the usual accompaniment of foot hills from the valley. There is quite sufficent water for our animals, and having been eighteen

hours without, they are glad enough to get it.

The grass here is very poor, both in quality and in quantity. We started on at 3. The sun was intensely warm, but about 4 a most refreshing shower cooled the atmosphere, and rendered the travelling very agreeable. It was particularly so to us, as we had a journey of thirty-four miles before us, without water. We passed on the road, shortly after leaving the spring, the scene of a battle between the Comanches and some Texas emigrants to California, in which the latter were badly worsted. Travelled some twenty miles, and encamped on the plain without water or grass. To-day we have made thirty miles; a good journey for loaded wagons.

We met two Mexicans on the road whom we supposed to be fleeing from justice. They had probably committed some rascality, and were

in a hurry to get out of danger, as according to their story they had

ridden nearly eighty miles since day-break.

July 23.—We got an early start this morning, and after travelling a short distance crossed an easy divide, and followed down a cañon leading directly to the Rio Grande. Very soon we came in sight of the green cotton-woods, which mark the line of the river: a most grateful sight to men who had travelled so far without seeing a piece of wood larger than a mesquite bush. The valley of the Rio Grande is here about twenty to twenty-five miles in width, from mountain to mountain, and certainly has no very prepossessing appearance; the mountains on the American side, like those on the Mexican, are destitute of timber, and offer to the eye nought but gloomy masses of rock, where the very spirit of desolation seems to reign. Only the clear fresh green of the cotton-woods in the river bottom creates a point for the eye to rest upon with pleasure; speaking to us, as it did, of a fine stream in which we would bathe our weary limbs; but, like all other anticipations of pleasure, this, too, faded on a nearer approach. found the river after groping some distance through a dense undergrowth of weeds, briars and willows, a muddy stream about a hundred yards wide; but with such a deposit of mud and quick-sand that even our thirsty mules were obliged to go half a mile below, before we could find a place where we could safely take them to water.

Yesterday our corn being nearly exhausted, I ordered all of the remaining packs to be taken from the camels, in order that their backs might have a chance to recover, where they had become chafed by bad packing. I find they have suffered less than the same number of pack mules would have done on a journey of the same distance. I am convinced that a better and lighter saddle could be easily arranged for them, and shall submit my ideas on this matter fully hereafter. morning we made twelve and a quarter miles; wood abundant (cotton and willow) and grass enough, but of an inferior quality. We travelled up the valley of the Rio Grande fourteen miles, and encamped for the night. Here I took Mr. Bell and Sandy, and accompanied by Mr. Ford, who had travelled from Fort Davis with us, went on to San Elizario. We travelled until 2 o'clock at night, when we stripped off our saddles, ate a little bread and cheese, and laid down After resting two hours, we started again, drowsily saddling our mules in the dim twilight of coming dawn, betook ourselves again with many a yawn to our journey. We travelled on until 11 when we overtook a Mexican train, which gave us breakfast on green peppers and coffee, after which we started once more, and at noon reached San Elizario, hungry and tired. We had ridden, almost without intermission, a distance of ninety-five miles, and had been in the saddle, well nigh constantly, for thirty-six hours.

July 24.—We passed the day pleasantly at the house of Mr. Ford.

July 25.—Still at San Elizario.

July 26.—Our train arrived this morning, and the whole Mexican pepulation, which, since our getting in, had been in a perfectly feverish state of excitement in relation to the camels, had their curiosity gratified. The street was crowded, and when we went on to camp the

whole town followed. I drove up to Franklin this evening, in order

to expedite our departure on the following morning.

July 27.—Spent the day at Fort Bliss, where I was kindly received by the officers. Dined with Mr. McGoffin, and attended a pleasant party at his house afterwards. At 6 in the evening saddled our mules (Thorburn and I) and trotted out to camp—ten miles distant.

Made to-day about eighteen miles.

July 28.—Started before sunrise, and travelled twelve miles, our road following the river to Willow bar. We found the road heavy

nearly all the wav from recent rains.

Encamped opposite the mountain, about nine miles distant, in which is situated a valuable silver mine, belonging, I believe, to a Mr. Stephenson, who lives near El Paso. It is said the mine is yielding an abundant fortune to its proprietor. It is situated in a mountain on the American side of the river, and apparently of easy access.

The grass at our camp, and also throughout the entire valley, is very plenty, but of a poor quality. Of wood there is abundance of mesquite and cotton-wood, but no other. We have passed to-day numerous herds of sheep, of the small kind common to this country. The wool is coarse and the animal, from the pernicious practice of breeding in and in, small and every way inferior to those of the eastern States.

July 29.—Started by star-light, and travelled about nine miles, when we encamped at a hole of water, about a mile from Fort Fillmore and one and a half from the river. Grass indifferent; mesquite wood abundant, especially a kind of which the camels are particularly fond, the fornia or screw-bean. This bush bears a fruit in bunches, about an inch and a half in length, in the form of a screw. It is very nutritious, and is sometimes used to make pinola by both Indians and Mexicans. The camels seem to like both the branches and fruit better than any other we have met with. Although the branches are covered with sharp thorns, larger and stronger than those which grow on the rose bush, the camel seizes them in his mouth and draws the limb through his teeth, rapidly stripping off the leaves and briars and eating both greedily. Sometimes they bite off branches of considerable size and eat them leisurely, with apparent great ease. strength of jaw and teeth seems uncommonly great, greater even than in proportion to their size when compared with other brutes.

This evening was passed pleasantly at Fort Bliss with the officers of the post. We encamped six miles beyond the fort, and only stopped the train long enough to put in forage for our animals. The fort is pleasantly situated, overlooking the river and meadow land lying on either side. The ground rises considerably at the post, which is built on the sand hills, and gives it a pretty appearance on approach. At sun-down, we rode on to camp, accompanied by Captain Myers, Major Morris, and my old friend, George Haywood.

It rained slightly almost all night; but not enough to wet our

blankets or disturb our sleep.

July 30.—We passed through the towns of Cruces and Doña Ana, where we exhibited the camels to the wondering gaze of the population. Travelled about eighteen and a half miles, and encamped on the river.

Here we leave the water, and take the much dreaded "Jornada del Muerto," a stretch of ninety miles without water. We are, however, in hopes that our usual good fortune will attend us, and that the rain will come to our assistance.

This morning our road led us in view of the Organ mountain, about seven miles distant, a most rugged and terribly severe mountain, but containing in its bosom a store of wealth in silver ore which its frowning aspect seems to guard from intrusion; ineffectually, however, as its bowels are being torn and rent by blasting and cutting, in search of the precious contents. This evening we started at 4 o'clock, intending to go out eight miles and make a dry camp; but we had not gone far before it began to drizzle, and soon after the rain came down in torrents. Through the rain we travelled on cheerfully, until a little after dark; cheerfully, for we felt assured of finding rain water in holes on the "Jornada," and for our animals' sake we were willing enough to take the rain.

At night we stopped on the plain, and threw ourselves on the ground, to sleep soundly until the bugle called us in the morning.

After leaving the river, the road ascends about seven miles, which is sandy. At this point the great plain of the "Jornada" is reached, and the road becomes excellent.

July 31.—This morning we started at 4, and travelled until 9.30 a. m. Nothing could exceed the beauty of the country we have travelled over this morning. The whole extent, as far as vision reached ahead, was a level plain, covered thickly with the most luxurious grass, and filled with beautiful wild flowers, while on each side the mountains in the distance, nearly covered with clouds, loomed up grandly. Hundreds and hundreds of thousands of acres, containing the greatest abundance of the finest grass in the world, and the richest soil are here lying vacant, and looked upon by the traveller with dread, because of its want of water.

It is worthy of remark, as a curious coincidence, that at every long stretch without water we have come to, since leaving the Atlantic, we have had abundant rains; all the more remarkable, as the people here say that these are the first rains that have fallen on them for more than a year.

This evening we made ten miles; making, for the day's journey, twenty-four and a-half miles.

Encamped without finding water.

Grass abundant and good; slight rain during the night.

August 1.—Raised camp at 4.30, and sunrise found us some distance on the road. Last night was passed watchfully, Indian signs having been observed. We travelled four miles, and after ascending a short but steep hill encamped at some rain water holes. On the brow of the hill is the grave of two Germans killed by the Indians, from which this place takes its name of the Allemagne. Three miles further on is another place of the same name, where a third German of the same party lost his life. Our journey this morning was short, owing to our finding water and the uncertainty of soon finding it again. The road is excellent and the grass very abundant, wanting only trees and water to make the country perfect. After breakfasting we started

again, and, on arriving at the Big Allemagne, found a party of Mexi-

cans journeying to Doña Ana.

In this country the first question is, Indians? And the second, water? Having exchanged views as to the first and most important, we found that, to our sorrow, we should not find water at the Laguna, and that, as no rain had fallen to the northward, we had no hope of any water nearer than the river—fifty miles distant. This at once determined me to spend the day where we were and travel after night. The teams were immediately turned loose and our camp made; the rain water in the holes being abundant.

At sundown we started on our journey again, and travelled till 1 o'clock at night, when we encamped on the plain, having made twenty

miles.

The grass is excellent, but the animals, having no water, ate but little.

August 2 .- At 4, up and off again. The sun rose hot and fiery, and all betokened a distressing day's journey. Soon we began to see that since the Mexicans had passed rain had fallen upon their trail. and shortly after, to our great joy, a hole containing sufficient rain water for all our animals was found. Camp was made at once, and After a hurried meal, the animals being refreshed by water and abundance of grass, we started again and at noon encamped on the Rio Grande. Thus, we have passed the terrible "journey of death," and it has been our good fortune to have had a most agreeable passage of it; rain water as often as we desired, instead of a ninety mile journey without any. The road is already good; the grass, as I have before remarked, everywhere excellent and abundant, and nothing but water required to make it in every way desirable. At present, it lies directly on the road between El Paso and Santa Féthe dread and terror of travellers, and has cost more loss in the suffering and death of cattle than would pay ten times over for the three wells the government might cause to be dug

The grass on the river bottoms is not good, and we therefore camped on the nearest hills to the river, where we found excellent gramma.

Distance made to-day twenty-five miles.

August 3.—Started somewhat late this morning, (6 o'clock,) and after a short march came in sight of Fort Craig, on the opposite side of the river. I did not cross to it, but from its appearance at a distance of a quarter of amile it presented a more fort-like outside and aspect than any post we have seen on the road. Travelled up the river sixteen miles and encamped on a hill near it. Grass good, and wood, in the timber of the river bottom, abundant.

The scenery of the river, especially the green meadow and the trees is very pleasant, and to us, who have been so long without the sight of running water, and kept so constantly anxious on the subject of a good square drink, the abundant river is a very grateful object of view.

August 4.—Being anxious to see General Garland, and to arrange matters in relation to the soldiers I am to take with me, I left camp this morning and travelled on ahead as rapidly as the worst road in the known world would permit. At every step our poor beasts sank deep in the sand, and could scarcely lift a leg when we arrived

at camp. The river bottom, to which we occasionally descended and travelled upon, was filled with corn fields, and tolerably well cultivated after the Mexican fashion, almost the entire day's travel. Herds of sheep, goats, and cattle, sheltered from the scorching sun under the cotton-woods, or standing belly deep in the river, added the grace of pastoral life to the beauty of the landscape.

We passed several towns, and found the fame of the camels had preceded us. At the first, I was taken for the head showman. A crowd soon gathered around us, and a slouchy looking ruffian, acting as interpreter, we had quite an amusing time. Looking at my ambulance, which the taste of the builder had painted a bright red, he commenced:

"Dis show wagon, no?"

I replied, "ves."

"Ah, ha! You be dee showmans, no?"

"Yes, sir."

"What you gottee more on camelos? Gottee any dogs?"

"Yes, monkeys too, and more."

"Whattee more?"

"Horse more."

"Whattee can do horse?"

"Stand on his head, and drink a glass of wine."

"Valgame Dios! What a people these are to have a horse stand on his head, and drink a glass of wine." And we left our friend explaining to his audience what had passed, and filled with admiration for the nation, one of whose humblest individuals possessed a horse

capable of standing on his head and drinking wine.

Angust 10.—ALEUQUERQUE.—Returned from Santa Fé, having arranged all my business with the commanding officer of the department. As we were engaging rooms at a wretched fonda, on our arrival here, I was met by Major Rucker, of the army, whom I had known in California years ago. The major kindly offered Thorburn and myself rooms at his house, which we gladly accepted. Business kept me here to-day pretty busy, though I nevertheless enjoyed highly the change from the rough fare of camp to the well supplied table of our kind host.

August 11.—Still in Albuquerque.

August 12.—Started my train on, it being necessary for me to remain until the arrival of the express from Santa Fé. I was anxious, moreover, to get the men out of town as soon as possible, as the fandangos and other pleasures had rendered them rather troublesome. This morning I was obliged to administer a copious supply of the oil of boot to several, especially to my Turks and Greeks, with the camels. The former had not found, even in the positive prohibitions of the prophet, a sufficient reason for temperance, but was as drunk as any Christian in the train, and would have remained behind, but for a style of reason much reserted to by the head of his church, as well as others, in making converts, i. e., a broken head. Billy Considine says he has seen a cut glass decanter do good service, when aimed low, but to move a stubborn half-drunken Turk give me a good tough piece of wagon spoke, aimed tolerably high.

August 15.—To my delight the express arrived last night, and today, at 2 o'clock, we got off.

After travelling some twelve miles or so we encamped on a plain

beyond the Puerco.

August 16.—Travelled all day, and overtook the train at the little half Indian town of Covero.

We arrived about sundown, and no one can imagine the pleasant thing it was to us to get back to our flannel shirts, big boots, and

greasy buckskins once more. It was home to us.

August 17.—We moved a few miles up the valley and encamped. We are travelling very slowly, awaiting the arrival of Col. Loring, from whom I am to receive my escort, and who is now on his way to We are all very impatient, as our work is now about Fort Defiance. to commence; and whatever fortune is before us, we are anxious to meet it, and have done with all suspense in regard to it. I trust to be in California in sixty days after we once get started.

We find this valley, cultivated by the Indians, in far better condition, as far as crops and prospects are concerned, than any part of New Mexico we have yet seen. They seem to have plenty of corn and wheat, and are, altogether, quite as well off as their Mexican

neighbors.

August 18.—Moved camp this morning a few miles up the stream of the Gallo.

Having nothing to do but await impatiently the arrival of Colonel Loring, we only move camp to get better grass. The little valley of the Gallo presents a most singular appearance. Directly down the centre, and rising to a height of some twelve feet, a stream of lava has flowed, and apparently ceased somewhere near our camp of yester-This fiery torrent seems to have been nearly a quarter of a mile in width, and looks as if a troubled ocean of molten iron had suddenly The whole valley is so completely filled with the solid lava as to leave only here and there a narrow belt of meadow; but this is knee deep with the finest and greenest grass, and almost hidden by it, and winding its way through it is the clear, sparkling brook of the Gallo. The stream is quite narrow, in fact no where over six feet in width, but the water clear as crystal and very cool. It is quite deep, being in many places breast high. The contrast with the rough, black, honey-combed rock, which extends as far up the valley as the eye can reach, and the soft velvet green of the little fringe of meadow, is very pleasant, not only to ourselves but to our poor mules, to whom our present short camps seem particularly delightful. On each side of the valley the mountains rise abruptly, and on the left, directly in front, is a palisaded mesa of very considerable height. The term mesa is a Mexican word, signifying table; but out here it is used in reference As an English word, when so used, it means a mounto mountains. tain with a flat top, and in this region nearly all are so; in fact, it is an exception to see one otherwise. A sprinkle of rain this evening. Every day for the past ten we have had more or less rain, and at times heavy showers.

August 19.—Still in camp, waiting for Colonel Loring. To-day we made a seine of gunny bags, and caught a large quantity of fish; they were principally mullet, with a few trout. The stream seems filled with fish, and with a proper net an abundance for any number of men

might be taken.

Our camels are doing well here, and seem as fat as when we left, and apparently in better order for the road. On leaving Albuquerque they were packed with an average of seven hundred pounds each; the largest carried nearly a thousand pounds, and the others in proportion to their size and strength. Two Zuñi Indians came into camp this morning and reported Colonel Loring as only a few miles behind, so that we hope to see him this evening. We found the grass on the other side of the creek best, and our mules are now grazing in it belly deep.

August 20.—This morning I mounted the white dromedary, "Seid," and started back to meet Colonel Loring. The morning was cool and pleasant, and the fine animal travelled off at the rate of eight miles

an hour without, apparently, the least effort.

On reaching Covero, some thirteen miles and a half from camp, I found the colonel, who had just arrived, and after a pleasant interview, we started back together; but finding his animals unequal to mine, I rode on to camp again alone, and arrived after an absence of three hours, during which I had ridden twenty-seven miles. "Seid" seemed not the least tired; indeed, it was as much as I could do to hold him on my return, and could not have done so had I not put the chain part of his halter around his lower jaw. The best mule or horse in our camp, in present condition, could not have performed the same journey in twice the time, although they have been fed with corn ever since leaving, and some of the horses not worked at all, having been kept for express duty in the event of accident, while "Seid" has not only worked every day, but been grazed entirely on grass.

I saw some Indians, in the hills at a distance, as I rode along.

I found our men had been fishing again, and had caught, at one haul of our gunny bag net, ninety-six fine fish, which furnished us a good meal for all hands.

There is plenty of wood at this camp—cedar and a few dwarf pines.

August 21.—To-day I sent the camp on to Zuñi, and shall go up with Colonel Loring, whose command reached here last evening, to Fort Defiance, so as to start with my escort from that place. I have determined to take but twenty men, instead of thirty-five, as I do not

wish to encumber myself more than is absolutely necessary.

Started at 8 and travelled over a beautifully undulating country for twenty-two miles, when we reached the "Agua Azue," (Blue Water,) and encamped. We found two trains of army wagons here, with their escorts. I cannot imagine why this place should ever have been called "Blue Water." It is a long, ditch-like hole, extending about half a mile, and probably twelve feet in width, by an average depth of two and a half. The water, which, from its name, should be blue, is the deepest colored red brown I ever saw; even more colored than the Pecos, of Texas; differing, however, from that wretched stream in this, that the water is sweet, palatable, and wholesome.

The meadow here embraces, in all, probably two thousand acres of uncommonly fine land, and is covered with a beautiful grass, of a kind

I have not before met with in this country. It grows quite tall, and is very pleasant to the taste and seemingly nutritious; in color a blue

green, and very much resembling the blue grass of Jamaica.

There is but little wood immediately at the water, though we found enough drift trash for cooking. A mountain range, which extends all along the road we travelled to-day, and about five or six miles distant, seems to carry good wood in all parts of it. The foot-hills are covered with small cedars, and the higher mountains with large pine trees. On our road to-day a bear crossed our track, just out of gunshot, ahead of us. Thorburn and I started to cut him off, in some hills to our right, for which he was making, but Bruin outran us, and we gave up the chase, completely out of breath with running.

This evening we have killed a few snipe, which, cooked on a stick,

with alternate slices of bacon, have made us a nice supper.

Colonel Loring having turned off the road to a spring, we passed

without seeing his command, and shall await his arrival here.

August 22.—The night has been cloudy, with rain, and this morning the sky is still overcast with occasional showers. Fortunately, we have an Indian rubber blanket with us, which protected us both very well, our blankets being spread on the ground close together. Made our breakfast on snipe killed this morning, some black birds. and a piece of mutton we brought from camp with us—a better and a heartier one, and eaten with a more contented mind, than many a one eaten this morning at the best hotel in New York. This morning the colonel joined us, and in the evening we proceed together to Fort Defiance. Leaving at 2 o'clock, we rode, through a driving rain and heavy mud, but over a very level country, fourteen miles, and encamped at a muddy spring of sulphurous water, unfit for man or beast. Fortunately, we had filled our canteens at the Agua Azue, and so were provided with good water. Made a pleasant camp in the shelter of a pine grove, but had poor grass for our animals. On our right runs, bounding the valley, a curious range of red sandstone bluffs, some hundred feet perpendicular in height, and stone abutments extending into the plain like capes at sea. This curious formation is said to extend for a hundred and twenty miles to the northward of On our left the mountain is covered with fine timber—cedar The plains are filled with rich gramma grass, which is and pine. now hardly long enough to allow our animals to graze on, but which is rapidly springing up everywhere.

August 23.—Yesterday's remarks would apply perfectly, without change, to to-day's travel. We have had the same rain, followed up the same valley, had the same curious range of red sandstone on our right, and finely timbered mountain on our left; the same freshly growing gramma grass; in fact, everything just as yesterday. The valley through which we have travelled is apparently very level, and the road excellent. At noon, having made seventeen miles, we encamped in a fine grove of pines, just in time to shelter us somewhat

from a heavy rain squall.

Started in the afternoon and travelled six miles, and encamped near some rain water. Grass tolerably good. The grass throughout this region is now coming on rapidly, and, once well up, will remain good

during the winter, and until the first of June. It is nearly all

gramma.

August 24.—Started about 7 and travelled nearly eighteen miles. when we encamped on the Puaco, a deep gulley, in which we found water. We are now on the western slope of the Rocky mountains, and the waters from this point all reach the Pacific. Our ascent has been so gradual that no one would have supposed, from the character of the road, we were ascending at all, much less that we were approaching the summit of a most formidable range of mountains. Not even a hill of any size has obstructed the passage of our wagon, and our mules are as fresh after their day's work as though we had been travelling on the great plains. The country through which we are passing is all well timbered with pine and cedar. This evening we found a vein of coal quite near the road where it crosses the Pecos. It seemed to us of excellent quality, and was about two feet in width. It cropped out in two places, and seemed equally large at both. brought off specimens of it, which we kicked up with our boots from I subsequently learned that coal in large quantities existed near Fort Defiance and was used at the government shops by the blacksmiths, and found of excellent quality.

A huge rock, which was so perfectly balanced on another that it resembled the rocking stone of the Druids. A very slight exertion caused it to oscillate backwards and forwards like a cradle, though I am sure all of our party could not have lifted half of it. After great exertion, and prizing it with a pine log, we at last overcame its balance and sent the huge mass crashing to the foot of the cliff. This afternoon we came on about ten miles, and finding good grass, wood

and water, encamped.

We are now about twenty miles from Fort Defiance, and shall breakfast there to-morrow. Since leaving Albuquerque the weather has been delightfully cool, and at night one finds a pair of blankets hardly enough to keep him comfortable.

Last night the dew was very heavy, amounting almost to rain. This evening mosquitoes are very abundant; but, as the sun goes down,

the night is too cold for them to trouble us at all.

August 25.—Started about 6, and after travelling for some hours over a beautiful country, where coal seemed everywhere abundant, we met Captain Carlisle, who was on his way in the ambulance to meet Colonel Loring. As we stood in the warm sun of August, it was most refreshing to see the captain's servant throw off the folds of a blanket from a tub in the bottom of the wagon, and expose several large and glistening blocks of ice, while at the same time the captain produced a delicate flask of "red eye." In ten miles more we reached the post, and were most hospitably received by the officers. Thorburn and myself accepted the invitation of Dr. Irving to live at his house, and are indebted to him for a great deal of hospitality.

August 26.—Rose early, and, with Thorburn and the doctor, took

a long walk.

This post is situated at the mouth of a cleft in the mountain, by which the very backbone of the mountain seems to have been cloven down

to the level of the plain; nothing I have ever seen hitherto compares with it. Fancy a great mountain range running in an unbroken line for miles and miles, and here rent asunder, so that a road perfectly level passes directly through what would otherwise present an impassable barrier, and the rock rising in a solid mass, five hundred feet perpendicular, on each side. This cleft is about a hundred yards in width and about three miles in length. Through the centre trickles a scanty stream, which serves to water the gardens of the garrison, which are all made in the cañon, and which seem to be in a most flourishing condition, especially the potatoes. This vegetable is found in this vicinity growing wild. Our walk this morning was constantly through the grandest scenery, and fully repaid us for rising so early.

August 27.—This morning, everything being in readiness, we take leave of our kind and hospitable friends and start upon our journey into the wilderness. No one who has not commanded an expedition of this kind, where everything ahead is dim, uncertain, and unknown, except the dangers, can imagine the anxiety with which I start upon this journey. Not only responsible for the lives of my men, but my reputation and the highest wrought expectations of my friends, and the still more highly wrought expectations of envious enemies—all these dependent on the next sixty days' good or evil fortune. To-day commences it. Let us see what I shall say in this journal, if I live to say anything, on the day of my return here. Left the post at 2 p.m., and travelling over a very pleasant rolling country, reached camp twenty-two miles from the Fork, at a spring called the Collito. our way we passed the spring called Amarillo, seven miles from the post. The water was the coldest I have ever tasted where no artificial means were resorted to.

At our camp to-night the grass is not good, though wood is plenty-

cedar and pine.

August 28.—Raised camp at 5 and travelled until 9; country rolling and heavily timbered nearly all the way with pine. excellent, but water not to be found. Grass very good in many places. I stopped to rest the men on the Puerco, (the fifth river we have seen of that name,) but found no water in the river. We remained at the Puerco two hours, when we took up our march for this place. Course to-day and yesterday southerly. We found two steep but not high hills on the road this evening, but nothing to make double teaming Fine timber everywhere—cedar and pine. The road has run, since leaving the spring near the fort, almost entirely through level cañons of sandstone sides, and on the left hand very abrupt The attrition of water has worn them in many places into the most curious and fantastic shapes. Thorburn took a sketch of one this morning, which resembled, on a gigantic scale, an Italian road-To-day our journey has been twenty-six miles—course side shrine. southerly.

We encamped at the Posos, (wells,) a grassy vega of about one hundred and sixty acres, where the water and grass are good and timber abundant—cedar and pine.

Thorburn and I have passed the evening in anxiously examining the very meagre notes of Aubrey, who passed somewhere near where

our trail will go. We have tried hard to reconcile it with the very imperfect maps of the wilderness, but both are so vague that I fear

we shall profit nothing by them.

August 29.—Arrived at Zuñi, an old Indian pueblo of curious aspect; it is built on a gentle eminence in the middle of a valley about five miles wide, through which the dry bed of the Zuñi lays. As we approached, cornfields of very considerable extent spread out on all sides, and apparently surrounded the town. This place contains a population of about two thousand souls; the houses, although nearly all have doors on the ground floor, are ascended by ladders, and the roof is more used than any other part. Here all the cooking is done, the idle hours spent, and is the place used for sleeping in summer. Each house or family has a little garden, rarely over thirty feet square. which is surrounded by a wall of mud. Inside of these, and completely encircling the town, are the corals for sheep, asses, and horses. which are always driven up at night. We saw here many Albinos. with very fair skins, white hair, and blue eyes. The Indians raise a great deal of wheat, of a very fine quality, double-headed. squaws are more expert at carrying things on their heads than our southern negroes. I saw one ascend to the second story of a house by a ladder, with an earthen jar containing a full bucket of water, without touching it with her hands. It was quite amusing to see the men knitting stockings. Imagine Hiawatha at such undignified work. The old Jesuit church is in ruins; but a picture over the altar attracted our attention from the beauty of four small medallion paintings in each corner, which were very beautifully done. After much rubbing off the mud and dust we made out that it was painted by Miguel somebody in 1701. White intercourse (traders) with these Indians seems to have destroyed with them all the respect they had for the Catholic religion, without giving them any in return. Like all Indians who have a fixed abode, they are quiet and inoffensive. knowledge of this fact induced me to endeavor to establish the same system of old missions in California; but the government did not appreciate the fact as I did, and it has not been carried out. We found here a few indifferent peaches, the only effect of which was to carry us back, in fancy, to home at this season. The melons also were quite poor, almost unfit to eat.

For an account of these people, as they were centuries ago, see Coronado's expedition. For more modern accounts, Whipple's answers every purpose, and is very interesting. Salt, of the finest quality, is found near here by the Indians in the greatest abundance. There is no wood nearer the town than five miles. After leaving camp this morning we had no water until our arrival here. The grass is good, and the wood on the road abundant, until getting within five miles of

the place.

Distance made to-day nineteen miles.

August 30.—We spent the morning in arranging a trade with the Indians for corn. The men were all day and until midnight shelling it.

August 31—Camp No. 1.—Got off at 11 o'clock, and travelled until

6 in the evening very pleasantly over a rolling country.

There has been so little rain that there was no water at the usual water holes, two of which we passed. The grass was everywhere of good quality, but the drought had shrivelled it until but little remained. It was all gramma. At 6 we encamped on good grass, but without water. The high rolling prairie, over which we have travelled to-day, has good wood, cedar and pine, and plenty of it everywhere.

September 1—Camp No. 2.—Up at 4 and off at 5 o'clock. We travelled four miles over a level table-land, where the prairie dipped suddenly for a distance of three hundred feet; only about fifty yards was steep, and this our wagons descended without any trouble whatever, other than locking. The perpendicular height of the table-land, over the level of the valley, was about three hundred feet. The valley into which we descended was probably five or six miles in width, and bounded by low hills. Crossing this diagonally, and keeping our good ground and westerly direction, we passed over undulating prairie land, covered with grass for twelve miles, when we arrived at Jacob's Well.

This is decidedly the most wonderful place of the kind we have yet The traveller, following the trail on a level plain, comes suddenly to the brink of a perfectly circular hole of about a quarter of a mile in circumference, and a hundred yards in almost perpendicular descent. The sides of this hole slope very steeply nearly to the bottom, where a basin of apparently very great depth, and about sixty yards in circumference, completed the picture. Around the edges of this pool grow rushes and a few small willows and cedars. water is agreeable to the taste, though a little brackish, and in it are quite a number of fish. It is only accessible by one trail, which follows the nearly precipitous sides, winding gradually down. Immediately around the well there is no other wood than greasewood, though there are plenty of small cedars at a quarter of a mile distant. I found in the well three blue-winged teal, all of which I killed and found very fat. Our camels, which I packed heavily with corn at Zuñi, (about 750 pounds each,) get along very well, and came into camp this morning a short distance behind the wagons. this morning a fine band of antelopes. Left Jacob's Well at 3.20 p. m., and following a westerly course over a rolling prairie, covered with the finest gramma grass, arrived at Navajo spring, where we found good grass and water. Since leaving Zuñi we have seen, at times, indistinctly, Whipple's trail, and have travelled in its direction most of the time. This evening we struck it just be-We have made this evening nearly seven miles, fore camping. making, for one day's journey, nineteen miles.

To our left, and bearing nearly east, our guide, a Pueblo Indian, pointed out the ruins of an ancient Indian town, which he described as being very curious; but as it was dark when we encamped, I did not visit it. From this place it must be about six miles distant. The cottonwood trees growing near it would be a good guide for any future traveller. At this camp there is no other than greasewood bushes, but within a mile cedar is abundant. Soil, a sandy loam.

September 2—Comp No. 3.—Got up at 4½ a. m., off at 6, and at 8 arrived at the Puerco, but found no water. A little further on, say

a quarter of a mile, found a little rain water in a fork of the Puerco coming from the northwest. The Puerco has a few cottonwood trees on its banks, and at a short distance on the hill-sides, scattering cedars of stinted growth. At 11 we came to the dry bed of the Rio de la Xara, after travelling from our last camp nine miles, over a rolling country, very easy everywhere for our wagons. At the crossing we dug, but found no water; following down the dry bed of the stream for two miles, on the right hand side, is a mass of sandstone rock of considerable size, say half an acre; from this, two hundred yards down, on the left, is more rock, two of which overhang the verge of the bank. Under these, by digging a few inches, we found water sufficient for all our animals, of which we have a hundred and twenty. There is no timber here other than greasewood bushes. The soil is light red clay and sand mixed.

Since leaving Zuñi, the weather has been delightfully cool and

pleasant for travelling, and grass good.

Encamped on the Carisso, which is thirteen and a half miles distant from Navajo spring, our last camp. Travelled six miles to the westward, and encamped on a high table-land near the Xara. Grass abundant, but no wood. The country to the northwest is much broken, and very rugged; Sierra Blanca is within sight to the southward, and Moquis to the northwest. The road came up to the banks of the Xara, which we found exceedingly steep, and the whole valley intersected in all directions by ravines, and red clay, mixed with brown sandstone, arroyos, and gullies. Passing a narrow neck of land between the Xara and some very rough country towards the east, we reached a high table-land, covered with beautiful grass, where we encamped; no wood. We found, on the left of our trail, on the table-land, a huge petrifaction, apparently a large tree of probably three feet in diameter.

September 3—Camp No. 4.—Got up this morning at 4, and off

at $5\frac{1}{2}$.

It rained on us from the time of our camping last evening until our

arrival at this place, Rio de la Xara.

We plodded along this morning through a cold hard rain for a distance of six and a half miles, descending gradually the high tableland on which we had encamped last night. On arriving at the banks of this river, we found no difficulty in getting down without locking a wheel. The country to the west and north, like that of yesterday, was broken and rocky; to the south and east it has softened into a hilly country. Descending in the bed of the stream, the waters of which were discolored and muddy, about a quarter of a mile we found a ravine opening into it, in which was clear water among some cottonwood and much undergrowth, indicating a spring. As one enters this ravine on the right hand side, and nearly opposite the cottonwoods, is a rock thirty feet in height, a part of the brown sandstone cliff, forming the sides of the ravine; and nearly at its base, protruding through the solid rock, and completely surrounded by it, is the butt end of a large petrified tree, the diameter of which is almost three feet; before reaching this, is a detached rock of the same character, through which runs another petrified tree.

At 9, we encamped here for breakfast, the grass being good and wood sufficient. Our course to-day has been southwest by south.

Left the Xara at 12, and crossing a low ridge, entered the broad valley of the Pecos. At this point, the valley is about five miles in width, and bounded by low hills on either side. Three or four miles after leaving the Xara, we crossed two sandy beds of streams emptying into the Pecos; but which, I presume, carry no water, excepting in

rainy weather.

As we opened the valley, we could see at a considerable distance its point of junction with that of the Little Colorado. Travelling down it, is seen on the left, rising beyond the low hills which bound the valley, the single peak of a mountain, sugar loaf in shape, and looking blue in the distance. It is the most prominent landmark in sight. To the southwest are two conical buttes, which are near the Little Colorado. The soil this evening has been of the same character as that previously noticed—light, sandy loam. There is no wood on the valley, and but now and then a cotton-wood on the banks of the river. The ground is strewn with pieces of petrified wood, and very pretty agates are constantly found.

The weather is still unsettled, and the chances are in favor of our passing another night in the rain, with wet blankets to begin with. It is very cool, and more like our November in the latitude of Virginia, than September. Our course to-day has been a little south of west, and the distance made, fourteen miles. Grass good, and water

plentiful.

September 4—Camp No. 5.—We were off this morning at 6 a. m. The pulling was very heavy, owing to the rain of yesterday and last Nearly all night it rained on us, and sometimes heavily; but

the morning broke bright and clear.

Our road was made this morning down the banks of the Pecos, towards its junction with the Little Colorado. About three miles from our camp, we came to a shallow lake, near the river, where it seemed as though the water might be permanent. The soil is still the same. and and clay mixed, though clay predominates. Sprinkled over it we found many beautiful stones of various hues and colors, some of which we preserved. Finding the road bad, from the soft character of the soil, we crossed the river for better travelling; but soon after recrossed it where a point of sandstone rock comes down to the banks, and quite near the junction of the two rivers. The Pecos, where we crossed it, contained six inches of water in depth, and about twenty feet in Turning the angle of the point of rocks, we came in sight of the cotton-wood trees of the Rio Colorado, at a distance of three or four hundred vards.

The river comes in from the southeast. It was a discolored and shallow stream, some one hundred yards or so from bank to bank; but the water not wider than as many feet, and not over a foot in depth.

The valley of this river is three miles across, and grass plentiful in the bottoms, as well as on the hills, which are quite low. abundance of large cotton-wood trees in the bottom, which resembles very nearly the bottom of the Rio Grande. The weather this morning is quite warm, giving us a fine chance to dry our blankets; and the men are pleased again, after cooking for several days with greasewood, to see the fine large trees which grow in such abundance here. We have travelled this morning, eight and a half miles, reaching this breakfast camp at 9 o'clock. Our course has been, for the morning, southwest.

The mountain peak to the south, which I mentioned yesterday, I have called Mount Whipple, in honor of the distinguished officer who bears that name.

Left camp at 2.30 and travelled for some distance down the river bottom to a point of rocks which came out from the bluffs towards it, and turning this, we came to and crossed Leroux's fork, which comes in from the northward; the country in that direction looking clean

and open.

The stream was quite shallow, not over a half foot in depth, and about fifteen in width. A few cottonwoods lined its bank, and served to mark its course. Proceeding onward in the river bottom, and finding the road heavy with mud, we took a course due west; and ascending a long slope, came suddenly to its termination, from whence we enjoyed a magnificent view. The whole river, for miles, was spread out before us; and far in the distance, over the green tops of the cottonwood trees, San Francisco mountain, rising apparently out of a vast plain, stood as the landmark which was to be our guide for many days. Here we encamped for the night. The country looks open and promises a level road. Should it turn out as much so as that we have passed since leaving Zuñi, we have every reason to congratulate ourselves. The soil over which we have passed this evening, especially that of the hills, is excellent; the grass fully attests that The weather this evening is delightfully cool and clear. is abundant on the river, which is quite near camp. We have travelled a little south of west to day, and made fifteen miles, although the rains have completely saturated the ground, and in many places we have found the road heavy with mud.

September 5—Camp No. 6.—The promise which last evening held out of fair weather has not been fulfilled. It rained shortly after sunset and at intervals during the night. We were off this morning a little after 5. The trail was heavy with mud from the last three days' rain, and yet, although it made our travelling unpleasant, I am pleased to see that the wheels of our heavy and heavily loaded wagons cut in but very little, and most of the time, not more than halfway

up the fellies.

Since we struck the river I have observed none of that salt ground, so characteristic of all the streams of this region; and the grass of the river bottom seems of a decidedly better quality, while the low hills which bound the view are everywhere covered with the best gramma grass.

The soil of the bottom is light clay unmixed; and that of the hills, clay of a firmer nature, and mixed with gravel and pebbles, many of

which are very pretty.

The view is unchanged since yesterday, San Francisco mountain looking no nearer for the many miles we have plodded towards it.

At 8 we encamped for breakfast near a little fork of the river which comes into this from the north.

The weather is cool and cloudy and threatens more rain. Wood abundant on the river, but none on the hills. We travelled this morning nearly five miles on a course about north northwest, and cut down two arroyos to admit the passage of our wagons. We left our breakfast camp at noon and travelled until 5, crossing over many

arroyos draining to the river.

The road was perfectly level, with the exception of the gullies, which we worked down without difficulty. At 4 we passed the ruins of an ancient Indian pueblo. It seemed very old and was scarcely to be traced, except by the broken pieces of pottery which were scattered over the ground. It is a constant source of wonder to us, to see, by the evidences the number of these ruins afford, the dense population this country has once sustained. Scarcely a mile but has its mound of earth and bits of broken pottery ware to mark what was once the abode of a race whose very name has passed away. In those examined this evening we found parts of baked earthen pipes, evidently for the purpose of conducting water, and much of the pottery was prettily figured. The sites of all these places show some eye for beauty of scenery, too; nearly all are placed on gentle eminences overlooking the river and valleys, and not on steep mesas, like those of modern times, and which were built under the influence of fear, after those Bedouins of America, the Apaches, had commenced their ravages over this part of the world. We came eleven miles this evening, making for our day's journey seventeen miles, on a course little north of west.

The soil has been clay, with a little sand; weather pleasant and cool; wood, water, and grass abundant. We passed this evening a large Indian trail going to the north. It seemed about a week old, and we suppose it to be of the Ganoteros, with whom we have been

and are at war.

September 6—Camp No. 7.—Up at 4 and off at 5 a. m.

It rained on us from sunset until morning; and in consequence of which we found the pulling through the river bottoms unusually heavy and fatiguing to our animals. Our trail was over a perfect level, but the rains had rendered the stiff clay soil of the consistency of tar, so that it stuck to the wheels in large pieces, and to the feet of the mules like snow balls. Add to this the fact that the road was unbroken, there not being even a trail over it, and one may imagine how difficult a job it was to work wagons along. Nevertheless, the soil was not at all boggy, so that with heavy wagons we did not once stall. Passed this morning another large Indian trail going to the northward and crossing our track at right angles.

The weather this morning is bright and clear, but not hot.

We encamped for breakfast near the river, where the grass is excellent and wood abundant.

In sight, a little in advance of us, we see the tops of the cotton-wood trees of Cotton-wood fork, a tributary of the Colorado Chiquito, coming in from the north. Our course this morning has been nearly west. The camels are so quiet and give so little trouble, that sometimes we forget they are with us. Certainly there never was any-

thing so patient and enduring and so little troublesome as this noble animal. They pack their heavy load of corn, of which they never taste a grain; put up with any food offered them without complaint, and are always up with the wagons, and, withal, so perfectly docile and quiet that they are the admiration of the whole camp. At starting there were many, a large majority of the men, who scouted the idea of their going with us, even as far as Fort Davis; but at this time there is not a man in camp who is not delighted with them. They are better to-day than they were when we left Camp Verde with them; especially since our men have learned, by experience, the best mode of packing them.

We have made this morning five miles and a half. The valley of the river bottom here is about six miles wide. On either side the hills slope gradually to the meadow land of the bottom, and, ascending them, extensive plains spread out for great distances, all covered with

fine grass.

A spire of the Mogollon mountains and a large blue ridge are seen

ahead of us, but at a great distance.

Starting from our breakfast camp at 11, we pulled through the same stiff muddy soil until 1, when the Cotton-wood arrested our further progress. I ascended this stream some distance, and found it running through a wide valley, bounded by plains and low hills as far as the eye could reach. In the direction of the stream, which is northerly, though a great distance off, we saw many isolated peaks, which are said to be in the Moquis country. The stream itself is swollen by rains, and, although now some six feet deep, is doubtless

nearly dry when the rains cease.

Finding a good ford over the Colorado Chiquito, and not knowing how soon these constant rains might render it impassable, and, above all, as we would be bound to cross it the next day, I determined to do so at once; so I followed down the Cotton-wood, crossed the Colorado Chiquito, and after going a mile or two down it, encamped near a singular stream coming in from the south. This stream gives no notice of its existence until you arrive directly on its banks, having neither cotton-wood trees nor willows to warn one of its whereabouts. I explored it for some distance up, and found it issuing out of a rocky cañon with precipitous sides. The water is clear, and the immense amount of drift wood, and its character, shows that it comes from a country where cypress and pine of great size abound. Just above, or nearly directly opposite to where we crossed, comes in another stream from the south; but the waters of this are muddy and the banks dotted with cotton wood trees, whereas the waters of the other are clear, showing it to come all its way over a rocky bed.

The climate of this country is exceedingly pleasant, and from the vast quantity of rain that has fallen on us, I should suppose crops

might be easily raised without irrigation.

Passed this evening more Indian trails, all going to the northward. Saw much beaver sign, and one fresh dead one, caught by Mr. Coyote last night, and only partly eaten. We saw large fires, Indian signals, in the Mogollon mountains this evening. Grass excellent and most abundant, and for water, the whole river. We have made to-day but

eleven miles, but, if it does not rain again to-night, shall make up for it to-morrow.

September 7—Camp No. 8.—Up at 4, and started at 6 a. m.; but a team having stalled in the river, at the mouth of the little creek mentioned yesterday, it became necessary to take out all the loading. This delayed us until 9, when, after coming three miles, we encamped to breakfast.

We have seen indications of the greatest abundance of game for the past three days. Elk, antelope, and deer, besides beaver and coyotes in large numbers. We leave the river here and take across some low hills, on account of a bend it makes to the northward, and are glad to get to the hills again, where the road will be less monotonous than these flat river bottoms. Wood, water, and grass good, and the weather warm and clear.

Last night we had no rain, though its want was nearly supplied by the heaviest dew I ever saw, and which penetrated our blankets thoroughly. To-the north, yesterday and to-day, we have had the peaks of Rabbit hills in view. They seem conical points, rising to a considerable height above the general level of the low hills and plains around them.

We left camp at noon, and following a stretch of country as level as a billiard table, crossed, after coming five miles, a slight elevation, from which we came into a broad, level and beautiful valley, stretching as far as the eye could reach to the westward and southward. this valley, the hills of which on both sides are gentle slopes rather than hills, we found a small stream of running water, but very narrow, scarcely over a foot in width. Passing this, we came to a mesa or table-land, the ascent to which occasioned some delay, as it was necessary to cut down the hill before our wagons could go up. Once on the summit, the travelling was again level, until after crossing it, when we came to the abrupt descent of its other side. Here we encamped, having made ten miles, and for our day's journey over twelve. The grass throughout the day has been most abundant, and we have constantly exclaimed, "What a stock country!" I have never seen anything like it; and I predict for this part of New Mexico a larger population, and a more promising one than any she can now The Indians once removed, or kept in check by military posts, this country would be immediately settled with a large popula-The river is in sight on our left, well wooded with cottonwood; and as far as one can see, a level country extends to the southward and westward, covered with gramma and bunch grass. Across the river the Rabbit hills look picturesque, but rugged, as, indeed, does all the country in that direction.

The weather this evening has been bright, cool, and pleasant, and the night is cloudless. To-day the soil of the bottoms has been clay, with a little sand; on the mesas it is clay and gravel. For short distances to-day we have had it of a light character, almost like ashes.

We encamped on the top of the mesa to-night, without water, having watered our animals just before ascending it. On the mesas there is only grass wood. In the river bottom, to our right, wood abundant. Our general course to-day has been northwest. We have

seen deer and elk, and the fresh tracks of them are innumerable all over the valley. The valley here, including both sides, is about fifteen miles wide.

September 8—Camp 9.—Up at 4, and off at 5.30 a. m.

Descending the mesa, on which we encamped last night, we struck the level valley in a few hundred yards, and our course from that time has been over a succession of level valleys, divided from each other by gentle ridges of very easy grades, generally a mere swell in the prairie. All of them were filled with fine grass, with the exception of bald places, called by the Mexicans playas. These are always of clay, perfectly flat and smooth, and for the most part hard and firm.

At 8 o'clock we found water in two pools, directly on our travel ling direction, and without going out of our way to seek it, so that

doubtless there are others of the same character.

Shortly after leaving the water, we came, by an inclined plain, to an immense plain or mesa, which seemed to extend over a radius of twenty miles. The soil was firm clay, well packed with gravel, and the whole covered with a luxuriant crop of gramma grass. Travelling in a direct line across this, in a direction nearly northwest, but a little to the westward, we came in sight of the river, but at a considerable distance. The grass was so tempting that I determined to camp here for breakfast.

On these lands, lying at a distance from both river and mountain, there is no timber, so that the traveller must cook with greasewood bushes.

Our trail has led to the west and north for the last day or two; but for no other reason than that a cañon, known as Cañon Diablo—a mere chasm in the plain—prevented the passage of wagons in a due west direction. But for this we should now be thirty miles further on our journey. It is described by my guide as being a rent in the plain of about a hundred yards across, and with precipitous sides of white rock. This singular chasm extends for thirty or forty miles nearly north and south, which obliges us to go greatly out of our direction in order to pass its mouth. This is the more annoying as the country directly across it presents to the eye almost an uninterrupted plain, rising very gradually to the base of San Francisco mountain and a long spur of the Mogollon range, which comes out to meet the mountain just mentioned. The weather this morning is like a day in the early part of June

We arrived at camp at 9, having made nearly ten miles, on a course a little west of northwest. This morning, on our arrival at breakfast camp, one of our party came near sitting on a rattlesnake, but fortunately it was discovered in time by a messmate, and I despatched it with a wagon whip. It was of the class known as ground rattlesnake, and, although of small size, said to be of the most venemous character.

We left camp at 1, and soon after descended from the mesa to the river bottom. The descent was by a gradual slope. Since leaving the river, we have never been over five miles from it, and the road to it always easy, so that should others, following our trail, not find water where we did, they have only to turn off to the right and make

the river. Travelling down the river bottom, which is here a wide valley on both sides, we came, in ten miles from the previous camp, where we breakfasted, to the mouth of the Cañon Diablo, where we encamped. This point is well marked by four little red sandstone buttes, which rise from the meadow near its mouth, and cannot be mistaken, as they are of peculiar form and isolated in position. They are about thirty or forty feet in height. We are now gaining on San Francisco mountain, which looks down upon us this evening, and tomorrow we cross to encamp near its base. To-day the soil of the table-lands has been the same as that of yesterday. That of the bottom is sand and clay mixed.

The weather this morning is cool and pleasant, and, though clear to us, we see showers falling ahead, and hear the distant roll of thunder.

We arrived at camp this evening at 5.30 p.m., having made nearly twenty miles to-day with our teams. This, over an unbroken road, makes comment unnecessary. Our course has been about west northwest. In yesterday's notes I neglected to mention that up the steep mesa we ascended, and where it was necessary to double teams, the camels packed their heavy loads without the least apparent difficulty, and without a stop, some of them having nearly a thousand pounds, including the cumbersome and heavy saddle. Water, wood and grass abundant.

September 9—Camp 10.—Left camp this morning at 5.30, and came three miles. We then encamped for breakfast, as our guide knew nothing of the country in the direction I desired to go, and it was therefore prudent to give the animals water before we started on the It was necessary to rest the animals a little, and allow the warm sun to make them thirsty, so that they would drink well before starting, for mules, unless very thirsty, will not drink early in the After breakfast the animals were all sent back to the river. and at 11.30 a. m. we started on a course west by south. cending from the Cañon Diablo, we came to a plain of vast extent, and only bounded by San Francisco mountain ahead, and more distant ones to the southward. To the north nothing obstructed the view. This great plain seemed to ascend by a gradual slope to the westward until it met the base of the great mountain of San Francisco. travelled over it, we found it occasionally breaking into gentle valleys and small ravines, but all easy and rolling, and between them level floors of extensive table-land; the whole covered thickly, as far as the eye could reach, with the richest crop of the most luxuriant gramma The entire plain is covered with stones and loose pebbles, and parts of it with small pieces of lava, and occasionally masses of it in rocks, which sometimes reach the altitude of fifteen or twenty feet. Altogether the view, the rich green grass, the distant mountains, and our moving camp wagons, sheep, horses, and camels, made up a beautiful picture. At 3 I sent off three of my men-Stacey, Porter, and Bell-to a line of distant trees, which seemed to promise water, and kept one direction myself with camp. At 4 we came to the banks of a rocky cañon, in which we found abundance of wood and water. Indexing from the number of Indians who had evidently made this

place a resort, I should think water might be found here at all times. The sides are very precipitous where we found the water, and on going around to the right of the trail, which we went down, I discovered a cave, which had lately been used by Indians as a chamber. The grass on which they had made their beds was still there, as well as a little wood not yet consumed. The chamber is natural and well arched. It would probably shelter twenty-five men quite comfortably.

We came to-day, in all, fifteen miles, on a course west by south, and encamped here at 4 o'clock. The weather this evening is quite cool, and we can see showers falling in the mountains ahead. To-day nothing has impeded our progress but the grass, and this trail, travelled by one large emigrant train, will make as firm and fine a natural road

as could be desired.

The creek on which we are encamped is fringed with black walnut of remarkably close texture, and many of them of considerable size.

There is also gumpum weed in abundance.

September 10—Camp 11.—Up at 4 and off at 5. Following up the creek we came to a curious sort of fortification, or remains of houses. One was of sixteen feet square, and containing but a single room; in another were three rooms, or what had been such. They were of stone, but no lime had been used. All the joints were regularly broken, and the sides, which were over three feet in thickness, were perfectly straight. Only about three or four feet in height remained; the rest had fallen, and lay in fragments at the base.

The morning was cool and fresh, and the night had been quite cold. As the sun rose the temperature became delightful, and has remained so all day. Following the still ascending plain, we approached the mountains, and, crossing a ridge, we came to a table-land from which the view was truly beautiful. Ahead to westward, the whole country was broken into gentle hills and valleys, covered with a heavy growth of noble fine trees, except here and there a mountain meadow of fresh green grass, while to the eastward lay the great plain over which we had so recently passed.

In one of the pleasant mountain valleys we encamped for breakfast; but, unfortunately, it bore no water. Thorburn and I crossed ahead to explore, and found fine, clear water, about a mile from camp, in

very much such a place as we discovered it last evening.

The soil to-day has been of clay mixed with decomposed lava; the grass everywhere abundant. We have made this morning eleven miles; our course west, ½ south. We arrived at breakfast camp at 10.30. Game has been seen to-day in abundance—antelope and deer.

This morning we left breakfast camp, and following up the little valley in which we were encamped, turned, after going half a mile, the base of a hill on our left and came around it to the water we had discovered this morning, which, on examination, proved to be the same canon on which we had encamped last evening, and which was also one of Whipple's camps in 1853.

Cosnurio caves.—These caves are quite extensive, and divided into different apartments by walls. I am quite sure these walls and divisions are not the work of the miserable Indians who at present occasionally make use of them, and who are too lazy and indifferent to

such matters as domestic privacy to make any separate apartments. I think, most probably, this was the work of the race which made the pottery fragments, which are scattered everywhere on the surrounding hills. Certainly it is not of the present tribes, a people differing but little from the root diggers of the great desert and Pah-utes.

One of the escort went off this morning just before we reached breakfast camp, and did not come in before we left. A party was sent to hunt him, but were unsuccessful; therefore I shall camp here this evening, although it was my intention to go twelve miles further, in order that, by building fires and making signals, he may have a chance of being found; but I hardly expect, in fact, I fear he will prove a total loss.

We have made in all to-day nearly fourteen miles on nearly a west

course

The evening is chilly, making camp fires quite pleasant.

On a further examination of the creek I found water in abundance, both above and below where we struck it this morning, and I think quite likely it may be found here at all times. Wood and grass abundant.

Our road this evening lay through a pine forest. A tree I measured of clear pine, and seemingly solid as possible, was five feet in diameter.

The soil is the same as this morning, clay covered with decomposed lava. We arrived at camp at 3 o'clock, leaving our former one at 1.30.

We have had an overhauling of the camels this evening; find their backs all doing well, and the animals improving in flesh. The rocks and lava over which we have passed, sharp as it is, have so far had no effect whatever upon their feet.

September 11—Camp 12.—Up and off at 5.30 a. m.

The soldier who was missing yesterday has not appeared, although bright fires were kept up all night. It seems hard to determine whether he deserted or went off in a fit of mental aberration. To track him over the rocks would be impossible, and the attempt a useless waste of time.

Leaving our last night's camp, where we had a cold night, and a little frost and ice on the edges of mess kettles, which were left with water in them, we followed up the valley until half a mile brought us to a short hill, ascending which, we came to a glorious forest of lofty pines, through which we have travelled ten miles. The country was beautifully undulating, and although we generally associate the idea of barrenness with the pine regions, it was not so in this instance; every foot being covered with the finest grass, and beautiful broad grassy vales extending in every direction. The forest was perfectly open and unencumbered with brush wood, so that the travelling was excellent.

There has been less of stone to-day, and the soil seems all of rich clay and loam.

Fresh Indian tracks have been seen, probably made last night or yesterday. We came to this breakfast camp at 10 o'clock, having travelled ten miles. Our camp is now at the base of San Francisco

H. Ex. Doc. 124-4

mountain, which looks down frowning upon us. We found no water at this place. Our course this morning has been a little south of west. A shower or two fell on us this morning.

Leaving breakfast camp at 1, we travelled rapidly over a lovely country of open forest and mountain valley, which continually drew exclamations of delight and surprise from every member of the party. Even the stoicism and indifference to beauty of scenery so characteristic of the lower class of Spanish population was moved, and as we passed successive vales and glades, filled with verdant grass knee high to our mules, dotted with flowers, and the edges skirted by gigantic pines, they constantly gave vent to their delight in fervent ejaculations of praise.

After going a few miles, we found it necessary to ascend a mesa, which was rough with stones on the sides, and with flat rock on top. Crossing this, we descended into a pretty valley, where we found some holes of water; but, these not being sufficient, I sent off a man to explore, and in a quarter of an hour we heard his two shots, which was the signal agreed upon, announcing the discovery of running water. Following the direction, we crossed a low hill, and found the water rising from a marshy place, and running, or rather trickling through high grass, down a short cañon not over a hundred yards in length or more than fifty in width. The sides of this cañon are some ten feet high, and of solid rock, and should this become an emigrant trail, by throwing a dam across the lower end, water sufficient for ten thousand head of cattle may easily be obtained. The expense of this would be but trifling, as the material is all at hand, within twenty steps.

The soil this evening has been rocky on the hills, and clay and black loam in the meadows. We made ten miles this evening, on a course

nearly west. San Francisco spring we found nearly dry.

Our camp is under San Francisco mountain, which rears its head far above us into the region of eternal snow. One of its sharp peaks is now covered with snow, looking at that great distance like a white cloud, and is doubtless at all times so. The peak is bare rock, for the vegetation ceases far below it, but from the point where the hardy pine can grow to its base, it is clothed with a noble forest of pine trees.

To-day we saw, besides other game, such as bear, deer, and antelope, some partridges resembling in plumage and habits our own bird at home. They are the first of this species we have seen, all others having been of the blue and gray variety of New Mexico; and the sight of these familiar birds aroused a momentary pang of homesickness, such as I have not felt for many days. Some elegant squirrels were killed to-day very large and beautifully furred—a silver grey with a rich brown down the back. Scouting close to the mountain I discovered a singular tree. The bark had all the appearance of white oak, while the limbs where cedar. I called the attention of Mr. Williams to it, who has preserved a piece of the bark as well as some of the foliage. Our camp is cheerful to-night, and brilliant with numerous fires. The night being cool, the mule guard and camp guard have built various fires around the spaces guarded, and these, in ad-

j

dition to the mess fires, give a very pretty effect, especially as each fire has a dozen logs of the fattest pine upon it.

September 12— Camp 13.—Up at 4 a. m.

Being doubtful of the country ahead I sent off Thorburn and five men to look for water. We unfortunately have no guide, the wretch I employed at the urgent request and advice of every one in Albuquerque, and at enormous wages, being the most ignorant and irresolute old ass extant.

This obliges us to do the double duty of road making and exploring, which is very arduous, besides adding infinitely to my anxiety and

responsibility.

The dew last night was so heavy that on turning out this morning I at first thought it had rained during the night; on inquiry, however, I found it had been perfectly clear. The morning air is keen; but the sky bright and clear. Thorburn got back at 10, repoting plenty of water ahead and a good road, so that we shall start immediately.

Leaving our last night's camp, which I called Stacey's spring, after one of my party, and travelling west by south seven miles, over a country of the same character as that of yesterday, we came to the beautiful valley of Leroux's spring, in which I encamped to water and graze the animals for two hours and a half. The road to the spring, from our last camp, is rough with loose stones of volcanic origin for half the way; but the grass as luxuriant throughout as elsewhere. The timber still retains its large size and abundant quantity. measured to-day a pine nineteen feet in circumference and of very great height.

Leroux's spring is one of transparent sparkling water, and bursts out of the side of the mountain and runs gurgling down for a quarter of a mile, where it loses itself in the valley. To reach it we found it necessary to turn from the course we were steering, and go up into a little mountain glen from which it flows into the valley. The soil, though stony on the hills, like that of yesterday, is a rich

The day is bright, clear, and warm. loam in the valleys.

We left our last night's camp at 11, and arrived at Leroux's spring at 2. We left Leroux's at 4 and a half p. m. and encamped at 7. Our road for the evening lay entirely through a heavy forest of pine, and was rough with loose stones. The grass. however, was as good as usual and very abundant. The road was over a rolling or rather undulating country, and excepting for stones would have been excellent.

Our camp, which is in the midst of the forest, and five miles from Leroux's spring, was soon as brilliant as day with the fires of the rich pine logs. Our animals having drank heartily, did not feel the want of water, and we, having brought some with us, found no inconvenience from it.

September 13—Camp 14.—Up at 4, and off at 5.30 a. m.

Emerging from the pine forest, we came upon a rolling country dotted with isolated hills, and breaking into fine meadow lands, the borders of which were fringed with a heavy growth of pine and, occasionally, a few oak groves.

Passing to the north of Mount Sitgreaves, and between it and Mount

Kendrick, over a beautiful country, though occasionally stony, we came upon two fine springs, which issue from the north side of Sitgreaves' mountain. The first one I called Porter's spring, after one of my party, and the second Breckenridge, after another.

The weather this morning was quite cold, and last night a white frost covered the ground. We have made this morning eleven miles on a course west eight degrees north, and arrived here at 10.30. Water is very plenty and permanent. Game has been seen in num-

bers this morning—antelope and deer.

The country seems to open handsomely to the north; in fact, in that direction it seems a great plain. To the southward Bill Williams' mountain is in sight about twenty-five miles distant. Sitgreaves' mountain about six, due south, and Kendrick's north of east about eight To the west the country looks easy, with valleys and isolated hills, such as we have traversed this morning. The soil this morning has been similar to that of several days past-clay and loam in the valleys, and stony in the mesas and hills. Grass is everywhere good. The appearance of this place is, in the highest source, sylvan. The fine spring attracts numerous antelopes, which appear and disapthen for one forcet with which The appearance of this place is, in the highest sense, sylvan. pear as they glance rapidly through the fine open forest with which it is surrounded, sometimes stopping to gaze at the strangers, and at others racing past at full speed; and the majestic mountains looking bold and grand, and black with heavy timber, at just a sufficient distance to make the scenery of the amphitheatre in which the springs are one of the loveliest valleys we have seen. This stopping to graze has been fatal to two of the antelope, which have been killed by our party with muskets, directly in sight of the whole camp. The day has been delightfully pleasant since 7 o'clock.

Leaving Breckenridge spring at 2 o'clock, we passed over a rol-

ling country on a west course for some eight miles, when a gradual ascent brought us to a stony mesa of level land over which we journeyed for a mile, when, on arriving at the brink, a great surprise awaited us. Here the most extensive prospect lays spread out before Far as the eye could reach, extending to the westward and northward, a wide and level valley of probably thirty miles in width, lead the vision far towards the Colorado, while to the west and south the view lay over a ridge to another valley, seemingly a part or extension of the first, and bounded by a distant range of blue mountains, which I suppose cannot be very far from the great Colorado river. The view was so grand and extensive that we sat on our horses for a long time in silent admiration; I, on my part, only regretting that we could only go in one direction at one time, so that it was impossible to know and see all the view contained. The soil this evening has been less stony than usual, and the grass, though good, is not as fine as that we have

heretofore had.

At 4 we found water in great abundance in a cañon to our right, which was bordered by fine trees. It was a succession of large pools, sufficient for one or two thousand head of animals, and I think, without doubt, permanent wood abundant.

Our general course to-day has been west eight degrees north, and we have made nineteen (19) miles. Could any amount of writing say

more for a road? Nineteen miles with mules that have pulled and are pulling heavily loaded wagons eighteen hundred miles; and to-day we have travelled easily, having encamped at the Breckenridge spring for a considerable time. The camels continue undisturbed by the stony character of the country, and can any day go twice as far as the wagons, besides relieving us of all anxiety on their account as to food or water, for they can eat whatever they may chance to get, or do without anything, and drink only when the water happens to be

perfectly convenient to camp.

September 14—Camp 15.—Up at 4, and off at 5.30 a. m. Travelling six miles over a rolling country in the direction of a wooded butté nearly west from camp, and around the base of which I designed to go; we discovered water about a mile to the right in a ravine. which seems to be a fork of that on which we slept last night. camping in a valley among the cedar trees which cover the country here, I sent the animals to the water while the men prepared break-The soil to-day has been clay and coarse volcanic pebbles. grass (gramma) very good. The temperature of the weather has undergone a very sensible change, being now quite warm althugh cloudy. We encamped 8.30 a. m. As we advance, the country opens handcomely to the westward, and I am now steering for a depression in the mountains due west. I am strongly tempted, however, to alter my course to northwest, for to the northward appears a boundless plain, across whose southern termination our course seems to lead. From an elevation we ascended, I am almost certain a distant mountain to the northward is one at or near the mouth of the river Virgen, and consequently on the other side of the river Colorado. To the southwest is a stack of mountains, one of which is much higher than the surrounding ones, and quite pointed; this I presume to be Picacho.

Our guide has proved so utterly worthless, that I was obliged to send him to the rear yesterday, and only regret that I had not done so sooner. Up to this point he has only served to annoy and mislead me, and it is much better to have no guide, than one in whom you have no confidence, especially as it generally results in your having

to do his work for him.

This evening our road, or rather direction to the westward, led us over successive ravines, all leading to the great plain lying to the northward. Intervening, the ground was covered with a thick growth of pine and cedar trees, and apparently this country extended for a considerable distance until it met a rough looking range of mountains,

which I suppose is the Aztec range.

A consideration of these facts, and the tempting character of the country to the north and west, determined me to after my course, and to endeavor to avoid the mountains by striking out upon the open plain. I therefore followed down a ravine into which the train had descended, and at night encamped near the dry bed of a considerable stream, which entered a cañon a short distance below camp. In the morning I shall follow out this ravine, which is filled with fine gramma, to the plain. I called the valley Gramma, from the quantity of that grass which is here found.

September 15—Camp 16.—Up at 4, and off at 5.30 a. m.

Following down the ravine for about half a mile, to the point of its entrance into the cañon, we crossed it and soon emerged upon the boundless plain, which stretched, as far as the eye can reach, to the north and west. Here I found the travelling excellent, the soil being of clay and coarse gravel. The grass was not so good though the ground was covered with it; but it was, as yet, young and short. In places, however, it was very good.

The curious appearance of the country to the north induced me to make a detour in that direction, with three of the party (Stacey, Bell and Porter) and Thorburn. Travelling over an apparently level plain, we came suddenly to the bank of a chasm of some one hundred feet in depth, and the same in width. Descending this, on foot, for some distance, I found it to be but the main channel into which many others

of the same character, but smaller, emptied.

The sides of this cañon, except in a few places, were perpendicular rock; but the bottom, which was quite level, was filled with fine grass. Crossing this and many others, in search of a point sufficiently elevated to afford a distant view, we spent an hour or two fruitlessly and re-

turned to camp.

Doubtless these canons all empty the great floods, which the drift wood shows they are subject to at times, into the Colorado or Little Colorado at no very great distance, and I felt the greatest inclination to explore one to its mouth; but as we were uncertain where we should find water for our animals, I dared not do it. Last evening it rained quite a heavy shower, and we are praying for it again this evening. The day has been moderately warm, but cloudy towards noon, and rain has been seen falling some leagues to the west.

These plains are treeless, with the exception of a very few scattered cedars of small growth. We travelled this morning eleven miles on a course nearly northwest, (N. 40° W.)

Breaking up our breakfast camp we followed our northwest course, occasionally bearing more to the westward to avoid the numerous small cañons, all making their way to the great one we had crossed this morning. As we ascended the slight elevations which the almost uniform level afforded, we became more and more impressed with the

vast extent of the valley we were following.

On our right, at a distance of probably thirty miles, a long range of precipitous bluffs marked what I take to be the entrance of the Little Colorado into the great river of that name, and most likely at the commencement of the great canon south of these; and the most prominent landmark in view is a mountain of curious form, rising out of the plain and entirely isolated. The sides of this mountain are quite red about half way up, and the shape of the whole somewhat resembles a bishop's mitre. I called this mountain after Lieutenant Thorburn, of the United States navy, to whose services on this expedition I am greatly indebted. To the southeast are Kendrick, San Francisco, Sitgreaves and Bill Williams' mountains, and to the southwest the peaks of Picacho, while all along to the westward is a line of mesas extending into the plain. To the northwest is a range, but so distant as only to present a dim blue line, and between that and us only a vast plain.

After travelling about eight miles, and water having been found three miles to the eastward of us, we turned off and encamped about sundown, having made ten miles, giving us twenty-one for one day's work. We found the water in one of the canons already mentioned, a tributary of the large one. It was abundant in quantity and of excellent quality. Large pools of a hundred yards in length were found above and below the place where we struck it, and the green gramma grass covered the sides thickly. Cedar wood was also abundant for camp purposes on the side of the hills. It is worthy of remark that while the grass on the great plain is young and but just sprouting, that near the canons is well up and in bloom, though I perceive no change in the soil to produce that effect. The soil continues to be clay mixed with the coarse flat angular gravel.

Although it threatened rain yesterday, only a few scattering drops

fell, and the evening, though cloudy and cool, was not cold.

On the plain there is but very little growth of wood of any kind;

once in a mile or so one sees a small cedar.

At Albuquerque, before leaving, I found a man who had once passed through with Mr. Aubrey, and, thinking he might be of some use, I employed him. Up to this time he has only justified my expectation by looking out for water, but now he becomes useful as a guide, and, with his assistance, I hope to get along rapidly towards the Colorado. This evening he went off to hunt water before this, at which we are camped, was known to us, and up to this time has not

returned, but I suppose he will rejoin us again to-morrow.

September 16—Camp 17.—Our man Leco not having yet come in, and it is now noon, I begin to feel a little anxious about him, and shall remain here until he returns, or we can find out what has become of him. Should he not return by night, I shall send a party in search of him, though I can imagine no accident that could happen him, as he is up to all the Indian tricks, and is an old traveller in the mountains and plains. At 4 p. m. I sent out a party of three men to look him up, with orders to search until to-morrow night, and then return; or, if they should find any Indian village sooner, so as to make it certain he had been slain by them, to come in immediately, so that we might make up a party to surround them and take due vengeance.

The weather to-day cold and windy.

September 17—Camp 17.—No news yet of Leco or the party sent in search of him. Finding being in camp tiresome, Thorburn and I walked some miles down the creek towards its entrance into the Colorado. We found water every hundred yards or so, and I am confident it may be relied on as permanent. The pools were large, some of them over a hundred yards in extent, and from one to three feet in depth. I am led to the belief in the permanence of this water from the fact that we found and killed here, at our camp, snipe, ducks, and crane; and that the water extends all the way to the river in pools is equally certain, otherwise the antelope would have made this place their resort for water, and abundance of sign would be found here, which is not the case, although they abound on the plains all around. The Indians, too, if this were the only water,

would have a rancheria here, of which we should see the remains. The grass is equal to any we have found on the road, and is gramma mixed with bunch grass.

The soil is the same as that heretofore described in this region.

We find the whole country to the eastward cut up in cañons, all leading, I suppose, to the little Colorado, which is marked by the cliffs in sight of our camp, and is probably some thirty miles to the north of us.

To-day the weather is pleasantly warm, with a brisk southwest wind blowing and a few clouds.

Leaving this camp I shall endeavor to find a road due west to the Colorado, which, although here running east and west, takes a bend a hundred miles to the westward, and runs nearly north and south.

Towards sunset the party sent in search of the missing guide returned with him. It appears that in getting off to light a fire his mule had escaped, and knowing it to be one of the most valuable in our mulada, he had followed it all the remainder of the evening and the whole of the next night, only catching it, sometime in the forenoon of the next day, and then supposing camp had held the direction it was going when he left it, and not being aware of our finding water here, he had kept on until overtaken by the men sent in search of him. He had been forty-eight hours without water or food, and must doubtless have perished had he not been found.

September 18—Camp 17.—The morning is bright, clear and warm. We have killed, this morning, at the water here, blue-winged teal and other ducks, flocks of which are flying and alighting around the pools, and the English snipe, the first of that species we have met with about here.

All signs indicate this as permanent water, and its very great abundance makes the discovery a most valuable one to this road. Water may be had, however, in any quantity every five miles from the Colorado Chiquito or Zuñi to the river, by the expenditure of a few thousand dollars by the government in building dams across aroyos and cañons, which the rain would fill every month. A dam here, for instance, is not probably needed; but if it were, the stone and other material is ready cut by nature, and only wants the hand of man to place it in position to confine millions and millions of gallons. These cañons are from a hundred to two hundred feet in depth; at times a chasm with precipitous sides; at others only precipitous on one side; and all of them show, by drift wood and other unmistakeable signs, that they are frequently bold running streams. One can see, therefore, how simple a matter it would be to make the dams and to insure a bountiful supply of water at all seasons, should this, contrary to all signs, prove not to be permanent.

These remarks apply equally to all other parts of the road from Zuñi, and I cannot but think that money expended on a certainty of this kind would be spent to better purpose than in the uncertain process of artesian wells.

We leave here to-day at noon to explore this great plain, and shall endeavor to go as nearly west as possible to the Colorado Grande. Leaving King's creek, so called after one of my party, at noon, we

travelled until 4, over an undulating plain, which stretched out to the northward and westward. I should suppose this plain to be, at its widest part, from eighty to one hundred miles in width. Its soil is light, loose yellow clay and coarse gravel, and is without trees,

bearing only greasewood bushes for fuel.

To our left, that is, to the south and southwest, a range of mountains seems to terminate in long cape-like mesas, which extend into the plain we are traversing. Ahead the view is unbounded, only the blue points of a mountain appearing far in the distance. The bluffs of what we take to be the Little Colorado, and Thorburn's mountain to the east, are the most prominent objects in sight. The grass at our camp is short, but green and fresh, and has been so since leaving King's creek. The weather is clear and warm, making the uncertainty of water ahead rather unpleasant. However, by travelling to-aight and part of to-morrow I hope we shall find it.

We have made this evening twelve miles, and shall go on again at

sundown, and travel until midnight.

The slopes of the mesas on our left seem to be covered with a heavy growth of pine timber. The nearest is about ten miles south of us. Leaving our supper camp at dark, we travelled by night, and the night dark, for ten miles across the country to the northwest, and so level was the surface, that not a wagon stopped for a moment. At 10 we halted and encamped for the night. Going ahead with two or three of my party, I made fires every three or four miles, as guides to the wagons, and such was the level character of the country, that those behind told me they could frequently see the flash of my match as I would light it to kindle the fire. In gathering greasewood bushes for one of the fires, Thorburn picked up in his hand a rattlesnake, but fortunately the night was so cool that, I presume, the reptile was torpid with cold, so then when the fire blazed up I shot him with my pistol where Thorburn had dropped him.

Resuming our march at sunrise, we travelled twelve miles, the country assuming a slightly more rolling character as we advanced. We crossed many broad and well-beaten Indian trails, all going to the southwest and northeast, but none towards the direction we were travelling. Our guide, however, who had been full of confidence before, still retained his confident air, and assured me there was no

doubt of our finding water a short distance beyond.

A half mile further, and he came back to tell that the distant mountain, towards which our course was directed, was not the one he thought, and that he was completely lost. I ought to have killed him

there. but I did not.

We were thirty-two miles from water and in a country entirely unknown. Encamping at once, I despatched the two dromedaries to the east, while, with a few men on our strongest horses, I started to the west. On our line we travelled through some low hills, and following an Indian trail came suddenly upon a most wonderful sight. This was a chasm in the earth, or apparently a split in the very centre of a range of hills, from the top to the bottom.

Seeing that Indians had descended, I determined to try it, so, picking out the least precipitous part and scrambling down and leading

our horses and zigzagging, we at last reached the bottom. Indian sign was abundant in the caves on either side, and a trail led up the middle of the ravine.

From appearances I should judge they wintered here, after gathering the piñon on the surrounding mountain sides. Exploring the cañon upwards for five or six miles, we found it ran out, so we ascended a steep hill, and, finding no water or any appearance of any, we turned our faces towards home. Arriving at camp, I found the dromedary men had found a river (the Little Colorado, I presume) about sixteen or twenty miles off, but very rough to approach. animals were now beginning to suffer very much, having been almost constantly at work for thirty-six hours without water; and one of the most painful sights I ever witnessed was a group of them standing over a small barrel of water and trying to drink from the bung hole, and seemingly frantic with distress and eagerness to get at it. camels appeared to view this proceeding with great contempt, and kept quietly browsing on the grass and bushes. Unfortunately, the dromedary men had not gone down to the river, so that it was not certain that water, even though existing, could be got at, for these rivers, in going through canons, are frequently inaccessible, so that, all things considered, it was safer to return, while the animals had strength to do so, to the water we had left, and start again, without guides, for, up to this time, they have proved a perfect curse to the party. Hitching up the teams, we commenced our retreat at dark. At about 3 o'clock in the morning it was found necessary to turn the animals out and drive them to water.

The moment they were released they started off in a gallop, (for they well remembered the last water we had left,) which did not cease, with many of them, until they arrived at King's creek. I arrived, with Thorburn, at 7 in the morning. This evening the animals will be sent back to bring on the wagons, and will probably be here by daylight. The weather is warm.

A heavy growth of pine and cedar covered the hills in every direction, around the great canon I have mentioned, and extended as far as we could see from the high hill we ascended. The grass was dry gramma, which did not appear to have sprouted at all this year.

The camels were sent on in advance, and shortly after our arrival here, although, like the rest of us, they had been on the road all night, they were started back with eight or ten barrels of water for the camp at the wagons. Six of them are worth half the mules we have, although we have good ones.

September 20—Camp 18.—To-day the wagons arrived, the mules having been sent back for them last night. Every one looks wretchedly jaded, and all hands are glad to get back to King's creek again, and most of them a little sick of exploring parties.

It must be borne in mind by those interested in the road that this has been only a lateral exploration, and not the line of the road itself.

I am now getting ready, with five or ten men, to start in advance to explore the country, before moving on with the camp.

September 21—Camp 18.—Left, with Thorburn and ten men, at 4 in the evening, taking with us six breakers, of fifteen gallons each, of water, packed on camels, for the use of the mules and men. I took

with me also, on this exploration, for the convenience of packing blankets and provisions, the small instrument wagon. 8 we encamped, after travelling across the plain, in a westerly direction, some ten miles, where the grass was good and wood abund-At daylight we were off, still holding the same course, in order to turn the northern point of the long mesas I have mentioned as mnning out into the plain. Taking with me two men, I started more to the southward, into the mountains, and climbing the steep and rocky sides of the mesas we found ourselves, on gaining the summit, in a region of rough high table land covered with lava rock, but still very pleasing to the eye, for the timber was abundant-pine and cedar—and the grass a rich green and luxuriant. Through this beautiful country, abounding with deer and antelope, we searched ineffectually the whole day for water. To me the presence of game was conclusive evidence of the existence of water, and yet although we hunted faithfully, and were all experienced men, we had no success, and not a single spring could be found. At night we returned to the instrument wagon, which had followed a back bone, and by a more southerly course had reached the top of a high divide, which I determined to cross the next day in the prosecution of our search. fortunately the trails of the antelope and deer, which generally form good guides to the water hunter, in the rocky soil of the mesas, soon ran out, so that they were of no use. Birds too were abundant-jays, hawks, ravens, sparrows, and towards evening a flock of partridges gave us encouragement for a further search in the morning-nevertheless it was thought prudent to send back the instrument wagon to camp, as it would reduce the number of animals requiring water, At daybreak it was on its return, a dromedary having and also men. been started to camp to send out to its assistance water and fresh mules. Last night we watered our animals after their hard days' work, a fourth of a bucket each, and, as the day had been hot, it was only enough to tantalize them.

Starting at daybreak, we resumed our search, and passing through a great deal of pretty country, we came upon a ravine, at least what seemed one at the commencement, but which, on further examination proved a level and beautiful pass through a range of sand-stone mountains. The prospect was tempting, although it evidently led us far from home, and our animals, if no better success attended us, were sure to die under us for the want of water, leaving our own chance of life to depend on our getting back over a rough country, some fifty or sixty miles afoot. However, trusting to luck I determined to try it. Following down the pass, which I called after Tucker, one of my men, and a very worthy one, we found it to descend rapidly, but with a very smooth surface to the mouth, a distance of perhaps six miles. width would not average over a hundred and fifty yards, and the direction was southwest. It seemed to cleave the mountain, which was of a bright whetstone character from summit to base, and opened into a wide valley of some twenty-five miles in length and ten in breadth, covered with grass so green that it seemed we must find water in it. Turning to the left, and going to the southeast at the base of the Sierra, which was a line of perfectly perpendicular rock for its entire length,

we journeyed on for eight or ten weary miles to where the mountains, forming the southern boundary of the valley, united with the Sierra we had passed through. Here we found an easy path, and going through it and turning to the northward, we encamped at night on the dry bed of a stream, having travelled nearly fifty miles. The day was hot and dusty, and during this time we had watered our animals once with about four quarts each, and their distress was painful to witness. It was evident something must be done speedily, or we should loose every animal we had, and perhaps our own lives, for we knew nothing of the character of the country we had to traverse between us and camp, or whether,

indeed, it was passable at all.

Camp was, by my estimate, sixty or seventy miles distant, bearing nearly north, and we had remaining one fifteen gallon keg of water for eight men and ten animals, which had already been exhausted for the want of it. Matters began to look squally. The camels alone seemed perfectly indifferent, and, like good fatalists, chewed their cuds in cheerful contentment. At day break we were on the road again, heading north towards camp, but having a terrible time of it over volcanic rocks and brush wood of cedar and scrub pine. We struggled manfully on until noon, when all the mules were completely done up, and it was evident they could go no further. I was fortunately riding a superb horse on the occasion, "Gray Eddy," full of strength and endurance, and I came to the conclusion to give him a bucket of water, and trust to his reaching camp with an order to send out immediate He drank it eagerly, for his tongue was as dry as an old bone, and his lips parched and hot with fever. Exchanging my horse with Tucker for his broken down mule, I ordered him to proceed to camp at once, giving him his landmarks and bearings, and send us assistance, and in the meantime we would ascend a prominent point and keep up fires and smokes to guide the relief party to our camp. We had about a bucket of water remaining, and if Tucker got in at all, we could not expect him back for forty-eight hours. As for the poor animals, they hung around the empty water kegs braying huskily for what they were perishing for. Everything now rested on the gallant gray, and as if conscious of his responsibility the noble brute struck out boldly for the mountain which marked the direction of camp. Slowly we followed along to reach the point where our signal fires were to be kept burning. We had not gone over three miles when I observed a rugged looking cañon on the left, which seemed as though it might bear water. Dismounting, I climbed down the steep and slippery rocks to the bottom, and, after a short search, discovered small hole, under a projecting rock, containing water. Pursuing this discovery, I found, a hundred yards further down, a large pool of perhaps a thousand gallons. I fired my gun and pistols at once to halt the party which had passed on, and our famished animals being led down to the pool, plunged their heads to the eyes in cool water, and for the first time in three days, satisfied their thirst. Stacey was started on his mule, now refreshed with water, at speed to overtake Tucker, which he succeeded in doing, the two returning to camp that evening. The mystery of so much game and so little water was now solved. Instead of looking for streams and rivulets, I found

I must look in the rocky canon for pools and water holes. Acting on this, I found water next morning after a half hour's search, and in this region shall not fear for the future. The nature of the country beyond must determine the method of search when we get there.

Leaving the lucky cañon, which I called Alexander's, from one of the men who were with me, the next morning, we followed valley after valley, one opening into the other, until we reached the plain where I halted, and, watering our animals from the replenished kegs, made coffee and rested awhile, with the view of taking the moon for the next ten miles to camp. Starting sometime after dark with Thorburn, Tucker, and Davis, the remainder of the party being left to come on in the morning, we walked our animals over the plains, guided by the North star.

My horse walking more rapidly than the rest I gradually drew everal miles ahead, and reached the rocky banks of King's creek at our camp about ten o'clock. Seeing the wagons quite close, and finding, as I thought, the camp fire where the mules were herded and no guard visible, I concluded they were all asleep, and that discipline had been relaxed in my absence. I determined to frighten them, so drawing my revolver, and giving two or three Indian yells, I fired it off. I hardly remember much that occurred after that. "Gray Eddy" wheeled at the first yell, and when I fired took the bit in his teeth and was soon rushing like lightning over the rough ravines and precipitous and rocky affluents which run in all directions from the plains into King's My arms soon became as useless as if they belonged to somebody else a mile off, and, expecting to be dashed to pieces every moment. I was carried by the frightened animal many miles. Once I stopped him, but it was only for a moment, when he made a fresh start worse than ever, until at last, with a tremendous crash that made me see stars, we came down together. Fortunately his feet became entangled in the bridle and I was able to recover him, which was more than I could do for myself, for I remained sick and bruised on the ground until nearly morning.

In the meantime camp was all in confusion. The Indian yells had started every man to his feet, and for a while a regular stampede was the result of my experiment. To make the matter more mortifying, when I got back I found that the fire I thought was the guard fire was an old one left burning, and that the guard and mules had been removed a half hour before to another point some fifty yards off.

My admiration for the camels increases daily with my experience of them. The harder the test they are put to the more fully they seem to justify all that can be said of them. They pack water for others four days under a hot sun and never get a drop; they pack heavy burdens of corn and oats for months and never get a grain; and on the bitter greasewood and other worthless shrubs not only subsist but keep fat; withal, they are so perfectly docile and so admirably contented with whatever fate befalls them. No one could do justice to their merits or value in expeditions of this kind, and I look forward to the day when every mail route across the continent will be conducted and worked altogether with this economical and noble brute.

In the morning I shall send off Mr. Thorburn and ten mer. ahead,

to Bill Williams' river, to explore for a road, and shall start myself with three to look for water in the intermediate distance. I am determined, before leaving, to make sure work, and know every foot of country between here and the Colorado, so as to make no mistakes. Our explorations to north and west, which we have carried on for the past two weeks, convince me that in that direction water is too scarce for a road, but I do not regret the trouble we have had in examining the country. The knowledge we have gained of it fully compensating for the hardships. The country we have been exploring to the north of our road is evidently that described by Captain Sitgreaves.

September 27—Camp 18.—The day has been passed in getting off Thorburn's expedition, which started at noon, and also that of part of my escort, which I determided to send back from this place, having no further use for them, and not wishing to deprive the quartermaster's department of the teams used for their transportation. I sent back a corporal and twelve men, with four wagons and their teamsters, re-

taining a sergeant and six men, with one wagon.

In the evening we repacked our wagons, ready for a start to-morrow, intending to move to Alexander's cañon, where we found water day before yesterday.

The weather is clear and pleasant, though cool at night. A few

nights ago, ice formed in the bottom of a bucket.

The climate here is so pure and dry that we frequently dry mutton, when we have killed more than the rations, and keep it, without its spoiling, for a week. It is not found necessary to jerk it, but simply to lay it in the sun and air (sides and hams) on the bushes.

September 28—Camp 19.—We left King's creek at 3 o'clock, and travelled nine miles and a half, when we encamped on a slight eminence covered with excellent grass, and with a scanty growth of cedars;

but where there was no water.

We passed over a rolling prairie, from King's creek to this place, having no timber upon it, but grass everywhere good. We saw many antelopes on the plain, the soil of which is clay mixed with gravel.

The weather this evening is quite cool, with a light southerly breeze

and a few clouds. We arrived in camp at 6.

September 29—Camp 20—Left camp at 5.30 a.m., and arrived

here, at Alexander's cañon, at 12.

Our road this morning was by the trail we made three days ago in going from this place to King's creek. We followed a gradually ascending valley the entire distance, from last night's camp, until within three miles of this, when we crossed a divide which intervenes between the waters flowing north into the great plain and those flowing southwardly into some of the tributaries of the Gila or Colorado. On either side of the narrow valley we came up stretched the mesas, which I have previously spoken of as running like headlands out into the plain.

Their slopes and broad flat summits were covered with pine and cedar, though the latter growth predominated. The grass, gramma,

abundant on all sides.

The soil in places is rocky with a great deal of obsidian scatteredover it; where it was not rocky, it was of clay and coarse gravel. The weather to-day has been delightfully pleasant, reminding one of the pleasant autumn weather of Virginia or Maryland, though the nights are cold and the early morning air keen and fresh; so that our mules made nothing of the fifteen and a half miles which we have

travelled to-day.

On arriving here my first care was the pool of water we had left. On examination I found it but little diminished by evaporation, there being still enough left, I hope, for cur purposes until we find more in advance of us; though the delay of hunting ahead is very great, besides giving both men and animals much additional labor. If it were not that the grass is so good and abundant, our mules and horses would soon sink under this double duty; but as it is, they are in fine condition; thanks to the good grazing. We have made a southwest course to-day, and, to-morrow, hope to strike out more to the westward. Abundance of deer and antelope, constantly in sight, render our ride, this morning, a most agreeable one. The deer were of the species known as black-tailed. Bear sign was also frequent, though Cuffee did not show himself in person.

September 30—Camp 20.—To-day has been spent in exploring the country ahead for water. A fine pool and two springs were found, nine miles off, due west of us, and to this I shall move with the train

in the morning.

Our present camp, at Alexander's cañon, is at the northern base of a high conical mountain, which we at first thought to be the Picacho of Whipple; but it does not agree with his description or position. It is the southern termination of a long range of table mountains, dividing the waters flowing north into the Colorado and Little Colorado and those which find their way into the same river below the bend. centre peak is sharp, and has upon its northern side a singular grove of aspen, growing on the steep ascent, near the top. Looking at it from the north, it has upon the right two smaller and lower peaks, and on the left, one; altogether, with mountains Thorburn and San Francisco, it forms the most prominent land mark in this vicinity. cedar growth here is quite heavy and abundant; I measured one tree to-day sixteen feet in circumference, and it was by no means the largest I saw. Pine is scarce and small, though we occasionally find it in patches on the elevated mesas we are now encamped on. Yesterday, in exploring, I found walnut trees of small size, in many places. Within a mile of camp, I found a circular hole on the level table land, which much resembled Jacob's well, heretofore described, excepting that the sides were of volcanic rock. The soil over which my explorations led me to-day was generally of a rich character, producing everywhere fine grass; for the most part it was clay and gravel, with occasionally spaces of considerable extent covered with large and The weather is warm; loose volcanic rock; timber everywhere. evening cloudy.

October 1—Camp 21.—At daybreak we were off, and travelling nine and a half miles west found an excellent camp at the water holes

and springs discovered vesterday.

The centre peak of the mountain, spoken of yesterday, bears from our camp east by south.

From Alexander's cañon the road ascended almost imperceptibly to the table land, and descended from the divide almost as gradually. The country and soil is the same as that yesterday described. Several small conical hills are within sight a mile or two to the southward, and directly to the west a large bald hill or mountain, with steep sides, rounded top, and but little timber on it.

The morning was cold but the day has been warm and cloudy, so

that we are in hopes of rain.

Our present camp is an excellent one; grass, wood, and water in abundance.

To-day is that fixed for the return of Thorburn's party, and we are looking for it with great anxiety, as we are all getting tired of this slow and tedious work, and look to his report of the country ahead, with hope of being able to recommence our old style of travelling. Leaving Alexander's canon at 6, we arrived here at 9.

A fine black-tailed doe was killed this evening.

October 2—Camp 22.—Thorburn not having returned, I moved on southwest twelve and a half miles to the mouth of the Pass, (which I have named Pass Dornin, after Captain Dornin, United States navy,) discovered a few days since, while we were reconnoitering ahead.

The morning was cloudy, with a few showers of rain, but only enough to wet our buckskins thoroughly, without doing any other good.

The first three or four miles of the road to-day was rough and stony,

but the latter part excellent; the soil was sand and clay.

On arriving at camp, I ascended a mountain which forms one side of the entrance to the Pass. It was very steep and high; but on reaching the summit I was fully repaid by the extensive view it afforded.

I am now convinced we are near Lieutenant Whipple's trail, (probably within fifteen or twenty miles,) but all traces of it are so completely obliterated that it is impossible to follow him. I think we are now within twenty-five or thirty miles of his Aztec Pass, and a

little to the northward and westward of that point.

From the summit of the mountain, as I looked down, almost directly under was the camp, which was at the mouth of the Pass. Then came the view westward. The pass opened into a wide valley, bounded on the north by a high and precipitous mesas, and on the south by a long range of low mountains, apparently very rugged and broken. The valley itself was level and broad, being six miles at its narrowest part in width, and filled with fine grass. To the westward this valley seemed to stretch out to the full extent of vision. About fifteen miles off, near the centre of it, was a high table land or mesa, apparently unconnected with any other range, and rising abruptly and squarely out of the plain. Far, very far, in the distance, were dim mountains, which may be the chain running parallel with the Colorado.

To the southward I could see, over the range bounding the valley, another range, or at least the tops of high mountains, showing a valley to exist between, by the difference in the shades of blue. Turning to the eastward, I could see, stretching off to the southeast, an extensive valley, which seemed to contain in its wide spreading

1

arms, Bill Williams, San Francisco, Sitgreaves, Kendrick mountains, and a host of hills of lesser note. Into this valley one would think some noble river would enter, to add to the fertility of the soil, as well as to the beauty of the landscape; but I regret to say that only a few meagre streams, containing no running water at present, find their way from the mountains to it, although, doubtless, springs

exist throughout these mountains.

The pass at the valley on which we are encamped is approached by so gradual an elevation, that, except on inspection, it seems almost like a continuation of the great valley just mentioned. Its course is northwest, and it seems to be the only road left us, unless we cross the ridge to the mountain valley, which I have mentioned being shown by the difference of shade to exist in that direction. This I will look at to-morrow, as I shall then start on another exploring expedition, if Thorburn should not return. The valley we encamped at the entrance of is the same into which Tucker's Pass, discovered a few days ago, enters, that pass coming in at right angles to the one we are on, about ten miles west of our present camp. Wood at this camp is abundant, both of cedar and pine, but there is no water.

Grass good.

October 3—Camp 22.—We are still looking anxiously for the return of Thorburn, who has now been absent six days. To pass the time more agreeably than lying idly in camp, I started out with Davis and Tucker to explore to the westward. We started at 9 in the morning and returned at 9 at night, never having left the saddle for five minutes since the hour of our departure. Our course was nearly west, and I suppose we could not have travelled less than forty miles, going and returning. Contrary to my expectations, we found the country easy for either wagons or horseback travelling. The mountains were generally lower than I thought from looking at them yesterday, and the ranges all tended to the northwest, with pleasant and wide valleys, filled with excellent gramma grass, on which numerous herds of antelope and deer were grazing. Timber, of cedar and pine, was everywhere abundant. The weather was cool The soil fertile, and of gravel and clay principally. and clear. saw, in many places, a small black locust tree, but scarcely larger than an ordinary rose bush. We crossed one hill which seemed to be entirely formed of quartz, such as is found to contain gold in Cali-Towards sundown we found a few rude huts, probably the spring or last winter camp of Indians. A metata, and a few other of their very limited supply of household furniture, had been left to await their return. At this point I thought we had reached a fork of Bill Williams' river, as we were evidently on the head of a ravine, which, some distance beyond, connected with another in a rough deep valley or canon, and to the southward a range of black serrated mountains looked like those called by Lieutenant Whipple the Black mountains. I regretted not having time to explore further, but it was nearly sundown, and we had twenty-odd miles before us to camp, and had started without bringing with us any provisions; so turning our backs upon what seemed a very interesting country, we returned, to reach camp at 9 o'clock. Should Thorburn not return by to-morrow, I shall make another exploration more to the southward. The weather to-day has been cool and pleasant.

October 4—Camp 22.—About the time I was preparing for my contemplated exploration to the southeast, to my great delight Thorburn came in. He had discovered a small stream some thirty-five miles distant from our present camp, and, by hard travelling, had explored over a hundred and fifty miles of the country lying west and southwest of King's creek in the seven days of his absence.

This, with the explorations made by us from Floyd's Peak, as I have named the mountain described near Alexander's canon, leaves only a quadrant lying to our southeast unexplored, within a radius of

forty or fifty miles from Floyd's Peak.

Preparations were immediately made for our departure to-morrow at 3 o'clock. At that time we shall leave here, and, travelling through Dornin's Pass and the level valley beyond until midnight, we will encamp until daybreak, and hope to reach the water by 3 in the evening of the next day. Thence, we shall make another exploration, which will take us to the Colorado river.

The weather is mild, clear, and very agreeable.

October 5—Camp 22.—The day has been spent in rest and quiet. The wagons are prepared for our night march. At dark we left camp, and, ascending a very slight elevation, which makes the entrance through Dornin's Pass, we came upon the wide plain or valley beyond. This was so level that we travelled it until midnight without a single stoppage, when we encamped in good grass, though without other wood than greasewood bushes.

On the hills to our left was plenty of cedar and pine, but as they were a mile distant, I did not care to go to them, as the men had eaten before leaving our last camp, and required rest more than food.

The night was mild and pleasant—only cool, not cold. The soil of the valley was clay and gravel, and the grass abundant, though young and short.

We made thirteen miles and three-quarters.

October 6-Camp 23.-At daybreak we were up and off again before sunrise. Pursuing the same level valley on a course nearly west northwest, we came some ten miles, the hills on our left gradually diminishing until the range gave out in two small buttes of regular and graceful slopes. Here we crossed a gentle divide, and changed our course to one almost west, in the direction of the water for which we were going, and, travelling five or six miles further, encamped on some limestone hills, near a pool of water in the rocks on the summit. As we passed down the large valley this morning, the range of mesa mountains on our right, which I have called the Aulick range, extended as far as we could see to the northward and westward. places the perpendicular face of the rock, which I should think full a thousand feet in height, was covered with crimson colored blotches and white spots intermixed, and presented a most singular appearance. The wide valley which we had traversed diagonally continued on, doubtless to a great distance northwest, at the foot of these cliffs, and as far as we could see, without diminution of its width. Thorburn not having had time to look out a wagon road to the water, I encamped some four miles from it, and, the mules having drunk all the water in the pool, they were sent on to the stream this evening under the charge of Mr. Davis.

To the westward the country begins to assume a rougher appearance, so that I shall make another exploration in that direction to-

morrow.

I sent Saeveda this evening to the water with the mules to show the way, and also to endeavor to come to speech with the Indians who have their little corn patch there. In the event of their running off, and of his having no opportunity to speak with them, I sent some calico and other presents to be left in their lodges, and the men had strict orders to touch neither corn nor melons, or to allow their animals to do any damage whatever to the place. Poor creatures! their time will come soon enough for extermination when the merits of this road are made known, and it becomes, as it most assuredly will, the thoroughfare to the Pacific.

The soil to-day has been clay and small gravel mixed; the grass

(gramma) good, though as yet short.

The weather has been windy, but otherwise bright and pleasant. Wood is abundant—cedars and a little pine.

We left this morning at half-past 5, and arrived here at noon.

I rarely think of mentioning the camels now. It is so universally acknowledged in camp, even by those who were most opposed to them at first, that they are the salt of the party and the noblest brute alive, that to mention them at all would only be to repeat what I have so often said of them before. They have been used on every reconnoissance whilst the mules were resting, and having gone down the precipitous sides of rough volcanic mesas, which mules would not descend until the camels were first taken down as an example. With all this work they are perfectly content to eat anything, from the driest greasewood bush to a thorny prickly pear, and, what is better, keep fat on it.

October 7—Camp 23.—This morning started at 9 o'clock, and crossing a hill to the eastward about a mile from camp descended into a valley running off to the westward. Following this valley, which was nearly half a mile wide, I found it one of many, all of which seemed to drain their waters into one canon. Here, as I expected, we found water. Two fine springs bursting out of the side of the canon at the base of its perpendicular sides afforded quite a stream and pool of excellent water. Stripping our saddles and turning our animals loose to graze on the fine grass which abounded thereabouts, we remained near an hour, and then starting again we returned to camp, reaching it at 9 o'clock at night.

On our way back, old Saevedra's mule gave out, which obliged me to leave all of the party to take care of him, excepting Thorburn and Davis. This old wretch is a constant source of trouble to every one, and his entire and incredible ignorance of the country renders him totally unfit for any service. I keep him moving, however, on all occasions, by way of punishment for putting himself upon us as guide.

The valley we descended this morning has a slope to the water discovered, so gradual as to make it difficult to judge from the eye how

water would run in it. Where we first struck it, it is bounded on either side by high rough hills and rocky bluffs, which, after following it a few miles, soften into low hills well covered with grass, and on the left a considerable amount of cedar trees. Descending it some ten miles these hills recede, so that it becomes a broad valley of a mile or two in width, and, indeed, the hills become so low that the whole may be taken for a plain of many miles circumference. It seems a basin at the lower or western limit, in which the different valleys, having united their waters, break through a range of low mountains in the cañon where we found the springs. How far this cañon extends, or whether we can pass through it with our wagons, remains yet to be seen. I did not explore it further than the water which we found a mile from the head.

From the head of this cañon, the lowest point reached, from which a view of the ground passed over could be taken, the basin is bounded on all sides apparently by mountains, and is without any outlet, that I could discover, excepting the valley by which we entered, and the cañon which contains the spring.

Our journey of to-day has convinced us that the water Saevedra found, and to which Thorburn was sent, is not, as we supposed it might be, the head of Bill Williams' river, since the one runs south and the other north. It may probably be Gampia's creek.

The water discovered to-day, after running south for some distance, turns abruptly to the north, in which direction it finds its outlet into the Colorado.

On going to the springs this morning to water the mules our men found the fresh tracts of Indians, and that they had taken the presents left for them.

The general course of the valley followed to-day was west 30° south; the soil clay.

There was little grass in the bottom, but abundance on the slopes of the hills. The weather is pleasant and clear.

October 8—Camp 24 —Raised camp at daybreak, and taking our wagons down the rough hill into the valley, we descended the level bottom rapidly towards the water. Where we descended the hill we found on the rocks many hieroglyphics cut by the Indian race who have doubtless once inhabited this region, but have long since passed away. Unhappily, we have no Champollion to decipher these histories of a past race, or much that is interesting in the story of the red man of past times might be brought to our knowledge. The country described yesterday leaves but little to say to-day. We saw at a dishtance te black serrated mountain mentioned a few days ago; both yesterday and this morning it bore nearly southwest.

At the springs we found jimpson weed growing luxuriantly. It was pleasant to see even this well-known weed, so common at home, at this distance from everything like civilization.

The banks of the stream running through the canon of the springs are lined with small willow, and other bushes requiring water, from which I conclude water may be found at all times near the surface.

The two springs are both strong heads of water, and gush out of the rocks in a most refreshing manner to a thirsty man. The entire day's journey of twenty miles has been down the gentle descent of the valley to the springs, and as smooth as a table the vhole distance. At the springs the canon is only about two hundred yards in width, but, I presume, widens below. I have called it Engle's Pass, after Captain Engle of the United States navy.

The sides are palisaded at the summit, and in places they must be

eight hundred feet in height.

Sufficient timber for fuel and cooking may be found on the banks of the stream, and good grass covers the bottom everywhere. A better place for wintering with stock could not be found, as the turns and winding of the canon afford a shelter from any winds that blow. The soil is rich loam. The climate to-day has been pleasant, though this evening the clouds threaten rain.

Our course has been for the day about southwest. We were eight

hours travelling time in making the twenty miles.

October 9-Camp 25.—It rained on us nearly all night, wetting our blankets, and making all things uncomfortable, and we crawled out, shivering in the cold morning air. We got off at 8.30 and pursued the course of the canon, crossing frequently the little stream which turned and twisted in its narrow bed as if anxious to The morning was one of great anxiety to me. We were in the cañon, which narrowed a short distance below the springs, and the walls became almost precipitous from the base to the summit. The course also began to take a more southerly direction, and what with the course and the doubt as to whether the canon might not close in entirely so as to oblige us to go back, I passed a very anxious morning. A few miles below camp, however, the cañon widened. two or three miles more and its creek ran through a bottom of threequarters of a mile, and cotton-woods (only two it is true) enlivened the view with their bright green leaves. Further view was shut out by a long point which came down into the valley. I was now well satisfied we could get out; but the course, and how far we would have to go before doing so, still remained to be settled. So far the road down the cañon had been most excellent; no rocks, and the crossings of the stream all so easy as only to require working in one or two places. On our way down and near the long point mentioned, we followed an Indian track, and among the rocks found a good spring of fine clear water. Several others were found by the men on the sides of the cañon.

Passing the point, our doubts were all set at rest most satisfactorily. The stream turned abruptly to the westward, and in that direction a glorious view broke on us. For full sixty miles an immense plain extended to the west, only bounded by a distant range of mountains in that direction, through which we thought we could see such great depressions as to make a passage easy. This, we trust, is the Colorado range. Directly west is a huge mountain, which I called Mount Buchanan, and connected with it by a chain; the roughest we have seen is another which I called Mount Benton. Near this seems an overlapping of the mountain with the range which runs to the northwest, where a pass seems to be easy. Due northwest is a depression in the northwest range which apparently reaches the level of the

Altogether, the prospect is the finest we have had on the road. This great plain to the northwest must extend to the Colorado. for our distance from that river cannot now exceed by much the distance which we can see.

Much Indian sign is presented about our camp. A few hundred yards below is a rancheria, deserted, likely, by its people on our approach. It probably contained some thirty or forty savages.

The soil of the valley is excellent; principally of decomposed granite

and loam. Grass is very fine.

The day has been threatening, but no rain has fallen. We found no water in the creek where we camped, and I think the descent is so rapid that we are much more likely to find it in pools a few miles below, where it reaches the level of the plain.

We came nearly ten miles to-day; six on a southerly course, probably south southwest and four west. The fresh Indian sign induces me to believe water may be found quite near us in the morning, but we encamped too late this evening to look for it. There are bushes and small willows enough here for cooking and fuel, but it is all small stuff. The mountains have cedar on their sides.

October 10—Camp 26.—While awaiting in camp for the mules which this morning had been sent up the creek to water, our geologist came into camp, much excited, to inform me that while engaged in cracking stones on the mountain side, three Indians had crept up to his gun a short distance from him, and, after taking it, had drawn their bows upon him, and he was obliged to beat a rapid retreat to camp, which, fortunately, was not over half a mile from him. I immediately sent my three boys, May, Ham and Joe, to look after the thieves and to bring them into camp. They did not succeed in finding them, though they trailed them to the spot. Here they found shoe tracks an extraordinary distance apart, and of large size, coming directly towards camp; but as our geologist says he walked on his return, these could not have been his, especially as the toe had made deep impressions in the sand. We are at a loss, therefore, to know to what tribe they could belong, as shoes seem to be a luxury only indulged by the most civilized nations. On returning to camp the boys saw two Indians quite near, who immediately fired their arrows at them. This was returned by double-barrelled guns, and hearing this at camp, Mr. Thorburn and I started at once with our guns in the direction of the sound. A few hundred yards from camp, in the bottom of the valley, we saw the Indians running, and the boys hot foot after them, both parties firing as they ran. We immediately joined the chase, which proved very pretty practice for a while, but soon began to tell on the lungs. Some of the men having followed us, I directed them to return to the wagons and mount the horses and mules we had re-This done, we all continued the chase. In a few minutes the mounted party joined us. I ordered the men by no means to kill the Indians, but to take them alive. Directly opposite camp is a dark red butte very rocky, high and steep. Here we fairly ran them to earth near the top. The first caught was a boy apparently fifteen years of age; but where was the other? We had completely surrounded the conical peak of the hill, and though a minute search had been made we had not found him. I was positive I had seen him while balancing myself upon a slippery rock, but in jumping off it I had lost him in an instant. Still I knew he was not over fifty steps from me; so putting Tucker at one point, and stationing others around, some were sent to the top, so as to form a complete cordon around the spot he had disappeared at. At last one of the men looking into a greasewood bush not larger than an ordinary rose bush, discovered him close to the root, lying apparently coiled around it, and so completely concealed that even within six feet of him he could not be seen. He was dragged from his concealment, roped and carried to camp. Here he was well fed and both of them clothed from head to foot, and they are now sitting quietly at the camp fire. I shall use them as guides to the Colorado, and then either take them on and bring them back next winter or allow them to return from that river.

We are now about sixty-five miles from the river. The weather is

clear and pleasant.

This evening the boy appeared so young and unfit for a long journey, that I determined to release him and send him back to his people with all his fine clothes and presents.

We started with the wagons, and, after having gone three miles, encamped on the side of the mountain bounding the valley on the left. Wood is scarce, there being nothing but bushes, and the grass only tolerable.

In the morning the old Indian, our captive, has promised to show

me a fine spring on the other side of the valley.

Our road this evening was about a west southwest course, and gravelly and stony in places. We crossed several small arroyos putting out from the mountain. The mountain on the left gives out within a mile of this place, and the wide valley we are in joins another equally wide, running to the southwest.

At dusk the boy was liberated and went off into the darkness rejoic-

ing.

October 11—Camp 27.—This morning the good policy of setting the boy free has been made apparent. Shortly after daylight an Indian came in bringing the gun stolen from Mr. Williams the day before. I gave them presents—calico, blankets, handkerchiefs, &c., &c., half a sheep—and left them cooking their meat at our camp fire, in excellent humor with both themselves and us.

We started before sunrise, with our Indian captive as guide, and crossing the spur of the mountain, while the train passed around by the level valley, we found the spring in a narrow ravine high up in the mountain. It was a bold spring, and the tule or catstail growing on it proves it to be permanent water. I rejoined the train some three miles from the spring, and as the plain had been heavy, and the teams had made eight miles, I determined to camp where we met them, and send some men up with the mules and with picks and shovels to make a fine pool at the water. This done, I shall explore ahead again.

Grass (gramma) is pretty good at this place. Wood is indifferent, only bushes, and the soil loose clay, mixed with quartz and granite gravel. The weather is warm, clear, and pleasant. Last night there

was a heavy dew. To-day I have seen a great deal of quartz, like the gold-bearing quartz of California. Some of the veins seemed very

large, and were in positions to be easily worked.

The Indian fires were built all around us last night, but they made no attack upon us, nor did they attempt to stampede our mules. After taking a hurried dinner, I started with Thorburn, two or three of the men and my boys, under the guidance of the captive, to whom I promised liberty if he would show us water once more. We rode over the valley, or rather plain, for eleven miles, when we found a well some six feet deep, and apparently containing a sufficiency of water. It was nearly 10 o'clock when we returned—cold, hungry, and tired—to camp.

I determined to move camp to the well in the morning.

The grass here is pretty good, but no wood except bushes. The soil of the great vallev we are in does not seem so rich as the general average of the land we have passed, and the grass appears to grow in large patches, leaving bare intermediate spaces.*

At the well, we found Indian signs, showing their presence around

us; but none came in sight.

October 12—Camp 28.—Starting at dawn we travelled by the easy plain over to the spring. Before leaving camp I started off old Saevedra to look for water, which, he says, he camped at somewhere about here fourteen years ago, but does not remember the exact spot. I sent with him Ham, May, and Joe, and the whole party under the

charge of Tucker.

Our camp from the well, which I have called Butler's well, from one of my men, appears to be completely hemmed in by the most rugged mountains. The great valley is bounded on the north by the Buchanan and Benton ranges of mountains, and on the south by a rugged mountain I have named Harry Edwards' mountain. All the intermediate spaces are filled up with rough and ragged ranges of lower elevation. To the northward and eastward is a range of high, frowning, dark mesas, along the base of which and turning to the northward runs the dry stream, on which we encamped in Engle's Pass, (as I have called the canon down which we came to the great valley;) and where we are to leave the valley is a problem yet to be solved, involving further exploration.

Fresh tracks of Indians at and around the well show them to be

quite plentiful in our vicinity.

At 3 o'clock Tucker returned to inform me that Saevedra had found his spring, and that it was a fine running water. I was pleased to hear this on two accounts: In the first place, the supply in the well proved insufficient; and in the next, it was the only thing old Saevedra had found, that he started to look for, since our departure from Albuquerque. Before he went out this morning, he told me that if he could only find this water the direction to three others would come directly back to his mind, and that they lay on a good course for us to the Colorado.

Leaving Butler's well, we journeyed six or seven miles over the

OI changed my opinion returning. We found the grass in this valley everywhere abundant.

great valley to the south, and encamped at the head of the canon in which the spring and little stream rises. The grass is indifferent, and no other wood than bushes.

The road is excellent. The soil is loose and in places covered with

volcanic pebbles and gravel.

October 13--Camp 29.—At an hour before daybreak the bugle

sounded, and by light we were on the road.

At the head of the cañon we had about fifty steps of rocky road, which delayed us awhile, making it passable for the wagons. This over, we came rapidly down the level bottom of the cañon to the fine clear water of the spring, which we reached in five miles. This place—I refer to the cañon—differs in no particular from that already described as Engle's Pass. The character of the rock, the palisaded sides, are just the same. We found here plenty of wood for cooking; but the grass is scarce at the spring, though a mile or two above it there is plenty. I have called the spring after Saevedra.

I have no doubt that this pass, like Engle's, will lead to another great valley, or a plain, over which we shall travel without trouble to

the Colorado.

The stream from the spring, after running a short distance, sinks into the gravelly bottom of the bed of the stream. It affords abundance of water for any number of animals.

The weather has become warm this evening, recalling the summer

weather of the Del Norte.

The mesquite growth also begins again to show itself, and other shrubs that grow in a warmer temperature than we have lately experienced in the more elevated region we have passed over.

Breakfast over, Mr. Thorburn, the boys, and myself started ahead to explore, leaving the wagons to follow on our trail. Emerging from the mouth of the pass, which I called the Boys' Pass, after May, Ham, and Joe, who were the first to enter it, we came upon a vast plain

Directly in front of us stretched a chain of high mountains cut into fantastic peaks and shapes of all kinds, and about fifteen miles from us.

To the northwest and southeast the view was unbounded, only two peaks appearing in the distance about the centre of the plain in the southeast Directly ahead appeared in the centre of the mountain range a single peak, rising sharp and clear above the surrounding mountains; and here the mountains seemed to form a pass, towards which we directed our steps. The plain appeared to be endless, and travelling towards the opposite mountain until night we were still at a distance from the base. The plain was barren of grass and bore only a growth of worthless bushes, but the ground was firm and strong and the travelling good. It was covered for the most part with fine gravel, and when beaten down will form an excellent road.

When night overtook us we unsaddled, and, tying up our mules, built a fire and cooked what little we had brought with us. Shortly after our fire was started, another at a long distance, perhaps eight or ten miles off, marked the position of our camp, and near to us, and between us and the mountains, we could see Indian fires. A guard of one man was kept on during the night, and we passed it pleasantly without disturbance from the Indians. In the morning as soon as it

was light enough to see, we were off again. Turning the point which makes out from the high peak, which I called Frank Murray's Peak, we entered a wide gorge, which seemed to cut the mountain far up towards its centre. It was rough with stones, and overgrown in places with willow and rank weeds, through which Indian trails with fresh tracks and other signs, showing their immediate presence. A few rude lodges, and a patch or two of pumpkins, were also found on the borders of the dry bed of the creek. We found a fine bold spring about three miles from the entrance of the pass, and pursuing our way soon came to a short but steep hill at the end of the gorge, which seemed to be the summit of the pass. Ascending this, the river lay below us. We had arrived at the end of our long journey. So far, without an accident. Only those who have toiled so far, with life, reputation, everything staked upon the result, can imagine the feelings with which I looked down from the heights of this mountain upon the cotton-woods and shining surface of the river far below us.

At a great distance to the northwest, a snow-capped chain of mountains marked the Sierra Nevada, the mountains of my own State, and my heart warmed as I thought of the many friends beyond that distant chain who were looking anxiously for my arrival, and who would share with me the feelings of gratified pride with which the result of a successful expedition would be crowned. Both the descent and ascent of the hill was sharp, and I therefore determined to pack the

loads over on the camels, so as not to distress our mules.

Descending the hill we met the train coming up the pass, and having found another large spring below the first we encamped near it.

Here also was a patch of pumpkins and lodges.

In coming down the pass from the summit, I found Indian tracks over those made by our mules in going up, so that they had passed over our trail within an hour, and were doubtless hidden close to us in the bushes as we passed. Poor creatures! if they had known me better, they would scarcely have hidden out of sight, or missed the blankets and shirts I would have given them had they come in. The weather is warm.

In the evening we moved a mile further up the pass to the second spring, where we found, as at the first, a few acres of coarse bottom grass growing luxuriantly, and quite enough for one night's feed for our mules. I sent the boys to the summit to make fires as signals to the Mohaves that we came as friends, and desired to trade.

It is about twelve or fifteen miles yet to the river, and from the Indians living there, who are a fine, large, bold race of agriculturists, we hope to obtain corn enough to feed our animals all the way from

here to California.

I shall go into Fort Tejon to recruit and refit, as we have but ten days' provisions, at half rations, left, which short fare is owing to our

having been misled by the miserable Leco, our guide.

October 15—Camp.—This morning we spent in unloading the wagons and packing the camels over the hill. I sent Saevedra ahead with the boys to find a water to encamp at, between the summit and the river. We might easily have avoided this mountain by going on the plain I have described as extending to the northwest, and turning

the point of the mountain there where it gives out; but my instructions direct me to a point opposite the mouth of the Mohave, and these waters make it easy for emigrants to make the drives, besides which the Mohaves, from whom breadstuffs, vegetables, such as beans, corn and pumpkins, may be obtained, do not live to the northward of this point, and which becomes important for these reasons.

We gained the summit without difficulty, and found it only a mile

and a half from the spring.

Only a quarter of a mile was steep, and the whole was accomplished

without double teaming.

The descent looked so steep that I determined to encamp on the top and make it in the morning. We had a slight shower of rain during the night.

October 16.—The whole morning has been employed in getting down the mountain, which, though not over three-quarters of a mile,

was difficult to pass over, being steep and rocky.

Emigrants cannot pass here until the hill is worked. I estimate the expense of making this mountain pass a good one, and a good

road for emigrants, at five thousand dollars.

In coming down the mountain, the little buggy used for the carriage of the instruments upset and broke a wheel, which is the first breakage we have had since leaving. As the chronometers had been taken out no harm was done, and as it had fulfilled the purpose for which it was purchased, and our journey was accomplished, I did not care to encamp to repair it, especially as the camels, with the tool chest, by a mistake of the gentleman having charge, had been carried many miles beyond the place I had intended for them; thus, to our regret, separating our party a considerable distance, as they had with them all that remained of our rations.

October 17.—At daylight we were at work, and, passing down an arroyo making out of the mountains, encountered a short hill of not over fifty yards, which, on account of the arroyo running through a narrow chasm, we were forced to cross, in order to get back into the arroyo again lower down. The passage of this hill which we were obliged to work down cost us nearly all the morning. Once over this, we descended the dry bed of the arroyo rapidly. Here the Indians began to pour in upon us from the Mohave villages. First, two or three, and then by dozens. They were a fine-looking, comfortable, fat and merry set; naked excepting a very small piece of cotton cloth around the waist, and, though barefooted, ran over the sharp rock and pebbles as easily as if shod with iron. We were soon surrounded on all sides by them. Some had learned a few words of English from trafficking with the military posts two hundred and fifty mile off, and one of them saluted me with: "God damn my soul eyes. How de do! How de do."

A few miles down the arroyo the growth of a patch of cottonwoods and willows announced the presence of springs; but we did not wait to examine, though some of the party found water there. Shortly after we left the arroyo, and coming out on the left bank, followed an excellent Indian trail leading us directly to the river.

Night overtook us a mile before we reached the river. The plain over

which we passed bore neither wood, water, nor grass, so that our camp was a rough one, and only enlivened by the Indians who brought some pumpkins, which we purchased, and baking them, we made an excellent supper. Weather during the day has been warm, and the soil barren.

The distance made to-day has been about eight miles, on a course nearly west.

October 18.—This morning the mules were sent off before daybreak to water. We had tried ineffectually to get them to the river last

night, but found it impossible on account of the brush wood.

Camp is crowded with Indians again this morning, some bringing melons, others corn, and others beans, &c., to trade for old clothes, worn out shirts, handkerchiefs, or almost anything of ours they fancy. They are shrewder at a bargain, though, than our men, whose keen appetites cannot bear the delay necessary to a successful trade. The watermelons, cantelopes, and pumpkins, are of excellent flavor and fair size.

In the river bottom, which is several miles wide, and of very rich soil, we found grass and wood in great abundance. Trading with the Indians, in a day we had secured a hundred bushels of corn and beans, pumpkins, watermelons and cantelopes, to last us to the settlements. Here my journey, as far as the road is concerned, terminated. My instructions directing me, in the event of a want of provisions, to proceed to Fort Tejon and procure them there.

Crossing my wagons over the river on the common air beds which I had brought for the purpose, and the use of which I recommend to others, I followed the United States surveyor's trail from the river to Los Angelos, my wagons and train taking the right hand road, and coming directly from the Mohave to the Fort Tejon. Here I remained until about the 1st of January, when I commenced my winter journey homeward, arriving at the Colorado January 23, 1858.

Saturday, January 23, 1858.—We reached the Colorado river early in the morning, having encamped in a rain-storm the night previous a few miles from it. Shortly after leaving camp, my clerk, F. E. Kerlin, who with two of my party had been despatched the day previous in order to have my boat ready for crossing, was seen returning. Various surmises were immediately started as to the cause, and as soon as he was within speaking distance he was questioned eagerly for the news. He gave us a joyful surprise by the information that the steamer "General Jesup," Captain Johnson, was at the crossing waiting to convey us to the opposite side. It is difficult to conceive the varied emotions with which this news was received. Here, in a wild, almost unknown country, inhabited only by savages, the great river of the west, hitherto declared unnavigable, had, for the first time, borne upon its bosom that emblem of civilization, a steamer. enterprise of a private citizen had been rewarded by success, for the future was to lend its aid in the settlement of our vast western territory. But alas! for the poor Indians living on its banks and rich meadow lands. The rapid current which washes it shores will hardly pass more rapidly away. The steam whistle of the "General Jesup" sounded the death knell of the river race.

Accompanying Captain Johnson, was Lieutenant White, of the United States army, and fifteen soldiers as an escort, which, with as many rugged mountain men, and the steamer as a fort, made a

dangerous party to meddle with.

In a few minutes after our arrival the steamer came alongside the bank, and our party was transported at once, with all our baggage, to the other side. We then swam the mules over, and bidding Captain Johnson good bye, he was soon steaming down the river towards Fort Guma, three hundred and fifty miles below. I confess I felt jealous of his achievement, and it is to be hoped the government will substantially reward the enterprising spirit which prompted a citizen, at his own risk and at great hazard, to under take so perilous and uncertain an expedition.

I had brought the camels with me, and as they stood on the bank, surrounded by hundreds of wild unclad savages, and mixed with these the dragoons of my escort and the steamer slowly revolving her wheels preparatory to a start, it was a curious and interesting picture.

The camels, immediately on my arrival, for the sake of testing their capability of withstanding cold, I had placed in camp within a few hundred yards of the summit of the Sierra Nevada, and to this date they have lived in two or three feet of snow, fattening and thriving wonderfully all the while. Lately, in a terrible-snowstorm, the wagon, carrying provisions to the camp, could proceed no further. The camels were immediately sent to the rescue, and brought the load through the snow and ice to camp, though the six strong mules of the team were unable to extricate the empty wagon.

At the river I bade farewell to Major Blake and the officers who had. accompanied me, and the same evening commenced my homeward journey. My object in undertaking a winter journey is to test the practicability of the road surveyed last summer for winter transit. For this purpose I have taken with me a party of twenty men, and hope

to reach home in March.

We did not go far the first day, and shall not to-morrow, as I desire a day to regulate my party, and the mules cannot find very good grass for the first forty miles of the road. We encamped in a clump of willows, fifteen miles from the river.

January 24.—Started late and crossed the mountain to Murray's springs; the Indians of this side of the mountain, who are not friendly, yelling at us as we passed down the canon, and showing themselves at a respectful distance on the high bluff on either side.

Grass tolerably good. Willow and mesquite wood plenty. Water is abundant, much more so than when we passed last summer. The

weather cold.

January 25.—Breakfasted at 4 and off at 7. The night was passed without trouble from the Indians, though they shouted at us as we left camp from the hills where we saw their camp fires, which had been divided from ours by a small intervening ridge. The morning was cold and raw, and a keen easterly wind made walking much more agreeable that riding; accordingly, most of us walked for ten or fifteen miles towards Saevedra's spring. We passed close under Frank Murray's Peak, and, by going around the

base, avoided a steep hill which we came over on the previous journey, and which is the only pull for a loaded wagon between Saevedra's

spring and the summit of John Howell's Pass.

I am pleased to find how clearly our wagons have defined the road we explored last summer. The Indians have already commenced to follow our broad well beaten trail, and horse, mule, moccasin and barefooted tracks are quite plenty on the road. At Saevedra's spring we found the greatest abundance of water, and our mules having drnuk, we filled our canteens and came on to the end of the "Boys' Pass," and encamped, having made twenty-five miles.

Grass abundant, and wood, though small, in quite sufficient quan-

tities.

I ascended this evening the steep mesa or rocky bluff which forms the pass, and found an entensive table-land, stretching in every direction, and covered everywhere with excellent grass.

The latter part of the day pleasant, though the morning was cool.

At noon the barometer was 50°.

January 26.—Up at 4 and left camp at 7. Coming out of the "Boys' Pass'," we left our wagon trail road, and striking a direct course down the broad and beautiful valley for our former day camp. we travelled until we entered the canon of our first camp, from Hemphill spring. The valley we have travelled to-day is one of the most beautiful and extensive on the entire road. It is in extreme length not less than sixty miles, by a width of fifteen, and is filled with the most luxuriant grass in every part. As yet we have only discovered three waters in it, Via's spring, Butler's well, and a small spring at the ·head of it: but subsequent explorations will doubtless discover more. as there is evidently a number of Indians living in it. Although surrounded by high mountains—Buchanan, Benton, and Harry Edwards'—it is very easy of access and egress from the character of the passes. A large number of deer, antelope, and big horn tracks, show it to be well supplied with game, which, finding abundant grass, probably seek its warmth in winter, and retreat to the neighboring mountains during the heat of summer.

The grass is gramma.

It was my intention to have encamped to-day at the spring where we sent our horses to water from the Cosmino camp, but arriving in the night we were unable to discover the locality, and having passed Via's spring, Butler's well, and the little one, we were obliged to seek our blankets supperless; but our mules fared well, the grass being excellent, and the cañon smooth, level, and a mile wide.

Thermometer 48° at 8 p. m.

January 27.—Determined to lay by and shoe the mules. Up at 4 and found the spring a short distance from us. It is a beautiful one; the water pouring over the rock is received in a basin of some twenty feet diameter and eight or ten deep. Coming down the cañon it lies to the right hand, where a cañon coming in from the left widens the valley to a beautiful camp full of fine grass. The spring of the first water, on entering the cañon at its commencement, is three or four miles above. The weather clear and cool. Thermometer 50° at noon.

This morning, at 2 o'clock, we had a skirmish with the Indians. We lost one mule, killed with arrows, and another badly wounded.

At 2 o'clock thermometer 30°.

Two of the Indians who attacked us last night were slain this morning.

January 28.—Up at 4 and off at 6.30. Left Truxton's spring, travelled up the canon by White Rock spring, and entered the wide

valley leading to Hemphill's spring.

There is snow on the ground in patches which are rapidly passing Leaving our road at the head of the valley, we took a course nearly east, through some low hills covered with fine grass, and encamped among some cedars near the valley into which we entered by Dornin's Pass.

Gramma grass abundant.

Thermometer at sun down 45°. A few Indian tracks seen to-day.

January 29.—Up at 4 o'clock and off at 6 30. The night plea-At midnight the thermometer was 36°, and at noon 76°. We rode all day in our shirt sleeves. Crossed some easy hills. through a fine forest of cedar and a little piñon pine. Grass everywhere abundant. By crossing the low hills we came directly east and entered the broad valley opposite Tucker's Pass, bearing straight for Dornin's Pass, and keeping along the foot of the hills which we passed some distance to our left as we were going over, and which form the boundary on that side of the valley into which both Dornin's and Tucker's Passes enter. We found some snow on the hills, but not enough to cover the ground, except where it had drifted. In the valley there was none. Encamped among the cedars at Dornin's Pass. Grass luxuriant and green. Saw a large band of antelope, and killed some rabbits. Indian tracks have been seen to-day, but old, probably a week.

Thermometer at sun-down 65°, at 8 p. m. 39°.

Januarg 30.—Up at 2 and off at 3. The morning bright and At daybreak the thermometer 31°. We found no snow on the road, and but very little at Worley's cañon or Smith's spring, where the water was abundant and grass excellent. Encamped in a grove of cedar trees, with which the country hereabouts is covered. Here I determined to pass the day, as we had yesterday a fatiguing march, and our mules want rest.

It is pleasant to see our old camps again, and to recall the anxious hours we passed at them when in doubt as to what we were to find ahead At present we are under Floyd's Peak, which, for so long a time on our previous journey was our landmark in returning from our exploring expeditions, and its snow-capped summit looks as pleasant now as the face of an old friend.

At noon the sun was bright and warm, and the thermometer at 75°.

January 31.—Up at 4 and off at 6. Travelled directly east from Alexander's cañon, in which we found abundance of water, and left our road at that place and travelled in a straight line for San Francisco mountain, the snow-covered peak of which made an excellent guide. Our way to-day has been over a country of great beauty, and exceedingly rich in grass and cedar timber. The face of the country is undulating, and the landscape most pleasing to the eye. Passed large tracts of land, on which we found a red sandstone, apparently fit for building purposes without any further labor than selecting the size of the stone required. The surface is flat, smooth, and shiny, and enough of it to build a dozen towns without making any apparent diminution of its quantity. All day long we have found abundance of water in every little hollow. These streams and holes I do not suppose are permanent, but caused by recent rains and snows, spots and patches of the latter being still upon the ground.

Thermometer, at 4 a. m., 31°; at noon, 61°; at 3 p. m., 61°; at

sundown, 50°.

Encamped in a cedar grove. Grass abnudant. Weaethr bright,

clear, and cloudless.

February 1.—Up at 4 and off at 6. Passed a rolling country in a direct line for Mount Sitgreaves, and so heavily covered with cedar and piñon that our progress was constantly retarded by the trees. The hills and valleys are covered with bunch and gramma grass. Crossing some fine valleys, the only places we found free of a dense growth of cedar, we came at 2 upon a dim trail almost invisible, which, from the occasional marks of a wheel tire having scraped a rock, and a bush here and there crushed and broken, I took to be Whipple's. Following this a short distance, we came to a tank in the rocks, which I supposed was the Lava spring of Whipple. The grass being excellent, and water and wood plenty, I encamped here. The day has been warm and bright.

Thermometer at noon, 71°.

I determined this morning to come in a direct line to San Francisco, and therefore shall leave Breckenridge spring to our left. From an elevation we saw Mount Thorburn in the plain far below us, and the most prominent object in that quarter, in fact, on the whole road, with the exception of Floyd's Peak and San Francisco. We saw very many deer and antelope tracks. Snow only occasionally in small patches where sheltered by the cedars and pine.

After noon the travelling generally became laborious from the softness of the ground, so that we make but short day's journeys.

February 2.—Up at 4 and off at 6. After travelling a mile we came to a large tank in the rocky canon, which, from the sign about it of camp fires, I knew to be Whipple's lava spring. From this point I determined to go south of Mount Sitgreaves, and by that means to Leroux's spring in a straight line. We passed over a fine country—rolling hills and timbered land—and found no snow until we reached the summit of the plateau at the greatest altitude over which we passed it last summer. Here, on the foot of the mountain, it had drifted for probably twelve inches in height. The travelling being laborious, I encamped near where we made our day camp, after leaving Leroux's springs, last summer. Shortly after leaving Lava spring, in which there was abundance of water, we came to New Year's spring, which was also full, and in a mile or two more entered the noble forest of San Francisco. The old mountain covered with snow, relieved by

the dark green patches of pine, and the plain at its base, with its black forest of gigantic timber, presents a beautiful sight as the sun is setting this evening.

Thermometer at noon, 39°. At sundown under the shelter of the

mountain, 46°.

Leaving the plain, which was covered with snow, we sought shelter under a spur of Sitgreaves' mountain for a camp and found a warm

corner and plenty of grass and timber.

February 3.—Up at 4 and off at 7. Found the snow from a foot on the level to eighteen inches in drifts. Put all the men, excepting enough to drive the train, on foot ahead to break the road. The leader was changed every few hundred yards and came behind to the end of the line, nevertheless it was tedious work as the snow was just hard enough on top to break through at each step. This lasted for three miles, after which we had no trouble. After travelling all day through the beautiful forest of pine which covers the country, at four in the evening came to our old camp at Leroux's spring. At this pretty spring, which breaks out of the side of San Francisco mountain and runs four hundred yards into the valley, we found, as everywhere else, the southern exposure of the mountain entirely free of snow and covered with fine grass. Here we encamped for the night. At daybreak, thermometer, 29°; at noon, 36°; at sunset, 31°. A keen and cutting northwest wind all day, filling the air with fine snow, or what the Canadians call pondice.

February 4.—My birth-day.

Up at 4, but did not get off before 8, the animals having good grass and the previous day's journey having been a fatiguing one.

Directly after leaving Leroux's spring the snow commenced getting lighter, and broad bare patches to appear by the time we had reached San Francisco spring, which we passed but did not go to. It had become so light and so little of it that the travelling became easy. After coming twelve miles we encamped at our old noon camp, the grass being excellent; and, moreover, I knew I could not go further than Walnut creek the next day, or between there and the Little Colorado; there is no wood, which is very necessary to one's comfort these cold nights. Our camp is a beautiful one this evening; a clear space of three miles around and skirted with lofty pine trees. We amused ourselves, as we strolled through the pine forest this morning, in shooting squirrels, which are abundant here and of a very beautiful species. Their ears are tufted and very long, the back a beautiful rich brown with silver gray on the sides and white on the belly.

At 4 a. m., thermometer 20°; at noon, 48°; at 3 p. m., 57°.

The day has been calm, cloudless, and very pleasant.

February 5.—Up at 4 and off at 6.30. Still travelling through the forest we came at noon to Cosmino caves. The snow for the latter part of the morning scarce, and even in the drifts and patches where it did exist light and thin.

Encamped about a quarter of a mile below the caves, where we camped in travelling west last summer. If any one should ever follow our trail, it must be remembered that the water at this point is

H. Ex. Doc. 124—6

not that found at our wagon camp at the caves, although that is generally sufficient, but in an immense tank a quarter of a mile or so below. This singular tank in the rock is from eight to ten feet in depth, about twenty feet in width, and seventy feet in length at this time, and I presume is lower now than at any other season of the year. An excellent entrance for animals is found at its lower extremity. Cutting the ice, which was a foot thick on the surface, the sun only reaching it at noon for a moment or two, our animals drank plentifully, and after eating dinner we again started on our journey. grass here is the best gramma and very abundant. Timber in the greatest abundance; cedar, pine, and piñon. The day very warm, calm, and clear. Indian horse and foot tracks seen on the trail all day and last night near camp. Entirely out of the snow, it being only visible on the distant hill tops.

Thermometer at midnght, 18°; at 4 a. m., 18°; at noon, 67°; at mid-

night 22°.

February 6.—Up at 3 and off at 4.30 a. m. Shortly after sunrise came to Walnut creek, where we stopped for breakfast. Water not so plentiful as when we passed here outward bound. The grass very fine; no snow at all. The morning calm, clear, and cold. from camp to Walnut creek. After breakfasting I determined to remain all day, as we found more water than we at first thought; more

than sufficient for all our animals and camp purposes.

We found one house in Examined the ancient ruins near here. which the floor had been laid in adobe. The ground was covered for many acres with pottery, and some fine arrow heads were found near the ruins. Looking more closely we discovered that what we at first took for piles of loose stones and earth were the ruins of houses, in one of which we could trace five distinct rooms separated by what remained of the partition walls. Behind one of these the ground on stamping gave forth a hollow sound; but having no pickaxe with us, we could not investigate the cause.

Thermometer at 4 a. m., 27°; at noon, 70°; at sundown, 37°. February 7.—Up at 4 and off at 5 a. m. We came to the Little Colorado at noon, and encamped a few miles above our old camp. We found the river very much lower than when we passed in September, though from the ground it was evident much rain had fallen lately.

The weather is warm and pleasant though a good breeze is blowing

from the westward.

Thermometer at 4 a. m., 33° ; at noon, 67° .

February 8.—Up at 4 and off at 5 a. m. Soon after starting we left the river and followed our old cut off, and passing the holes where we watered last fall, and which we found equally full to-day, we came soon after to the little stream which we found running when we passed it the first time. Here we found abundance of water, but not running as formerly. Crossing the playa, through which the water runs off, and leaving the road to our right hand, we entered a small cañon in which we found plenty of grass, shelter from the wind, and a considerable quantity of brush-wood, where we encamped.

The day has been rather disagreeable, and a stiff breeze (double reefed topsail) blowing in our faces, with an overcast sky, has made

it the most uncomfortable day we have had on the road.

Thermometer at 4 a. m., 25°; at noon, 58°; at sundown, 45°.

February 9.—Up at 4 and off at 6. After leaving camp a short distance we came upon a fresh trail of Indians, which we followed as far as Davis' creek—thirteen miles. Here I crossed the river. Davis' creek is much fuller than when we passed, and the river is rising.

Last night the wind blew half a gale, and though the morning was calm it is now blowing fresher than ever. Fortunately we have abundance of timber, and the cotton wood on the river makes a good lee

for us.

Found some fine ducks in ponds near the river, of which I killed two.

Thermometer at 4 a. m., 31°; at noon, 58°; at sundown, 45°.

February 10.—Up at 4 and off at 7 a.m. Travelling up the river, and passing two of our old camps, we encamped near Cottonwood Fork, in eight of Mount Whipple, San Francisco mountain being hull down to the westward. Found a good camp, where some cedars and cottonwoods grow, near the river bank. The day has been cloudy, with rain this evening and a prospect of it all night long. Passed two old Indian trails—nothing fresh.

Thermometer at noon, 31°; at sundown, 45°.

February 11.—Up at 5 and off at 7.30. It rained on us all night in drizzling showers, as well as some little this morning. The day

raw and squally, with heavy clouds.

After travelling eight miles we left the river at the mouth of the The more I see of the Little Colorado the better I like it. The stream is of the size of the Gila, but to be likened to that fresh water abomination in nothing else. The soil seems fertile and bears good meadow grass in all parts, while the plains, extending from its banks as far as one can see, are covered with rich gramma grass. The growth of timber in the bottom is in places very heavy and almost entirely cottonwood, but on the left bank, a mile or two from the river, cedar is abundant along the whole length of the stream. All who are with me, and who have been raised in the south, declare it to be excellent tobacco and cotton land. I am not sufficiently acquainted with the culture of these products to give an opinion, but for stock of all kinds I should say that a better country is not within the United States. We found Cottonwood Fork running a brisk but muddy stream, and also the Puerco. Travelling up the latter river we encamped, a mile from our old camp, in abundant and excellent gramma and bunch grass at a half mile distance from the river. The little lagoons between this and the mouth were filled with water.

Thermometer at midnight, 28°; at 4 a. m., 32°; at noon, 54°; at

aundown, 45°.

In the evening stroiled with Joe Bell over the hills, and found the remains of a house. At another point overlooking the river found quite a number of ruins; apparently all the wood used had become petrified; as usual, a large amount of broken pottery ware, painted in various shapes, was laying around.

February 12.—It rained and snowed on us most of the night. This morning, shaking the snow from our blankets, we pursued our road

at 8 o'clock, over the rolling plain, between the Puerco and the Xara. The snow passed off so rapidly, that by noon there was scarcely a trace of it to be seen, but the ground became so muddy that it made the travelling of to-day the hardest on our animals we have experienced during the voyage. At 2 o'clock we encamped on the Xara, having found a good lee under the cliffs, which bound the stream, and excellent grass and shelter for the animals. Our camp is about a mile below our former one, where we moored as we were going over. Weather squally, with rain, and occasionally spitting snow; wind blowing a gale from the northwest. Found the Xara twenty or thirty yards wide, and about two feet deep.

Thermometer at 5 a. m., 28°; at noon, 45°; at sundown, 42°.

February 13.—Up at 4 and off at 7 a. m. Found the stream we had encamped on was not the Xara; crossed the divide, and struck our old trail, where it comes into the Xara, and at 2 o'clock encamped on the Carisso, at our old camp. The travelling very heavy from late rains; found nothing but mud to put our blankets on, but rendered it comfortable by putting down a layer of bushes first. The stream running, and grass good and abundant.

Thermometer at midnight, 31°; at 4 a. m., 28°; at noon, 55°; at

sundown, 48°.

February 14—Up at 4 and off at 6 a. m. Travelled towards Navajoe spring; found some Indian horses, which we at first thought were strays or lost, we captured them at the Little Cotton Wood creek, half-way to the spring. In the evening, as we approached the spring, we found that many Indians were about, and not knowing whether they were Garroteros or Navajoes, we prepared for war. Just before arriving at the spring, discoverd a band of sheep, and from the Indians in charge heard that the large number of savages in the vicinity were Navajoes; watered our animals at the spring, and encamped a couple of miles from it in splendid grass, bunch and gramma. Cedar in abundance all over this country.

February 15.—Up at 5 and off at 8 a.m. The Navajoes were in camp early, but unwilling to trade horses. We left them with the promise that they would come over to Jacob's well and trade, we promising to wait until evening for them. Jacob's well I have previously described. It is the greatest curiosity of the kind I have ever seen. A third of a mile in circumference, a hundred yards in depth, and at the bottom a pool of water about thirty yards across, and friuged with cedar trees, rushes, and willows. It is descended by a spiral trail leading down the sides, which are of soft, yellow clay. Thermometer at 4 a.m., 25°; at noon, 75°.

February 16.—Up at 4 and off at 7 a. m. Met two Indians on the road, whom we supposed to be Garroteros. At noon came in sight of Zuñi, and encamped near the town.

Thermometer at midnight, 38°; at 4 a. m., 25°; at noon, 58°.

February 17.—Up at 4 and off at 5 a.m. Passing the Pueblo of Zuñi, we went a few miles beyond and encamped. Here I bought corn, of which these Indians have plenty, for our mules. They were all in great trouble, the Navajoes having stolen one hundred and fifty of their horses.

Here I parted with Sergeant Armstrong and the soldiers who had been with me so long. They were all excellent men, and I parted with them with great regret. I sent them back from this place to Fort Defiance, having hired of the Indians burros for their transportation.

Thermometer at midnight, 39°; at 4 a. m., 27°; at noon, 52°. February 18.—Up at 4 and off at 5.30. Travelled by a very pretty valley to Ojo Pescada, which is one of the finest springs we have seen, and the land exceedingly fertile. The valley is reached by the trail from Zuñi, so gradually ascending as to seem a level road to the eye, though the elevation attained is considerable. The spring bursts a lively brook from under the rocks, and runs a bold stream at this season beyond Zuñi. Here the fine wheat of the Zuñians is principally raised, and the stubble remaining on the imperfectly cultivated Patches, show clearly the natural resources of this beautiful valley.

Timber of both pine and cedar is abundant, and everywhere the

richest grass covers the ground.

In the evening we came on by a beautiful, undulating country to the night camp, which we made in some cedars. The day has been

Rarm and delightful, and the evening mild and clear.

There is a fine valley with a bold stream of water running through which may be reached by going three miles to the westward, across the mesa, at the Ojo Pescada. This whole country, with the exception of the valleys, which are clear and open, is covered with a dense Srowth of timber-cedar and pine.

Thermometer at 4 a. m., 26°; at noon, 60°.

February 19.—Up at 3 and off at 5 a. m. One would have to deal superlatives altogether to describe the beauty of the country through hich we have passed this morning. When at 9 a. m. we reached Scription rock, I was tired of exclaiming, as every hundred yards Plened some new valley. "how beautiful." The rock itself seems to e a centre from which radiates valleys in all directions, and of marrellous beauty. It rises grandly from the valley, and the tall pines Srowing at its base give out long before they reach the top of its pre-Cipitous face. Inscriptions, names, and hieroglyphics cover the base, and among the names are those of the adventurous and brave Spanlards who first penetrated and explored this country, with dates as far back as 1620. The race has long ago passed away, and left no representative of Spanish blood behind them. Those with us looked with listless indifference at the names of the great men of their nation, and who had made it famous centuries ago, cut by themselves upon this rock, and turned off to take charge of the mules, which is about all even the best of them are fit for.

The rock is some three or four hundred feet in height, and the spring almost hidden in the cavity of it; the face is perpendicular. The valley is ten miles in width, rolling but not hilly, and dotted over with clumps of pine and groves of cedar. A thick forest of pine covers the mountain, which defines the limits of the valley.

In the same valley with "Inscription rock" (as the name has been changed from the pretty old Spanish one of "El Moro") are, as I am informed by a Mexican of my party well acquainted with the country, four fine waters. The first, a large tank called El ojo del Trinidad, bears north northeast from this spring, and is two leagues distant. The next is the rivulet of the Muertas, (so called because of some people having been killed by the Indians,) bearing north northwest, or northwest, and ten miles distant. The next, the rivulet of La Savoya, bearing northwest by north, or west northwest, and twelve miles distant. The fourth is Los Nutinas, which is the largest, and bears west by north, and is fourteen miles distant.

On the summit of the rocks are ancient ruins, the walls of which are four feet in thickness. They are square, one hundred and seventeen yards in front. To the west the mouth of a natural inclosure opens into the heart of the rock, containing within its walls from twenty to thirty acres of level land, and growing in it the finest pine timber. The sides are from one to two hundred feet in height. The ground is covered with fine grass, and the whole may be closed by a wall or fence of thirty-five or forty yards length. Leaving this beautiful place with regret, we travelled up the valley some miles further, through a country of the same character, and encamped for the night.

Thermometer at 4 a. m., 28°; at noon, 70°; at sundown, 32°.

February 20.—Up at 4 and off at 5 a. m. All the morning passing through a fine open forest of tall pine, with extensive open glades and meadows at short distances. At noon we came to the beautiful valley of the Agua Frio. It is not very large, but is the finest we have yet stream issuing out of the head of it is clear and cold, but does not run Its length is about five miles by one and a half in width. over a mile before it sinks. The soil is exceedingly rich, and the hills bounding it covered with pine, and among the trees, which are not thick or scrubby, the finest grass. We had at this point crossed the Rocky mountains, but our passage had been through a country of such. beauty that we could scarcely recognize, in the fairy land we had been travelling in, these rugged barriers, as they have been considered, to our westward progress in civilization. The temperature of the weather at the summit was delightful. The sun clear and bright. The trees green and luxuriant, and nothing but here and there a patch of snow reminded us that the winter was not yet passed.

Descending gradually by a most pleasant trail through beautiful valleys, and without crossing a hill, we came to our night camp, in a fine grove, where we found a fine pool of water and abundance of grass. As for the latter, that may be found everywhere. In the evening a stiff breeze blew up from the westward. It was a free wind, however, and we bowled off before it handsomely. Thermometer at 4 a. m., 30°; at noon, 50°; at sundown, 30°.

For a better description of the country through which we have been passing for the last three days, I refer to the very interesting report of

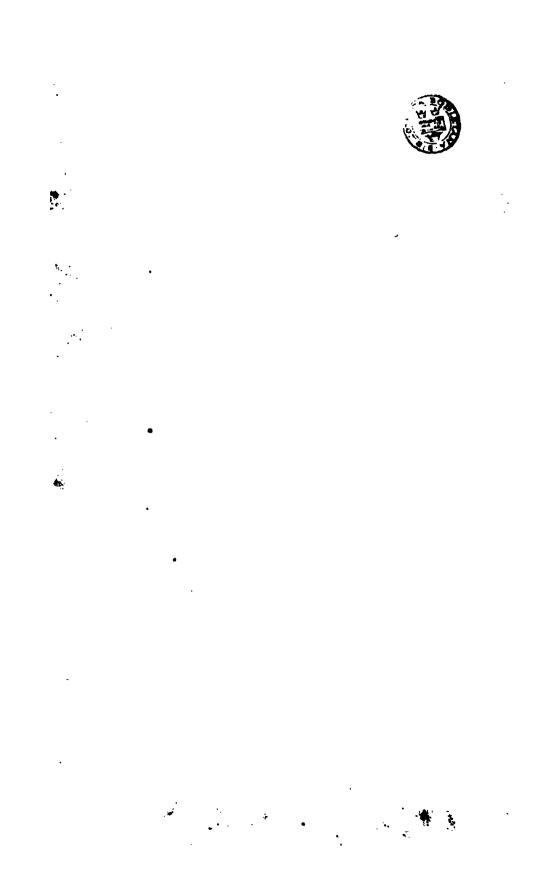

Captain Simpson, United States army.

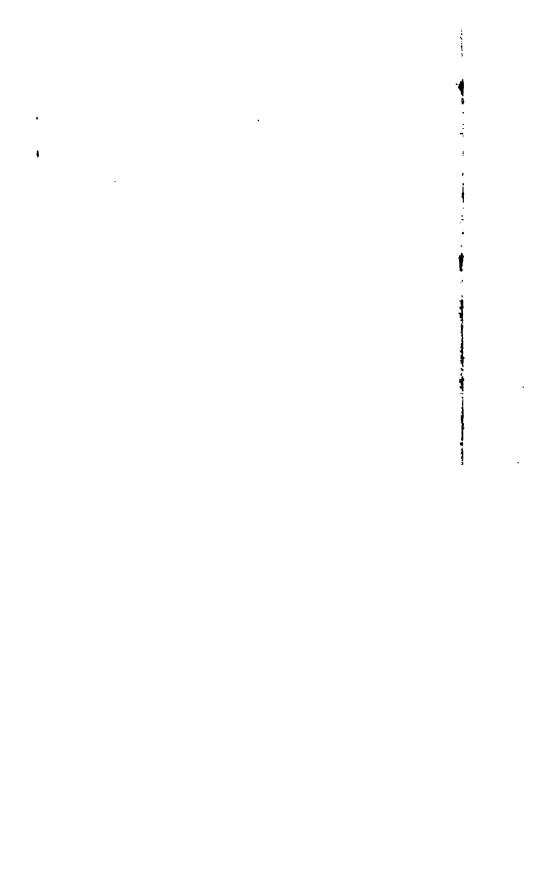

February 21.—Up at 4 and off at 5 a. m. Still descending gradually over a fine country we came to the Gallo. Crossed many streams of lava, which appear to have rolled in a fiery torrent just as a mountain stream from the hills. Crossing the rough face of this, we encamped at 10 near our old place on the Fort Defiance road, having been absent seven months. Here my labors ended; the main road to Fort

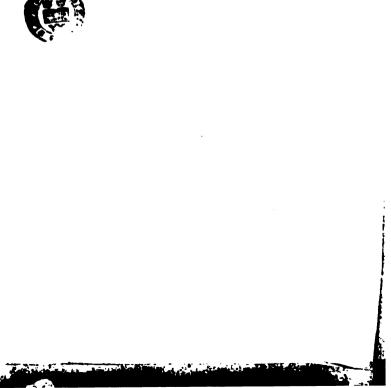

Defiance being intersected at this point by that which I have explored and surveyed to Fort Tejon, California.

Thermometer at 4 a. m., 35°; at noon, 77°.

A year in the wilderness ended! During this time I have conducted my party from the Gulf of Mexico to the shores of the Pacific Ocean, and back again to the eastern terminus of the road, through a country for a great part entirely unknown, and inhabited by hostile Indians, without the loss of a man. I have tested the value of the camels, marked a new road to the Pacific, and travelled 4,000 miles without an accident.

JOHN H. WHEELER, LATE MINISTER TO NICARAGUA.

LETTER

FROM THE

SECRETARY OF THE TREASURY,

FURNISHING,

In compliance with a resolution of the House, copies of papers relating to the claim of John H. Wheeler, late minister to Nicaragua.

May 14, 1858 -Refured to the Committee on Foreign Affairs.

TREASURY DEPARTMENT, Comptroller's Office, May 11, 1858.

SIR: I have the honor to acknowledge the reference to this office of resolution of the House of Representatives of May 5, requesting copies of the papers on file in the Treasury Department in relation to the claim of John H. Wheeler, late minister to Nicaragua, for losses charged to have been sustained by him by discounts upon drafts for his salary, together with the grounds upon which said claim was disallowed by the Treasury Department.

Herewith I transmit all papers connected with the above claim of Mr. Wheeler, and, as furnishing the grounds upon which the claim was disallowed, beg leave to refer particularly to my letter to yourself of June 13, 1857, Mr. Wheeler's reply thereto, and my final report of September 25, 1857, copies of which are herewith. The subject having been fully examined in these letters it is unnecessary to add anything in the present communication.

The papers herewith transmitted are as follows:

No. 1. Letter of First Comptroller to Secretary of Treasury, dated June 15, 1857.

No. 2. Letter of Mr. Wheeler in reply, dated July 15, 1857.

No. 3. Letter of First Comptroller to Secretary of Treasury, dated September 25, 1857.

No. 4. Letters of Hons. Bowlin and Eames to First Comptroller.

No. 5. Letter of J. M. Ramsey, chief clerk to First Comptroller.

No. 6. Letter of E. M. Whittlesey, clerk to First Comptroller.

No. 7. Letter of J. H. Wheeler to Secretary of the Treasury, dated November 18, 1857.

No. 8. Statement of account and papers presented by Mr. Wheeler.

No. 9. Treasury adjustment of same.

9. Treasury adjustment of Samuel Very respectfully, your obedient servant,

W. MEDILL,

Comptroller.

Hon. Howell Cobb, Secretary of the Treasury.

> TREASURY DEPARTMENT. May 12, 1858.

Sir: In compliance with the resolution adopted by the House of

Representatives on the 5th instant, as follows:

"Resolved, That the Secretary of the Treasury be requested to furnish the House of Representatives with copies of the papers on file in his department, in relation to the claim of John H. Wheeler, late minister to Nicaragua, for losses charged to have been sustained by him by discounts upon drafts for his salary, together with the grounds upon which said claim was disallowed by the Treasury Department.

I have the honor to transmit herewith the report of the Comptroller

dated the 11th instant, and the papers therein mentioned.

Very respectfully, your obedient servant,

HOWELL COBB, . Secretary of the Treasury.

Hon. JAMES L. ORR. Speaker of the House of Representatives.

Copies of papers relating to claim of John H. Wheeler, late United States minister to Nicaragua, for losses on his drafts by exchange, called for by resolution of House of Representatives of May 5, 1858.

No. 1.—Letter of Comptroller to Secretary of the Treasury, June 15, 1857, giving reasons for disallowing claim for loss by exchange; and letter of Secretary, approving views of Comptroller.

No. 2.—Letter of Mr. Wheeler to Secretary, in reply to above

letter, July 15, 1857.

No. 3.—Letter of Comptroller to Secretary, replying to letter of Mr. Wheeler, and giving additional reasons for rejecting the claim, September 25, 1857.

No. 4.—Letters of Hons. J. B. Bowlin and C. Eames, late United

States ministers in Central America, showing condition of currency and rates of exchange.

No. 5.—Letter of J. M. Ramsey, chief clerk Comptroller's Office,

referred to in Comptroller's letter of September 25, 1857.

No. 6.—Letter of E. M. Whittlesey, clerk in Comptroller's Office, referred to Comptroller's letter of September 25, 1857.

No. 64.—Letter of Mr. Wheeler to Secretary of Treasury, dated

November 18, 1857.

No. 7.—Account, as stated by Mr. Wheeler, in which he prefers his claim for loss by exchange, together with vouchers and other papers.

No. 8.—Treasury adjustment of Mr. Wheeler's account and other papers, in which Comptroller disallows claim for loss by exchange.

No. 1.

Letter of First Comptroller to Secretary of the Treasury, June 15, 1857, giving reasons for disallowing claim for loss by exchange on drafts.

TREASURY DEPARTMENT, Comptroller's Office, June 15, 1857.

The letter addressed to you by the Hon. John H. Wheeler, late minister to Nicaragua, in relation to a certain charge in his account against the United States having been referred to this office, I have

the honor to submit the following:

Mr. Wheeler's account, as minister to Nicaragua, for salary and contingent expenses from the 1st July, 1856, date of the last settlement, to 2d March, 1857, the date of his resignation, has been reported by the Fifth Auditor of the Treasury to this office for examination and revision. In this account he charges the United with twenty per cent. on all his drafts, embracing those that were covered in former settlements as well as those that were drawn since, and now in the course of settlement, amounting, in the aggregate, to \$2,941 32, on the ground, as he alleges, that the currency of Nicaragua is eight dimes to the dollar.

There was certainly no necessity for referring to the opinions of former Attorneys General on the subject, inasmuch as this office admits that the government is bound to pay a foreign minister his stipulated salary, and, being thus bound, is liable to make that amount available to him at his foreign residence, and insists that this obligation has been fully executed and complied with in the case now

under consideration.

Mr. Wheeler was authorized to draw on London or New York, and there is not a particle of proof of any kind or description whatever before this office, nor even an allegation from himself in writing, that he ever lost one cent upon the exchange of his drafts. On the contrary, the only vouchers which he submits in support of this large item in his accounts, copies of which are herewith, marked B and C, clearly show, if they show anything, that exchanges were at par between the place of his "foreign residence" and the cities upon which his drafts were drawn and negotiated. Indeed, the exchange has usually been in favor of those cities, and hence the necessity, as was supposed, of procuring vouchers disproving the receipt of any premium.

M. E. Bradley certifies "that a bill of exchange on London or New

York was at par only, and commanded no premium."

Thomas J. Van Dyke says "that a bill of exchange on London or New York commanded no premium, but was par only in Nicaragua. In my transaction I had occasion to call on Mr. Wheeler for drafts, and negotiated them with others for him, and on no occasion was any

premium charged or paid."

But Mr. Wheeler, in his letter to you, says: "It is on file among the vouchers of my accounts that any draft drawn on Nicaragua was paid for by eight dimes to the dollar; that my drafts were disposed of at this, as the best that could be obtained for them, thus falling short of the gold coinage at the United States treasury twenty per cent."

If there is any evidence, or even allegation, of this kind on file, it has escaped my notice. The vouchers B and C, referred to, are the only papers on file in the case. There is no allegation in either of them that Mr. Wheeler disposed of his drafts at the ruinous rate of eighty cents on the dollar, as the "best he could do;" that he received the proceeds in ten cent pieces, or that he sustained a loss of one single

farthing on the same.

It is true that Messrs. Bradley and Van Dyke certify that, according to a custom prevailing in Nicaragua, eight dimes, or ten cent This is very probable, as a similar p.cces, are taken for a dollar. custom is known to exist in all countries where silver change is unusually scarce. Such has been the custom in some portions of our own country, and is still the custom even in this city in the small and ordinary transactions of the day. So well is this custom known, and so great is the scarcity of small change in Nicaragua and other South American States, that persons intending to visit that country frequently carry out their money in ten cent pieces for purposes of speculation; and, if I have not been misinformed, Mr. Wheeler himself is not entirely without experience in this matter. If the same persons were permitted to bring back their accumulations, and dispose of them at an increase of twenty per cent., the operation would be still more profitable.

The exchange between Nicaragua and London, and Nicaragua and New York are proved to have been at par, dollar for dollar. I cannot, therefore, see what the custom in Nicaragua of receiving and paying out a dime for twelve and a half cents has to do with the business relations existing between Mr. Wheeler and the United States. The government was not bound to pay Mr. Wheeler at the place of his foreign residence in ten cent pieces in order that he might realize a premium thereon of 20 per cent, but in gold dollars, which was done. If he saw proper to conform to the custom of the country and take eight silver dimes for a dollar, did he not in pursuance of the same

custom pay them out at the same rate? In no way then did he sustain any loss. If as he says eight dimes were regarded as equivalent to a dollar in Nicaragua, was he not in possession of a dollar for every eight dimes that he received? Mr. Wheeler is in eror in supposing that the dollar was at a discount in Nicaragua; it was the dimes that commanded a premium, and he will admit, I presume, that he could purchase as much in that country with eight silver dimes, whether in property, drafts, or the larger coins, as he could with a gold dollar.

Under no circumstances, therefore, is he entitled, in my judgment,

to the credit in question.

The letter of Mr. Wheeler is herewith returned.

Very respectfully, yours,

W. MEDILL.

Hon. Howell Cobb, Secretary of the Treasurg.

TREASURY DEPARTMENT,

June 16, 1857.

SIR: I have examined your decision in the case of the claim of the Hon. John H. Wheeler, late United States minister to Nicaragua, and approve of the same, and have transmitted a copy to the Hon. Mr. Wheeler.

I am, very respectfully,

HOWELL COBB, Secretary of the Treasury.

WILLIAM MEDILL, Esq., Comptroller.

No. 2.

Letter of John H. Wheeler, Esq., to Secretary of the Treasury, July 15, 1857, replying to letter of the Comptroller to the Secretary, of June 15, 1857.

Washington City, July 15, 1857.

SIR: Yours of the 16th ultimo (enclosing a copy of the opinion of the First Comptroller of the Treasury, dated 15th ultimo, relate to the loss sustained and claimed by me as the difference between the amount actually received for salary as United States minister at Nicaragua, while at my foreign residence, and the amount actually due from the Treasury) was replied to by me as soon as received.

I stated in my reply that I should examine this opinion, and en-

deavor to show to you that, in rejecting this item of my account, it was

contrary to equity and the usage of the government.

The first statement of the honorable Comptroller, that I "charge the United States on all drafts, embracing those that were covered by former settlements as well as those drawn since, and now in course of settlement," seems more a charge of laches on my part than error or illegality in the item. Had the Comptroller looked through my accounts he would have seen that he was in error as to fact; that in my returns for the first quarter of 1856, loss of exchange was charged by me to the United States; from some informality or other cause, however, was never allowed to me.

If he was correct as to the fact, it does not avail a feather against my rights. I know that a final settlement would bring up all matters between the United States and myself; nor was I aware of any statute of limitation, rule, or regulation denying this right. It should have been passed to my credit when claimed. I have been kept out of my just due, and have just cause of complaint against the former account-

ing officers that it was not allowed.

This point made then by the Comptroller is not true, and, if true, avails nothing. The Comptroller admits that "the government is bound to pay a foreign minister his stipulated salary; and, being thus bound, is liable to make that amount available to him at his foreign residence."

I respectfully ask you to decide, were the amounts received by me in Nicaragua equal in value to the stipulated salary as paid at the United States treasury?

The evidence is conclusive that eighty cents or eight dimes was only paid or current as a dollar; that this was the universal currency of

that country.

The Comptroller asserts that "there is not a particle of proof of any kind that I ever lost one cent by the exchange of my drafts; but, on the contrary, Messrs. Bradley and Van Dyke prove that drafts drawn in Nicaragua upon the United States or London were par in Nica-

ragua.''

Messrs. Bradley and Van Dyke prove that the currency of Nicaragua was eight dimes to the dollar, (which fact the Comptroller omits in this connexion;) the owner or drawer of a bill received only eight dimes for each dollar drawn for. This was selling drafts at par with a vengeance. Evidently the honorable Comptroller does not comprehend the meaning of the word par as conveyed by the evidence or as understood in mercantile usage, meaning par or equal at the place of negotiating. If a bill of exchange is said to be par in London or Nicaragua, the currency of London or Nicaragua is to be the standard by which this equality is to be regulated. If then eight dimes was considered equal to the dollar at the place of negotiating or selling the bill, then eight dimes paid for each dollar of the bill was par. Yet under this operation, the Comptroller avers, not a cent was lost. When it is demonstrated that eighty is equal to one hundred, then this sagacious averment is proved

But the Comptroller avers further that it is all a mistake; "the

drafts were not at a discount; there was no loss, since the dimes were

at a premium."

This valuable discovery should rank the discoverer as the first financier of the age. He seems to forget that I never agreed to receive American dimes at a premium for my salary. The contract between the United States and myself was, that I should be paid in Nicaragua the dollar, equal in value to the coinage paid at the United States treasury of ten dimes to the dollar, nothing more nor Has this been the case? If these dimes commanded a premium, as agreed by the Comptroller, it is unfortunate that he has not informed us by what standard this astounding fact is determined. For to say that any circulating medium bears a premium or is at a discount, presupposes some standard. Now, by what standard was this salary to be regulated; surely not by the Nicaragua standard, but by the standard of the government whose servant I was. the government sent me my stipulated salary at my residence, in American dollars in silver or gold, I should have received ten dimes for each dollar due. It was not done so, but I was bound to render service to the government at a foreign residence, and left to get the means of my support in the best mode practicable. The mode was by drafts, on which I received only 80 cents for each dollar drawn for, and which drafts were charged to my account on the treasury books at 100 cents for each dollar drawn for. Is there no loss here?

The Comptroller asserts that exchange is usually in favor of the place on which my drafts were drawn. Where is the proof of this? There is none. But the experience of any one who has any knowledge of Central America positively contradicts this assertion. Every merchant or any one who has correct information in mercantile affairs knows that even in Cuba the exchange is against the United States. It is positively proved by Mr. Van Dyke, in this case, that the universal currency of Nicaragua was eight dimes to the dollar; that a bill of exchange commanded no premium; that he bought drafts himself of me, and sold them to others for me at this rate. How then can any mind be so prejudiced or obtuse as to assert "that not a particle of proof of any kind or description, or even an allegation by me, that I ever lost one cent upon the exchange of my drafts?"

No demonstration can make the fact more evident that a loss was sustained, unles the financial genius of the Comptroller is prepared to show, by a similar process of reasoning, that 80 is equal to 100; or

that 80 taken from 100 leaves minus.

The argument of the Comptroller states that if "eight dimes was received for one dollar by me in Nicaragua, could I not purchase as much in that country as with a dollar?" How profound a quere! How subtile and pertinent to the issue! Did I agree to take eight dimes to the dollar from the United States? For this point asked, admits that this is all I received. Admit his extraordinary position, and that, with every copper cent received by me from the United States in Nicaragua, I could and did purchase property to the value of five dollars in that country, is the logical conclusion hereby drawn that every copper cent is to be charged as five dollars on the books of the First Comptroller? The point which we now examine, is what I was really

entitled to and what was really received. Not what became of the amount after it was received.

In the same train of profound reasoning, the Comptroller admits that "it is the custom in all countries where silver coinage is scarce to take eight of these dimes for a dollar; that this custom prevails in our own country, and even in this city; that so well is this custom known that persons intending to visit Nicaragua frequently carry out their money in ten cent pieces for purposes of speculation, and states, upon information, that I pursued this course." I supposed that when you, as the head of the Treasury Department, referred this case to a high functionary near you, you desired only facts. Where then does this appear among the papers of this case? By whom is it alleged or by whom proved? If true, I should be unworthy of the confidence of my country and the high position of representing her honor and dignity abroad. If untrue, the assertion is offensive, and unworthy of any official in any respectable government.

An unfounded surmise or false information received as evidencin the office of the First Comptroller. Had such information been received, should not the party affected by it had notice and been allowed to rebut it by the truth and the facts? Even if true it cannot change the contract between the parties, and presents no bar to my rights; being untrue, and finding so ready a lodgment in the mind of one from whose judgment a patient, fair, and equitable examination was expected, shows clearly to you the spirit of investigation which has animated the Comptroller in refusing just compensation for services fairly and faithfully rendered to our common country amid much per-

sonal peril and suffering.

In connexion with this claim I beg leave to submit a letter just received by me from the Hon. J. B. Kerr, of Baltimore, who states therein that "the only currency of Nicaragua, during his official residence there, consisted of American dimes, eight to the dollar, and the single and two franc pieces, four to the dollar."

In conclusion I have proved the honorable Comptroller in his argument errs as to facts; and when not in error as to facts the statement

nowise affects this case.

I have shown that the universal currency which I received was less than I was entitled to receive; that to subsist in Nicaragua I had to take this currency; that I am justly entitled to receive the salary stipulated at the rates paid at the United States treasury. This is all I ask, and this is what I have a right to receive. I wish that my whole accounts be fairly and fully investigated, understood and allowed by the proper accounting officers of the treasury.

Should there be a shadow of doubt resting on your mind as to the equity of my case, I respectfully request that the argument of the Comptroller, with the proofs filed, with this communication, be referred to the Attorney General of the United States, to whose legal

opinion I feel ready to submit it.

I have the honor to be, very respectfuly, your obedient servant, JNO. H. WHEELER,

Late Minister of United States to Nicaragua.

Hon. Howell Cobb,

Secretary of the Treasury, Washington City.

No. 3.

Final report of Comptroller.

TREASURY DEPARTMENT, COMPTROLLER'S OFFICE, Washington, September 25, 1857.

Sir: I have the honor to acknowledge the reference of a communication, bearing date July 15, 1857, addressed to you by Hon. John H. Wheeler, late minister of the United States to the government of Nicaragua, in reply to your letter of the 16th of June, approving the decision of this office in disallowing the claim of that gentleman for an alleged loss in the exchange of his drafts.

As the case was fully disposed of by that decision, and your unqualified approval of the same, I presume that this second reference was merely made for my own information, and, if desired, to afford me an opportunity of showing the correctness of the facts set forth in my former report, which has not only been questioned, but expressly

denied in the reply before me.

I therefore avail myself of the occasion thus offered me to submit the following additional remarks, with accompanying letters from Hon. J. P. Bowlin, late minister of the United States to New Granada; Hon. Charles Eames, minister of the United States at Venezuela; James M. Ramsey, esq., chief clerk of this office, and E. M. Whittlesey, who has been acting as chief clerk during the absence of Mr. Ramsey; observing at the same time that I have been prevented by ill health, and an unusual pressure of current business upon the attention of the office, from noticing the matter at an earlier day.

Mr. Wheeler was authorized, while residing in Nicaragua, to draw upon the Treasury of the United States, or Barings, Bros. & Co., our agents in London, as might be found most convenient and economical, for the amount of his salary as the same would become due, together with the contingent expenses of his office, and enjoined, as is usual in such cases, to forward his accounts quarter yearly to the appropriate department for examination and settlement. In pursuance of this authority, and after receiving his outfit of \$4,500 in cash at the treasury, he drew and sold the following bills, as set forth in his account.

| Oct. 13 | , 1854. | On Barings, Brothers & Co. for | £384 | 5 | 8 |
|---------|----------|---------------------------------------|------------|----|---|
| | Ďο | dododo | 25 | 16 | 1 |
| Nov. 4 | , 1854 | \$ 97 92 | | | |
| April 3 | , 1855. | On Barings, Brothers & Co. for | 232 | 8 | 9 |
| | Ďo | dodo | 103 | 6 | 1 |
| July 2 | 2, 1855. | On Barings, Brothers & Co. for | 232 | 8 | 9 |
| | | On Barings, Brothers & Co. for | 232 | 8 | 9 |
| Jan. 14 | 1, 1856. | On Barings, Brothers & Co. for | 232 | 8 | 9 |
| | | dodododo | 103 | 6 | 1 |
| May 18 | 5, 1856. | On Treasurer United States \$1,123 88 | | | |
| July 1' | 7, 1856. | On Treasurer United States 1,125 00 | | | |
| Oct. 31 | l, 1856. | On Treasurer United States 4,875 00 | | | |

In the rendition of his quarterly accounts, embracing the period during which all of these drafts were drawn and the proceeds realized,

he made no charge whatever for loss by exchange except in a single instance, and the same were duly settled by the proper accounting officers of the treasury, and he advised each time of the results. In the account immediately preceding that now under consideration he claimed a loss of \$599 on the draft of January 14, 1856, drawn upon Barings, Brothers & Co for £103 6 1, (\$500 federal money,) which charge was suspended upon the recommendation of H. Lasselle, then a clerk in the office of the Fifth Auditor, but now the attorney of Mr. Wheeler, in the following words:

Mr. Wheeler cannot claim loss in exchange on drafts drawn from a place distant from his mission, unless under leave of absence or on

official business."

"H. L." (H. LASSELLE.)

On retiring from office, Mr. Wheeler submitted a final account containing his receipts and expenditures from the date of the last preceding exhibit and settlement till the close of his official services, in which he charged the United States with a loss of twenty per cent. on all the above drafts, "including those," as I before stated, "that were covered in former settlements, as well as those that were drawn thereafter, amounting, in the aggregate, to the large sum of \$2,941 32. Even the draft upon which he had claimed, in the first instance, but a little over one per cent. is included, and the same clerk that so promptly rejected this small demand, while acting under the sanction of an official oath, is now laboring, as an attorney, to show that his client is entitled to a loss of twenty per cent., not only upon this same draft, but upon those in relation to which no charge whatever had been made, and that, too, with a full knowledge that every one of them was drawn or negotiated at places distant from his mission."

Whatever claim our ministers and other agents, who are required to reside abroad, may have to indemnity for losses of this description, the only authority that the accounting officers of the treasury have for recognizing or allowing them is in the following regulations,

prescribed by the President of the United States:

"Loss by enchange in the sale of drafts on the Secretary of State will be allowed, provided that the certificates of the bankers or brokers to whom the sale may have been made, are transmitted, showing the loss sustained, or the certificate of two or more merchants, bankers, or brokers, showing the rate of enchange between the place where the consular officer is situated, and the city of New York, at the respective dates of the drafts as per form No. 25."

It is only upon condition that certificates as above shall be "transmitted," that the accounting officers are authorized to make allowances of this character. Mr. Wheeler did not bring his claim within the provisions of this regulation, or if he did, it was only to negative its title to consideration. He submitted no certificate from the person or persons to whom the sales were made, "showing the loss sustained," no certificate from any merchant, banker, or broker, "showing the rate of exchange between Granada and New York, at the respective dates of the drafts;" and he even forgot to furnish his own certificate

verifying the said rates in form prescribed in the appendix to said regulations. This singular omission, whether designed or not, would necessarily have led to the disallowance of the claim, even if its want

of merit had not been otherwise apparent.

Accompanying the account, however, were two certificates, one from Mr. E. Bradley, "that a bill of exchange on London or New York was at par only, and brought no premium;" and the other from Thomas J. Van Dyke," "that a bill of exchange on London or New York commanded no premium, but was par only in Nicaragua," both of which certificates, are dated at Philadelphia, after the rendition of the account. Par, means equal in value, and hence it is of no consequence in what currency the draft was drawn on the proceeds received.

They must be equal in value, or the exchange was not at par. This direct and positive testimony, together with the fact that no other minister or public agent in the Central or South American States, have ever charged one farthing, so far as I could learn, for losses by exchange on the United States during the period referred to, removed the last remaining doubt, and fixed, in my judgment, the true character of the demand.

But that Mr. Wheeler may have the full benefit of these certificates, which cost him so much trouble to procure, I here give them entire:

"I do hereby certify, that the currency at Granada, Nicaragua, Central America, for the last five years, was eight dimes to the dollar, and that although the government did, within the last year, enact that ten dimes should be the legal currency, yet among the people, the usual custom was to take and receive eight dimes.

"Witnes my hand, this 19th March, 1857.

"M. E. BRADLEY.

"And I further certify, that a bill of exchange on London or New York was at par only, and commanded no premium. "M. E. BRADLEY."

"I do hereby certify, that I resided in Nicaragua during the years 1855 and 1856, and acted often as the agent and private secretary of Mr. Wheeler, the American Minister.

"That the universal currency of the republic of Nicaragua is eight dimes to the dollar, and it is the custom to take them and receive them at that rate.

"That a bill of exchange on London or New York, command no

premium, but was par only in Nicaragua.

"That in my transactions, I had occassion to call on Mr. Wheeler for drafts, and negotiated with others for him, and on no occasion was any premium charged or paid.

"THOMAS J. VAN DYKE.

"PHILADELPHIA, March 19, 1857."

The certificate of Mr. Wheeler is written on the margin of the account, and is in the following words: "The currency of Nicaragua being eight dimes to the dollar, and realizing this on these drafts, said drafts commanded no premium See the testimony of the agent of the Nicaragua Transit Company, endorsed and marked B, and of Thomas J. Van Dyke, esq., enclosed and marked C.

"JNO. H. WHEELER."

What the standard of value or the peculiar nature of the currency of Nicaragua, which it would seem to be the principal object of Mr. Wheeler to explain, has to do with the matter under consideration, I am really unable to perceive, since neither he nor the United States are shown to have been affected in any way thereby. The character of these certificates, though somewhat artfully prepared, is too obvious to impose on any one. They were no doubt intended to create the impression in the minds of the accounting officers that the proceeds of the bills sold by Mr. Wheeler were received in the currency of Nicaragua, and only amounted in his hands to eight-tenths of their face, or eighty cents on the dollar of our money, and thus lay an apparent foundation for the charge, without incurring the responsibility of

making any express or positive allegation to that effect.

There is a species of morality that sees no wrong in misdirecting the judgment of others, provided it can be done by indirect means. There are two allegations contained in each certificate, but in no instance has the one been connected with or made dependent in any way They are separate and distinct propositions. It is alon the other. leged that the bills drawn on the United States or London, sold at par only, and brought no premium. It is next alleged that in the currency of Nicaragua, the dollar, meaning of course the local or mercantile dollar of the country, is estimated at only eighty cents of our money. These allegations are no doubt both true, and yet they prove nothing whatever as it regards the question in issue. If our minister in Paris was to draw for so many dollars he would hardly be expected to take the same number of francs in exchange; or, if he did, I do not think he would so far presume on the ignorance of his own government as to call it par.

The peso sencillo, or light dollar of Nicaragua, is no more the dollar

of the United States than is the franc.

This criticism on the construction and design of these certificates originated in no uncharitableness on my part; a just claim required no such support. Why the refusal to assert the loss in direct language; or to accompany the account with a statement of the facts, and thereby relieve this office from the necessity of seeking them in other sources? Why were the regulations and forms prescribed by the President disregarded, and a new and unauthorized course of procedure adopted in their stead? And why the necessity of going to Philadelphia and procuring the equivocal, and, to say the least of it, very inconclusive testimony of certain persons wholly unknown to the department, while Mr. James F. Brown, who negotiated and sold these drafts, and Messrs. Riggs & Co. the purchasers thereof, are quietly residing in this city? These Philadelphia witnesses may have made very good "private secretaries" in Nicaragua, but if they desired to be understood in the above certificates as having "called on Mr. Wheeler for any of these drafts," and as having sold or negotiated any portion

of them with others for him, "their testimony in any case, however, unexceptionable in form, should be excluded on the grounds of credibility, as it is satisfactorily shown that not one of them was ever sold

or negotiated in Nicaragua.

All commercial and civilized countries have some fixed or recognized standard of value for the transaction of their own business, and by a comparison with which the various coins or other mediums of exchange in circulation, is readily ascertained and determined. As few if any of the South or Central American States have any mints, their standard of value exists merely upon the statute book or in the customs of the people, and is composed of the pero and its fractional denominations. This peso is called the peso sencillo, or in English, the soft dollar, to distinguish it from the peso fuerto, or hard dollar of the United States, Spain and Mexico, and is about eight-tenths in value of the latter.

In Nicaragua, and other States of Spanish origin, the currency or coins chiefly in use, are the eagle, half-eagle, dollar, half-dollar and dime of the United States, the sovereign or pound sterling of England and the five-franc piece, franc and half franc of France.

Other coins also find their way there, as they do into all commercial

or trading communities.

The United States in the transaction of their business reduce every thing into dollars and their fractions; England into pounds sterling and their fractions; France into francs and their fractions, and the South and Central American States into peso sencillos and their fractions. Compared with our currency the pound sterling is \$4 84, the franc 19 2-10 cents, and the peso 80 cents. In sterling the dollar of the United States is 4s. 2d., the franc a little over 9½d. and the peso aforesaid 3s. 4d. Reduced into the currency of the South or Central American States, the dollar of the United States, Spain, or Mexico is one peso and the fourth of a peso, the pound sterling or sovereign a fraction over six pesos, and the franc one fourth of a peso. From this it will be seen that there is no more difficulty or inconvenience in transacting business, or determining the rates of exchange in Nicaragua, than there is in the United States, England, France, or in any other country.

A person selling a bill in Nicaragua for five hundred dollars on London or New York, when exchanges are at par, will be credited with six hundred and twenty-five pesos, or soft dollars, upon the books of the broker. In like manner, if he draws for one hundred pounds sterling, and Mr. Wheeler generally drew in that currency, he will be credited with six hundred and five pesos, or soft dollars, instead of four hundred and eighty-four dollars, the value in federal money. If he only received five hundred pesos, or soft dollars, for the first draft and four hundred and eighty-four for the last, instead of the sale being at par, it would have been made at a discount of twenty-five per cent. This subject is fully and most satisfactorily illustrated and explained

in the accompanying letters of Messrs. Bowlin and Eames.

Mr. Bowlin, says: "The par rate of exchange there," alluding to New Granada, where he has resided for the last few years, "in their current language, is 25 per cent. advance, which means that one hundred dollars American, is one hundred and twenty-five Granadian or soft dollars of 80 cts. each, and it is above or below par as it rises above or falls below the 25 per cent. When I sell a draft for five hundred dollars at par I receive five hundred ten real dollars, which they call in the currency of the country, six hundred and twenty-five dollars, and would so credit it immediately, as all accounts are kept in the 80 cent dollar; so that a man drawing there loses nothing in consequence of the varied currency, for if he takes soft dollars he gets them at their true value, 80 cents each of our coin." Again he says, "there is no disadvantage to the drawer of bills in that country, resulting from the use of the 80 cents dollar, for he only gets more of them in the proportion of 80 cents to 100 cents. Such a thing as selling a bill dollar for dollar and receiving for it the dollar of the country at 80 cents each, as a full dollar," I suppose was never heard of. Certainly not in Nicaragua; but Mr. Wheeler sent his drafts to Washington city, and there in sight of the treasury of the United States, where he could have drawn the entire amount in gold, received, to quote his own declaration in the letter before me, only 80 cents for each dollar drawn for." Mr. Bowlin had probably left New Granada before the fame of these operations, so new and interesting in the science of finance, had reached the surrounding nations.

Mr. Eames, who resides in Venezuela, concurs in these views, and says that while he has "no personal experience of the state of currency and exchange in the other Spanish American countries, he supposes that those of them which have no mint nor national coinage must regulate their currency on general principles similiar to those adopted in Venezuela." Both gentlemen bear testimony that exchanges on London and New York are at par, dollar for dollar of the same currency in which the drafts are drawn, and that when the proceeds are received in the local or nominal currency of the country, the value is always equalized by the required increase in the amount. And this testimony is well corroborated and sustained by their own accounts, not one of which contains any charge for loss by exchange

or otherwise.

It will thus be seen that if Mr. Wheeler had sold any drafts in Nicaragua he would have realized their full walue, dollar for dollar, measured by the same standard, and even if he had been compelled to receive the proceeds in "ten cent pieces," so far from losing he would have been benefited to the extent at least of the cost and risk of transporting them from the United States. But, to my great surprise, it turns out, upon a full investigation of the subject, that Mr. Wheeler never sold a draft in Nicaragua during his entire residence in that country, and that the matter has been a mere experiment upon the presumed ignorance, or too confiding disposition of the department. An examination of the accounts of Baring, Brothers & Co., London, and Riggs & Co. of this city, has brought these drafts to light, and shows that the most of them were drawn in the United States, and that every one of them was negotiated and sold either in this city or New York. By reference to the table accompanying the letter of Mr. Whittlesey, and which is hereto appended, it will be perceived that Mr. Wheeler, during the period he was in office, drew

ì

thirteen drafts, amounting in all to \$14,706 62. The two first were drawn in New York on Baring, Brothers & Co., and sold to Duncan, Sherman & Co. of that city. The next one was drawn in this city upon the State Department, and sold to William F Bayly, in payment, it is said, of a stationery account. The six immediately following were drawn in Washington, on Baring, Brothers & Co., London, and sold to Messrs. Riggs & Co., who resided within view of the United States Treasury, while the other four appear to have been drawn in Nicaragua upon the Secretary of State, and enclosed to a friend or agent in this city, who sold them also to Messrs. Riggs & Co. They were probably presented at the treasury and paid the same day. Those upon Baring, Brothers & Co. were drawn in pounds, shillings, and pence, and those on the Secretary of State in federal money.

What induced Mr. Wheeler to adopt so extraordinary a course when he could have sold any amount of bills in Nicaragua at par, and whether he realized any premium upon those which were drawn in this city or London, I have made no effort to ascertain. It is said there is a motive for every thing, and what other than a pecuniary one could lead him to prefer receiving his salary and other moneys at the hands of bankers rather than from the treasury of the United

States?

As you have already decided, in your reply to my communication of 29th August, 1857, requesting your views on constructive charges, "that only the actual loss by exchange on the sale of drafts will be allowed," it is unnecessary to pursue the matter further.

Finally, I am of opinion that the claim of Mr. Wheeler to indemnity for loss by exchange, in the sale of drafts, is not only unsustained by the proper vouchers, but that it is without any foundation whatever

in either law, equity, or good citizenship.

Mr. Wheeler has been liberally treated, and should have been the last person to set up such a demand. He was appointed when ministers of his rank received but \$4,500 per annum, with an outfit of one year's salary. He had pocketed his outfit, and been in office only eleven months, when Congress raised the salaries to \$7,500, dispensing with the outfit. He had thus the advantage over most others, in receiving both the outfit and the increased salary, and of thereby realizing \$4,967 more than he would have been entitled to under the law that was in force at the time of his acceptance, and nearly \$5,000 more than is allowed under the present law. It would seem there is something in the old adage, "that an unexpected gain only increases our avarice."

Mr. Wheeler, prior to my former report, carefully avoided making any direct allegation that he had been compelled to receive the proceeds of his drafts in the currency of Nicaragua, and at a sacrifice of one fifth of their true value, although this was the sole ground on which his claim was predicated. But, confiding in the security of the past, he does not hesitate to declare in his letter to you, "the owner or drawer of a bill received only eight dimes for each dollar drawn for." In relation to the case in question, he says: "I should have received ten dimes for each dollar due. It was not done; but I was

bound to render services to the government at a foreign residence, and left to get the means of my support in the best mode practicable. The mode was by drafts, on which I received only 80 cents for each dollar drawn for, and which drafts were charged to my account on the treasury books at 100 cents for each dollar drawn for. Is there no loss here? Again, he says it is pointedly proved by Mr. VanDyke in this case, that he bought drafts himself of me, and sold them to others for me, at this rate." There is no equivocation in this language. It is plain, positive, and direct, and merely quoted here to enable you the more readily to compare it with the facts above stated; and especially the fact that every one of his drafts was sold either in this city or New York, surely for not less than par, probably in some instances at a premium, and the proceeds received in the currency of the United States.

In my former report I had occasion incidentally to allude to a practice which I was told existed, to some extent, of carrying out American dimes to those countries where silver change is scarce, and where they circulate as of equal value and are promiscuously taken with the twelve and a half cent piece, and, to intimate a scienter, remarked that, "if I had not been misinformed, Mr. Wheeler himself is not entirely without experience in this matter." Mr. Wheeler denies any such experience—declares that "if it is true, he would be unworthy of the confidence of his country," and somewhat indignantly asks, "by

whom is it alleged or by whom proved?"

In response, I herewith submit a letter to me from James M. Ramsey, esq., the chief clerk of this office, a gentleman whose veracity and honor require no endorsement from any one. It was drawn out, of course, by a note from myself. Mr. Ramsey certifies that, during a conversation that took place between Mr. Wheeler and himself in relation to the claim in question, Mr. Wheeler stated: "I converted about \$2,000 into dimes before I left this country, which I carried with me to Nicaragua, on these I made a profit, which perhaps I ought to, or it would be but fair that I should, credit to the government. I am very willing to do so." Mr. Ramsey continues: "I of course cannot vouch that such was the identical language used by Mr. Wheeler, but it is substantially the same, except probably in regard to the amount. In that I may err, but my belief is strong that I do not."

I herewith respectfully return the communication of Mr. Wheeler,

and am, very respectfully, your obedient servant,

W. MEDILL.

Hon. Howell Cobb, Secretary of the Treasury.

No. 4.

Letters of Hons. J. B. Bowlin and C. Eames to Comptroller, relative to the rates of exchange and character of the currency in Central America.

Washington City, D. C., August 25, 1857.

DEAR SIR: I received duly your note of yesterday making some inquiries into the character of the currency and the rules and rates of exchange in the central and South American States of Spanish origin, and, in reply, I have to say that I am only familiar with New Granada, but I believe the general character of the currency of those States of Spanish origin is very similar throughout.

In New Granada the general currency of the country, in which all accounts are kept, and all transactions are done in the peso, or dollar of eight reals or dimes, equal to 80 cents, and always passes for that amount. It is called, in commerce, the soft dollar, in contradistinction to the ten real dollar, introduced into the circulation of the country.

called the fuerte, or hard dollar.

This soft dollar is the general standard of all transactions in the country, yet it is never confounded with the hard dollar. If a man asks you for a hundred dollars for an article, it means one hundred soft dollars paid with eighty fuertes, or hard dollars, and so, throughout, four hard dollars always counting five dollars of the country.

In their foreign coins, the five franc piece is rated with the American or Mexican dollar, of ten reals or dimes, though strictly there is a dif-

ference.

During my residence in New Granada they established, by law, the ten real dollar, and force its use in the transactions of the government; but it has made scarcely any other progress, and does not enter into the commercial transactions or language; hence everything is still counted by the 80 cent dollar. The par rate of exchange, then, in their current language, is 25 per cent. advance, which means that one hundred dollars, American, is one hundred and twenty-five Granadian or soft dollars, 80 cents each; and it is above or below par, as it rises above or falls below the 25 per cent. When I sell a draft for five hundred dollars at par, I receive five hundred ten real dollars, which they call, in the currency of the country, six hundred and twenty-five dollars, and would so credit it invariably, as all accounts are kept in the 80 cent dollar; so that a man drawing there loses nothing in consequence of the varied currency; for, if he takes soft dollars, he gets them at their true value, 80 cents each, of our coin.

My drafts were on London, and exchange on London was generally below par, but never much. As an illustration, in all my drafts I never lost, in exchange, beyond something like seventy dollars; and if my drafts had been on the United States, where the exchange was always better, I do not believe I should have lost anything. They would most always have brought me par, if not a fraction above.

The gold coin of the United States, being of equal fineness, and a

little better in weight, I always found to be a little above par value. I have given for it myself as much as 3 per cent. in buying it, giving 103 hard silver dollars, of ten reals or dimes each, for \$100 in gold, United States currency. The United States gold coin in New Granada is much more sought after and more highly appreciated than the silver currency of the same country, dollar for dollar.

There is no disadvantage to the drawer of bills in that country resulting from the use of the 80 cent dollar, for he only gets more of them, in the proportion of 80 cents to 100 cents. Such a thing as selling a bill dollar for dollar, and receiving for it the dollar of the country, at

80 cents each, as a full dollar, I suppose was never heard of.

I have endeavored to answer all your inquiries, but if I have over-looked any point, and you will call my attention to it, I will most cheerfully try to explain it.

Hoping, however, that this will prove satisfactory, I have the honor

to remain, very respectfully, your obedient servant,

JAS. B. BOWLIN.

Hon. W. MEDILL, Comptroller's Office.

WASHINGTON, September 1, 1857.

DEAR SIR: I have the honor to acknowledge your letter of the 24th instant, making certain inquiries as to the state of the currency and the rates of exchange in Venezuela.

Venezuela has no mint, nor any coinage of its own, except a few copper coins called centaros, which appear to have been minted abroad

to its order.

The currency of Venezuela, in which accounts are kept there, exists merely on the statute book. Its principal denominations are the peso, the real, and the centaro, the values of all of which are fixed by law.

The peso is by statute of the value of four francs. The real is oneeighth of the peso, that is, half a franc. The centaro is one-hundredth

of the peso.

The coins in principal use in Venezuela are the gold coins of the United States, of all denominations; the British pound sterling or sovereign; the five franc piece, the franc, and half franc; and the half dollar and dime of the United States.

The dollar of the United States is worth 1 peso 34\frac{2}{3} centaros. The pound sterling is worth 6\frac{1}{2} pesos. The five franc piece is of 10 reals, or 1\frac{1}{4} peso. This piece is called fuerte, or peso fuerte. A draft for one hundred dollars on New York or Washington is, at par, worth 134\frac{2}{3} pesos, and would be so credited in a banker's account. By this it appears that the peso of Venezuela is never considered equivalent to the United States dollar.

A purchase for one hundred pesos of a bill on New York for one hundred dollars, would be regarded not as a purchase at par, but at about 34 per cent. discount, and would be so described.

Sterling bills on London can sometimes be bought at 6.30 or 6.25, 6.50 being par.

Exchange on the United States is mostly in the hands of a few

houses.

Their bills on the States, at sixty days sight, can be seldom bought at less than par, 1.34\frac{3}{6}. On the other hand, they are not willing to buy such bills at more than 1.31 or 1.32. My own sight bills, how-

ever, I have generally managed to sell nearly at par.

I have no personal experience of the state of currency and exchange in the other Spanish American countries, but suppose that those of them which have no mint, nor national currency, must regulate their currency on general principles similar to those adopted in Venezuela.

I am, sir, with high respect, truly yours,

C. EAMES.

Hon. W. MEDILL.

No. 5.

Letter of J. M. Ramsey, chief clerk, to Comptroller. Referred to in Comptroller's report.

TREASURY DEPARTMENT, Comptroller's Office, Washington, September 2, 1857.

DEAR SIR: In yours of yesterday, addressed to me, you say: "While the accounts of John H. Wheeler, late minister of the United States at Nicaragua, were before this office, I understood you to say that Mr. Wheeler admitted, in your presence, he had procured and taken out with him to that country a quantity of dimes or ten cent pieces, on which he had realized a considerable profit. Having incidentally alluded to the matter in a late report to the Secretary, as showing Mr. Wheeler's knowledge of the value of such currency, Mr. Wheeler has pronounced the fact so referred to as untrue. Unwilling to be charged with having stated an untruth, will you have the goodness to inform me what he did admit on the question referred to, and whether I misunderstood you in relation to the matter?"

In reply, I have respectfully to state that, while the question touching loss in exchange involved in the accounts of Mr. Wheeler was pending, he, on several occasions, came into my room, and made the matter a topic of conversation. On one of those occasions, in reply to Mr. Wheeler's oft-repeated assertion, that he had sustained a loss in consequence of having been obliged to receive eight dimes as equivalent to a dollar, I referred to a similar state of things in regard to the value of the dimes which, some years ago, obtained in the western country, and remarked, in effect, that no one living in the west ever supposed he sustained a loss when he received a ten cent piece as of equal value to the eleven-penny bit or twelve and a half cent piece; that the dime or ten cent piece purchased just as much of any article of traffic as the "bit," and was, therefore, to all intents and purposes

its equivalent in value. I further remarked, that it seemed to me that any intelligent, prudent man, about to go to Nicaragua, to sojourn there, acquainted, as he would most likely be, with the fact of a dime being there, in business transactions, regarded as equivalent to twelve and a half cents, would be very apt, if he could get them, to supply himself with as large a quantity of dimes as the amount of funds which he intended taking with him would procure, adding that I had heard of officers of the army, and others, at the period when a ten cent piece or dime was taken for twelve and a half cents in the west, on being ordered or journeying from the east to the west, having realized very considerable profits, from having carried with them large quantities of dimes, which they had the care to provide themselves with.

Mr. Wheeler assented that such was, or might have been, the case in respect to our western towns. I think he indicated that assent by a peculiar intonation of the simple "yes," and then said, in something

like the following language:

"I converted about two thousand dollars into dimes before I left this country, which I carried with me to Nicaragua. On those I made a profit, which, perhaps, I ought to (or, it would be but fair that I should) credit to the government; I am very willing to do so." I, of course, cannot vouch that such was the identical language used by Mr. Wheeler, but it is substantially the same, except, probably, in regard to the amount. In that I may err, but my belief is strong that I do not. Also, the whole of what I have narrated as a part of a conversation which occurred between Mr. Wheeler and myself, although I may not have related it in the precise order in which it took place, yet it is substantially true. I think that Mr. Wheeler, upon reflection, will find himself constrained to corroborate this statement.

Yours truly,

J. M. RAMSEY.

Hon. WM. MEDILL, Comptroller.

No. 6.

Letter of E. M. Whittlesey, esq., clerk, to First Comptroller.

(Referred to in Comptroller's report.)

TREASURY DEPARTMENT, Comptroller's Office, September 2, 1857.

Sir: In compliance with your request I beg leave respectfully to report that I have examined the adjusted accounts of John H. Wheeler, esq., late minister resident to Nicaragua, per Fifth Auditor's reports Nos. 14,018, 14,751, 15,110, and 15,923, and find that a charge of \$5 99 was made for loss in exchange on a draft of £103 6s. 1d., equal to \$500, drawn on Baring, Brothers & Co., of London, January 14, 1856, under the contingent head, and which was suspended by the Fifth Auditor, per report 15,110, and confirmed by you in the fol-

lowing language, to wit: "This sum charged for loss in exchange on a draft sold to Riggs & Co., suspended." The following note was appended to the statement by way of explanation: "Mr. Wheeler cannot claim loss in exchange on drafts drawn from the place distant from his mission, unless under leave of absence, or on official business;" signed "H. L." (or H. Lasselle, then a clerk in the office of the Fifth Auditor.)

It appears from the accounts of Barings that the particular draft upon which the exchange of \$5 99 was charged as aforesaid, and suspended, was drawn in this city January 14, 1856, by J. F. Brown,

agent of Mr. Wheeler, and negotiated through Riggs & Co.

I do not find that any other charge was made for loss in exchange, except that of \$2,941 33, included in his last rendition of account current, dated March 2, 1857, and which must have been signed at Washington, inasmuch as he resigned that day, as will be seen by letter from Mr. Marcy to him, of March 2, filed with report 15,923, his salary having been credited to include that date by that report.

By reference to the voucher charging the loss of \$2,941 33, it is made to appear to have been based upon a principal of \$14,706 62, at 20 per cent., the loss alleged to have been sustained in Nicaragua, on account of certain of his drafts drawn for salary and contingent expenses of his office upon the Barings, at London, and the treasury, embracing a period of time from October 13, 1854, to October 31, 1856, in which is included the said draft of £103 6s. 1d., upon which he had before

charged a loss of \$5 99, which was suspended as stated.

I find that all of the drafts drawn on London, upon which Mr. Wheeler charges loss in exchange, were dated in New York and in this city, two of which were drawn by him, and the remainder by J. F. Brown for account of the minister, and that on five drafts paid at the treasury, upon which loss is charged, one was drawn by Mr. Wheeler, in this city, for a certain bill of stationery purchased here, and the remaining four were drawn by him in Nicaragua in favor of Mr. Brown, who passed them over to Riggs & Co., by whom they were collected from the treasury. Reference is made by way of more full information to schedule herewith, which shows the drafts drawn, by whom drawn, upon whom drawn, in what place or city drawn, and amount, &c.

I should, perhaps, state that Mr. Wheeler acknowledged the receipt of his outfit, \$4,500, in his first account current per report No. 14,018, as received August 16, 1854, from the Treasurer of the United States, and that the balance found due him on account of salary was paid by a treasury draft issued in his favor per report 15,923, being the same report in which you disallowed, as mentioned, the alleged loss in ex-

change of \$2,941 33, as charged in addition by him.

Respectfully submitted,

E. M. WHITTLESEY, Clerk.

Hon. WILLIAM MEDILL,
First Comptroller.

Schedule of drafts of Hon. J. H. Wheeler on which loss is claimed by him, disallowed by Comptroller.

Washington City, November 18, 1857.

Sin: I acknowledge the receipt of your letter of the 13th ultimo, enclosing a communication from the First Comptroller, on the subject of loss of exchange on my drafts while minister of the United States to the government of Nicaragua.

I wish to place on the records of the Treasury Department a reply to this communication, the statements of which I will endeavor to show are unfounded, as its arguments are unsound and inconclusive.

In your communisation to me of 16th of June last, you enclosed an argument of this officer on this same subject, to which I replied on the 14th of July following. In the communication of the Comptroller now enclosed, the grounds then assumed are abandoned; new facts and other points in this case are sought with great zeal.

Too much credit cannot be paid to a vigilant and faithful officer in warding off unfounded demands upon the public treasury; and equal credit is due to a prompt and full liquidation of a fair and equitable

demand for service rendered or loss sustained.

I will prove that the points in this communication of the Comptroller are unfounded in fact, and, if the statements made were facts, could not, and should not, influence this case.

It was gravely alleged in the first communication of the Comptroller that in the settlements of my accounts (previous to the final settle-

ment) no loss of exchange was ever charged.

To this it was replied and shown, that in the returns for the first quarter of 1856, a loss of exchange was charged. If the fact were as alleged, it could only amount to a momentary neglect on my part.

which was remedied in the final rendition of my accounts.

But this is now conceded to be true; but it is asserted that "this charge was suspended upon the recommendation of H. Lasselle, then a clerk in the office of the Fith Auditor, now the attorney of Mr. Wheeler;" "this same clerk that so promptly repelled this small demand, while acting under the sanction of an official oath, is now laboring as an attorney to show that his client is entitled to a loss of 20 per cent."

The First Comptroller, in this instance, is as unfortunate, as to the facts, as he was in the former. I have sought out the gentleman referred to, and his statement proves that he is not, nor was he ever an attorney for me; and that Mr. Medill had no authority for saying so.

I protest against any imposition on me of the official shortcomings

of either Mr. Lasselle or Mr. Medill.

With equal candor and justice a regulation, prescribed by the President of the United States, for the first time is brought to my attention, which it is alleged should have been regarded by me in this behalf.

Neither the State Department nor the Comptroller, or Auditor, have ever furnished me (until now) with a copy of this regulation prescribed by the President. On examination, it will be seen, that it does not apply to ministers, but to consular accounts. It states that "loss of exchange in the sale of drafts on the Secretary of State shall be allowed, provided that the certificate of the bankers, or brokers to

whom the sale may have been made are transmitted, showing the loss sustained, or the certificate of two or more merchants, bankers, or brokers, showing the rate of exchange between the place where the consular officer is situated and the city of New York, at the respective dates of the drafts, as per form No. 25."

Admitting this regulation to be applicable to my case, how could it be observed when its existence was unknown? and in a spirit of equity it is respectfully submitted, whether its form has not been in this case substantially proved fully within the cautious guardings of

the same?

The certificate of the receiver of the government for the Transit route, (M. E. Bradley, esq.,) and Thomas J. Van Dyke, esq., to whom and by whom sales of drafts were made, now on file, prove "the loss sustained," as also "the rate of exchange between Nicaragua and the city of New York, at the respective dates of the drafts."

The comptroller would have this case regulated by a form prescribed, the existence of which he had given no information; and yet when the proofs bring, substantially, the case within the regulation, he

rejects the allowance!

The comptroller, in the same spirit of candor, asserts that no "other minister in the Central or South American States has ever charged one farthing, so far as he could learn, for loss by exchange on the United States during the period referred to, and this removes his last doubt."

From his whole course in this matter no doubts were to be removed; a fixed purpose is patent from the first, on his part, to reject this item, fas aut nefas. There was no other minister in Central America at the period of time referred to; and "that no other minister in South America has ever charged loss of exchange, so far as his learning goes," proves that his learning is not very extensive, or that his memory is very defective. In the Opinions of the Attorneys General, (volume IV, 295,) Judge Semple claimed and was allowed for loss of exchange.

My predecessor to Nicaragua, Hon. J. B. Kerr, informs me that he made a similar claim. My immediate predecessor, Hon. Solon Borland, I learn did claim loss of exchange, as also the secretary of

legation, Mr. Berlin.

But the comptroller, by assiduity and zeal in my private arrangements no ways connected with my official duty, makes a wonderful discovery! and states that I never sold a draft during my official residence abroad, and makes the charitable and gentlemanly assertion that "this item of account was a mere experiment upon the presumed ignorance or the too confiding disposition of the department," and "that every one of my drafts were sold either in this city or New York, surely for not less than par, probably, in some instances, at a premium, and the proceeds received in the currency of the United States."

The quality of truth becomes more lovely, in that the more it is examined the clearer it appears. If the idea as it strikes the luminous mind of the Comptroller be true or sane, I never realized or used any funds while abroad; hence, with an expensive family, I subsisted on the

charity of others, or my own private resources, during my lengthened residence in Nicaragua.

I will try to state the facts so clear that even the Comptroller can

understand them.

When I left the United States, by instructions from the Department of State, I was authorized to draw for my salary and contingent expenses on London, or Messrs. Barings. On reaching Central America, I found it impossible to negotiate on any terms a draft on London, but drafts on New York were in demand. I instructed my agent, (Jos. F. Brown, esq.,) who transacted my business, such as collecting rents, debts, &c., in the United States, to draw my salary (under my power of attorney) from London, and paid in, subject to my drafts from Nicaragua. I then drew on him, by which I realized funds in Nicaragua; for which drafts I received from those who purchased them in Nicaragua the currency of that country, which was

eight dimes to the dollar.

I have settled with Mr. Brown, and still have in my possession, cancelled, many of these drafts, which bear the authentic marks of having passed through many hands, merchants, bankers, and others. The fixed principle of law, as laid down by the Attorney General and recognized by the Treasury, is, that the government is bound to pay a minister his stipulated salary at the place of his official residence; and, being thus liable, is bound to make that amount available at his foreign residence. Has this been the case? Doubtless the fact is that the holders of my drafts did receive the full amount, in the currency of the United States; but did I receive the amounts justly due under this compulsory and complicated mode? The government should have placed the amount to me in Nicaragua, and if, in the process, loss was encountered, in good faith it is bound to make it good.

The statement of Mr. Brown is appended, which the Comptroller expresses some surprise had not been earlier filed. This would have been done had any idea been formed that so idle and chimerical objection could have been raised by the most captious and stringent investigation.

tigation.

This statement of Mr. Brown also effectually corrects the voluntary and swift witness of Mr. Medill's clerk as to the large amount taken out in dimes, on speculation, since Mr. Brown proves that I commenced drawing on him as soon as I reached Central America, which would not have been the case had I possessed at that time and place any amount of money of any kind. But this is a matter of no consequence, unless Mr. Ramsey alleges that the money was procured by drafts on the State Department, which his chief sagely asserts I never drew while in Nicaragua!

I have as concisely as possible gone over the material points made by the Comptroller. I protest against his decision as illegal, unjust, and oppressive.

Respectfully submitted,

JNO. H. WHEELER, Late Minister of U. S. to Nacaragua. I do hereby certify, that during the absence of Mr. Wheeler from the United States at Nicaragua as minister, under a general power of attorney I transacted all his pecuniary matters in this country, such as collecting rents, debts, and his salary. That during the first year, the drafts were drawn on Messrs. Baring & Brothers, London; and subsequently, by instructions from the State Department, the place of payment was made at the Treasury Department. That under this power of attorney I did draw from the said bankers in London, and from the Treasury Department the amount due Mr. Wheeler for his salary, and Mr. Wheeler from Nicaragua drew on me for the amounts, as he required; that said drafts were sold by him in Nicaragua, to different persons at different times; and from these persons and others, I have always understood and believe that the currency of that country was eight dimes to the dollar, which was paid to Mr. Wheeler for said drafts.

J. F. BROWN.

WASHINGTON, Oct. 16, 1857.

I further certify that Mr. Wheeler did commence drawing on me drafts as soon as he arrived in Central America, to wit: in December, 1854, and continued the same until he left that country in November, 1856.

J. F. BROWN.

Note.—It is represented to me that Mr. Wheeler purchased property in Washington, where his family continued to reside, to be paid for from his salary. That he appointed Mr. Brown his agent to draw the same and apply it as aforesaid, and in support of his family. It is also represented that Mr. Brown sold a portion at least of said drafts for as high as eleven per cent. premium.

Certificates of M. E. Bradley and Thomas J. Van Dyke, of value of American Dollar in Nicaragua.

I do hereby certify, that I resided in Nicaragua during the years 1855 and 1856, and acted often as the agent and private secretary of Mr. Wheeler, the American minister.

That the universal currency of the Republic of Nicaragua is eight dimes to the dollar, and it is the custom to take them and receive

them at that rate.

That a bill of exchange on London or New York commanded no

premium, but was par only, in Nicaragua.

That in my transactions, I had occasion to call on Mr. Wheeler for drafts, and negotiated with others for him, and on no occasion was any premium charged or paid.

THOMAS J. VAN DYKE.

PHILADELPHIA, March 19, 1857.

I do hereby certify, that the currency at Granada, Nicaragua, Central America, for the last five years, was eight dimes to the dollar, and that, although the government did within the last year enact that ten dimes should be the legal currency, yet among the people the usual custom was to take and receive eight dimes.

Witness my hand this 19th March, 1857.

M. E. BRADLEY.

And I further certify that a bill of exchange on London or New York was at par only, and commanded no premium.

M. E. BRADLEY,

Agent Republic Nicaragua, and was put in possession of the Transit Co. property as Q. M., when seized by Nicaraguan Gov't. No. 8.

٧.

ADDITIONAL LOAN OF FIFTEEN MILLIONS OF DOLLARS

LETTER

FROM

THE SECRETARY OF THE TREASURY,

ASKING

An additional loan, not to exceed \$15,000,000.

MAY 21, 1858.—Referred to the Committee of Ways and Means.

TREASURY DEPARTMENT, May 19, 1858.

SIR: In view of the early adjournment, I desire to call the attention of Congress to the present condition of the finances of the government.

In my annual report I estimated that there would be a balance in the treasury, at the end of the present fiscal year, of \$426,875 67, which would have required a deficiency in our resources of five millions of dollars to be provided for; as that amount is necessary, at all times, to be in the treasury for its prompt and successful operation. This estimate was based upon an expenditure limited to the appropriations then authorized by law. Since that time the demands upon the treasury for the present fiscal year have been increased by legislation to an amount not far below ten millions of dollars. Another important element of that estimate was the probable receipts from customs and other sources during the then three remaining quarters of the fiscal year.

The actual receipts for that period, it is now believed, will fall tenmillions below that estimate; attributable to the fact that the trade and business of the country have not recovered as rapidly from the

effects of the late revulsion as was then anticipated.

Owing to these causes the twenty millions loan of treasury notes, authorized by the act of December 23, 1857, will be exhausted in supplying the deficiencies in the treasury for the present fiscal year.

We shall commence the next fiscal year dependent entirely upon the current receipts into the treasury to meet all demands from it.

In reply to a call upon the heads of the different departments, I have received official information that the sum of \$37,000,000 will be,

probably, called for during the first two quarters of the next fiscal year. This sum does not include such amounts as may be appropriated by Congress over and above the estimates submitted to them by the departments, and I have no data upon upon which to estimate for such expenditures. Upon this point Congress is better able to form a

correct opinion than I am.

To meet these expenditures, it is not prudent to rely upon receipts into the treasury, estimated upon the too rapid revival of trade and business. I believe that we may safely calculate upon receipts, during that period, from all sources, of \$25,000,000. Looking to this state of things, I recommend that authority be given to this department to supply any deficiencies that may arise in meeting the demands upon

the treasury by an additional loan not exceeding fifteen millions of dollars.

In view of the amount of treasury notes already issued, I recommend a loan for that amount, to be negotiated for a period of not more than ten years, at a rate of interest not exceeding six percentum.

I have confined this inquiry to the two first quarters of the next fiscal year, as Congress will re-assemble before the close of the second quarter, and it will be time enough then, should it become necessary, to provide for future contingencies that cannot now be foreseen.

I do not recommend any measure for increased taxation. It would be unwise at this time to attempt a modification of the tariff act of March 3, 1857, for the reasons given in my annual report to Congress. Sufficient time has not elapsed to test the effects of that act upon the revenue, considering the condition of the country during the period of its operation. In addition to this consideration, neither the receipts nor the expenditures of the government should be estimated for in the future, upon the basis of its present receipts and expenditures. The former have been, and still are, too seriously affected by the late revulsion, to justify a policy of legislation based upon a probable continuance of this state of things for any considerable period of time.

The latter have been so greatly increased by causes of a like temporary character as to preclude, with equal propriety, the policy of considering them as a basis for estimating future expenditures. The most prominent of these temporary causes is the Utah expedition, which, it is hoped, will not reach beyond the end of the next fiscal During the period of an overflowing treasury, a system of expenditure was inaugurated in the building of custom-houses, post offices, court-houses, and other public works, which, fortunately for the country, has been checked by the exhausted condition of the treasury. The time thus given for a more thorough and rigid inquiry into the necessity and propriety of these expenditures, it is confidently believed, will lead to wise and salutary reforms. Retrenchments in other branches of the public service can, and I have no doubt will, be effected. Attention should be directed more to the reduction of expenditures than to an increase of taxation, to remedy the evils of an excess of expenditures over the means of the govern-A full treasury is an unpropitious element in the work of retrenchment and reform. If measures should be now adopted to provide the treasury permanently with a sum equal to the present demands upon it, it might relieve the government from some of its embarrassments, but would greatly weaken the effort to restrain the government to an economical expenditure of the public money.

The revival of business, which cannot be much longer delayed, will, I am confident, ensure from the present tariff a sufficient revenue for

the support of the government in ordinary times.

Extraordinary expenses, rendered necessary by causes equally extraordinary, always being of a temporary character, should be pro-

vided for in a like temporary manner.

This principle is too plain to require argument or illustration; it is only necessary to call attention to it to command the approval of every intelligent mind.

I am, very respectfully,

HOWELL COBB, Secretary of the Treasury.

Hon. James L. Orr,

Speaker of the House of Representatives.

LETTER

FROM

THE SECRETARY OF STATE,

IN

Reference to the repayment to Robert J. Walker, late governor of Kansas, certain extraordinary expenses incurred by him.

MAY 24, 1858.—Referred to the Committee of Ways and Means.

DEPARTMENT OF STATE, Washington, May 22, 1855.

SIR: I have the honor to enclose herewith a letter addressed to the chairman of the Committee of Ways and Means, requesting that an appropriation may be made for the purpose of repaying to Robert J. Walker, late governor of Kansas Territory, certain extraordinary expenses to which he was subjected in that Territory, and to request that you will give it the proper direction.

I have the honor to be, sir, your obedient servant,

LEWIS CASS.

Hon. James L. Orr,

Speaker of the House of Representatives.

DEPARTMENT OF STATE, Washington, May 22, 1858.

SIR: I have the honor to transmit copies of a letter from Mr. Robert J. Walker, late governor of Kansas Territory, dated May 20, 1858, and of the accompanying statement of the expenses to which he was subjected in that Territory.

These amount to seven thousand and three dollars and seventy-five cents, for which I have the honor to request that an appropriation

may be made, as follows, viz:

"For the payment to Robert J. Walker, late governor of Kansas Territory, for extraordinary expenses to which he was subjected in that Territory, seven thousand and three dollars and seventy-five cents, or so much thereof as may be necessary."

It will be seen that Mr. Walker has not presented vouchers for all the items charged. He, however, expects to supply the defliciency, and in the interim desires that only such charges as there are vouchers for may be allowed in the adjustment of his account.

I have the honor to be, sir, your obedient servant,

LEWIS CASS.

Hon. J. Glancy Jones,

Chairman of the Committee of Ways and Means,

House of Representatives.

Washington City, May 20, 1858.

SIR: In consequence of my absence, your letter of the 8th of April was but recently received, and some delay subsequently has occurred in collecting and arranging the vouchers. Some items I am sure are necessarily omitted, many of the payments having been made during my absence from Lecompton on public business. If any loss occurs from this circumstance, it falls on me, and not on the government. I presume, however, there would be no objection to my supplying this deficiency at a future period, as also producing any vouchers now In a few cases it was impossible to obtain regular vouchers, but unless they are produced, or satisfactory proof furnished, I do not desire any allowance. From the confidential character of the service, in some cases, perhaps this cannot be done, in which event the loss, of course, must be mine. The statement furnished amounts to \$7,003 75, for which I think an appropriation should be made, leaving to the usual accounting officers to pass such items only where proper vouchers or proof may be produced. If the expenditures were large, they were necessarily incurred in the public service during a period among the most important in the history of the country. the above sum of \$7,003 75, properly chargeable to the government, my own individual expenditures in addition exceeded \$6,000, for which, of course, no payment is asked. The items to which no objection exists should, I think, at once be passed to my credit, and the others retained until proper proof is produced.

Most respectfully, your obedient servant,

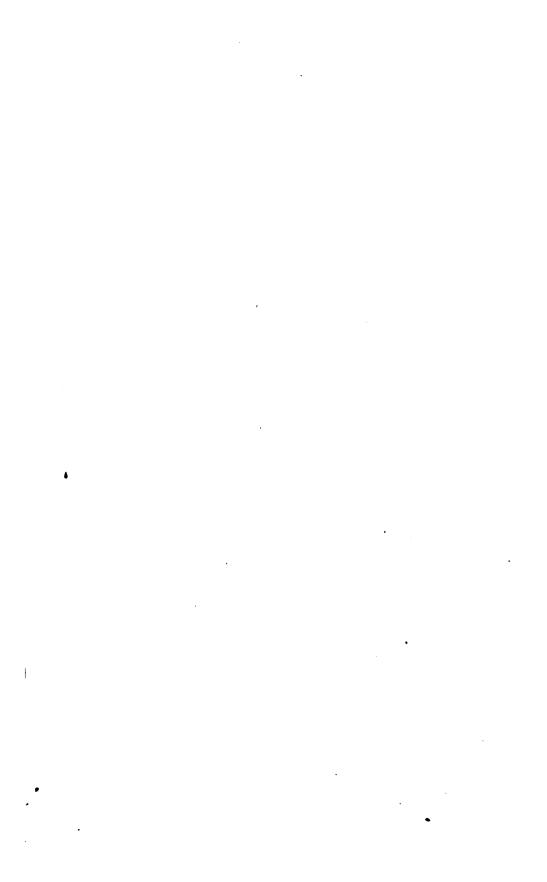

R. J. WALKER.

Hon. Lewis Cass, Secretary of State.

RECEIPTS AND DISBURSEMENTS OF THE POST OFFICE DEPARTMENT.

LETTER

FROM

THE TREASURER OF THE UNITED STATES,

TRANSMITTING

Copies of receipts and disbursements for the service of the Post Office Department.

MAY 24. 1858.—Ordered to be printed.

TREASURY OF THE UNITED STATES, May 22, 1858.

SIR: I have the honor of transmitting to you, herewith, copies of my accounts of the receipts and disbursements for the service of the Post Office Department for the fiscal years ending the 30th day of June, 1856 and the 30th day of June, 1858.

Respectfully, your obedient servant,

SAM. CASEY, Treasurer.

Hon. James L. Orr, Speaker of the House of Representatives.

The Post Office Department in account with the Treasurer, on account of receipts and disbursements for 3d quarter ending September 30, 1855.

OFFICE TREASURER UNITED STATES, May 5, 1856.

SAM. CASEY, Treasurer United States.

Post Office Department, Auditor's Office, March 26, 1857.

I certify that the foregoing account of the Treasurer of the United States for his receipts and expenditures for the service of the Post Office Department, for the quarter ending September 30, 1855, has been examined in this office and found correct.

WM. F. PHILLIPS, Anditor.

The Post Office Department in account with the Treasurer of the United States, on account of receipts and disbursements for 4th quarter, ending December 31, 1855.

OFFICE TREASURER UNITED STATES, February 17, 1857.

BAM. CASEY, Treasurer United States.

Post Office Department, Auditor's Office, March 26, 1857.

I certify that the foregoing account of the Treasurer of the United States for his receipts and expenditures for the service of the Post Office Department for the quarter ending March 31, 1856, has been examined in this office and found correct.

WM. F. PHILLIPS, Auditor.

The Post Office Department in account with the Treasurer of the United States, on account of receipts and disbursements for 2d quarter ending June 30, 1856.

| Adjusted balance to the debit of the Treasurer of the United States, June 30, 1856 Deduct the amount of sundry warrants in different depositories, as per statement No. 1, not charged in the foregoing account, which has not been returned to the treasurer, but for | |

OFFICE TREASURER UNITED STATES, February 17, 1857.

SAM. OASEY, Treasurer United States.

POST OFFICE DEPARTMENT,
Auditor's Office, March 26, 1857.

I certify that the foregoing account of the Treasurer of the United States for his receipts and expenditures for the service of the Post Office Department, for the quarter ending June 30, 1858, has been examined in this office and found correct.

WM. F. PHILLIPS, Anditor.

The Post Office Department in account with the Treasurer of the United States, on account of receipts and disbursements for 3d quarter, ending September 30, 1856.

OFFICE TREASURER UNITED STATES, June 18, 1857.

SAM. CASEY, Treasurer United States.

ACDITOR'S OFFICE, POST OFFICE DEPARTMENT,

May 20, 1858.

I certify that the foregoing account of the Treasurer of the United States for his receipts and expenditures for the service of the Post Office Department for the quarter ending September 30, 1856, has been examined in this office and found correct.

THOMAS M. TATE, Auditor.

The Post Office Department in account with the Treasurer of the United States, on account of receipts and disbursements for the 4th quarter ending December 31, 1856.

OFFICE TREASURER UNITED STATES, September 4, 1857.

SAM. CASEY, Treasurer United States.

Post Office Department,
Auditor's Office, May 20, 1858.

I certify that the foregoing account of the Treasurer of the United States for his receipts and expenditures for the service of the Post Office Department, for the quarter ending December 31, 1856, has been examined in this office and found correct.

THOMAS M. TATE, Auditor.

The Post Office Department in account with the Treasurer of the United States, for receipts and disbursements for the 1st quarter, 1857, ending March 31.

| Actual balance in the treasury for the service of the Post Office Department on the 31st of March, 1857, as per statement No. 2. | , |
| Warrant and counter warrant for receipts | 1,561,199 50 1,561,199 50 |

OFFICE TREASURER UNITED STATES, March 20, 1838.

SAM. CASEY, Treaturer United States.

AUDITOR'S OFFICE, POST OFFICE DEPARTMENT,
May 20, 1838.
I certify that the foregoing account of the Treasurer of the United States for his receipts and expenditures for
the service of the Post Office Department for the quarter ending March 31, 1857, has been examined in this
office and found correct. THOMAS M. TATE, Auditor.

The Post Office Department in account with the Treasurer of the United States, on account of receipts and disbursements for 2d quarter ending June 30, 1857.

JOHN CASSIDY.

LETTER

FROM THE

SECRETARY OF THE NAVY,

IN RESPONSE TO

A resolution of the House calling for copies of papers having reference to the claim of John Cassidy.

MAY 29, 1858.

NAVY DEPARTMENT, May 27, 1858.

SIR: In compliance with a resolution of the House of Representatives of April 26, 1858, requesting the Secretary of the Navy to "communicate to the House copies of all communications and documents on file in his office having reference to the claim or application of John Cassidy for services rendered at the Charleston navy yard," I have the honor to transmit herewith the following papers:

No. 1.—Copy of letter from Mr. Abraham Moore to the Secretary of

the Navy, dated 24th February, 1832, with sundry affidavits.

No. 2.—Copy of letter from Commodore Charles Morris to the Secretary of the Navy, dated March 16, 1832, with enclosures A to I.

No. 3.—Copy of letter from the Secretary of the Navy to Abraham

Moore, dated March 23, 1832.

I am, very respectfully, your obedient servant, ISAAC TOUCEY.

Hon. J. L. Orr, Speaker of the House of Representatives.

Boston, February 24, 1832.

SIR: Herewith you will receive sundry affidavits touching various transactions in the United States navy yard at Charlestown. I have taken them at the request of Mr. Cassidy, he having shown me a letter from your honor consenting to the taking of the same before any magistrate here. I am wholly unacquainted with the transactions to

which they allude, and they have been taken in great haste, frequently

interrupted by calls usual in a lawyer's office.

I am assured by persons interested that the best witnesses will not attend, and that unfair means have been used to deter them from giving their testimony. I have no authority to issue a subpœna, and unless some process be granted which will compel witnesses to attend before a magistrate, the whole truth, I am told, will never reach your honor's department.

Very respectfully, your honor's obedient servant,

ABR'M MOORE.

Hon. LEVI WOODBURY.

COMMONWEALTH OF MASSACHUSETIS, Suffolk, 88.

I, Moody Stockman, of Charlestown, in the county of Middlesex, in the commonwealth of Massachusetts, carpenter, of lawful age, to testify and give evidence, do say: In the summer of eighteen hundred and thirty I left the United States navy yard at said Charlestown, where I had been employed six or seven months previously. A man by the name of Edward Adams, a house carpenter, was employed by Caleb Pine, also a carpenter in the yard. Adams had an apprentice, his son, about twenty years of age. I have been credibly informed, and verily believe, Mr. Pierce, on application of said Adams, refused to enrol said Adams' son on the books of the yard at first; but that Mr. Pierce afterwards agreed to enrol him upon condition that said Adams would allow Pierce twenty-five cents per day out of his son's pay, and Adams' son was enrolled and received pay revealed.

MOODY STOCKMAN.

CITY OF BOSTON, February 24, 1832.

Sworn to before me,

ABR'M MOORE, Justice of the Peace.

COMMONWEALTH OF MASSACHUSETTS, Suffolk, 88.

I, John Morris, of Charlestown, in the county of Middlesex and commonwealth of Massachusetts, formerly boatswain's mate in the Charlestown navy yard, of lawful age to testify, do depose and ray: That while I was employed as boatswain's mate in said yard, I was purposing to hire a house, or part of a house, of one James Fowler. While looking at the cellar of the house, we found several pieces of copper bolts. I observed to Fowler, bolts of this size must belong to the yard. In consequence of this, we took them to the yard, and I reported it to Mr. Baymun, and about an hour and a quarter after I was sent for to go to the lieutenant's office, or master's office, as it was then called. Mr. Percival and Mr. Barker were both there. Mr. Percival asked me where I got the copper. I told him I got it in Mr. Fickett's cellar, it being Fickett's half of the house I was going to occupy. He asked how I came to look for it, and Barker ask me how I came to look for such a thing—how I came to know anything about it. I

told them that Mr. Fowler and Mr. Fickett had had a little difficulty, and in consequence Mr. Fowler told me that if I looked in Fickett's cellarI should find something. I did see in the cellar some sheet lead, copper spikes and bolts in a basket. I only took away two pieces to carry to the yard.

Mr. Percival asked me why I did not report it to them first. I re-

plied I reported it to the first officer I saw.

JOHN MORRIS.

CITY OF BOSTON, Feb. 20, 1832.

Sworn to before me.

JOHN C. PARK, Justice of the Peace.

Commonwealth of Massachusetts, Suffolk, 88.

I, Jonathan Binney, of Cambridge, in the county of Middlesex, in the commonwealth of Massachusetts, ship carpenter, of lawful age to testify and give evidence, do say: I served my time as an apprentice with Mr. Barker. I left him about six years since, having lived with him about five years; while I lived with him he had five apprentices. when I first went, and generally had four; one, a young man, John Dickenson, was put upon the rolls, and Mr. Barker drew one dollar and seventy-five cents per day for John's services; while he was an apprentice we were all placed upon the pay-roll, and were paid as the rest of the men were. Mr. Barker used to receive the whole, and keep it to his own use. There was an old man who was an invalid, he was very lame, and could do but little. Mr. Barker, it was said, and generally understood in the yard, owed him a considerable sum of money, and the old man, whose name was Winslow, threatened Mr. Barker occasionally, and Mr. Barker kept him on pay, not for so much as some, but as much as some others, and Mr. Barker kept him on the rolls, I think nine or ten years; he was always there when there was work in the yard. It was understood in the yard that he was kept under pay by Mr. Barker to keep him quiet; his services were trifling. Mr. Barker used to take blocks from the yard two or three feet long, eight inches square, six by eight or ten inches, and sawed from timber heads; also chips, and have them taken to his house. He used to call me from the government work to get them in. There was, after a while, a disturbance made about his taking the blocks, &c.; this disturbance was between him and Commodore Hull about it, and Mr. Barker stopped taking them. While I was on the books of the yard, and Mr. Barker drew pay for my services, he used to send me away on errands about his private affairs. I left Mr. Barker nine months before I was twenty-one years of age, I thought he did not give me as good a chance as he ought to; he kept me jobbing about, and did not allow me to work upon regular work, so that I had not a chance to learn the trade. He used to order me to sign the books in the yard in the same way regular journeymen used to sign, and receive their pay. I had signed during the time I was with him, and he drew my pay the same as though I had been free. He set me to work on Sunday, and also drew full pay for it, and never gave me a cent of it. After I had exchanged my indentures with Mr. Barker, he told me I should not get employment, that there was a combination among masters not to employ runaway apprentices, I told him I was not a

runaway, that I did not intend to run away.

Mr. Barker went into the commodore's office, and directly after, say five minutes after, Lieutenant Gwinn came out, and told me he was sorry I was about to leave, and urged me to stay. Before the indentures were exchanged, he, Mr. Barker, told me he would give me nine shillings per day; I told him I was dissatisfied, and made a fair explanation to him. I soon after went to work at Medford, and have never been employed under Mr. Barker since. I worked on the drydock about six weeks; about two years since, I was discharged with the men, who refused to work on Sundays. We were threatened to be discharged unless we would work Sundays. I worked upon the brigs Forrest and Nahant, Mr. Barker was part owner. Timber was sent from the yard, which was sent for these brigs, and was called rejected timber; some pieces I recollect were very good. There are spars very good now lying at Mr. Robinson's yard, which were got out for the navy, large enough for seventy-fours.

JONATHAN BINNEY.

CITY OF BOSTON, February 23, 1832.

Sworn to before me,

AB'M MOORE, Justice of the Peace.

COMMONWEALTH OF MASSACHUSETTS, Suffolk, 88.

I, William Phipps, of Charlestown, in the county of Middlesex, in the commonwealth of Massachusetts, laborer, of lawful age to testify and give evidence, do say: That, some time in the summer of 1830, being employed in rafting, I took 108 sticks of timber from the United States navy yard in Charlestown and carried to Mr. Robinson's, near the State's prison, in said Charlestown. It was timber which had been rejected at the navy yard. I took it to Mr. Robinson's, by order of Mr. Cazenove, who keeps a store on Long wharf, in said Boston. Mr. Barker pointed out the timber to me, and I took, as before stated. There was attached to the timber staples and rigging belonging to the United States. I asked Mr. Barker to let me have it, to aid me in taking the timber around to Mr. Robinson's. He said I might take them, meaning the staples and rigging, if I would see them returned. I agreed to and did return the whole. Mr. Barker took no memorandum of what he let me have, to my knowledge. I did not return the staples and rigging for a week. Mr. Seaton, clerk of Mr. Barker. requested me to return them, and I did so. I have also taken timber from the navy yard, in said Charlestown, by order of Mr. Coffran. Mr. Coffran is engaged with Mr. Barker in two brigs, as I am informed, and whether he is his partner in ship building I do not know. When Mr. Seaton called on me to return the rigging and staples he told me there had been some complaint made about them.

WILLIAM PHIPPS.

CITY OF BOSTON, February 9, 1832.

Sworn to before me,

AB'M MOORE, J. P.

COMMONWEALTH OF MASSACHUSETTS, Suffolk, 88.

I, John Studley, of Charlestown, in the county of Middlesex, in the commonwealth of Massachusetts, ship carpenter, of lawful age to testify and give evidence, do say: I formerly worked in the United States navy yard at Charlestown, Massachusetts, about three years ago. I was under Mr. Barker, master ship builder of said yard, at that time. Since I left the United States navy yard, I have been employed at Mr. Robinson's yard, in Charlestown, upon a brig called Forrest, owned partly by said Barker, and at Magonnis' yard, in Medford, in said county of Middlesex, upon a brig called Nahant, also partly owned by said Barker. I saw Mr. Barker two or three times at Medford, and once a week at Mr. Robinson's yard, while the Forrest was building. Some of the timber used to build the Nahant was timber which had been rejected at the United States navy yard at Charlestown. I have seen said Barker out of the navy yard in business hours. What he was about I do not know.

JOHN STUDLEY.

FEBRUARY 18, 1832.

Sworn to before me,

AB'M MOORE, J. P.

COMMONWEALTH OF MASSACHUSETTS, Suffolk, 88.

I, Lawrence Ward, of Charlestown, in the county of Middlesex, in the commonwealth of Massachusetts, milkman, of lawful age to testify and give evidence, do say: That in the year eighteen hundred and twenty-nine, I was employed as a laborer in the navy yard at said Charlestown; also, in eighteen hundred and thirty, in the same ca-While there I assisted in carrying rigging from the naval store-house in the yard to the beach, to secure timber discharged from the different ships or vessels which had brought it there. I atterwards assisted in taking the selected timber to the dock, and then was ordered by Mr. Barker to secure the rejected timber, which I did with said rigging and staples. I further say that I know Stephen G. Clark, who was formerly boatswain of the yard, and then foreman over the gang in which I was employed to be passed muster, and when he went to work was intoxicated with liquor, as I thought, as well as a great many other men. I thought Clark was often intoxicated; he is still continued in Mr. Barker's gang. I went to Mr. Robertson's yard with Mr. Barker to mark some timber. Mr. Barker observed to Mr. Phipps, this is a curious place for our rigging to be, lying in here on the beach. Mr. Phipps, who was a raftsman, says, it was not me that fetched it here, it was Mr. Fennelly. I further say, to the best of my knowledge,

Roger McGowan has stated in my presence that he has known Mr. Coffran to put as much rigging and staples on board of a brig as would load a cart. The reason of Mr. McGowan stating the above was, he had heard John Cassidy tell the difference between the privileges here and in the New York navy yard. I knew John Castigan to carry a bottle in his hat or cap, which he often took a tip at; he has asked me to take of it, and said it was medicine. I told him I did not want any of his medicine; he was in Mr. Barker's gang in the employ of the United States, although I am satisfied all the men considered him drunk every day. John Cassidy was at my house one day and a man of the name of Michael Collins came in at this time; the orders were to have Cassidy's report investigated by the commodore, as I understood. Said Collins asked Cassiday if his name was on the list of Cassidy said, yes, it is. Collins said, take my name off or I will kill you; I would sooner run away than bear witness against Mr. Barker, he has been a good friend to me. I have heard him very often say that he had to attend at the commodore's at breakfast and dinner times to do things about the house and garden, and that he had no time to eat his meals; that he used to go to muster at bell ringing and answer, and then go down to the saw yard and get into a saw pit, and creep under the platform and stay there while the other men were attending to their duty; that he had one dollar per day, and other good men had ninety-two cents per day in the same gang. I further say that this favorite of the commodore's confessed that he used to take half a pint of rum in the morning and go to work without any breakfast. He said that he had to attend at the commodore's in my presence, as also in the presence of other men.

LAWRENCE WARD.

CITY OF BOSTON, February 9, 1832.

Sworn to before me,

AB'M MOORE, Justice of the Peace.

COMMONWEALTH OF MASSACHUSETTS, Suffolk, 88.

I, Briggs Bennet, of Boston, in the county of Suffolk, in the commonwealth of Massachusetts, blacksmith, of lawful age, to testify and give evidence, do say: Some time previously to 1822 I had been employed in the United States navy yard at Charlestown, about two years previously to my leaving the last time, which, I think, was in 1821. I had also been employed in the navy yard at periods before my last two years, and, in all, I should think, more than six years, but had then been discharged. While I was employed in the yard, iron, which was the property of the United States, was taken and used by a person in the employment of the United States. Shadrack Varney was the person who took the iron, and ordered me and others to work it up, and Varney took it and carried it away. Two axes were made for Varney, which he took; and there were other articles taken by him in the same way; and he was at the same time master blacksmith of the yard. I do not recollect all the articles taken by Varney. A woman made complaint to Com. Hull. As I understood, Com. Hull told Varney not to take things from the yard again; so Varney told me, when I had then just seen Com. Hull just talking to Varney.

Varney brought the roll-book into the shop for me and others to sign. The number of days and some few days were left blank. I objected, in the first place, and did not sign till a fortnight afterwards. I was told it was the custom to sign the pay-roll in blank, and as a fortnight had elapsed since pay day, I signed it; I also signed the blank rolls for some months after, when there was some difficulty. The orders were that the rolls should all be filled up with the number of days' work, and prices, &c. Varney urged me to sign the blank pay-rolls, saying it was the fashion. Varney had four apprentices at the time; they were rated on the books as journeymen, and were on the books for higher prices than good able-bodied sledgemen. John Rice was one of Varney's apprentices; was a boy about fourteen years of age, and was Varney's brother-in-law.

BRIGGS BENNETT.

Sworn to before me,

AB'M MOORE, J. P.

COMMONWEALTH OF MASSACHUSETTS, Suffolk, 88.

I, Daniel Seeman, of Charlestown, in the county of Middlesex, in the commonwealth of Massachusetts, house carpenter, of lawful age to testify and give evidence, do say: That previously to the trial of Commodore Hull and Lieutenant Abbott, in eighteen hundred and twenty-one, I think, I was employed in the United States navy yard at said Charlestown, in making capstans, gun-carriages, &c.; I was called as a witness in the above named trials, and since that time cannot obtain employment in the yard. While I was employed in the yard I was requested by Mr. Fosdick, a clerk in the yard, to sign the pay-rolls in blank; he requested me to sign them four or five times before I did sign; was very violent and threatened me that I should not get my pay unless I signed them; I finally signed them. modore Hull met me one day before I signed the rolls, and said to me, Seeman, why in hell don't you sign the pay-rolls, why do you make such a damn'd fuss about it? I told him the reason was the sum was not properly carried out on the rolls; I told him also, the government would be charged fifteen shillings per day and that I should get but twelve. Commodore Hull said he did not understand I was to have twelve shillings per day. It was not more than ten days before, that Commodore Hull made the bargain with me and promised me I should have fifteen shillings per day. I had other conversation with Commodore Hull, and transactions which are full and truly detailed in the report of the trial of Lieutenant Abbott, they were then fresh in my recollection and are correctly detailed.

DAN. SEEMAN.

CITY OF BOSTON, February 24, 1832,

Sworn to before me,

AB'M MOORE, Justice of the Peace. COMMONWEALTH OF MASSACHUSETTS, Suffolk, 88.

I, Ebenezer Jackson, of Boston, in the county of Suffolk, and commonwealth of Massachusetts, painter, of lawful age to testify and give evidence, do say: Some time previously to eighteen hundred and twentytwo, I resided at Charlestown, and was employed in the United States navy yard in my business as a painter; while there, I know that paints were brought to the store-house in the yard, while the paint was there, white lead, in particular, as, also, oil. I have known the lead and oil to be used from the same cask for painting the United States ships, and the houses then erecting and repairing by Commodore Hull, being his own private property. While employed in the yard, I frequently signed a book kept by Mr. Fosdick, Commodore Hull's clerk, in which the number of days I had wrought was not carried out or in any way stated as to number of days or the amount of wages per day. been before employed while Mr. Debois was paymaster, and was then obliged to put down the number of days, &c. Under Commodore Hull, while Mr. Fosdick was clerk, not being called upon to do it, I thought it wrong and so stated it to my friends. For the work I did for Commodore Hull, on his private property, I was paid by his clerk, Mr. Fosdick, who was also clerk of the commodore, as commodore of the yard. There was a regular gang kept at work on the United States ships, and when anything was wanted to be done on Commodore Hull's houses, the best of the men in the gang were taken from the United States employ and put to work on Commodore Hull's private property. I received my orders from Mr. Henry Tollman, master painter.

EBEN, JACKSON.

CITY OF BOSTON, February 15, 1832,

Sworn to before me,

AB'M MOORE, Justice of the Peace.

COMMONWEALTH OF MASSACHUSETTS, Suffolk, 88.

I, Jonathan Pearson, of Boston, in the county of Suffolk, in the commonwealth of Massachusetts, house and ship joiner, of lawful age to testify and give evidence, do say: I left the United States navy yard at Charlestown, in this commonwealth, about ten years ago; I had been employed in the yard four years under Mr. Pierce, master joiner. While I was employed in the service of the United States, I was taken off from that service and set to work upon houses Captain Hull was then building and repairing near the yard. They were Captain Hull's own houses. Captain Hull wanted me to superintend the building of his houses, repairing, &c., and wanted me to hire hands and set them to work, &c. I did so. I should think I was employed in the above, by said Hull, about four months, while the houses were building and repairing. Stuff was wanted for them, and we could not get such as was dry enough to use; took green, belonging to Captain Hull, and exchanged it for dry, which was in the yard, belonging to the United States. Joiners there were the persons who settled the relative value; Captain Hull was the commandant of the yard, and was about there, but gave no orders. I made blinds for Captain Hull, and I think they were made from what is called chip in the yard. At one time we wanted a certain quantity of nails for Captain Hull's houses, and could not get them, except in the yard. We took a quantity, and when we could procure some of the same sort, we returned them. While I was at work on Captain Hull's houses I was about to be committed to Cambridge jail; he told me to go and stay there till the building rotted down, and that he would send piece-work for me to do, so that I should get a living. I accordingly took measures of work, went to jail, and the same afternoon the work was sent to me by Captain Hull. I also saw Mr. Wingate carry shingles out of the yard to Captain Hull's houses, and I saw Mr. Wingate using the shingles in repairing said Hull's houses. knew Mr. Wingate to be called away from finishing the ship house building in the yard to make blinds for Captain Hull's houses; said Wingate used to carry nails and spikes out of the yard, the property of the United States, and the same were used upon said houses of Captain Hull. I now recollect what had been taken from building the magazine of the ship I told said Hull would do to make his blinds if he could get it. Shortly afterwards a man in said Hull's employ brought them to me, and I made a number of blinds out of them for Captain Hull, and hung them upon his windows.

JONATHAN PEARSON.

CITY OF BOSTON, February 20, 1832.

Sworn to before me,

AB'M MOORE, Justice of the Peace.

COMMONWEALTH OF MASSACHUSETTS, Suffolk, 88.

I, Prudence Worcester, of Charlestown, in the county of Middlesex, in the commonwealth of Massachusetts, wife of James A. Worcester, testify, and on solemn oath declare: That about ten years since Shadrack Varney, then and ever since master blacksmith in the United States navy yard at said Charlestown, became offended with me and induced my boarders to leave me. I had kept a boarding-house in Charlestown a number of years, and Varney had boarded with me. While Varney boarded with me I found a chest of copper, very heavy, in my house; so heavy that it took me and another woman to move it, by shoving it; I was satisfied that Varney had taken it from the yard, as he had thrown his clothes over it to screen it; it was afterwards taken privately from my house, and, as I understood then, and now verily believe as I understood then, was put on board a packet in Varney owned a vessel at that time, schooner Morning Star; and a man by the name of James Stiggins worked in the navy yard under Mr. Varney, and also boarded in my house; Stiggins, by order of Varney, frequently took iron work, such as gridirons, toastingirons, &c., and used to sell them to people; also, sheeves and pins, black varnish in kegs, &c.; and when asked what it was, Varney used to say it was rum; this, Varney ordered the boy to say at the gate. who carried it out on a wheelbarrow; the sheeves and pins were also carried out on a wheelbarrow, and covered over with chips, and shavings, and charcoal; and Varney ordered the boy to say they were fuel to kindle his master's fire. Varney and —, and another, owned the Morning Star; I think a man by the name of Adams owned a small part of her. After Varney had taken his men from me, I said he was a thief, alluding to his having stolen the things above stated; I had no inducement before to expose him, though I had often witnessed the above and other similar transactions. Shortly after I had said Varney was a thief, he called on me with Duncklee, then and at the present time one of the constables of Charlestown; said they had a writ of slander against me, and that I must pay Varney damages, confess I had lied, or go to jail. I told them I had told the truth, and never would say I had told a lie, let the consequences be what they may, and that I would prove the truth of what I had said; they went away, and I have never since been sued, or in any way annoyed, for what I had said. At the time they called on me, Duncklee did arrest me, but went off and I have not heard of it since, except in the afternoon of the same day, Duncklee called on me and told me I had better settle with Varney; I told him I had nothing to settle; what I had said was true, and I would prove it; Duncklee said Varney had acknowledged he took some of the things, and he went away. I took counsel of E. Phinney, esq , then a lawyer in Charlestown, and now clerk of the courts in Middlesex; he advised me to make these facts known to Commodore Hull; I asked Commodore Hull if he allowed anything to be taken from the yard; he said no, not ninepence worth; I then told him the story about Varney; at his request, I told him fully all that had come to my knowledge; Commodore Hull then advised me to settle the affair with Varney; that I should have a large house and more boarders; that Mr. Varney would do what was right. Commodore Hull said he would get a house for me himself, but I went away and nothing was ever done about it, and Varney was continued as master blacksmith in the yard.

PRUDENCE WORCESTER.

CITY OF BOSTON, February 15, 1832.

Sworn to before me,

AB'M MOORE, Justice of the Peace.

COMMONWEALTH OF MASSACHUSETTS, Suffolk, 88.

I, James Fowler, of Charlestown, in the county of Middlesex, in the commonwealth of Massachusetts, ship carpenter, of lawful age to testify and give evidence, do say: About nine or ten years since I left the navy yard at Charlestown, where I had been employed six weeks short of four years at that time. I had worked there before my last employment; I was employed by Mr. Barker, head carpenter of the yard. While I was employed in the yard, I was about to let a part of my house in Charlestown to a man by the name of Morris, who was, I think, a boatswain's mate in the yard; I think he was so styled. While examining the cellar of the house, which was, in com-

mon with the adjoining house, occupied by Samuel Fickett, we discovered some round pins of copper bolts and lead; we both supposed and said it belonged to the yard, because we had seen such in the Morris said this came from the yard, and I will take some of it into the yard and show it. Morris took some of it. Shortly after, I think the same day, I was called into Mr. Waldo's office—clerk of Mr. Barker was there, and asked me if I knew the vard, I think. where that copper came from. I replied, yes, it came from Fickett. Yes, said he, Morris brought it here. Yes, said I. Mr. Barker's countenance altered, and he said that will do. Mr. Barker never took further notice of it, to my knowledge, and I never heard more of Commodore Hull was commandant of the yard at that time. While there Mr. Barker sent a team, and had a load of blocks carried to his house. These blocks were from a foot to two feet and a half long, and six inches thick, and ten wide, of live oak, which had been sawed from the timber heads used in the yard. Captain Hull knew of this; he came down, and the blocks were then loading by laborers employed in the yard. He asked the laborers what they were doing, and what they were going to do with the blocks; one of the men said, we are loading them for Mr. Barker; Mr. Barker set us to doing this. Well, said the commodore, where is our team? or where is the man who drives our team? Commodore Hull then said, he, meaning Barker, has no more right to the blocks than I have; and looked round, and halloed for the man who drove the yard team; the man came down with the team pretty soon after, within an hour, and took a load of blocks to the commodore's house; I think the commodore so ordered him; I was standing close by all the time. Barker had five apprentices, I think, while I was there; four, I think, were rated upon the books as full workmen, as we then understood. a lad by the name of John Southwick, jr., who was an apprentice to Mr. Barker, to whom I was told by John, who was in my gang, Mr. Barker allowed fifty cents per day for board and clothes; and, as we were informed, and the rolls will show if it was so, John drew, or Mr. Barker for him, workmen's pay from the yard. I have never been called upon to testify in any case touching this matter until this day. JAMES FOWLER.

CITY OF BOSTON, February 20, 1832.

Sworn to before me,

AB'M MOORE, Jus. Peace.

COMMONWEALTH OF MASSACHUSETTS, Suffolk, 88.

I, Benjamin W. Wait, of Charlestown, in the county of Middlesex, in the commonwealth of Massachusetts, joiner, of lawful age to testify and give evidence, do say: I am now employed in the United States navy yard at said Charlestown, and should think I had been so employed sixteen years out of the last twenty years. Mr. Barker has had, I think, four apprentices at a time. There was a boy, who was an apprentice of said Barker; Mr. Barker had his name put upon the

rolls of the yard as a journeyman. The boy's name was Jonathan Binney; he now lives in Charlestown. Mr. Barker told the boy to tell the lieutenant of the yard that he was of age, and if he was inquired of as to his age to say he was free; the boy said he would not tell a lie for anybody. Binney told Lieutenant Gwinn that he was but twenty years of age. Mr. Gwinn told Binney Mr. Barker had had him put upon the rolls as a journeyman. Mr. Barker, shortly after, had some trouble with Binney about sawing a beam and turned him away. After this, Mr. Gwinn sent for Binney and told him he would pay him journeyman's wages if he would receive the benefit of it, and not Mr. Barker. Binney said no; he knew Mr. Barker's disposition so well, he would put all the hard work he could upon him, and went away and has never done a day's work since in the yard. Messrs. Barker, Wade, Harding, Coffran, and Magoon were owners of brig Nahant, built at Medford. Mr. Coffran was agent; Wade was paymaster; Mr. Harding superintended the spars, as I understood; Magoon was builder; and Mr. Barker came and gave orders, and contributed money to pay for her in part. I helped finish the brig, and was employed by the day. Coffran made the agreement, and Wade paid. Mr. Magoon obtained timber at the United States navy yard which had been rejected, and worked it into the brig Nahant. Some of the timber ought to have been rejected, and some was very good. by the name of Samuel Lapham, jr., wanted a stern post for a ship; Mr. Magoon asked him twenty dollars, either per ton or the stick, I don't know which. Lapham did not purchase it, because it was so high; and this was one of the rejected sticks. This was in the month of April or May last. I was summoned as a witness in the trial of Lieutenant Abbott, but was not examined, although I attended the court every day. Mr. Crooker is now employed under Mr. Barker. but next in command to him, and is termed first quarterman. time the fore part of the present month, Mr. Crooker had his name taken from the rolls for some reason unknown to me; he was absent, I think, not over a week; he came back again, and is now employed as usual; but what adjustment of the cause of his leaving has been made I do not know. There is a man in the yard, by the name of Hadley, a ship joiner, now employed on the dry-dock; he became dissatisfied, and said they, meaning, as I suppose, the master workman on the dry-dock and others, kept hammering him, and if they did not let him alone he would take his name off of the rolls.

EENJ'N W. WAIT.

CITY OF BOSTON, February 23, 1832.

Sworn to before me,

AB'M MOORE, Justice Peace.

CUMMONWEALTH OF MASSACHUSETTS, Suffolk, 88.

I do hereby certify, in consequence of the charge of Mr. John Cassidy against Commodore Morris and Mr. Barker, I have reported to the said Commodore complaints similar to Cassidy's against Mr.

Job Turner, boss mason of the dry-dock. I have worked at stonelaying, &c., for two summers under said Turner, and, by going to him the third season, he told me he could not employ any Irish for the future or season. And I have known said Turner to employ wood-carriers and laborers as masons and charged nearly as much pay, and he told me himself there were masons from Boston, to my certain knowledge, looking for employ from him-men who were perfect in their business—and he would not. That he told me he was in duty bound to help these laborers, nothing but these men being faithful in his employ for a few years before this happened, I thought it very strange to employ such men and refusing good workmen and giving extra pay to them, I thought, had he been an honest man, he would requite them with his own pay, and not cheat government so. One of these men acknowledged he had but so much per month, and Mr. Turner kept the remainder for his benefit. This I informed Commodore Morris of; I have sent him two different letters respecting it, one of which I gave him out of my own hand, and told him in the other I should inform government of it if he should not bring it forward, and requested an answer but got none. I informed Colonel Baldwin of the same and got no answer. It was no hidden mystery amongst the rest of the officers, but they all put their foot on it and **left** it unnoticed.

PATRICK GILDAY, Mason.

FEBRUARY 14, 1832.

Sworn to before me,

ABRAHAM MOORE, J. P.

NAVY YARD, CHARLESTOWN, March 16, 1832.

SIR: I herewith return the seven depositions which you forwarded to me on the 5th instant, together with other papers marked from A to I, handed to me as explanations of the matters contained in the depositions forwarded by the department.

In compliance with your instructions, I beg leave to offer the following summary statement, together with copies of remarks founded

upon my own observations.

The master-joiner, Mr. Pierce, in his explanation marked A, admits that he employed the apprentice of Adams instead of an apprentice of his own, and that he charged Adams twelve and a half cents a day for the use of the tools which he furnished to the apprentice. This arrangement was unknown to me, and although I believe Mr. Pierce believed that he was acting within the scope of the instructions respecting apprentices, and without any belief that his conduct was

improper, yet I think it was not correct, and should never have authorized it. It is the only complaint I have heard against him.

The explanations offered by Mr. Turner respecting the charge in the deposition of Patrick Gilday (No. 4) are contained in a letter from him, marked B, a letter from Mr. Parris, marked C, and the

deposition of Samuel Seal, jr., marked D.

From these it appears that Mr Turner received the pay earned by his apprentices, but that he received no part of the pay of any others. As respects the other parts of the charge, I do not think there is any reason to doubt that Mr. Turner exercised a proper discretion in the selection and compensation of the persons employed under his direction.

The depositions numbered 2, 3, 5, 6, and 7, are supposed to be directed against Mr. Barker. No. 2, being the deposition of John Morris, merely states that he discovered some copper and lead in the cellar of a part of a house that was occupied by a carpenter named Fickett, then employed in the yard; that his attention was directed to it by another carpenter who occupied a part of the same house, and who had quarrelled with Fickett; that he suspected it had been taken from the navy yard, and that a part of the copper was taken by Morris to the yard and report made to the officers. I perceive nothing in this to implicate Mr. Barker in any way. Lieutenant Percival or Commodore Hull were the proper persons to investigate the matter, and it is but reasonable to suppose that they did. It occurred, as Morris informed me, about ten years since.

Mr. Barker has stated, in his letter marked E, his recollections upon

the subject.

In relation to the deposition of Jonathan Binney, marked 3, the explanations of Mr. Barker will be found in his letter marked E, and in the deposition of John A. Dickason, marked F; the apprentice named in Binney's deposition, and of James Mirkelley, another ap-

prentice, marked G.

From these depositions and the letters of Mr. Barker, it appears that Mr. Barker simply received the pay of his apprentices, as allowed by the regulations, and that he had never more, but latterly fewer apprentices than was allowed. It also appears that the cause assigned by Binney for the employment of Winslow did not exist, so as to form a probable motive for improper preference at any time, and that it ceased altogether in a short time.

The subject of chips, blocks, &c., said to be taken by Mr. Barker, appears to be satisfactorily explained, and the deposition of Dickason and Miskelley contradict that of Binney as respects the improper em-

ployment of apprentices during working hours.

The employment on Sundays is stated. It was general and for all workmen, and at times such employment is necessary. Mr. Barker had a right to receive his wages as an apprentice. The statement of Binney respecting the discharge of himself for refusing to work on Sunday is answered in the letter of Mr. Parris, marked C. His statement respecting timber sent from the yard is no doubt true. All timber which is rejected as not conforming to contract is disposed of by the contractors according to their own pleasure, and necessarily

leaves the yard. The deposition of Mr. Phipps (numbered 5) states that he was permitted by Mr. Barker to take raft ropes and staples for removing 108 sticks of rejected timber; that he retained them a week and then returned them, and that he does not know if Mr. Barker took any account of them, and that when called upon to return them he was informed there had been some complaint about them.

The loan of raft ropes and staples has already been the subject of

communications to the department, and the fact admitted.

The more important question is whether proper measures were taken

to secure their return.

In a former investigation of this matter Phipps stated the same facts to me, with the addition that the articles were counted by the master laborer, and that he had carried more back than had been borrowed, and these were returned to him, and that he never knew any taken from the yard which were not returned. The master laborer also stated that he counted them. A laborer named McGowan stated that he took them when returned, carried them to the proper room, and locked them up.

The other part of the deposition, stating the belief that Mr. Barker was connected with others in two brigs, has heretofore been and is

again admitted by Mr. Barker.

J. Studley's deposition (No. 6) relates principally to Mr. Barker's connexion in the ownership of two brigs, and to the fact that timber rejected at the yard was used in their construction. As these are not new charges they require no separate consideration. Mr. Barker states the circumstances connected with his being absent from the yard during working hours, and his references to the several commandants of the yard would seem to be the best means of ascertaining whether he has or has not been neglectful of his duty. My own testimony will be strongly in his favor.

The deposition of L. Ward (No. 7) relates first to securing rejected timber with the raft ropes and staples of the yard which has been already noticed; he next testifies that S. G. Clark, foreman of the laborers, and afterwards that John Castigan were continued in employment, though drunk. Mr. Barker, in his letter, comments upon this. Castigan is not now employed, and Clark is still employed as

master laborer.

Although I am very frequently about the yard, and the different mechanics and laborers fall under my observation, I have never seen Clark drunk, and have considered him a useful man. I had heard that he had been intemperate, and informed him that his employment

would depend upon his sobriety.

Ward proceeds to say that, to the best of his knowledge, he has heard R. McGowan say that he had known Mr. Coffran to put as much rigging on board a brig as would load a cart. Although not expressly stated, it may be presumed that he intended the inference should be that the rigging had been improperly taken from the yard. On a former occasion I examined McGowan upon this subject in the presence of Cassidy and of a man named Roach, to whom Cassidy referred as having heard McGowan make an assertion that he had known as much rigging sent on board the brig Forrest as would load a cart. Roach did not confirm Cassidy's statement, and McGowan

denied ever having said so, but that he had said that once, when he went to the smith's shop for staples, the foreman asked what he did with them all; that he answered that they broke some, and lost some overboard, and that the foreman replied he had made as many as would load a brig. This was probably the conversation referred to.

Of the conversation between Cullen and Cassidy nothing is known. As respects Cullen's employment and pay in the yard, Mr. Barker has stated the circumstances in his letter. I frequently hired him myself to work in the garden, and paid him a dollar a day. I considered him a very industrious, sober, and deserving laborer. His employment in the garden of the commandant out of working hours was entirely voluntary and unasked. His services, as he stated, proceeded from a desire to make some return for what he considered as favors received from the family, altogether unconnected with the public service. He left the yard some time since for a more desirable situation at one of the factories in Lowell.

I believe, sir, that the foregoing comprises a correct summary of the depositions, with references to the explanatory papers for your obtaining the information necessary to form an opinion upon the subject.

From the testimony of Eaton, marked H, it appears that Cassidy, who has been the most active agent in procuring the depositions, and in preferring the various charges, is but one of several persons whose avowed object is to obtain the removal of Mr. Barker, Mr. Pierce, and others of the master workmen. This has been corroborated by John Morris, the deponent No. 2, who has stated to me that Harrison Wingate requested him to give that deposition, and that when he replied that it was hardly worth while to rake up such old things which had occurred ten years since, Wingate said that some of us wish to get Mr. Barker, Pierce, Varney, and other master workmen removed; that they had been here too long to remain in one place; that they took too much bitters, and that he wanted the Secretary to know everything.

It is certainly of no consequence by whom charges are made, provided they can be substantiated, but when the avowed object of individuals is to obtain the removal of others from desirable situations it cannot be considered very uncharitable to suppose that they will endeavor to give the most unfavorable coloring to every fact at all

calculated to effect their purpose.

Both Cassidy and Wingate have been formerly employed in the yard and have been refused employment subsequently. They probably feel some disposition to punish those who have refused them, and at the same time may hope for future advantage in case a change should be made. That the character of Cassidy is rather questionable may be inferred from the letter of Mr. Ethridge to Mr. Barker, which is enclosed and marked I.

I have the honor to be, sir, very respectfully, your obedient servant, C. MORRIS.

Hon. Levi Woodbury, Secretary of the Navy, Washington. A.

NAVY YARD, CHARLESTOWN, March 13, 1832.

SIR: I make this statement, in reply to Moody Stockman's deposition or statement handed me by you, relating to employing Edward Adams and his son, or apprentice. I employed said Adams, but objected to employing his apprentice, for we had not been in the habit of employing minors. I told him that, according to the regulations of the yard, I was allowed two apprentices, and had but one. I could employ him in place of the other, and did so employ him, and allowed the wages that other apprentices had of his age and time of service. He commenced work in July, and worked about eighty days. Mr. Adams left the yard in the fore part of October to go south; in about a week after the apprentice left also, and, as I was afterwards informed, went to New Orleans, and have not seen either of them since. My agreement with said Adams was, that he should receive the apprentice's pay, and allow me twelve cents per day for the use of my tools for him to work with, which were my own.

CALEB PIERCE.

Commodore C. Morris, Commandant Navy Yard, Charlestown.

В.

NAVY YARD, CHARLESTOWN, March 14, 1832.

DEAR SIR: Captain Parris, superintendent of the dry dock, has this day shown me an affidavit of Patrick Gilday, a mason, formerly employed by me on the dry dock, in which he charges me with sundry misdemeanors. The two letters which he mentions writing to you, were shown to me at the time, and were then explained, and, as I thought, to your satisfaction. The man there mentioned, I presume, is the same now alluded to, when he says, "one of the men acknowledged he had but so much per month, and I kept the remainder as for my benefit," was Samuel Scales, an apprentice to me, (and Gilday knew it, as well as the other workmen,) whose affidavit I have caused to be taken, and is here enclosed. During his apprenticeship I received his wages, as well as one other apprentice, which was in accordance with my agreement, although I have had but one apprentice on the works not more than half the time whilst I have been employed on the dry dock, and most solemnly declare that I have not received any pay or emolument from any man other than my apprentices.

In answer to my employing hod-carriers or laborers as masons, and charged nearly as much pay, &c., I have endeavored to employ such workmen as were best qualified to do the work, and have generally

H. Ex. Doc. 130—2

consulted with the first officer of the dry dock as to the pay of the men, and they have been uniformly put on the rolls, which have been

examined and approved by that officer.

He also charges me with telling him, "I would not employ no Irish for the future, or season." Gilday called on the works some time about the 1st of March, 1830, when I was employed with ten or fifteen laborers—mostly Irish—clearing off some earth, and making ready to set the masons to work as soon as the frost would permit. He (Gilday) asked, or rather demanded, to be set at work. I replied to him, that our work was not ready; and I might have said we were not to employ any Irish, but did not expect him to consider me serious, having then nearly all men about me Irish; and he knew very well that I had never objected to a man on account of his being Irish, or have I made any distinction whatever, provided the man was industrious and faithful. Gilday was not of that kind of man, and I did not wish to employ him, and I consider myself justified in so doing; but I presume had he been employed, you would not have been troubled with his letter.

With great respect, your obedient servant,

JOB TURNER.

Commodore CHARLES MORRIS.

C.

DRY DOCK OFFICE, NAVY YARD, Charlestown, March 14, 1832.

DEAR SIR: Your note of 10th instant, with an affidavit of Patrick Gilday enclosed, has been received, in which he implicates Mr. Turner, master mason, and refers to two letters sent to you by Gilday some time in 1830. The two letters were then received and explained at the time, which I believe was satisfactory. I have, since receiving your note, called on Mr. Turner for an explanation, which he has given, and is here enclosed, with an affidavit of Samuel Scales, jr., which I believe to be correct.

Colonel Baldwin is now absent, but will be here in a few days, and will probably reply to that part of Gilday's letter where he says he

"informed Colonel Baldwin of the same, and got no answer."

With regard to the charge of "a man named Jonathan Binney, that he, with others, was discharged because they refused to work on Sundays, on referring to the rolls said Binney's name appears from the 1st of September until the 15th of October, 1829, when he was discharged, with others, not because he or they refused to work Sundays, but simply because we had no more need of their services, the job being finished which they were employed on, viz: the plank flooring of the dock.

With the greatest consideration, I am, sir, your obedient servant,
ALEXANDER PARRIS,
Superintendent of Dry Dock.

Commodore Morris.

D.

Commonwealth of Massachusetts, &ss.

I, Samuel Scales, jr., of Townsend, in the county of Middlesex and commonwealth of Massachusetts, now resident in Charlestown, in said county, mason, of lawful age, do testify and say: That during a part of the year 1829, and until I became of age, on the 26th day of October, 1829, I worked on the dry dock in the navy yard, in said Charlestown, as an apprentice to Job Turner, of Boston, master mason, and that after I became of age I continued to work on said dry dock as a mason until about the 18th day of December, 1829 From the said 26th day of October until the end of the season, about the 18th day of December aforesaid, I received my pay of the purser of the navy yard, and the said Job Turner did not, directly or indirectly, receive any pay, profit, or advantage of any kind from my labor. the time I worked on said dock, as aforesaid, a man was employed there named Patrick Gilday, and I worked with said Gilday a part of the time. During the time I worked on said dock with said Gilday I often heard Mr. Turner caution said Gilday, in a very particular manner, to lay his work solid, and heard Mr. Turner, aforesaid, several times threaten the said Gilday that, if he did not lay his work solid, he should be obliged to discharge him. Gilday worked at that time under the direction of Mr. Turner, and said Gilday was inclined not to lay his work solid, and I consider him to have been very negligent in this respect. I do not know of any men by whose work at said dry dock said Turner ever made anything, or had the profit of one cent by it; nor have I heard of any such man, and I have worked on said dock three seasons.

SAMUEL SCALES, jr.

MARCH 14, 1832.

Then the said Samuel Scales, jr., subscribed the said deposition, and made oath to the truth of the foregoing affidavit. Before me, JOSEPH TUFTS, Justice of the Peace.

 \mathbf{E} .

NAVY YARD, Charlestown, March 15, 1832.

Sir: Your letter of 10th instant, with sundry depositions containing accusations against me as naval constructor in this place, have been received, and, in compliance with your request, I offer the following explanations: To the deposition of John Morris (marked 2) I can only say, I have an indistinct recollection of the circumstance, but it appears that the subject was left to the officers of the yard. Said

Morris informed me a few days since that he was desired by Harrison Wingate to go and give said deposition, in order to procure my removal.

The next, (marked 3,) Jonathan Binney's: He came as an apprentice. and was indentured to me on 15th June, 1821, and continued till 29th March, 1826, about a year before he was of age or the time he was bound to serve. By the regulations of the commissioners, I am allowed to have four apprentices, and never have had a greater number, and for more than two years last past have had none; at the time he came I had but three, and have never received a higher price for them than was allowed by the regulations. John A. Dickason, while an apprentice, did the duty of a quarterman, but was never rated on the rolls higher than \$1 56 per day until after he was of age; six cents of this was for grog, which the men were allowed to drink or take pay for as they pleased. Winslow was employed but about seven years, and could do a good day's work at what he was principally employed on, which was boring holes and driving bolts, and received the pay of third class carpenters, and there was no one in the yard that was more faithful or did his duty more satisfactorily. owed him at any time since I have been employed in the yard any "considerable sum of money;" he had been employed by me in my private yard previous to the time I came here, and I did owe him at that time about twenty dollars, which I paid him shortly after; he was in indigent circumstances and obliged to labor for a living, and I sincerely believe that for the last twenty years of his life he never possessed property to the amount of one hundred dollars at any one time. The taking of blocks, &c., from the yard, I explain by saying, that there was an order by the commissioners, in 1819, (if my memory serves me,) to allow the chips to be taken by the persons employed in the yard and the poor of this town, which practice was continued about a year; finding that it was the cause of complaint and difficulty, I suggested to the commandant of the yard, Commodore Hull, the propriety of discontinuing the practice, which was done, and this took place previous to Binney's commencing his apprenticeship. reason of Binney's leaving me before he was of age was not as he has stated.

The true reason I believe to be, as his father informed me at the time, that he had formed a contract of matrimony while an apprentice, and which was in direct violation of his indentures, and I have been informed he was married before he was of age. I gave him as good an opportunity to learn the trade as any one ever had, and he was not "jobbing about," but was constantly kept upon "regular work." I never set him to work on Sunday; he worked but one Sunday during the time he was with me, and which he did voluntarily, and he received the pay for it; neither did I send him on errands about my private affairs when he was borne on the books for pay. There is a society of master shipwrights, of which I am a member, and one of the by-laws is, that no member shall employ a runaway apprentice, or one who does not serve his time faithfully. It is untrue that I ever offered him nine shillings per day, and have never spoken to him since he left my service; neither has he asked me to employ him since. He worked on the dry dock in 1828, but was not discharged

for the reasons stated by him, as will appear by the statement of Mr. The timber mentioned in Binney's, and also in Studley's deposition, was landed at the yard and rejected, not being according to contract, some of it being defective and short of the length required by the contract; the contract for plank stocks requiring that each delivery shall average 45 feet in length, and none less than 35 feet long to be received, consequently all less than that length is rejected, without regard to quality. The timber bought and taken from the yard by Mr. Magoun, of Medford, was sold him by Messrs. C. J. Cazenova & Co., of Boston, the agents for the contractors. Other rejected timber has been disposed of to Mr. Robertson, of this town, and others by Mr. Cofran and Mr. True, agents for contractors, and sometimes by the contractors themselves; and it frequently happens that a cargo of timber has been landed, only a part of which has been received. in consequence of the contract being completed; such residue was taken from the yard and sold to private builders by the contractors or their The pine timber mentioned in Binney's deposition as lying at Mr. Robertson's yard, is probably some mast timber that has been rejected, not on account of the size, but as being deficient in quality.

To Phipps' deposition, (marked 5,) I would state that it has been the practice to loan to persons who had rejected timber in the yard, both rigging and staples, on condition of returning them; and that the same were returned, is attested to by Phipps himself. any written account of such loans was kept I am unable to say. The Studley deposition, (marked 6,) I refer to the several commanders, and others, who have been here with me in the employment of the government; and would further assert that, in the discharge of my duty, I have passed more time in the yard during working hours than any other per-That I have been sometimes absent during working hours on my private affairs is true. But in so doing I did not neglect my duty to the government, and would ask, who is to be the judge, the commandant of the yard, or any and every other person that may see fit to take upon themselves to judge in the case? To Lawrence Ward's deposition, (marked 7,) I would state that Stephen G. Clark is still employed as an overseer to the laborers, and I consider him a useful and faithful man. He was formerly a master's mate in the navy, and had command of one of the galleys in Commodore McDonough's squadron, in the battle of Lake Champlain, at which time, I have been informed, he conducted as a brave man, and was afterwards a boatswain in this yard, and gave up his warrant some years since, at which time it was said he was addicted to intemperance; but since he has been employed as a laborer he has always done his duty satisfac-John Costigan, the other person mentioned as a drunkard, was discharged, as was every other person I found guilty of drunkenness, neglect of duty, or incapacity. Ward says he "went with Mr. Barker to mark some timber," which is not true, as regards myself; he probably went with my son, the inspector, but from his deposition it was intended for me. As respects the refuted remarks of McGowan, in the hearing of Ward, that Mr. Cofran had put on board a brig as much rigging, &c., as would load a cart, is, McGowan states, untrue; that he has never said in any one's presence that he has known Mr. Cofran to put rigging or anything else on board any vessel, a designed further states that he never knew Mr. Cofran to put anything longing to the United States on board any vessel; he further states the while employed as a laborer he has himself carried rigging, &c., board vessels for the purpose of securing timber, but that none was left on board such vessels. Michael Cullen received one dollar per day at the time mentioned by Ward, and all the rest of the gang -eceived the same pay, except John Cassidy, James O'Donnel, a nd Parker Butterfield, whose pay was ninety-two cents per day, and w -8. in my opinion, a full equivalent for their services. Cullen was one of the best in the gang, and never neglected his duty, nor guilty of I utemperance, to my knowledge. That I own a part of the two vess els referred to in the depositions with Mr. Cofran and others, is true; their employment is under the direction of Mr. Cofran. I was concerned in navigation previous to coming to the yard; discontinued for a time, and resumed it in these vessels about two years since.

I deem it due to myself and to the department to make some statement respecting those of the individuals who are known to have been concerned in getting up the charges which have been made against myself and the other master workmen in the yard; from these the character of their associates may be fairly inferred. The most prominent personage, and the reputed author of the letters to the honorable Secretary and commissioners of the navy, is John Cassidy, a native of Ireland, who can neither read nor write. He was formerly employed in this yard as a sawyer, and afterwards as a laborer. He was considered less worthy of employment than others, and was dismissed when the number of mechanics and laborers was reduced. He was frequently lazy, impudent, and troublesome, and particularly so in the latter part of his employment. His only known employment for more than a year past has been to dictate letters, &c., to the Navy Department, traducing the characters of persons attached to this yard, and attempting to influence others to enlist in the same cause; exhibiting the letters and papers he has caused to be written, and those also received by him from the department, in all the low tippling shops and streets of the city and this

Another, who is known as an associate, is Harrison Wingate, of this town, by trade a house carpenter, who was also formerly employed in this yard by Mr. Pierce, the master joiner, and was dismissed some years ago, and has not been employed since, although he has made frequent application. I have been credibly informed that his character in this town is such that he would not be trusted by any one who knows him. He has acknowledged himself the author of an anonymous communication, sent to the Hon. Secretary of the Navy a few months since, requesting the removal of the several master workmen at this place.

In support of what I have asserted, I send herewith the depositions of John A. Dickason, Robert W. Eaton, and James Miskelley, also a letter to me from Mr. S. Etheridge, with a request that they be for-

warded with this to the Hon. Secretary of the Navy. Should the explanations not exonerate me in his opinion, I hold myself ready to answer to any charges, and before any tribunal.

I am, very respectfully, your most obedient servant,

JOSEPH BARKER.

Commodore Morris, Commandant of Navy Yard.

F.

Commonwealth of Massachusetts, \\
Middlesex,

I, John A. Dickason, of Charlestown, in the county of Middlesex, in the commonwealth of Massachusetts, a carpenter in the navy of the United States, of lawful age to testify and give evidence, do say: That I was an apprentice to Mr. Barker, in the navy yard at Charlestown, from July 12, 1819, to July 23, 1823, at which time I was twenty-one years of age, having been previously an apprentice to the same trade in Boston. Mr. Barker never had at any one time while I was with him more than four apprentices. The two last years I did the duty of a quarterman, and am fully satisfied that Mr. Barker never received for my services more than one dollar and fifty cents per day while I was an apprentice to him. While I was with Mr. Barker I never have seen any blocks or timbers that were fit for anything but fire-wood at his house; nor has he sent me, or any other apprentice, to my knowledge, to get in chips, or call me or other apprentices from the government work to go on errands about his private affairs.

I knew Jonathan Binney as an apprentice to Mr. Barker, who left him before he was of age. He was employed the same as other apprentices, and had equally as good a chance to learn the trade as I had. I never knew Mr. Barker to order me or any other apprentice

to work on Sunday.

JOHN A. DICKASON, Carpenter U. S. Navy.

Justice of the Peace.

CHARLESTOWN, March 12, 1832.

Then John A. Dickason personally appeared and made solemn oath that the foregoing declaration by him subscribed is true.

Before me, JOHN SOLEY,

CHARLESTOWN, March 14, 1832.

G.

COMMONWEALTH OF MASSACHUSETTS, & 88.

I, James Miskelley, of Charlestown, in the county of Middlesex, in the commonwealth of Massachusetts, a carpenter in the United

States navy yard, Charlestown, Massachusetts, of lawful age to testify and give evidence, do say that I was an apprentice to Mr. Barker, in the navy yard, Charlestown. I commenced my apprenticeship in the year

eighteen hundred and twenty-four.

I have lived in Mr. Barker's family about five years. I was never sent during working hours to do errands or perform other work for Mr. Barker. I worked but one Sunday, for which I received my pay. I never knew Jonathan Binney sent out of the navy yard in working hours to perform work or errands for Mr. Barker. The last year that Binney was with Mr. Barker, he and myself sawed wood of evenings, for which we were paid by Mr. Barker.

JAMES MISKELLEY.

MARCH 15, 1832.

The above named James Miskelley personally appeared and made oath that the above statement by him subscribed is true. Before me, WM. GORDON,

Justice of the Peace.

H.

Commonwealth of Massachusetts, & 88.

Middlesex,

I, Robert W. Eaton, of lawful age, do testify and say that about three weeks ago, John Cassidy, a man who had worked in the navy yard in Charlestown, and who had been, as he told me, dismissed from it, called on me and entered into conversation about Mr. Barker, the master ship builder in the yard, and inquired of me if I meant to go in the yard again to work this summer; I told him I should like to if I could get work. "He then told me he wished me to go to Boston and give my evidence." I asked him what he wished me to give my evidence about. "He said he wished me to give my evidence against Mr. Barker, and that there were five or six others going to do the same." I told him I had nothing to say against Mr. Barker, for "He said he wished me to give my evi-I knew nothing against him. dence that Mr. Barker had knowingly permitted lumber, spikes, ropes, &c., property of the United States, to be fraudulently carried away from the yard." I told him I could not give my evidence to that, as I had never seen anything of the kind; but, on the contrary, when I worked in the yard, I had been ordered by Mr. Barker to collect and carefully stow away such articles as might be carried off or lost. then told me it was the design to get Mr. Barker and Mr. Pierce, the master joiner, dismissed, and Mr. Hart and Mr. Harrison Wingate appointed in their stead, and then you will get seven and sixpence a day instead of a dollar."

He said he would speak to Mr Hart in my favor. I told him I could not go, as I could be of no use to him. He then left me, but in a short time after called again and held nearly the same con-

versation, adding that Mr. Wingate was assisting him, and that "we shall get them—meaning, as I understood, Barker and Pierce—out." I refused, as before, stating that I knew nothing against them. Three or four days after this conversation, Cassidy called again, and pressed me still harder to go and give my evidence against Mr. Barker. I told him again I knew nothing against Mr. Barker. He then said "come over and I will tell you something that you can say." I then told him I would never go unless compelled. He then left me and hasnot renewed the subject to me since.

ROBERT W. EATON.

MARCH 15, 1832.

Then the above named Robert W. Eaton personally appeared and made oath that the above statement by him subscribed is true. Before me,

WM. GORDON,

Justice of the Peace.

I.

CHARLESTOWN, March 15, 1832.

SIR: Having understood that John Cassidy, a laborer of this town, has made improper use of certain recommendatory letters, and among the number one from me, I feel constrained to say that his subsequent conduct has been such as to forfeit the good opinion I at that time entertained for him; that he has become an idle brawler, using the aforesaid letters to impose upon the public, and that he is wholly unworthy of notice.

He, in connexion with a female, left an infant exposed in the road, at Newburyport, on the night of the 12th of February last, and only

escaped a criminal prosecution by suddenly decamping.

Having communicated with the witnesses to the transaction, I do not hesitate to say that I believe him to be an unprincipled fellow.

Respectfully, &c.,

N. ELKRIDGE.

Mr. Barker.

NAVY DEPARTMENT, March 23, 1832.

SIR: Commodore Morris' report, with sundry papers containing statements from the parties in reply to the accusations of John Cassidy and others, has been received.

The charges appear to be satisfactorily explained; some of them are of long standing, and were formerly investigated by the court of

H. Ex. Doc: 130-3

inquiry in Commodore Hull's case. One act is an exception, which was improper, and has been condemned by Commodore Morris since it became known to him, viz: the employment by Mr. Pierce of one of Mr. Adams' apprentices, and charging 12 cents per day out of his wages for the use of tools belonging to said Pierce.

Should you desire any further or more explanations, or a view of such papers in reply as are pertinent to the case, the department will take pleasure in meeting all reasonable requests upon the subject.

I am, respectfully, &c.,

S. W.

ABR'M MOORE, Boston, Mass.

1

LOUISVILLE AND PORTLAND CANAL.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

IN BESPONSE TO

A resolution of the House calling for information as to the condition and affairs of the Louisville and Portland Canal Company.

MAY 29, 1858.—Referred to the Committee on Roads and Canals.

TREASURY DEPARTMENT, May 28, 1858.

SIR: In reply to the resolution of the House of Representatives requesting the Secretary of the Treasury to inform the House in reference to the condition and affairs of the Louisville and Portland Canal Company, I have the honor to submit the following report:

In 1825 the legislature of Kentucky granted a charter to the "Louisville and Portland Canal Company," to construct a canal around the falls of the Ohio river, making the capital \$600,000, in shares of \$100

each.

In 1829 the legislature increased the capital to \$700,000, and al-

lowed the company to borrow money to complete the canal.

Subsequently, the company being embarrassed for means, the legislature, in December, 1831, authorized them to extend their capital stock a sufficient amount to complete the canal, and pay the interest on its cost.

The United States subscribed for 1,000 shares of the original stock, and in March, 1829, subscribed for 1,335 shares more, which had been forfeited by individuals. These subscriptions were respectively under the acts of Congress approved May 13, 1826, (Statutes at Large, vol. IV, p. 162,) and March 2, 1829, (Statutes at Large, vol. IV, p. 353.)

Again, in December, 1831, the United States acquired 567 shares more, under an act of the legislature of the State of Kentucky, as its portion of interest and dividends. An abstract of this act, passed December 12, 1831, is herewith submitted, marked A.

| The United States thus owned | | shares. |
|---|-------|---------|
| Total The money actually paid in by the United States, to this | , | " |
| point of ownership, which covers also a period (of non-payment) up to 1842, was in the aggregate During this period (to 1842) there was received into the United States Treasury money for dividends | \$233 | ,500 00 |
| amounting in gross to | 257 | ,778 00 |

And there were also received the above noted 567 shares of stock.

In February, 1842, the legislature of Kentucky amended the charter of the company, providing that its president and directors should have the privilege of selling the shares of stock owned by individuals to the United States, or the State of Kentucky, or the city of Louisville, and authorized their use of the income of the canal to effect such purchase. The amended charter further provided that when the shares of individuals should be all purchased up they should be transferred to the United States on condition that government should only levy sufficient toll to keep the canal in repair, and pay "all necessary superintendence, custody, and expenses, and make all necessary improvements, so as fully to answer the purposes of its establishment, and further to protect and guard the interests of commerce." An abstract of this act is herewith submitted, marked B.

Under the process of purchase, the individual stock was all acquired; and in January, 1855, the company tendered the same to the government, through the Secretary of the Treasury, on the conditions

of its amended charter, as above recited.

The president of the company reports that the secretary, in answer to this proffer, said that there had been no legislation by Congress authorizing its acceptance, but requested the president and directors each to retain one share, (for eligibility,) and to manage it under the charter until authority might by law be conferred upon the department to receive it.

The board of directors then reduced the tolls fifty per cent., believing they would then give sufficient income for repairs and improve-

ments, and since that time its income has been so expended.

In April, 1855, the Secretary of the Treasury, under the direction of the President of the United States, instructed the board of directors to make certain repairs and improvements, which are now nearly, possibly, quite, completed. A copy of these instructions, with a copy of the President's direction on the back thereof, (under which the instructions were written and forwarded,) is herewith submitted, marked C.

In December, 1857, the legislature again amended the charter of the company, authorizing the company to construct, with its revenue and on its credit, a branch canal, debouching into a safer portion of the river than the main canal, sufficiently large to pass the largest class of steam vessels now navigating the Ohio.

A copy of this act, with a copy of the certificate of the secretary of

the State of Kentucky, is herewith submitted, marked D.

The route for this branch canal had been previously surveyed, (in 1854-'5,) and plans for its construction prepared by Brevet Lieutenant Colonel S. H. Long, of the Topographical Engineers, who was detailed for the service by the War Department. Copies of this survey and of the plans are herewith submitted, marked E, F, and G.

The company have also acquired title to more or less land under the authority of the State act of 1857, (marked D.) as appears by its president's report to this department of November 25, 1857, a copy of which is printed with my annual Report of the Finances, at page 149.

The foregoing report, with the statements embodied in the various reports upon the finances, and the president of the company's report of November 25, 1857, cover all the facts in reference to the company that I am aware of. For what the company propose or desire to do, I respectfully refer you to its president's report, already alluded to, at page 150 of my report upon the finances for 1856—'7. They ask no appropriation for the work, as they believe the accruing revenue, with loans on the company's credit, (to be ultimately paid from revenue,) will be all that is required for the service.

My letter to the president of the company of the 26th instant (herewith communicated, marked H) will inform Congress of the course that the department proposes to adopt until there shall be

further legislation on the subject.

If it is the policy of Congress to keep this work under the charge and control of the general government, provision should be made by law for its management, and the purposes to which the receipts from it are to be appropriated should be clearly and distinctly declared.

Very respectfully,

HOWELL COBB, Secretary of the Treasury.

Hon. James L. Orr, Speaker of the House of Representatives.

Α.

Abstract of the act of the legislature of Kentucky of December 12, 1831.

Under the act of the legislature of Kentucky of December 12, 1831, the company made the following allowances to stockholders, to wit:

1st. Interest amounting in the aggregate to 20 per cent. (not per annum, but per three and one-third years) for stock which had been standing for three and one-third years, and 10 per cent. for that of one and two-third years standing, making the whole amount of interest \$106,650 on all the stock that had been paid in, the United States receiving on its 3,335 shares the sum of \$33,350.

2d. An allowance of \$60,000 in the form of dividends, which it was thought had justly accrued in favor of the stockholders, and as a debt against the canal. Of this \$60,000, the United States had credit to the amount of \$23,350. The United States, therefore, received, for its portion of the interest and dividends, \$56,700, or the equivalent

thereof in 567 additional shares of stock.

В.

Abstract of the amended charter of the Louisville and Portland Canal Company, as amended by an act of the legislature of Kentucky, February 21, 1842.

SECTION 1 provides, "That whenever the stockholders in said company shall direct, the board of president and directors of said company shall have the privilege of selling the shares of stock owned by individuals in said canal to the United States, or the State of Kentucky, or the City of Louisville, for the purpose of eventually making the said canal free of tolls; or, further to effect this object, the board of president and directors, when so authorized as aforesaid, shall hereby have the privilege of appropriating the net income arising from said canal to the purchase of said stock, instead of making dividends therewith."

SEC. 2 provides, "That whenever said stockholders shall authorize said board of the president and directors to appropriate the annual net income of said company to the purchase of shares held by individuals in the same, it shall be the duty of said board to advise each stockholder of the amount appropriated to the purchase of shares, and propose to purchase the number of shares that the sum on hand will warrant, at the least bid, and thirty days' notice shall be given of such offers of stock to be made."

SEC. 3 provides, "That the maximum price at which the said board shall purchase said shares for the first year shall not exceed the sum of one hundred and fifty dollars per share; and when the offers of said shares are made, it shall be the duty of said board to accept the lowest offer for the number of shares which the net income of the preceding year will allow them to purchase, and no dividends will be paid on the remaining shares of said company after the ratification of this amendment. The maximum price paid for the shares purchased the first year, and six per centum per annum annually added thereto, shall be the highest price which shall be paid for the shares in each subsequent year."

SEC. 4 provides, "That the shares so purchased by said board shall be held in trust by it for the purposes herein declared, and shall be voted on by them at all subsequent meetings and elections, until, by the operation of the provisions of this act, all the shares standing in the name of others than the government of the United States shall have been purchased up; and when the said shares shall be all purchased, the same shall be transferred to the government of the United States, on condition of said government levying tolls for the use of said canal, only sufficient to keep the same in repair and pay all necessary superintendence, custody and expenses, and make all necessary improvements, so as fully to answer the purposes of its establishment, and further to protect and guard the interests of commerce. The superintendent or agent in charge of said canal shall ever hereafter, on the first Monday in January, annually, report to the general assembly of Kentucky the amount of tolls levied and received, and of

the charges and expenses incurred on the same. The general assembly reserving the right of directing the amount annually to be collected, if found too much for the purposes contemplated by this amended act."

SEC. 5 provides, "That it shall be the duty of the said board of president and directors to report to the general assembly on the first Monday in January, in each year, the condition of the canal, and state the number of shares purchased, and the amount paid for the same: provided, that nothing contained in this act shall give said company the right to increase the toll allowed by the original charter."

The 4th section of the above amendment to the charter of the Louisville and Portland Canal Company being objectionable, the following act was passed, to obviate any difficulty between the State of Kentucky and the general government on the score of jurisdiction:

"Be it enacted by the General Assembly of the Commonwealth of Kentucky, That in the event of the United States becoming the sole owner of the Louisville and Portland canal, the jurisdiction of this commonwealth over said canal shall be yielded up to the government of the United States; and no annual report, as mentioned in the charter of the Louisville and Portland Canal Company, shall be required to be made by the United States, or their agents and superintendents, of maid canal to the general assembly of this commonwealth."

Approved February 22, 1844.

C.

Treasury Department, April 20, 1855.

Sir: Your favor of the 12th instant has been received and considered. I concur with you that if Mr. Hubin's plan of repairing the Louisville and Portland canal be adopted, that only a part of it should now be carried out, and that part you indicate, because that part would not commit the company to the enlargement of the locks, but leave that question open to a more mature consideration, and whatever may be the ultimate mode of enlargement that may be adopted, the other parts of Mr. Hubin's plan will be proper to a convenient navigation of the canal, and you will therefore be authorized to contract 1st, for the guard gate; 2d, the removal of the ledges on the margin of the canal; 3d, the basins; 4th, the floating boom at the head of the In making these contracts, you will have the work done as speedily as possible; but as payment can only be made out of the surplus tolls, that fact must be declared on your contracts, so that no liability shall accrue against the company, the payment of which is not to await the receipts of the canal.

You will report whether in your judgment it will be necessary to have an assistant engineer for this work, and if so, whether Colonel

Long would attend to it, provided I could get him assigned to the work by the Secretary of War.

This is written upon the predication that contract is preferable to doing it by day's work and a superintendent, but that may not be the case.

I am, very respectfully,

JAMES GUTHRIE, Secretary of the Treasury.

JAMES MARSHALL, Esq., President Louisville and Portland Canal Co., Louisville.

D.

AN ACT to amend the charter of the Louisville and Portland Canal Company.

Be it enacted by the general assembly of the commonwealth of Kentucky, That the charter of the Louisville and Portland Canal Company be so amended as to authorize said company to construct with the revenues, and on the credit of the corporation, a branch canal sufficient to pass the largest class of steam vessels navigating the Ohio river, and said company are hereby vested with all the power and authority to acquire and hold the necessary lands for said branch, and to construct the same, vested by the charter and amended for the construction of the original canal, and all the provisions of the original charter and amendments shall be, and are hereby made, as applicable to the branch as to the original canal.

DANIEL P. WHITE, Speaker of the House of Representatives. JOHN Q. A. KING,

Speaker of the Senate.

Approved 19th December, 1857.

C. S. MOREHEAD.

By the governor:

MASON BROWN. Secretary of State.

COMMONWEALTH OF KENTUCKY, Office of the Secretary of State.

I, Mason Brown, secretary of State for the commonwealth aforesaid, and keeper of the archives thereof, do hereby certify that the foregoing is a true copy of the enrolled bill now of record in my office.

In testimony whereof I have hereunto set my hand and affixed the

seal of my office this 29th day of January, 1858.

By S. P. ATTICUS BIBB, Assistant Secretary. H.

TREASURY DEPARTMENT,

May 26, 1858.

SIR: Referring to the report made by you on the 25th November last, upon the condition and prospects of the Louisville and Portland Canal Company, I have to say that you will take no further steps for the construction of a branch canal, and to make no expenditures of the company's revenue in reference thereto. You will incur no expenses beyond keeping the canal in repair, as already instructed by this department. You will also refrain from using the credit of the company in any way for a like purpose, but leave the whole matter in abeyance until you are further advised by this department, as all the facts in the case will be reported to Congress for its action.

Very respectfully, yours,

HOWELL COBB, Secretary of the Treasury.

James Marshall, Esq.,
I'resident Louisville and Portland Canal Company, Louisville, Ky.

Resolutions of the General Assembly of Maryland, relative to the construction of a new canal around the Falls of the Ohio river.

Maryland, sct.

At a session of the general assembly of Maryland, begun and held at the city of Annapolis on the first Wednesday of January, being the sixth day of the said month, in the year of our Lord one thousand eight hundred and fifty-eight, and ended the tenth day of March in the year aforesaid.

His excellency Thomas H. Hicks, esquire, governor.

Among others the following resolution was passed, to wit: No. 7. Joint resolutions relative to the construction of a new canal at the falls of the Ohio river:

Whereas the citizens of Maryland being deeply interested in the cheap, safe, and speedy transportation of their commerce on the Ohio river, they claim the right of expressing to Congress their opinion on the subject of the proposed mode of improvement of the navigation at the Falls of said river; therefore, to give force to these opinions collectively which the citizens individually entertain, the members of the general assembly representing the several counties of the State adopt the following resolutions:

Resolved, That the Ohio river, being acknowledged as the great national highway under the care and supervision of the general government, a free and ample mode of conveyance should be provided, and at all times preserved for passage of boats and other vessels conveying the commerce of the river around the natural

obstruction known as the Rapids or Falls of the Ohio.

Resolved, That rapid increase of commerce has rendered two canals necessary for the accommodation of vessels ascending and descending the Ohio river, and this necessity will be greatly increased by the

completion of the system of railroads now in progress of connexion with the river above and below the Falls.

Resolved, That the repair and enlargement of the present canal would at all times, excepting during the period of very high water, present an obstruction to the passage of vessels, and cause the portage of freight a distance of two miles, subject to the penalties and regulations incidental to a corporation, thus suspending navigation through the canal for years, creating daily losses highly injurious to the commercial and manufacturing interests, and fatal to the interests of those concerned in the navigation of the river.

Resolved, That surveys and estimates made heretofore by competent engineers, establishing the fact that the construction of a new canal around the Falls of the Ohio, adapted to the present and future wants of commerce, would cost very little more than the repair and enlargement of the present work, which, if repaired, would present but one passage around the Falls, and that, from the unfavorable location, never could be as useful for passing the largest class of boats as a new work, constructed with the advantages of the present experience in navigation.

Resolved, That the senators and members of Congress from this State be, and they are hereby, carnestly requested to use their best exertions for the passage of a law authorizing and aiding the construction of a new canal on the Indiana side of the river, and to prevent the interruption of the commerce of the river through the Louisville and Portland canal until some other mode is provided for the passage of boats around the Falls.

Resolved, That the governor be, and he is hereby, requested to furnish a copy of these resolutions to each of our senators and representatives in Congress.

By the House of Delegates, 1858. Read and assented to. By order.

J. W. CLAYTON, Clerk.

By the Senate, 1858. Read and assented to. By order.

C. HARWOOD, Secretary.
THOS. H. HICKS.

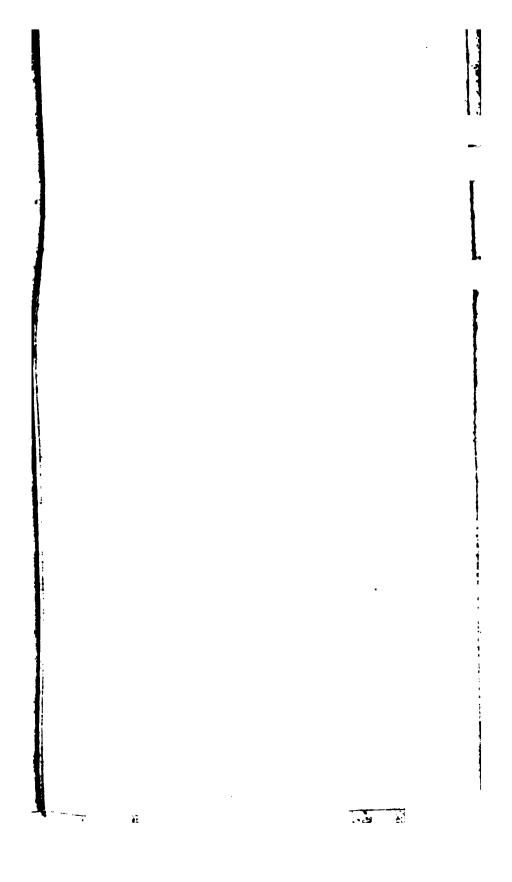

[L. S.]

Maryland, sct.

I, William A. Spencer, clerk of the court of appeals of the State of Maryland, do hereby certify that the foregoing is a full and true copy of the resolutions of the general assembly of Maryland, of which it purports to be a copy, as taken from the original engrossed resolutions deposited in and belonging to the office of the court of appeals aforesaid.

In testimony whereof I have hereunto set my hand as clerk, and affixed the seal of the said court of appeals, this twenty-second day of March, A. D. 1858.

WM. A. SPENCER, Clerk Court of Appeals of Maryland.

:

I TUROR TO

ATTACKS UPON UNITED STATES VESSELS IN THE GULF OF MEXICO.

MESSAGE

FROM THE

PRESIDENT OF THE UNITED STATES,

IN RESPONSE TO

A resolution of the House, asking information relative to attacks upon United States vessels in the Gulf of Mexico.

MAY 31, 1858.—Referred to the Committee on Foreign Affairs.

To the House of Representatives:

In answer to the resolution of the House of Representatives of the 17th instant, requesting information relative to attacks upon United States vessels in the Gull of Mexico and on the coast of Cuba, I transmit a report from the Secretary of State, with the papers by which it was accompanied.

JAMES BUCHANAN.

Washington, May 31, 1858.

DEPARTMENT OF STATE, Washington, May 31, 1858.

The Secretary of State, to whom was referred the resolution of the House of Representatives of the 17th instant, requesting the President "to communicate to the House, if not incompatible with the public interest, any information in his possession in relation to firing into, boarding, and searching vessels belonging to the United States, in the Gulf of Mexico and on the coast of Cuba, by British ships-of-war," has the honor to lay before the President the papers specified in the subjoined list, which contain all the information in this department called for by the resolution.

Respectfully submitted.

LEWIS CASS.

The PRESIDENT.

DEPARTMENT OF STATE, Washington, April 3, 1858.

Sir: An article has just been republished here from the Savanne Republican, giving an account of an outrage committed upon an Ame can vessel, the "N. B. Borden," "M. Brightman master," off t coast of Cuba, by the British armed steam sloop-of-war, the "Stra You have no doubt seen the article, and I will thank you to ascertain from Captain Brightman the precise facts of the case, in order to enable the department to determine upon the proper course to be taken.

I am, &c.,

LEWIS CASS.

John Boston, Esq., Savannah, Georgia.

Mr. Boston to Mr. Cass.

Custom-House, Collector's Office, Savannah, April 22, 1858.

SIR: In pursuance of my promise of the 7th instant, I herewith enclose a statement of Captain James M. Brightman, of the schooner "N. B. Borden," in reference to the alleged outrage committed on said vessel by the British armed steam sloop-of-war, "Styx."

I have the honor to remain, very respectfully, your obedient servant, JOHN BOSTON,

Collector.

Hon. LEWIS CASS, Secretary of State, Washington.

> SAVANNAH, GEORGIA, April 22, 1858.

Schooner N. B. Borden, of Fall river, Massachusetts, James M. Brightman, master, sailed from the port of Matanzas, Cuba, on Sunday, March 21, 1858, at 10 o'clock a. m., bound for Savannah, with a cargo of molasses and fruit, consigned to Messrs. Padelford, Fay & When six hours out of the port of Matanzas, being about four o'clock p. m., the Island of Cuba being still in sight, and while Iwas on the starboard tack, saw a sail running down, which proved to be the British sloop-of-war "Styx," she being three miles on our larboard quarter. She fired a blank cartridge, and, I not knowing her business, ordered the American ensign to be hoisted, as customary, and kept my course. She then fired a shot which fell at our stern. I then thought the matter more serious, tacked the schooner, and stood for the sloop-of-war until I was within half a mile of her, when I lay by until I was boarded by the first lieutenant. (or I suppose it was that officer from his appearance.) As he came alongside I hailed him, and asked what he wanted with a molasses droger. He replied that he would let me know, and came on board. He demanded of me where I was from, where bound, and what was my cargo, and saying they were in search of slavers and took me to be one. I told him that slavers seldom took molasses to the coast of Africa, and moreover, they never went loaded so deep, the schooner N. B. Borden at that time being nearly to her decks in water. The lieutenant then said I had a fine vessel, and he would like to take her

to Jamaica. I told him he had no occasion to do so, as my vessel was built in Massachusetts, and calculated for the West India trade, and never would be ashamed to wear the stars and stripes at her masthead, and that her commander had always sailed under that flag, and had been master of a vessel for the last eighteen years; had always done a lawful business, and was ready to nail the American ensign to the masthead, as our forefathers did, against any nation, and that I did not deserve to be insulted so by the British nation. The lieutenant then got into his boat and went on board his vessel. I filled away and proceeded on my course as usual. The schooner N. B. Borden was built at Somerset, Massachusetts, is one hundred and twenty-three tons, and owned by Messrs. N. B. Borden and other merchants at Fall River, and her owners and commander deserve the protection of the American flag.

Yours, respectfully,

JAMES M. BRIGHTMAN, Master of Schooner N. B. Borden.

Mr. Blythe to Mr. Cass.

No. 6.] Consulate General of the United States, Havana, April 29, 1858.

Sir: I have received definite information that the schooner Cortes, of New York, James M. Durand, master, was captured by the British screw gun-boat Forward, on or about the 18th instant, about half-way between Havana and Matanzas, at a distance of about 35 miles from the Cuban coast. Before proceeding to give such facts in relation to her seizure as have come to my knowledge, I will premise by stating that, for some time past, a number of British gun-boats and other. larger vessels of war of that nation have been very active in cruising for slavers both on the north and south side of this island.

Many complaints have been made to this office by American masters, that these British men-of-war have exercised about the vessels under their command, in this harbor, a system of espionage exceedingly annoying to them in their business, and, from the manner in which it has been done, insulting to their national feeling. Whilst two of these British war ships were in this port, (I learn from American masters then taking on freight,) they were in the daily habit of sending their boats around the harbor, and stationing them near such vessels as were lading; that they would carefully note every article taken on board, and, in some instances, were so pertinacious in their surveillance as to put themselves in the way of the lighters bringing cargo.

The American brig A. A. Chapman, engaged as a regular packet between this port and New Orleans, was thus annoyed on her last visit here. Her commander complained at this office on the eve of his departure, and expressed apprehension that he would be followed

out to sea and boarded. A rumor was in circulation that she was boarded after leaving the port. I had no means of ascertaining the truth of the rumor; but presume, if it was true, the fact was reported at the custom-house in New Orleans.

A few days after the Chapman lett, the Brownsville, Captain Simpson, engaged in the same trade, presented a similar complaint, alleging that a British man-of-war's boat lay constantly by him watching every thing that went on board, and interfering with his launches.

I present these facts, as they are the subject of much conversation in the shipping, and have caused great indignation among American

citizens here.

The "Cortes" arrived here the 20th of March, from New York, under the command of her sole owner, Adam A. Smalley; on the 27th he appointed his mate, James M. Durand, master of the schooner, and executed at this office, in favor of said Durand, a power of attorney, authorizing him to sell the schooner, if he could, or charter her. She cleared at this office on the 13th instant for Annobon, with an assorted cargo, and sailed on the next morning. The parties interested in the cargo have since furnished me the charter party and the bill of lading, which I herewith transmit to the department.

Learning that several of the crew and passengers had arrived here, and desired to make their complaint at this office, I caused them to come before me that I might receive their statements of the facts under oath. I transmit to the department the testimony of the mate, three of the seamen, and three of the passengers. I learn that the passengers, who say a large amount of money was taken from them, purpose presenting a demand for its restitution, and for damages, through this office. When they present themselves for that purpose I will, of course, receive their protest and forward it to the department.

Captain Durand's conduct, as disclosed by the testimony, seems to have been very strange. It seems to be the fixed opinion of the mate that he sold the vessel for a consideration. What were the contents of the paper which the mate and men say was signed by the captain I have not been able to ascertain. If the vessel was really bound on a slave voyage, then the captain should certainly be punished for prostituting the flag of our country to such a purpose; if she was not, and her commander so represented her for a consideration, then he is

equally guilty, and should certainly be punished.

Since the occurrence, I have conversed with a respectable and intelligent American merchant of Matanzas, Mr. Roger Horner, who met the commander of the gun-boat "Forward" in that city, and assured me that that officer had stated to him that the Cortes had neither papers nor flag; this statement of course is untrue. The mate and men all state that the flag was exhibited, and the papers produced, examined, and copies of them taken. If these men have perjured themselves, and no papers or flag were exhibited, then it would show collusion between the commander of the Cortes and the person seizing her, as the Cortes certainly took from this office regular papers. I learn from the same gentleman, Mr. Horner, that the master of the Cortes has sailed from Matanzas to the city of New York. In any

view of the conduct of this man, the propriety of an investigation is manifest.

Since I commenced this communication, Captain Samuel Tebeham, master of the bark "Glenburn," of Richmond, has arrived in port, and complains that on the 15th instant, whilst on his passage from Antwerp for this port, he was stopped by her Britannic Majesty's steamer "Basilisk," and boarded by one of her officers, accompanied by a detachment of men; the officer asked him the particulars relating to his ship, and stated to him that he had orders from the admiral at Jamaica, to board every vessel found in the neighborhood of the coast of Cuba. I will transmit by next mail his sworn statement of the facts.

I content myself, and deem that therein I have done my whole duty, in presenting a simple statement of such facts as have come to my office. I make no suggestions concerning the right of foreign men-of-war to visit or detain at sea vessels bearing the flag of the United States.

Under any circumstances I would doubt the propriety of discussing such principles in a communication to the department; under existing circumstances I conceive that it would not only be supererogatory, but presumptive on my part, as it is a subject with which the chief of the department is believed to be more conversant than any living statesman.

I have the honor to be, sir, very respectfully, your obedient servant,
A. K. BLYTHE,

Consul General.

Hon. John Appleton,
Assistant Secretary of State of the U.S., Washington

CONSULATE GENERAL OF THE U. STATES OF AMERICA, ISLAND OF CUBA.

On the day of the date hereof, before me, Andrew K. Blythe, consul general of the United States of America for the Island of Cuba, residing at Havana, personally appeared Don Antonio Flores, Antonio Peres. and Miguel Soler, all Spanish subjects, who stated that they were passengers on board the American schooner "Cortes," from the port of Havana, and having been compelled to return here, they wished to give their depositions under oath, and requested me to receive their depositions; the said appearers being, therefore, sworn according to law, declared and deposed as follows: Don Antonio Flores saith, that he took passage, with a regular passport from the superior government of Cuba, in the American schooner "Cortes," from Havana to the Spanish island of Annobon, in the African sea; that he sailed in said vessel from Havana, and when off Jamco, a British screw gun-bost, called the "Forward," overhauled the vessel; that he was conducted on board the British vessel, and three days after the British vessel anchored off Cayo Piedra, near Cardenas, where he was deprived of his best clothes, his money, two thousand dollars, his passport, and other effects, by the people of the British gun-boat, and then made to

land upon Cayo Piedra; that this was done in the presence of the pilots of the port of Cardenas, who afterwards conducted him to Cardenas; he was put on shore on last Sunday, the 18th instant.

ANTONIO FLORES.

Don Antonio Perez saith: That he took passage on the American schooner "Cortes," with a passport signed by the governor general of Cuba, countersigned by the political secretary, bound to Annobon; that the said schooner was overhauled off Jamco by the English gunboat "Forward," on the 16th instant; that himself and other passengers were conducted on board the gun-boat, and three days after landed upon Key Piedra, about 4 leagues from Cardenas; that there himself and others were robbed of almost everything they possessed by the people of the gun-boat; that he was robbed of the best portion of his clothes, his money, six thousand dollars, his passport, and other property, and the only thing that they returned to the passengers was their watches; that all this took place in the presence of many persons; and himself and the other passengers and the mate of the schooner were put naked and searched in the presence of a large number of persons; that he, as well as the others, were treated with the greatest indignity, and the commander of the gun-boat was dead drunk at the time; the British officers behaved more like Vandals than civilized men; that, finding himself landed upon the key, he accepted the kindly offer of the Cardenas pilots, who took him and the other passengers to Cardenas, from whence they came to Havana.

ANTONIO + PEREZ.

Don Miguel Soler saith: Myself and other passengers left this port of Havana with regular passports for Annobon; when off Jamco, the 16th instant, the American schooner "Cortes," upon which we were, was visited, searched, and captured by the British gun-boat "Forward;" myself and the others were made to go on board the gun-boat, where we were obliged to take off our garments and shoes, and searched, and otherwise treated with very great indignity; on the 19th, off Cayo Piedra, everything of value that we possessed, excepting the worst portion of our clothes and our watches, were taken from us. I was robbed, amongst other things, of 422 Spanish doubloons by the people of the "Forward," and then set on shore. The captain of the "Forward" was so drunk at the time that he could scarcely walk the deck of his vessel. The pilots of the port of Cardenas, who witnessed the whole transaction above recited, gave him a passage to Cardenas, from whence he came to Havana.

MIGUEL SOLER.

In testimony whereof, I hereunto set my hand and affix my official [L. s.] seal, at Havana, this 24th day of April, 1858.
A. K. BLYTHE,

Consul General.

By THOS. SAVAGE,

Deputy Consul General and Interpreter.

Bill of lading.

Shipped, in good order and well conditioned, by Francisco Garcia, on board the American schooner called the Cortes, whereof is master for this present voyage Durand, now lying in the port of Havana, and bound for Annobon. 'To say—

Seventy (70) bags of rice. Twenty (20) barrels of beans. Forty (40) barrels of bread. Ten (10) kegs of lard.

Twenty (20) jars of olive oil. Eight (8) boxes of codfish.

One (1) iron kitchen.

Three thousand (3,000) feet of pitch pine.

Five (5) barrels of wine.

Forty (40) pipes of white rum in \(\frac{1}{4}\) and \(\frac{1}{4}\).

Sixty (60) empty hogsheads.

Being marked and numbered as in the margin, and are to be delivered in the like good order and condition, at the aforesaid port of Annobon, (the dangers of the seas only excepted,) unto Mr. José de Silva, or to his assigns, he or they paying freight for the said goods two thousand dollars, with 5 per cent. primage and average accustomed. In witness whereof, the master or purser of the said vessel hath affirmed to three bills of lading, all of this tenor and date, one of which being accomplished the others to stand void.

JAMES M. DURAND.

Dated HAVANA, the 13th day of April, 1858.

Charter party.

It is this day mutually understood and agreed upon between James M. Durand, in behalf of the owners of the American schooner Cortes, of 176 tons, whereof James M. Durand is master, now lying in the port of Havana, on the first part, and Francisco Garcia, merchant, on the second part, as follows: That the said vessel being light, staunch, strong, and in every respect fitted for the intended voyage, Captain Durand shall receive on board said schooner a full cargo, to consist of such goods or merchandise as the charterer may see proper to send in her, (legal goods or merchandise is understood,) which shall not exceed what she can reasonably stow and carry over and above her tackle, apparel, provisions, and room sufficient for the accommodation of the officers and crew, and which cargo the said parties of the second part hereby agree to furnish at Havana.

The said vessel being so laden, Captain Durand shall, with all possible despatch, make sail for the port of Annobon, of orders, and on his arrival at the port of discharge make a true and faithful delivery of the cargo, according to custom and the bills of lading, to

the charterer's agents.

In consideration whereof freight shall be paid on right delivery of

the cargo, at the rate of four thousand dollars cash, at Havana, before the departure of the vessel, and three thousand dollars on her return voyage to a port in the Island of Cuba.

The lay days shall be as follows: fifteen running days, after the expiration of which time demurrage shall be paid at the rate of twenty-five dollars for each and every day, as it may become due.

The cargo shall be taken in and discharged according to custom of the respective ports of loading and discharging at the charterer's ex-

The vessel shall be consigned at Annobon to the order of the said

merchants, paying no commissions.

It is further understood and agreed upon, that, on arrival at Annobon, and after delivery of cargo, Captain Durand will receive on board such cargo of goods as the charterer's agents may give him; and should they see proper to load the vessel with copper ore, oils, hides, &c., and send her to a port in the United States, they may do so by paying the same sum stipulated for a port in Cuba. And for the due performance of the several articles of this agreement, the respective parties do hereby bind themselves, their heirs, executors, administrators, and assigns, in the penal sum of four thousand dollars, restraint of rulers, the acts of God, pirates, enemies, and all and every of the dangers of the seas, rivers, and navigation, of whatever nature and kind, always excepted.

In testimony whereof, the respective [parties] have hereunto set their hands, in Havana, at this twenty-ninth day of March, in the year one

thousand eight hundred and fifty-eight.

JAMES M. DURAND, FRANCISCO GARCIA.

Received, Havana, April 13, 1858, from Don Francisco Garcia, four thousand dollars, in payment for my outward voyage, as per charter party.

\$4,000.

JAMES M. DURAND.

CONSULATE GENERAL OF THE UNITED STATES OF AMERICA, ISLAND OF CUBA.

Information having reached this office that the American schooner Cortes, of New York, James Durand master, which sailed from this port on the 14th instant, bound to Annobon, was captured on the 18th instant by the screw gun-boat "Forward," (British,) off the land of Cuba; and learning that her first officer and a portion of her crew had reached Havana, I have caused such of them as could be found to come before me, who, being sworn on the Holy Evangelists of Almighty God, to speak the truth, the whole truth, and nothing but the truth, depose and say as follows:

William Archbold, being first examined, saith:

I am a citizen of the United States, having been naturalized in Philadelphia; I was chief mate of the schooner Cortes, of New York, on the voyage she undertook from Havana, when she sailed the 14th

of the present month; I was regularly shipped at Havana, and my understanding on shipping was, that the vessel was going on a lawful trading voyage on the coast of Africa. We left Havana, in tow of a steamboat, on the morning of the 14th; the crew consisted of the captain, myself, the cook, and four men before the mast; there were eight passengers on board; on the day following, at half-past nine a. m., a British man-of-war that had been in sight of us that morning fired a gun, when we immediately hove to-she had her ensign up, and we set our own colors: we laid to until the man-of-war. which proved to be the British screw gun-boat Forward, came to us: we were about halfway from Havana to Matanzas, and distant some thirty-five miles from the Cuban coast, the top of the Pan of Matanzas was visible; the captain of the man-of-war boarded us and demanded of Captain Durand to see his papers. Captain Durand presented his papers; our colors were up at the time; he examined the papers and found some fault with them; I do not know what he objected to, but it was mostly in relation to the passengers. The British officer took copies of all the schooner's papers. captain, at the time, did not know that the British officer was the commander of the gun-boat, and said to him, "You now have copies of my papers, take them to your captain, and he will find them correct," or words to this effect. The captain of the man-of-war returned then to his vessel, and remained there for a short time. When he returned, he informed Captain Durand that the schooner was a prize, as she was bound on the slave trade. He stated that he had received information before we left the harbor of Havana, and that he knew us as soon as he saw us. Captain Durand told me to haul the I then asked, "How do we stand colors down. I obeyed his orders. now, when our colors are down?" The captain of the man-of-war told me he would take us as pirates. I then requested Captain Durand to allow me to set our colors again, for I had shipped upon a lawful voyage, and wished to be taken as such; and I did not consider any foreign man-of-war in the universe had any claim to us. Captain Durand's permission, I again set the colors. Durand then called me down in the cabin to ask my advice. I advised him not to haul down his colors, as his papers were in order, and the object of the British officer was to frighten him to do things that were not right. I said, also, that if the British cruiser took charge of our vessel, let the British officers haul down the colors themselves. Captain Durand then made some remarks about the consequences of being taken with American colors—such as being taken to Baton Rouge. He said his papers were all false, and that there was not a correct account of the passengers. I told him to take no notice; for, if a British cruiser can take an American vessel for not having a correct account of the passengers, then almost every passenger carrier could be taken. advised me to let things go on; that we would be taken to Jamaica, and, as we had received our money, we need not care for the Span-I refused to accede to his request, and demanded of the captain of the man-of-war to take me to Havana. He answered, "No; for if I take you to Havana, I can do nothing with you there." He then took Captain Durand down into the schooner's cabin, and remained there

I was not present during their interview in the cabin. for some time. Captain Durand came upon deck and ordered me to haul down the colors; which I did. Captain Durand ordered me to lay there until he came back, and then, with the British captain, he proceeded on board the man-of-war, in her boat. Captain Durand remained absent While he was away, I told one of the crew to some twenty minutes tell the passengers to look out for themselves, for I thought the captain was going to sell the vessel. When Captain Durand returned on board with the British captain, I was aft by the wheel. He told me, "I am no longer in charge. I have no longer any control over you. This man is your master; you must obey him," pointing to a master, who, with six man-of-war sailors, had been left on board.

I said that I had been lawfully shipped at the American consulate; that the ship, so far as I was aware, had been lawfully, cleared and was bound on a lawful voyage, and that I would obey no man from a British cruiser or any other foreign nation: that I shipped under the American flag, and would go under no other. The British master then said, if you will not work I will send you on board the man-of-war. I told him if he took me out of the schooner it would be against my will. Captain Durand remarked, "if you go with those damned Spaniards, they will put a knife in you." The passengers had previously been taken out and conveyed to the man-of-war, and, as I refused to work, I was also sent on board the gun-boat, where I was put in irons. When I was in irons, the captain of the man-of-war offered me the sum of five hundred dollars, provided I would sign a paper certifying that I was going upon a slaving voyage to the coast of Africa, and he would release me from the irons, and land me wherever I liked; and said that if I would not do it, as I was an Englishman, as Captain Durand had told him, he would keep me on board the gun-boat, and was liable to be hung; for "I will not let you go on shore, for if you go to Havana you will make plenty of trouble for me." I had some other words with him; he threatened "to heave four dozen into me," if I would not sign the paper. I refused to sign it, and demanded that he should land me where I could get to my consul. He made me the same offer a second time. He even put one of his engineers to get me drunk, and furnished liquor of all kinds; but I was aware of his object, and took care of myself. Captain Durand came on board the man-of-war he was much intoxicated, and told the English captain to secure me, saying I was a great ruffian, and would knife every man on board. The English officer and myself again had a quarrel, because he accused me of having money in my pocket which I had received as a bonus for engaging upon an unlawful voyage. I told him he was a liar; that I had received one month's advance, and that I had been paid off in Havana from the vessel in which I had come with \$280. The British officers took away from me seven Spanish doubloons, and almost everything I had. was robbed by the British sailors; so were the passengers. The British captain was so drunk he could hardly stand. In the meantime we had got to Cayo Piedra, off Cardenas, where I was sent on board a Spanish steamboat bound to Havana; I left Captain Durand on board the gun-boat; the passengers had been put on board a pilotboat; the British captain first gave me one doubloon, and upon my remonstrating with him, he gave me another; he was drunk, very drunk. One pair of shoes was returned to me also, almost everything else was taken from me. When the British captain first came on board the Cortes he was not drunk, but he soon after became intoxicated, and continued so until I left him. Captain Durand was kept in the same condition; the rest of the officers and crew of the "Forward." with one or two exceptions, were also drunk, and behaved more like pirates and thieves, than men belonging to a war vessel. I arrived in Havana the 23d, two of our crew came with me in the steamboat; another was sent with the passengers on board the pilot-boat; the steward and one man remained on board the Cortes. I do not know. what amount of money was taken from the passengers, but it was a large sum; the passengers and myself were made to strip almost naked on the man-of-war, and our persons were carefully searched; four of the passengers were put in irons, the rest were not, and we got very little food, and that not of the best kind.

WM. ARCHBOLD.

William Green, being next examined, saith: I shipped in New York as a seaman on board the schooner "Cortes" of that port; from thence we came to Havana, where we remained several days, and again sailed from Havana on the 14th inst. I am a Swede by birth; I was aware, when leaving this port, that we were bound to Africa, and understood and believed we were going on a lawful trading The second day out an English man of-war, the gun boat "Forward," fired a gun, hoisted her ensign, and made us heave to; we hoisted our colors and hove to, when a boat from the man-of-war, with her commanding officer, boarded us; after awhile the captain of the "Cortes" had the flag hauled down, gave up his vessel, and left us in charge of a British officer; the mate said he would not be taken as a pirate, and hoisted again the American colors: subsequently our captain came to us and asked us what we would prefer—to go in the vessel to Port Royal, or oe transferred to a steamboat and landed in Havana or Cardenas, or taken to Key West, at which last place, if we were taken there, we should be put in the chain-gang for three years; he said if we would go to Jamaica we could stay by the vessel; so we stayed by her until some four days after she and the gun-bost came to an anchor near the light-house, off Cayo Piedra, outside the bay of Cardenas; myself and the rest of the crew were taken on board the man-of-war; the next day the steward and another man were sent back to the schooner; the passengers and one of the crew that shipped at Havana had been sent ashore before; the mate, Mr. Archbold. myself, and the seaman Manuel Florente remained on the man-of-war about three days; the captain of the man-of-war gave one doubloon to each of the Spaniards, also to each of the seamen, Florente and Antonio Francisco; to me he gave nothing, and sent us on board a steamboat that conveyed us to Havana. I forgot to state before, that shortly after our vessel had been captured by the man of-war, our captain went on board the latter vessel; he was sober when he left, and when he came back he was very drunk; the seaman Antonio Francisco and Mr. Archbold were kept in irons on the man-of-war several days; the captain of the man-of-war was drunk pretty much the whole time.

WILLIAM GREEN.

Antonio Francisco, being next examined, saith: I shipped in Havana, as a seaman before the mast, upon the schooner "Cortes," of New York, with the full understanding that the vessel was bound to Annobon, and thence on a general trading voyage upon the coast of Africa, and believed that the voyage we were to undertake was entirely of a lawful character. We sailed on the morning of the 14th April. The master was named Durand; the chief mate named Archbold; and there were, besides the steward and myself, three men before the mast. The next morning a screw gun-boat (British) came in sight. At about eight o'clock she hoisted her ensign, and fired a gun to us to heave to. We hoisted our colors and hove to. Presently a boat from the man-of war, with an officer, came alongside our vessel. The officer came on board and went into the cabin with our The passengers, of whom there were eight or nine, all came The two captains (for the British officer proved to be the commander of the man-of-war) remained in the cabin about one hour Afterwards came on deck, and immediately proceeded together, in the British boat, on board the gun-boat. In about an hour they came back. Our captain, who had left sober, was then perfectly intoxicated. Our captain then called the crew aft, and asked us whether we wanted to go to Key West or to Port Royal in the schooner. I answered that I wanted to be let alone to continue on the voyage we had undertaken. The British captain said: "What are you talking about? if you have too much to say, I'll have you put in irons." Before this the American colors had been hauled down by order of the American captain; but the mate, Mr. Archbold, had them put up again. They were a second time brought down by Captain Durand's orders. Captain Durand then said: "I have nothing more to do with you; you have to obey the British officer's orders." I replied that I had nothing to do with British officers. After this I was taken on board the man-of-war and put in irons. The mate had been taken to the man-of-war before me, and I found him there in The passengers were all on board the man-of-war; four of them were in the stocks, and the rest were loose. I was on board the gun-boat some three days, until we reached Cayo Piedra. There every one of us was made to strip, take off our shoes, and we were searched twice; almost every one was robbed of everything he possessed, or nearly so. I had two ounces, which were taken from me, of which one doubloon was returned me subsequently upon my remonstrating with them. The best part of my clothes were robbed from me. Cayo Piedra myself and the passengers were put on board a pilot-boat, which took us to Cardenas.

ANTONIO × FRANCISCO.

Manuel Florentino was last examined, and saith: I am one of the crew of the schooner "Cortes," of New York, and shipped at that The day after the schooner left Havana, on the 15th, she was captured by a British screw gun-boat. Several passengers, the mate, and the seaman Antonio, were taken on board the man-of-war. I was called aft by Captain Durand, and told to obey the order of the British officer that was placed in charge of our vessel after her flag had been taken down. I remained on board the schooner, with our captain, the cook, and two others of our crew. After four days we were all sent on board the man-of-war. We stayed on board of her two days, and were then sent to the steamer that came out of Cardens for Havana. The sailors of the man-of-war robbed us of almost everything we had in the way of clothing. I was searched. I exhibited two half doubloons, and told them that was all the money I The captain of the gun-boat gave orders to let me keep the We all paid our passages to Havana. Before we left Havana the captain told me that the vessel had been chartered for a voyage to the coast of Africa.

MANUEL FLORENTINO.

In testimony whereof, I hereunto set my hand and affix my official seal, at Havana, this 27th day of April, 1858.

[L. S.]

A. K. BLYTHE, United States Consul General.

Mr. Cass to Lord Napier.

Department of State, Washington, May 4, 1858.

My Lord: In my letter to your lordship, of the 10th ultimo, I referred to a statement, then appearing in the public journals, that a merchant vessel of the United States, the "N. B. Borden," had been fired at and boarded by the British vessel-of-war the "Styx," off the coast of Cuba; and I informed you that I had received no official information on the subject, and therefore could say nothing as to the truth of the report, but that I had taken measures to ascertain whether such an occurrence had happened.

I now transmit to your lordship, the copy of a letter from the collector of the customs at Savannah, enclosing the statement of the captain of the "N. B. Borden," by which it appears that an unjustifiable act of violence has been committed against a merchant vessel of the United States, to which the attention of her Majesty's government is requested, in the confident expectation that the act will be disavowed, and such measures be adopted as are called for by the circumstances, and as will tend to prevent the recurrence of similar proceedings hereafter.

I avail myself of this opportunity to renew to your lordship the assurance of my high consideration.

LEWIS CASS.

Lord Napier, &c., &c., &c.

Mr. Blythe to Mr. Cass.

No. 7.7 Consulate General of the United States, Havana, May 8, 1858.

SIR: In my despatch, No. 6, I stated I had received information that the passengers on the "Cortes" proposed presenting a demand for the restitution of the money and effects taken from them; as also damages for the wrongs and injuries they sustained, through the government of the United States. Since which time they have appeared at this office, have set forth, by protest, their wrongs and demands, and have memorialized the President in relation thereto. The memorial and a copy of the protest I herewith transmit to you.

I send to the department, also, a sworn statement of Captain Laurent, of the brig A. A. Chapman, from which you will perceive he was not boarded, as was rumored, having escaped the annoyance by

outsailing the British war steamer.

Since the date of my last communication, I learn, through an American, resident in Sagua, that all the American vessels in that port, numbering about fifteen, were visited and boarded, whilst lying in port, by British armed boats. He states an additional fact, of no less interest to us, to wit: that a Spanish ship, which he himself was loading with sugar for Europe, was subjected to the same examination by the same party; that on the latter, the visiting party went so far as to go down into the hold of the vessel, and bore into the boxes of sugar. This latter fact discloses the folly of an application to the Spanish authorities to protect our vessels while in their ports.

You will perceive I give the facts alleged to have occurred at Sagua, simply as the report of a private individual. This gentleman tells me that our consular agent was engaged when he left in taking the statements of the commanders of the American vessels, and you will doubt-

less receive the facts officially in a short time.

I have hitherto apprised the department of my conviction that our flag is sometimes prostituted for the purposes of the slave traffic. the evil is certainly not so great as to yield to its exigency the great principle of international law, for which we have so strenuously contended. If it is determined to remedy this evil, let it be done by a sacrifice of money rather than of honor. If our merchant marine is to be subjected to such surveillance, is it not better to send our own national vessels, at any cost to perform the act? It is known to the world that we have always contended for the freedom of the seas, and have insisted that the flag of an independent nation, borne by a vessel, shall give her immunity against stoppage or annoyance for purposes When such is the principle announced by us, of visitation or search. it can but be matter of mortification to all who feel an interest in our flag to see the principle violated constanty, almost in sight of our own shores.

In the case of the Cortes, I ask leave to say, in conclusion, that the same motive to action on the part of the agents of the British government, which has been illustrated in antecedent cases, is conspicuous and prominent. Whatever may be the motives of the British govern-

ment in giving its orders, the desire of gain is certainly most manifested in the execution of those orders.

I have the honor to be, sir, very respectfully, your obedient servant.

A. K. BLYTHE.

Consul General.

Hon. John Appleton,
Assistant Secretary of State of the U.S., Washington.

CONSULATE GENERAL OF THE U. STATES OF AMERICA, ISLAND OF CUBA.

By this public instrument of declaration and protest be it known and made manifest, that, on the day of the date hereof, before me, Andrew K. Blythe, consul general of the United States of America for the Island of Cuba, residing at Havana, personally came and appeared Don Juan Alverti, Don Manuel Vidal Perez, Don Miguel Soler, and Don Antonio Flores, all Spanish subjects, and residents of the city of Havana. who. being severally sworn to tell the truth, the whole truth, and nothing but the truth, did severally, voluntarily, freely, and solemnly declare and depose as follows: The said Juan Alverti saith, that he took passage in the American schooner "Cortes," with a regular passport from the superior government of Cuba, and in charge of the cargo on board of said schooner, bound to the island of Annobon on a lawful trading voyage, and sailed from the port of Havana on the morning of the fifteenth day of April instant; that he had with him on board, in his trunk, besides his wearing apparel and other small articles of his use, the sum of eight thousand five hundred dollars, in Spanish doubloonsthat is, five hundred doubloons; that the cargo of the schooner under his charge consisted of empty casks, rum, and provisions to the value of twenty thousand one hundred and ninety dollars; that on the following morning her Britannic Majesty's gun-boat "Forward" captured the schooner "Cortes;" that a boat of the said man-of-war came alongside the schooner, and an officer, with a detachment of men, came on deck; the officer demanded the vessel's papers, which were exhibited to him; after awhile the American flag was hauled down, but the mate interfered, and, after some remarks, he hoisted the flag, but it was soon brought down again, and British colors hoisted in its stead; that himself, the other passengers, the mate, and others of the crew were much abused by the British officer, and his men and subsequently himself and others were conveyed on board the gun-boat, with all their baggage and effects. On arrival on board the man-of-war, the American mate and scamen were handcuffed and imprisoned. On the third day of being on board the "Forward," the commander and his crew deprived him, and all the rest, of everything they possessed, excepting a portion of their clothing; that previous to this he and the others were made to strip almost naked, and their persons were searched. The man-of-war was then off Cayo Piedra. The boat of the Cardenas

pilots was there, and the passengers asked the pilots to stop, but not being willing to remain, the boat was about departing when the British commanding officer said: "Wait; for the Spaniards have plenty of doubloons, and, after they have been well stripped, you may take them away." After this, as the British commander was quite intoxicated, he treated the passengers and crew in a most outrageous manner, as if they had been guilty of some hideous crime. The English officer then returned three watches, one of them the property of this deponent, and, at about nine o'clock p. m., himself, the other passengers, and one of the "Cortes" crew were put on board the pilots' boat and sent away. The other protestants, to wit: Don Manuel Vidal Perez, Don Miguel Soler, and Don Antonio Flores, say that they have heard the above statement of Don Juan Alverti; that they were all passengers together on board the schooner "Cortes," had regular passports from the governor-general of Cuba, and were bound on a lawful voyage, and that they had no reason to suspect that the schooner aforesaid was not a lawful trader; that the facts set forth by said Alverti are, of their knowledge, true and correct, although they do not know the exact amount of money that was taken from him on board the gun-boat, but it was a large sum of gold Spanish doubloons; that they experienced the same harsh treatment from the British officers and men of the "Forward." The said Vidal Perez further states that he had on board the "Cortes" the sum of six thousand dollars, which were taken from him. The said Don Miguel Soler further saith that he was robbed by the officers and men of the British cruiser aforesaid of the sum of four hundred and twenty-two Spanish doubloons, or ounces, that he had with him; and Don Antonio Flores also states that the British officers and crew took from him the sum of two thousand dollars. The said appearers did further declare that they saw all the papers of the schooner "Cortes," as well as the passports of the passengers, in the hands of the commander of the gun-boat in the cabin of the "Cortes" when he first came on board of said vessel; that he read and examined said papers, and subsequently denied to them, upon their asking him to return them their passports, that he had seen any papers on board the "Cortes."

And therefore the said appearers did declare to protest, as by these presents they do severally solemnly protest, against the said unjustifiable and illegal acts of her Britannic Majesty's screw gun-boat, the "Forward," her officers and men; and do severally declare that they hold her Britannic Majesty's government responsible for the moneys and effects taken from them individually, as also for damages for the wrongful imprisonment and other injuries to which they were subjected by her Majesty's officers and servants, as well as for the injury to their business by virtue of the detention to which they were subjected, and the total disruption of their lawful voyage of business on which they were proceeding; they do, therefore, in addition to the sums of money taken from them, and the value of the articles pur-

loined, demand indemnity from the government aforesaid.

All which matters and things were declared, alleged, and affirmed, before me, the said consul general, and therefore I hereunto set my

hand and affix the seal of my office, being requested to certify and testify the premises.

JUAN ALVERTI.
MIGUEL SOLER.
ANTONIO FLORES.
MANUEL VIDAL + PEREZ.

Thus done and protested, at the city of Havana, this thirtieth day of April, in the year of our Lord one thousand eight hundred [L. s.] and fifty-eight, and of the independence of the United States the eighty-second.

A. K. BLYTHE.

CONSULATE GENERAL OF THE UNITED STATES OF AMERICA, ISLAND OF CUBA.

I do hereby certify that the foregoing is a true and correct copy of an original public instrument of protest, of record in the archives of this consulate general.

[L. S.] Given und my hand and official seal, at Havana, this 30th day of April, A. D. 1858.

A. K. BLYTHE, U. S. Consul General, in Cuba.

CONSULATE GENERAL OF THE UNITED STATES OF AMERICA, ISLAND OF CUBA.

Before me, Andrew K. Blythe, consul general of the United States of America for the Island of Cuba, residing at Havana, personally appeared, on the day of the date hereof, A. P. Laurent, master of the brig A. A. Chapman, of New Orleans, which arrived from that port at Havana on the 27th ultimo, and being sworn, according to law, deposes and says as follows: The brig A. A. Chapman, under my command, was in the port of Havana from the 27th of March to the 8th of April, inclusive. Whilst we were taking in cargo, I noticed two or three British man-of-war boats constantly going, day and night, around my vessel, and appeared to be watching my move-ments. I was loading for New Orleans, between which port and this my vessel has been plying as a regular packet for about a year past. On the morning of the 9th of April, very early, I sailed out of the harbor of Havana, and soon discovered that a British screw gun-boat, which I surmised to be the "Forward," was chasing me. I was about three miles from the Moro, and the gun-boat about one mile and a half, when she fired a blank cartridge, evidently to make me heave to. I had my national colors at the peak, and went on my way, taking no notice, when the gun-boat fired a shot towards me, which struck the water about a quarter of a mile from my vessel. I still took no notice, and kept on my course, made additional sail, as I had no intention to allow the British vessel to detain me. She kept on

chasing me, till about 3 p. m. of the same day, when I lost sight of her. When the gun-boat fired her second gun, I, having a small four-pounder on board, fired it at the British vessel in defiance.

A. P. LAURENT.

Sworn to and subscribed, at Havana, this 1st day of May, A. D. 1858, before me.

A. K. BLYTHE.

Mr. Cass to Mr. Dallas.

[Extract.]

DEPARTMENT OF STATE,
Washington, May 11, 1858.

Sir: I herewith transmit to you, for your information, the copy of a communication of the 4th instant, addressed by this department to Lord Napier, relative to the case of the American merchant vessel, the "N. B. Borden," which was recently brought to and boarded by her Britannic Majesty's vessel-of-war "Styx," on suspicion of being engaged in the slave trade.

GEO. M. DALLAS, Esq., &c., &c., &c.

Mr. Cass to Mr. Dallas.

No. 103.]

DEPARTMENT OF STATE,
Washington, May 12, 1858.

Sin: The accompanying papers, copies of the originals, which have been just received, will make known to you another outrage committed against the rights of the United States by a British armed vessel, which calls for the immediate attention of the British government. I am persuaded that, if the occurrences took place as they are stated, the conduct of the British officer will be disavowed and condemned. I beg you would communicate to Lord Malmsbury the earnest desire of the President that this practice, which seems to become more prevalent, of detaining and searching American vessels should be discontinued, and that the most peremptory order for that purpose should be given and enforced. Such a measure is called for by important considerations, which will readily occur to you. While this government is determined to use all proper exertions for the suppression of the slave trade, it is not less desirous that the just immunity of the vessels of the United States upon the ocean should be preserved. Whatever may have been the true object of the voyage of the Cortes, if she had papers showing her American character, she was subject neither to search nor capture by a British cruiser. I do not doubt but the facts reported will be fully investigated by order of the British

government, and proper measures taken to prevent the recurrence of a similar act hereafter.

I call your attention also to the circumstances reported by our consul general at Havana, showing the existence of a kind of police system, by which American vessels at that port are watched and interfered with, and have to request that you would bring the matter to the attention of the Earl of Malmsbury, with a view to the correction of the evil.

I am, sir, respectfully your obedient servant,

LEWIS CASS.

GEORGE M. DALLAS, Esq., &c., &c., &c.

Mr. Cass to Mr. Toucey.

DEPARTMENT OF STATE,
Washington, May 13, 1858.

SIR: I have the honor to transmit a copy of a letter to this department, and of the accompanying documents, from the consul general of the United States at Havana, relating to a gross outrage recently committed against a vessel of the United States. I am firmly persuaded that the British government will not justify such acts, and it is possible that the proceedings in this case may not have been of the flagrant character which is represented. Still, the subject calls for the immediate attention of the government, and Mr. Dallas has been instructed to bring it to the consideration of the British government, with a view to such action as the circumstances demand.

Outrages of this nature against our vessels, if longer countenanced, cannot fail to lead to the most unpleasant consequences. It appears from the public statements that there are several British armed vessels cruising off the coast of Cuba, and that our merchant vessels are exposed to vexatious interruptions by their interference. I beg leave to suggest the propriety of despatching one or more armed vessels to Cuba, in order to inquire into and report upon this subject generally, with instructions also to afford prompt protection to all the American vessels which may need it. Their forcible search by the cruisers of other powers upon the high seas cannot be tolerated.

I would suggest, also, an inquiry into the alleged existence of a kind of police system exercised by British authority over our vessels in the harbor of Havana.

I have the honor to be, sir, your obedient servant,

LEWIS CASS.

Hon. ISAAC TOUCEY, Secretary of the Navy.

Mr. Cass to Mr. Schell.

DEPARTMENT OF STATE, Washington, May 13, 1858.

SIR: I have to invite your attention to an article which appears in the morning edition of the "New York Herald" of yesterday, headed "Another British Outrage." It has reference to the overhauling of the schooner "Mobile" by the British steamer "Styx," and I have to request that you will be so good as to furnish me with any further information you may be able to obtain on the subject.

I am, &c.,

LEWIS CASS.

AUGUSTUS SCHELL, Esq., Collector of the Customs, New York City, N. Y.

Mr. Cass to Mr. Baker.

DEPARTMENT OF STATE,
Washington, May 14, 1858.

Sir: I have to invite your attention to an article which appears in the "Philadelphia Press" of the 12th instant. It has reference to the firing into the American ship "Tropic Bird," and the examination of her papers by the British gun-boat "Jasper," off Inagua, upon suspicion of her being a slaver. I will thank you to procure from the captain of the "Tropic Bird" his statement of the circumstances, under oath, and transmit it to me.

I am, &c.,

LEWIS CASS.

JOSEPH B. BAKER, Esq., Collector of the Customs, Philadelphia, Pa.

Mr. Cass to Mr. Austin.

DEPARTMENT OF STATE,
Washington, May 15, 1858.

SIR: It appears from the public journals that Captain Bray, of the brig "Robert Wing," which arrived at your port on the 13th instant, reports that off Inagua, on the 25th ultimo, a boat from a British cruiser came alongside and examined the brig's papers, and that previous to sending the boat, the cruiser fired a gun. He also states that there were a ship and a schooner in company at the time, and that the schooner was detained on suspicion of being a slaver.

I have to request, that you will be so good as to procure from the captain of the "Robert Wing" his statement of the circumstances,

under oath, along with any other reliable information you may be able to obtain on the subject, and transmit it to me.

I am, sir, &c.,

LEWIS CASS.

ARTHUR W. AUSTIN, Esq.,
Collector of the Customs, Boston, Mass.

Mr. Schell to Mr. Cass.

Custom-house, New York, Collector's Office, May 15, 1858.

SIR: I have the honor to acknowledge the receipt of your letter of 13th instant, (which did not reach here until this date,) in relation to a paragraph in the New York Herald of 12th instant. No other than the facts as therein stated having come into my possession, I forthwith, on receipt of your letter, sought an interview with the captain of the schooner "Mobile," which I have not, at the closing of this mail, been enabled to obtain.

I shall give my continued attention to the subject, and have the

honor to address you again.

I am, sir, with high respect, your obedient servant,

AUGUSTUS SCHELL, Collector.

Hon. Lewis Cass, Secretary of State, Washington, D. C.

Lord Napier to Mr. Cass.

HER BRITANNIC MAJESTY'S LEGATION, Washington, May 16, 1858.

SIR: I have the honor to acknowledge the receipt of your letter of the 4th instant, conveying an account of the circumstances which are alleged to have attended the boarding of the American vessel "N. B. Borden" by her Majesty's sloop "Styx."

I have transmitted copies of your communication to her Majesty's government, and to the commander-in chief of her Majesty's forces on

the West India station.

I have the honor to be, with the highest consideration, sir, your most obedient, humble servant,

NAPIER.

Hon. Lewis Cass, &c., &c., &c.

Mr. Schell to Mr. Cass.

Custom-house, New York, Collector's Office, May 17, 1858.

SIR: I had the honor, by mail of the 15th, to acknowledge the receipt of your letter of the 13th instant, and referring to its subject-

matter, have now the satisfaction to transmit to you the result of the information received from Captain Howes, of the schooner Mobile, in several interviews, embodied in the form of an authenticated statement of the facts of the case.

I also enclose herewith, a list of the names of the crew and of the passengers on board the schooner Mobile at the time of the occurrence

of the incident under consideration.

The schooner Mobile, Howes master, is a regularly enrolled vessel of the United States, in the district of the city of New York, and is licensed for the coasting trade. She sailed from Mobile on the 26th April, with a cargo of cotton, part of which (33 bales) was on deck. She arrived at New York on the 12th May, instant.

I am, sir, with high respect, your obedient servant, AUGUSTUS SCHELL,

Collector.

Hon. Lewis Cass, Secretary of State, Washington.

Statement in regard to schooner Mobile and British war steamer, supposed the "Styx."

NEW YORK, May 15, 1858.

I first saw the steamer about noon, April 29, a mere speck on the horizon to the eastward; could not make out what she was. At noon our latitude was 23° 42′, longitude 81° 52′. At one o'clock took the glass and looked at the stranger; saw she was a steamer, barque-rigged, and appeared to be running across our bows. I said to the mate, I think he is an American man-of-war going to Key West. Wind at the time E. by N., vessel heading N. by E. to N.N E.; several sail in sight. I then went below and laid down.

About half-past three my oldest daughter (my family were on board) came to my room, and said: Father, what is that vessel doing? I looked out of the window, and saw that she was running down for us. Thinking she was going to speak us, I went on deck to anwer her hail. As I came on deck the mate said to me, that is an English war steamer. I told him to set our ensign, which he did in the main rigging, the steamer then about two miles off. The steamer kept on until within hailing distance; he then rounded to on my weather quarter. As he came to, I saw the English flag at his mizzen peak, which was the first I had seen of it.

Soon I heard, twice in succession, something like the crack of a rifle, but I could hardly believe he was firing at me, and lying within hail. I soon heard another report, and likewise the whistle of the ball. The mate came to me and said, they are firing at us, and with ball, too. I then ordered the vessel hove to, the same as I would heave to for a pilot. After that there were two shots fired into us—one ball striking the vessel about eight feet abaft the fore channels, (where the mark can now be seen,) the other going over the heads of

the men working amidship, striking the water to the leeward. My men being in danger, I ordered the jibs hauled down, thinking that

might stop bis firing.

About four o'clock his boat came alongside, with, as near as I recollect, six men and an officer, all apparently unarmed, with exception of the officer, who wore his side-arms. The officer, dressed in the British naval uniform, came on board, came aft, and, without asking for the captain, began to ask questions: Where the vessel was from, where bound, where owned, her name, and number of men and passengers, &c.; to which I gave the usual answer. I then asked him what they meant by firing into my vessel, and frightening my wife and children? said, why did you not heave to when you saw a man of-war to windward, with her ensign flying? I told him it was common to see American and Spanish men-of-war in the Gulf with their colors flying, and they had never stopped or interfered with me, and it would not do for me to heave to and wait the motions of every man-of-war I saw with colors flying. He then asked for my papers; I started to go to the cabin to get them, when he, knowing that my family were there, and without an invitation, immediately followed me. I showed him my enrolment and license; after looking at them a moment, he said you should have a register; I told him our coasters did not have registers. but sailed under a license; and if he was not satisfied, here was my clearance from Mobile, in regular form. After looking at them awhile he laid them on the table I asked him if he took me for a slaver; he said no; I told him that knowing I was not a slaver, it was very strange they should want to board my vessel and insult my flag in such a manner; that they had no right to do it. He said they had, and that they had orders to board every vessel going up or down the Gulf, and that it was very lucky for me that I hove to.

I then told him if he had got through I should like to pursue my voyage. He then left my vessel without so much as saying "Good

day."

In the course of his visit I asked him how I should have known he was a man-of-war? He said I could have seen their pennant. I told him I had a long one that I very often set. He said if he saw me with one set, he would haul it down for me.

Our latitude when boarded was 24° 04', longitude 81° 42'. Three hours atterward I saw Sand Key light, bearing W.N W. by com-

pass, and distant fifteen miles.

Mr. Baker to Mr. Cass.

CUSTOM-HOUSE, PHILADELPHIA, Collector's Offix, May 17, 1858.

SIR: With this please find the attested statement requested by your letter of the 14th instant from Captain Foulkes, of the ship Tropic Bird, of Philadelphia.

I am, very respectfully, your obedient servant,

J. B. BAKER, Collector.

Hon. LEWIS CASS, Secretary of State.

PHILADELPHIA, May 17, 1858.

SIR: We enclose, as you request, the affidavit of Capt. C. Foulkes, master of our ship Tropic Bird, relative to the vessel being fired into and searched by the British steamer Jasper. We trust the action of

our government will be such as to prevent any further insult to our flag.

With respect, we are, sir, your obedient servants,

THOS. WATTSON, & SONS.

Hon. J. B. BAKER, Collector of Customs, Philadelphia.

PHILADELPHIA, May 15, 1858.

The ship Tropic Bird, of this port, under my command, left Port at Prince on the 27th ultimo. On the 2d instant, when about seven miles to leward of Ynagua, and being short handed, beating up to that port to recruit my crew, I saw a two-topsails schooner get under weigh from the harbor and run down towards the ship. When about four hundred yards from us she rounded to and fired a gun. I immediately hoisted my colors and kept on. The gun-boat finding the ship passing her, fired a shotted gun across our stern. I then got ready for going about, and whilst the ship was in stays the cruiser fired another gun, but as my attention was taken up by the ship, I did not see where the ball went. I then hove the ship to, and a boat came alongside. The officer commanding her stepped on deck, when I asked him by what right he stepped on an American ship on the high He answered that they had the right to do so; he said the name of his vessel was the Jasper, and demanded to see my papers, to which demand, after remonstrating, I complied with. I told him that I should report his vessel on my arrival; to which he said I might do so, and offered to write in the ship's log-book the fact of his having visited the ship. After the officer had examined my papers, I gave the order to fill away, when he turned round and told me that the Jasper would fire into the ship should I keep on my course before he had left my ship; which threat I disregarded, and told him to fire away, as I had already lost too much time. He got into his boat and I proceeded to Ynagua, and reported the case to Mr. Sargent, the consul, who told me that they had been boarding all the vessels they The Tropic Bird, far from having the appearance of a slaver, was deeply laden with coffee and logwood. She had on board eighteen passengers, eleven of whom were women and children, and almost the whole were at the time on her high poop, and could plainly be seen from the Jasper without a glass. The officer who boarded the ship apologized for detaining her, and said that almost all the vessels taken had been under American flag.

C. FOULKES.

CITY OF PHILADELPHIA, 88:

Personally appeared Captain C. Foulkes, who being duly sworn, did depose and say that the above facts are strictly [true] in every particular.

Sworn and subscribed this seventeenth day of May, A. D. 1858,

before me.

GEO. W. WILLIAMS, Alderman.

PHILALELPHIA, May 17, 1858.

We, the undersigned, passengers by the ship Tropic Bird on the voyage from Port au Prince, as annexed hereto, fully corroborate the statement of Captain Foulkes.

BN. P. HUNT.

The rain prevented more than one of the passengers from coming down to the office during the day.

THOS. WATTSON & SON.

Mr. Cass to Mr. Austin.

DEPARTMENT OF STATE, Washington, May 18, 1858.

SIR: I am again under the necessity of inviting your attention to another outrage which is alleged to have been perpetrated by a British cruiser upon an American vessel. I allude to the case of the brig "Ringgold," which vessel is reported to have been fired into with a musket from a British cruiser soon after leaving Sierra Morena, and afterwards boarded and searched by an armed boat's crew. You will oblige me by procuring from the captain of the "Ringgold" his statement of the circumstances, under oath, and transmit it to me.

I am, &c.,

LEWIS CASS.

ARTHUR W. AUSTIN, Esq., Collector of the Customs, Boston, Mass.

Mr. Cass to Mr. Dallas.

No. 106.]

DEPARTMENT OF STATE,
Washington, May 18, 1858.

Sin: Since my despatch No. 103 of the 12th instant, various statements have been made in the public papers, showing other cases of the forcible detention and search of American vessels by British armed ships-of-war in the Gulf of Mexico and in the adjacent seas. In every case where these reports have come to the knowledge of this department, application has been immediately made to the proper collector to procure from the captain a particular account of the outrage, with a view to make it the subject of reclamation upon the British government. Answers to some of these applications have been received, and copies of them, agreeably to the annexed list, are herewith transmitted for your information, as well as for your prompt action. When others are received, you shall in like manner be furnished with copies, that you may be kept advised of these assaults upon our national rights.

In addition to these aggressions upon the high seas, another indefensible act of violence against several of our merchant vessels, said to be eleven in number, by forcible entry and examination, has been committed by a British armed steamer in the harbor of Sagua la Grande, in the Island of Cuba. The statements in the public journals contain the details of this transaction, but no authentic report on the subject has yet reached the department, with the exception of a letter from the consul general of the United States at Havana, of which I transmit you a copy Proper measures have been taken to procure all the necessary information, which will be forwarded to you as soon as it reaches here.

When all the facts are ascertained, proper representations will be made, without delay, to the government of her Catholic Majesty, against this search of American vessels by the naval force of another power, within the territorial jurisdiction of Spain. The United States are satisfied that the government of that country will adopt the most efficient measures to protect their vessels, resorting to Spanish ports, from lawless violence. Such protection they are entitled to, and if it is not found elsewhere, it must be found in the power of their own country. I am not informed whether any injury was sustained in consequence of the proceedings against these vessels. If there were, it will be expected that it will be made good by the Spanish government itself, or by means of its interposition with the government of Great Britain.

These flagrant violations of the rights of the United States have excited a deep feeling through the country, and have attracted the attention of both Houses of Congress. Their continuance cannot fail to produce the most serious effects upon the relations of the two The President confidently believes that the British naval officers, in the adoption of these high handed measures, have acted without the authority, and have misunderstood the views of their government. But it is not the less due to the United States that their conduct should be disavowed and peremptory orders issued to prevent the recurrence of similar proceedings hereafter. You will communicate to the Earl of Malmesbury the earnest expectation of the President that this subject should received the immediate and favorable attention of her Britannic Majesty's government, and that the officers who have been guilty of these outrages should be held properly responsible for their conduct; and that where pecuniary injuries have been suffered, the interested parties should receive just compensation.
You will also invite the particular attention of Lord Malmesbury

You will also invite the particular attention of Lord Malmesbury to the occurrences at Sagua la Grande, and to the just expectations of the United States that the measures of redress, adopted by the British government upon this occasion, will be such as to mark with its displeasure the conduct of the officers whose proceedings have given a serious cause of offence to a friendly power, and to prevent a similar interference hereafter.

I am, sir, respectfully, your obedient servant,

LEWIS CASS.

GEORGE M. DALLAS, Esq., &c., &c., &c.

Mr. Cass to Mr. Schell.

DEPARTMENT OF STATE, Washington, May 18, 1858.

SIR: I will thank you to procure from Captain Albert Gage, of the American barque "W. H. Chandler," and from Captain Rawley, of the brig "Martha Gilchrist," their respective statements under oath touching the circumstances attending the boarding of their vessels by a British naval officer at Sagua la Grande, Cuba, on the 1st instant, and also the statements of the captains of any other American vessels boarded in like manner on the same occasion, that you may be able to procure and transmit them to me.

I am, &c.,

LEWIS CASS.

AUGUSTUS SCHELL, Esq.,

Collector of the Customs,

New York City, New York.

Mr. Cass to Mr. Austin.

DEPARTMENT OF STATE, Washington, May 19, 1858.

SIR: Your attention is invited to an article which recently appeared in the "Boston Advertiser." The article relates to the bringing to and boarding of the American barque "Clara Windsor," by the British war steamer "Forward," on the 19th of February last.

I will thank you to procure from the captain of the "Clara Windsor" his statement of the circumstances under oath, and transmit it to me.

I am, &c.,

LEWIS CASS.

ARTHUR W. AUSTIN, Esq.,

Collector of the Customs, Boston, Mass.

Mr. Schell to Mr. Cass.

CUSTOM-HOUSE, NEW YORK, Collector's Office, 19th May, 1858.

SIR: I have the honor to acknowledge the receipt of your letter of the 18th instant, and, in partial compliance with its request, am enabled to transmit to you by this mail a statement, under oath, from Captain Albert Gage, of the American barque "W. H. Chandler," touching the circumstances attending the boarding of his vessel, by a British naval officer, on the 2d instant, at Sagua la Grande, Cuba.

I am in progress of obtaining the further information suggested in your letter; and am, with high respect, your ob't serv't,

AUGUSTUS SCHELL,

Collector.

Hon. Lewis Cass, Secretary of State, Washington, D. C.

Statement made by Albert Gage, master of the barque William H. Chandler, of the boarding of said vessel by a boat from the British war steamer Styx, while lying in the harbor of Sagua la Grande, on Sunday the 2d day of May, 1858.

I, Albert Gage, do state that I am the master of the barque William H. Chandler; that I sailed with said barque from New York for Sagua la Grande, on the 18th day of March last, with a cargo of cooperage both under and on the deck; that I arrived at said port of Sagua la Grande on the 30th day of said month of March last; that I discharged my cargo within twenty days after my arrival; that I was taking in a return cargo of sugar for New York, and that the lading of the same was nearly completed on the second day of May instant. That on that day, after sundown, and about half-past six o'clock in the afternoon, a boat under sail with English rig came alongside, manned by twelve or fifteen persons, and commanded by an officer in English uniform; that the officer climbed up the side of the vessel, and was followed by half a dozen men. They had no arms upon their persons, but had arms in the boat. He did this without hailing the barque, or showing any flag, and as he was ascending the side of the vessel the mate told him he would find him an accommodation ladder on the other side. He replied, "Never mind." As soon as the officer got on deck, he inquired of the mate if he, the mate, was captain of the barque; he replied, "No, the captain is aft." The officer then came up to me and said, "How do you do, captain?" at the same time raising his cap, and asked me for the use of a light. I told him certainly. walked below into the cabin, and the officer followed me. After he got below, he asked the vessel's name and my name, where she belonged, and who were the owners. I asked him his object in making the inquiries. He replied that he was bound home, and wanted a report of all versels lying in the harbor; and then proceeded to ask me questions where I was from; I answered him, from New York. What I was loaded with; I answered, sugar. Where I was bound. I answered, to New York; my consignee's name in New York; I answered I had none, but consigned the vessel to myself. He then asked where the vessel belonged; I told him Providence, Rhode Island. then asked if I was under the American flag. I answered that I was; that Rhode Island was in the United States when I sailed from New York. How many days I was from New York; I answered about thirty-four days. He than wanted my ship's papers; I told him they were deposited with the American consul on shore. He wanted to know if it was necessary to deposit the clearance from the last port with the consul; I told him, no, I had the clearance. He then asked me if I would allow him to look at it; I did allow him to look at it; he examined, and said he thought it was not legal; it was different from any one he had seen. I told him he was mistaken; that I got it from the custom house in New York, and asked him what there was about it that was not legal. He said there was no naval officer's signature. I took it from him and showed him the initials from the naval officer, and informed him I supposed that answered all purposes. He said the name should be in full. I told him I knew nothing in regard to that. He turned it over and examined it more particularly, and seeing the consul's rule printed on the back, he said it was different from any he had seen before, and then handed it back to me. He entered all the several answers in a memorandum book which he had, He then inquired when I was going to sea; I told him on Tuesday morning following. He asked me if I was positive of getting away on Tuesday; I told him I should, provided I could clear in time. He then asked me for a drink of water, and I offered him a glass of gin, which he accepted. We then went on deck, and he asked me the direction I intended to go out. I showed him by pointing to the passage through which I came into the harbor. I then asked him where his vessel was. He pointed then to the direction where she lay. She was not in sight, being behind the Key Christo, a small island in the He said it was in a different direction from the one in which vessels usually came into the harbor. He then went over the port of the vessel. Upon my ordering his men to be called, he said: "Never mind, I will call them myself." He went on the main deck, and as he went by the forward-house, he made a halt and looked inside, (the door being open,) that contained twelve hogsheads of sugar. He then continued forward and said: "Come boys, man the boat." The officer and men then proceeded to get into the boat. I returned to the cabin, and discovered that he had left his book lying on the table. I called the mate, and ordered him to pass the book into the boat, which he did, and the boat shoved off; nothing was said on his departure.

I was subsequently informed by the mate that the officer was the second lieutenant of the British war steamer Styx. I was subsequently informed that the men had said the officer was the second lieutenant of the British war steamer Styx, and that the men were from

the same vessel.

ALBERT GAGE.

Sworn before me this 19th day of May, 1858.

JAMES T. GRISWOLD, Notary Public.

Mr. Austin to Mr. Cass.

Custom-House, Boston, Collector's Office, May 19, 1858.

SIR: I have the honor to enclose the statement of Captain Bray, master of the brig "Robert Wing," as by request of your letter of the 15th instant.

Very respectfully your obedient servant,

ARTHUR W. AUSTIN.

Collector.

Hon. Lewis Cass, Secretary of State, Washington, D. C.

> Custom-House, Bostom, May 19, 1858.

I, Reuben Bray, master of the brig "Robert Wing," an American vessel, belonging to Boston, Massachusetts, do solemnly depose and swear, that on the 29th April, 1858, while passing the Island of Inaqua, bound from Aux Cayes, St. Domingo, to Boston, loaded with coffee, logwood and honey, a gun was fired from a vessel some five miles distant. I paid no attention to it, but tacked ship and stood in toward the island. A pilot came on board, supposing that we were going into harbor. He told us the firing was from an English gunbrig. We then tacked and stood on our course. Another gun was then fired. We then hoisted our colors and stood for the gun-brig. When about half a mile distant, we were met by a boat, and boarded. The officer asked us the name of vessel, master, where from, where bound, and what our cargo was, all civil and polite, and then left us. The guns fired were without balls, as I believe.

REUBEN BRAY.

Suffolk, ss., May 19, 1858.—Then the above named Reuben Bray appeared before me, and took oath to the statement by him subscribed.

J. C. LOVEJOY,

Justice of the Peace.

Mr. Schell to Mr. Cass.

Custom-House, New York, Collector's Office, May 20, 1858.

SIR: In pursuance of the request of your letter of 18th instant, I have the honor herewith to transmit to you an authenticated statement made by Captain Edward Rawley, of the brig Martha Gilchrist, of the facts relating to the boarding of that vessel by an officer from a British war steamer in the harbor of Sagua la Grande, Cuba.

In addition, I also forward herewith, an authenticated statement made by Captain Edward Watts, master of the American brig "C.

"C. F. O'Brien," relative to the boarding of his vessel in the same harbor, under similar circumstances.

I have the honor to be your obedient servant,

AUGUSTUS SCHELL, Collector.

Hon. Lewis Cass, Secretary of State, Washington, D C.

Statement made by Edward Rawley, master of the brig Martha Gilchrist, of the facts relating to the boarding of said brig by an officer from a British war steamer, supposed to have been the Styx.

I, Edward Rawley, master of the brig Martha Gilchrist, do state that I sailed from New York on the 12th day of March last, for Sagua la Grande, Cuba, with cooperage cargo, and arrived there on the 29th day of March last; that I discharged the outward cargo and took in a cargo of sugar and molasses; that on the 2d day of May instant, about sunset, whilst lying at anchor in the harbor of Sagua la Grande, a sail-boat came alongside of the brig Martha Gilchrist, containing an officer in British uniform and ten or twelve men; she was well armed, and without a flag; that immediately after coming alongside of the brig, the officer, without hailing or asking questions, came on board of the brig and inquired for the master. He was directed to me, and came where I was. He then asked where I was from; I answered, from New York; he asked for the vessel's papers; I told him they were on shore, at the consul's office. He asked for my clearance from New York, and I did not show it to him. He noted the information given him in his memorandum book. He inquired the course of leeward passage out of the harbor, which I informed him of. I asked him who he was. He said he was an English steam When the officer boarded the vessel, seven or eight of his men came with him without arms. They assumed the right to examine the brig, and I did not interpose any objection to their proceeding.

EDWARD RAWLEY.

Sworn before me, this 19th day of May, 1858.

JAMES T. GRISWOLD, [L. s.]

Notary Public.

Statement of Edward Watts, master of the American brig C. F. O'Brien, relative to the boarding of his vessel while lying at anchor in the port of Sagua la Grande, on Sunday, 2d of May, 1858, by an English naval officer, supposed to belong to the British war steamer "Styx."

On the afternoon of Sunday, May 2, while lying at anchor in the port of Sagua la Grande, between four and five o'clock, I saw a boat coming towards me filled with men; as she neared me I perceived

that she contained one English naval officer and ten or twelve men. In a few minutes after I first saw the b at she got alongside of my vessel and made fast to her. Immediately thereafter the officer in command of the boat ascended the gangway and came on board my vessel, without any invitation whatever from me, and without having spoken to me or any one on board. At the time he came on board I was standing near the gangway. As soon as he had reached the deck, he asked me if I was master of the vessel, and if my colors were set. To which I replied, I was the master of the vessel, and my colors were not set. I then walked aft, and went down into my cabin, to which place I was followed by the officer, without having given him an invitation.

After we reached the cabin he asked me where I was from, how long out, how many men I had, and whether I carried any guns. To which I replied, I was from Havana, had left there about eighteen days before, had nine men all told, and carried no guns. He then wanted to know who were my owners, what I was loaded with, and where I was bound. I told him I was owned by Burgess & O'Brien and others, of Thomaston, Maine, was loaded with sugar and molasses, and was bound for New York; that I did not know who I would be consigned to, as I had not yet signed bills of lading. He then said, can't you guess who you will be consigned to; and I said it won't do any good to guess. He then asked me to show him my consul's certificate, (as he called it, I presume he meant clearance;) and I told him all my papers were on shore, either at the consul's or with the custom-house officer who boarded me at the point.

As the officer was about leaving the cabin I asked him if he would take a glass of gin, and he did so. We then went on deck, and when we got there I saw that about five or six men from his boat were also on board my vessel. As soon as we reached the deck the officer asked me if my hold was full of sugar, and I told him yes. He then said, can't I get down into the hold; and I told him he could not without a great deal of trouble, as my hatches were battened down. He then said never mind, you need not open the hatches. He then asked me where my flag was, and why it was not set; and I told him, in the cabin, and it was not set because it was blowing too fresh, and asked him if he wanted it set? He said, no. He then went into his boat, accompanied by his men, and pulled away from me. There was quite a large quantity of arms—pistols—in his boat. The officer was not armed when he boarded me, but I saw his arms lying in the boat.

Southern District of New York, se.

Edward Watts, being duly sworn, says he has heard read the foregoing statement by him subscribed, and that the same is true in every particular.

EDWARD WATTS.

EDWARD WATTS.

Sworn and subscribed, this 20th day of April, [May,] 1858, before [L. s.] me.

SAMUEL GODWIN, Notary Public.

Mr. Austin to Mr. Cass.

Custom-house, Boston, Collector's Office, May 21, 1858.

SIR: I have the honor to transmit the statement of the master of the brig "Wingold," E. H. Loring, taken according to your request in your letter of the 18th instant.

Very respectfully, your obedient servant,

ARTHUR W. AUSTIN,

Collector.

Hon. LEWIS CASS, Secretary of State, Washington, D. C.

> Custom-house, Boston, May 21, 1858.

I, Edwin H. Loring, do solemnly depose and swear that I belong to Camden, Maine, and sailed from Portland, Maine, to Havana, on the 18th day of March, 1858, as master of the brig "Wingold," owned in Boston, Massachusetts; that I sailed from Havana April 14th for Sierra Morena, in Cuba, in ballast. On the 15th of April saw a boat working off shore within a mile and a half of anchorage, at Sierra Morena; the boat was within easy speaking distance; noticed an English flag on the boat, and a large number of men, say fifteen; passed right by her; when the boat was astern, she fired a musket blank cartridge; in two or three minutes another; did not speak at all; could have spoken easily at any time while they were firing; in about two minutes from the second gun, a third was fired; I heard the ball whistle; struck somewhere about the mainmast, and fell on deck; it was picked up by the mate; I then hailed them, and asked "what they wanted?" [They were then getting a swivel on to the bow of the boat, and some one in the boat said they had a swivel, and if we did not heave to he would sink us.] The answer was, "I will let you know what I want when I come aboard;" they came aboard; officer said he was an English officer, and belonged to a steamboat; I asked him the steamboat's name; he said, "none of your business; he then said, "I will look at your papers, if you please;" showed him the papers; he looked at them, said he was satisfied, and went

The mate asked one of the men what the name of the steamboat was, and he said "Buzzard," a screw propeller.

EDWIN H. LORING.

STATE OF MASSACHUSETTS, Suffolk,

Then the above named Edwin H. Loring appeared, and took oath that the above statement, by him subscribed, was true.

J. C. LOVEJOY.

Justice of the Peace.

MAY 21, 1858.

Extract from the log-book of the brig Wingold.

"Thursday, April 15, 2 a. m., made Salt Key, bearing N. E. by E., dist. 3 miles, wind N. N. W., in all light sails and hauled on the wind, head to the eastward; 3 o'clock tacked ship; 6, Stone (Salt) Key, bearing north, dist. 5 miles; made all sail, and kept off south; wind N. N. W.; 10 a. m., made the high land of Sierra Morena; 1 p. m., running in for the anchorage in two fathoms water; was brought to by a shotted gun from an open boat, boarding us with some six or eight armed men, and demanding to see the brig's papers, asserting that his boat belonged to an English man-of-war."

I hereby certify that the above is a correct extract from the log-

book of the brig "Wingold."

ARTHUR W. AUSTIN, Collector.

Mr. Cass to Mr. Schell.

DEPARTMENT OF STATE,
Washington, May 22, 1858.

SIR: The New York Herald of yesterday contains a list of the names of American vessels which have been recently searched by British armed vessels in the Gulf of Mexico and in the adjacent seas. Among these, I observe the name of the brig "Brownsville," of your port. I have, therefore, to request that you will be so good as to procure from the captain of the "Brownsville" his statement, under oath, of the circumstances attending the search of his vessel, for transmission to me. I will also thank you to furnish me with similar statements from the captains of any other American vessels arriving at your port which may have experienced like molestation.

I am, sir, &c.,

LEWIS CASS.

AUGUSTUS SCHELL, Esq., Collector of the Customs, New York City, N. Y.

Mr. Cass to Mr. Austin.

DEPARTMENT OF STATE.

Washington, May 22, 1858.

SIR: The New York Herald of yesterday contains a list of the names of American vessels which have been recently searched by British armed vessels in the Gulf of Mexico and in the adjacent seas. Among these, I find the names of the barque "Samos" and brig "Wingold," of your port. I have, therefore, to request that you will be so good as to procure from the captains of those vessels their respective statements, under oath, of the circumstances attending the search of their vessels, for transmission to me. I will also thank you to furnish

me with similar statements from the captains of any other American vessels arriving at your port which may have experienced like molestation.

I am, sir, &c.,

LEWIS CASS.

ARTHUR W. AUSTIN, Esq., Collector of the Castoms, Boston, Mass.

Mr. Cass to Mr. Berry.

Department of State, Washington, May 22, 1858.

SIR: The New York Herald of yesterday contains a list of the names of American vessels which have been recently searched by British armed vessels in the Gulf of Mexico and in the adjacent seas. Among these I find the names of the brig "George Stockham," of Bath; the ship "Grotto," and the barque "Glenburn," of Richmond, Maine. I have, therefore, to request that you will be so good as to procure from the captains of those vessels their respective statements, under oath, of the circumstances attending the search of their vessels, and transmit them to me.

I will also thank you to obtain and forward similar statements from the captains of any other American vessels arriving in your district which may have experienced like molestation.

I am, sir, &c.

LEWIS CASS.

JOSEPH BERRY, Esq., Collector of the Customs, Bath, Maine.

Mr. Cass to Mr. Mason.

DEPARTMENT OF STATE,
Washington, May 22, 1858.

Sir: The New York Herald of yesterday contains a list of the names of American vessels which have been recently searched by British armed vessels in the Gulf of Mexico and in the adjacent seas. Among these I observe the name of the brig "A. A. Chapman," of your port. I have, therefore, to request that you will be so good as to procure from the captain of the "A. A. Chapman" his statement, under oath, of the circumstances attending the search of his vessel, for transmission to me.

I will also thank you to obtain and forward similar statements from the captains of any other American vessels arriving in your port which may have experienced like molestation.

I am, sir, &c.,

LEWIS CASS.

JOHN THOMPSON MASON, Eeq., Collector of the Oustone, Baltimore, Maryland.

Mr. Cass to Mr. Smart.

DEPARTMENT OF STATE,
Washington, May 22, 1858.

SIR: The New York Herald of yesterday contains a list of the names of American vessels which have been recently searched by British armed vessels in the Gulf of Mexico and in the adjacent seas. Among these I find the name of the brig "Eliza Merrithew," of Searsport, Maine, in your district.

I have, therefore, to request that will be so good as to procure from the captain of the "Eliza Merrithew" his statement, under oath, of the circumstances attending the search of his vessel, for transmission

to me.

I will also thank you to furnish me with similar statements from the captains of any other American vessels arriving in your district which may have experienced like molestation.

I am, sir, &c.,

LEWIS CASS.

E. K. SMART, Esq., Collector of the Customs, Belfast, Maine.

Mr. Schell to Mr. Cass.

CUSTOM-HOUSE, NEW YORK, Collector's Office, May 24, 1858.

Sir: I have the honor to acknowledge the receipt of your letter of 22d instant, in reference to the brig "Brownsville," of this port, and, in reply, have to state that said vessel has not yet arrived at New York, but that, in such event, your request will be immediately attended to.

Referring to your letter of 18th instant, I have now the honor to transmit an authenticated statement of Cyrus A. Nichols, master of the American barque "John Howe," of Belfast, Maine, relative to the boarding of said vessel on the 12th ultimo and 2d instant.

I am, sir, with high respect, your obedient servant,

AUGUSTUS SCHELL, Collector.

Hon. Lewis Cass, Secretary of State of the United States.

Statement of Cyrus A. Nichols, master of the American barque "John Howe," of Belfast, Maine, relative to the boarding of said vessel by officers of a British cruiser, on the 12th or 13th of April, and on the 2d of May, 1858.

I sailed from Portland, Maine, for Havana on the 3d or 4th of March, with a cargo of shooks and empty hogsheads. Arrived at

Havana about the 18th of March; discharged my cargo and sailed from Havana about the 10th of April for Sagua la Grande, to load with sugars and molasses for New York, pursuant to charter made in Havana. On or about the 14th of April, about 11 o'clock a. m., saw a steamer steering for me. I immediately set the American ensign. As the steamer neared me I perceived that she was an English manof-war steamer, and had English colors set. She bore down for me; hove to alongside and lowered a boat containing one officer and about half a dozen men. The boat pulled alongside of me, made fast, and the officer, accompanied by part of his boat's crew, boarded me. soon as he reached my deck I asked him to step into my cabin, and he did so. After reaching the cabin the officer asked me if he could see my papers. I told him he could, and showed them to him. took the vessel's name; my name; part of the owners' names; where from; where bound, and who the consignees at Sagua la Grande Some of my crew told me that the boat's crew had told them they belonged to the British steamer "Buzzard." As the officer was leaving he examined the hold and other parts of my vessel. After the occurrence of the above narrated incidents the officer left my ship and returned to his own vessel. No further incident of this character transpired until after my arrival at Sagua la Grande. Sunday, May 2, while lying in the harbor of Sagua la Grande, about sunset, an English man-of-war boat, containing an officer and about a dozen men, came alongside of my barque and made fast. Immediately thereafter the officer and part of the boat's crew boarded me. At this time I was standing on deck, and as soon as the officer reached the same I requested him to walk below. He did so. After we reached the cabin he asked for my papers. I told him they were ashore at the American consul's. He then asked me if I was loading there; took the name of the vessel; my name, part of the owners' names; where from, what loading with, and consignees' names. He looked about the vessel, as in former instance, and left

The officer had with him a large book, and on examining that he ascertained that the barque had been boarded previously. I was told the boat belonged to the "Buzzard." On the first occasion the officer who boarded me wore his side arms, and on the last he was unarmed, having left his arms in his boat. I saw no other arms in the boat, but my men told me they did. On the last occasion my colors were not set.

C. A. NICHOLS.

Southern District of New York, 88:

Cyrus A. Nichols, being duly sworn, says: He was master of the barque "John Howe" on her late voyage from Havana to Sagua la Grande, and from Sagua la Grande to New York; that he has heard read the above statement subscribed by him, and that the same is true.

C. A. NICHOLS.

Sworn and subscribed this 24th day of May, 1858, before me. SAMUEL GODWIN,
Notary Public.

Mr. Cass to Mr. Hatch.

DEPARTMENT OF STATE. Washington, May 25, 1858.

SIR: It appears from a special despatch to the Baltimore "Sun" of this morning that the American ship "John and Albert," which arrived at your port yesterday from Genoa, was fired into five times by a British war steamer while between the coasts of Florida and Cuba. on the 17th instant.

I have to request that you will procure from the captain of the "John and Albert" his statement of the circumstances under oath, and transmit it to me.

I will also thank you to furnish me with similar statements from the captains of any other American vessels arriving at your port which may have experienced like molestation.

I am, sir, &c.,

LEWIS CASS.

F. H. HATCH, Esq., Collector of the Customs, New Orleans, Louisiana.

Mr. Austin to Mr. Cass.

Custom-house, Bostom, Collector's Office, May 25, 1858.

SIR: I have the honor to acknowledge the receipt of your letter of the 19th instant, directing my attention to an article in the "Advertiser" newspaper of this city, relating to the boarding of the barque "Clara Windsor" by the British war steamer "Forward," and requesting me to procure a statement of the circumstances from the captain of the barque, and transmit the same to the department.

In reply I have to state that the vessel referred to is now absent on a voyage to Port au Prince, but is expected to arrive at the port of New York in about two weeks. I am, therefore, unable to procure the

statement as requested.

I am, sir, respectfully, your obedient servant,

ARTHUR W. AUSTIN, Collector.

Hon. Lewis Cass, Secretary of State.

Mr. Austin to Mr. Cass.

CUSTOM-HOUSE, BOSTOM. Collector's Office, May 25, 1858.

Sin: I have the honor to acknowledge the receipt of your letter of the 22d instant, requesting statements respecting the boarding of the barque "Samos" and brig "Wingold" by British cruisers, and, in reply, have to state that the former vessel has not arrived at this port,

and that the affidavit of the master of the latter was transmitted to the

department on the 21st instant.

The brig "S. Thurston" and schooner "Marcia Tribon," which vessels entered at this port yesterday, are reported to have been boarded in the harbor of Sagua la Grande, and I have taken measures to procure statements of the circumstances.

Very respectfully, your obedient servant,

ARTHUR W. AUSTIN, Collector.

Hon. Lewis Cass, Secretary of State.

Mr. Mason to Mr. Cass.

Custom-house, Baltimore, May 25, 1858.

Sin: I have the honor to acknowledge the receipt of your communication of the 22d instant, in regard to "American vessels which have been searched by British armed vessels in the Gulf of Mexico," and especially the "brig A. A. Chapman, of this port."

The "A. A. Chapman" does not now belong to this port. She was built here, but has since been sold and transferred to the district of New Orleans. She is not now, nor has she been for some time, in

this port.

I have procured the accompanying statement from the master and mate of the brig "Thomas Achorn," of Boston, which entered at this port on the 14th instant, from Sagua la Grande, ladened with sugar

and molasses, which is respectfully submitted.

The master of the schooner "Lath Rich," of Frankfort, in the State of Maine, also reported to me that his vessel had been searched at the same time, at Sagua la Grande; but, notwithstanding he was particularly requested by me to make oath to the facts, he left this port this morning for Boston without having done so.

I have the honor to be, very respectfully, your obedient servant, JNO. THOMSON MASON,

Collector.

Hon. LEWIS CASS, Secretary of State.

On this twenty-fourth day of May, in the year of our Lord one thousand eight hundred and fifty-eight, before me, the collector of customs within the district and port of Baltimore, personally appeared Donald Hastings, second mate of the brig "Thomas Achorn," of Boston, which entered at the port of Baltimore from Sagua La Grande, on the 14th day of May, 1858, and being duly sworn according to law deposed and said: That on or about the 2d day of May, 1858, whilst in the harbor of Sagua La Grande, and whilst John Hastings, the master thereof, was on shore, certain persons in British uni-

form, in a barge from a British vessel lying outside the said harbor, came on board of the said brig "Thomas Achorn," entered her cabin without invitation, demanded to see the papers of the vessel, searched her decks, ordered her colors to be set, and then retired from the vessel.

At the same time, before me came John Hastings, master of the said brig "Thomas Achorn," and being duly sworn, deposed and said: That whilst he was on shore he saw the persons spoken of by his second mate, boarding his said vessel; and on his return on board of his said vessel, the facts sworn to by his said second mate were reported to him

Sworn to before me this 24th May, 1858

J. S. OWENS, Deputy Collector.

Mr. Austin to Mr. Cass.

Custom-house, Boston, Collector's Office, May 26, 1858.

SIR: I have the honor to transmit the deposition of Captain Bray, of the schooner Marcia Tribon, of Bucksport, Maine, agreeably to your request of the 22d instant.

Very respectfully, your obedient servant,

ARTHUR W. AUSTIN, Collector.

Hon. Lewis Cass, Secretary of State, Washington, D. C.

> Custom-house, Boston, May 26, 1858.

I, John N. Bray, master of the schooner Marcia Tribon, of Bucksport, Maine, do solemnly depose and testify: I sailed from Baltimore, Maryland, March 12, 1858, for Matanzas, loaded with coal; discharged, and sailed from Matanzas the 25th of April for Sagua La Grande. On the 26th saw a boat about a mile distant; two guus were fired from the boat. I then hove my vessel to. The boat came alongside; one officer came aboard, requested to see my papers; said I should have kept them open for exhibition. I had them sealed to take to Sagua La Grande. I showed him my papers. He was satisfied, and left. His conduct was courteous in every respect. A British armed steamer was in sight, to which the officer of the boat said he belonged.

On the 4th of May, while at anchor in the Bay of Sagua La Grande, I was again boarded by an officer and two or three men from the British steamer Buzzard. The officer asked for my papers. I told him that I had been boarded a few days before, and that I had deposited my papers in the custom-house. He then took the name of my vessel, place of destination, consignee, amount of cargo, which

was molasses, and left.

JOHN N. BRAY.

Commonwealth of Massachusetts, May 26, 1858.

Then personally appeared the above named John N. Bray, and made oath that the foregoing statement by him subscribed is true.

Before me,

JOSEPH C. LOVEJOY,

Justice of the Peace.

Mr. Clinch to Mr. Cass.

Custom-house, New York, Collector's Office, May 27, 1858.

Sin: Referring to the subject of your letter of 18th instant, I have the honor to transmit herewith an authenticated statement of Captain R. W. Wheeler, of the American barque Anna, of New York, in relation to the boarding of his vessel by an officer and boat's crew from the British war steamer Styx, on the 28th day of March last.

With high respect, your obedient servant,

C. P. CLINCH,

Deputy Collector.

Hon. Lewis Cass, Secretary of State, Washington, D. C.

Statement of R. W. Wheeler, master of the American barque Anna, of New York, relative to the boarding of said barque on the 28th of March, 1858, by an officer from the British war steamer "Sty.c."

I left the port of New York about the 27th day of January, 1858. bound for Galveston, Texas, with an assorted cargo; arrived at Galveston about the 8th or 9th of February, 1858; took in a cargo of cotton, hides, and sugar, for New York, and sailed from that port on the 22d day of March, 1858, for New York. On the 28th day of March, Havana bearing southwest about thirty miles distant, between two and three o'clock in the afternoon, saw a steamer running When she got a little to windward of the course off from the land. we were heading, she shut off steam and hove to, and ran up English colors. I then ordered my colors to be run up. When I got nearly abreast of her I saw a flag put in the quarter boat and the boat lowered away. I then backed my main topsail and hove An officer and six men were put in the steamer's boat and she pulled alongside of me and made fast. Immediately after he had made fast, the officer in charge and one or two of the crew boarded me. this time I was standing on the forward part of the poop near the gangway. The officer, as he came up the side, offered me his hand, and I think asked if I was master; the name of my vessel; where I belonged; where from; where bound, and what cargo. I gave him the usual answers. He then asked me if I had seen a schooner with a red streak around her anywhere along the coast of Cuba? He said they

were in pursuit of her, as they believed she had slaves on board. I told him I had not seen any schooner of that description, but that I had seen a fore-topsail schooner to the westward the afternoon before. He did not ask to see my papers. I asked him his object in boarding vessels, and he told me, in substance, that their object was merely that they might be able to report that they had boarded a good many vessels. I don't recollect exactly the words he used, but think the above is the substance. I then asked him if he would report me at Havana. He said they would not be at Havana soon enough. Before he left he went into the cabin at my request and took a glass of wine with me. After we came up from the cabin, he remarked, I won't detain you any longer, and went into his boat and pulled for the steamer.

Nothing further of this character transpired during the voyage. I

arrived at this port about the 8th or 10th of April.

R. W. WHEELER.

R. W. Wheeler, master of the barque Anna, being duly sworn, says: that he has read the foregoing statement, and that the same is true to the best of his knowledge, information, and belief.

ROBT. W. WHEELER.

Sworn to before me, May 26, 1858.

SAMUEL GODWIN, Notary Public.

Mr. Cass to Mr. Boston.

DEPARTMENT OF STATE,
Washington, May 29, 1858.

SIR: It would seem from the public journals that among the American vessels recently fired into in the Gulf of Mexico by British cruisers the schooner "Gordon" has been forgotten or overlooked. It is reported of that vessel that she was fired into by her Britannic Majesty's steam sloop-of-war "Styx," on suspicion of being a slaver, on the 21st of March last.

I have therefore to request that you will be so good as to procure from the captain of the "Gordon" his statement of the circumstances under oath, and transmit it to me. I will also thank you to obtain and forward hither similar statements from the captains of any other American vessels arriving in your district which may have experienced like molestation.

I am, sir, respectfully, your obedient servant,

LEWIS CASS.

John Boston, Esq.,

Collector of the Customs, Savannah, Georgia.

CHICKASAW TRUST FUND.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

COMMUNICATING

The annual report respecting funds held in trust for the Chickasaw Indians.

ESTIMATES.—TREATY STIPULATIONS WITH PAWNEE INDIANS.

LETTER

FROM

THE SECRETARY OF THE INTERIOR,

COMMUNICATING

Estimates for fulfilling treaty stipulations with the Pawnee Indians.

JUNE 3, 1858.—Referred to the Committee on Ways and Means.

DEPARTMENT OF THE INTERIOR, June 3, 1858.

SIR: I have the honor to transmit, herewith, a special estimate of appropriations that will be required for fulfilling the treaty stipulations of the treaty of September 24, 1857, with the Pawnees, recently ratified by the Senate, together with a printed copy of the treaty, and a copy of the letter of the Acting Commissioner of Indian Affairs, transmitting the same to this department.

Regarding it as a matter of some importance that the appropriations should be made at the present session of Congress, I would respectfully request that the subject receive immediate attention.

Very respectfully, your obedient servant,

J. THOMPSON, Secretary.

Hon. James L. Orb.,

Speaker of the House of Representatives.

DEPARTMENT OF THE INTERIOR,

Office Indian Affairs, June 2, 1858.

Sin: I have the honor to submit herewith a special estimate of funds for fulfilling the stipulations contained in the treaty of September 24, 1857, with the Pawnees, recently ratified by the Senate; and to request, in consideration of the impoverished condition of the Indians, that the

necessary steps may be taken to have the appropriations therefor made at the present session of Congress. A copy of the Union containing the treaty is herewith.

Very respectfully, your obedient servant,

CHARLES E. MIX,
Acting Commissioner.

Hon. J. Thompson, Secretary of the Interior.

BY THE PRESIDENT OF THE UNITED STATES.

A PROCLAMATION.

To all and singular to whom these presents shall come, greeting:

Whereas a treaty was made and concluded at Table Creek, in the Territory of Nebraska, on the twenty-fourth day of September, one thousand eight hundred and fifty-seven, between the United States of America, by James W. Denver, commissioner, duly authorized thereto, and the chiefs and headmen of the four confederate bands of Pawnee Indians, viz: Grand Pawnees, Pawnee Loups, Pawnee Republicans, and Pawnee Tappahs, and generally known as the Pawnee tribe, which treaty is in the following words, to wit:

Articles of agreement and convention made this 24th day of September, A. D. 1857, at Table Creek, Nebraska Territory, between James W. Denver, commissioner on behalf of the United States, and the chiefs and headmen of the four confederate bands of Pawnee Indians, viz: Grand Pawnees, Pawnee Loups, Pawnee Republicans, and

Pawnee Tappahs, and generally known as the Pawnee tribe.

ARTICLE 1. The confederate bands of the Pawnees, aforesaid, hereby cede and relinquish to the United States all their right, title, and interest in and to all the lands now owned or claimed by them, except as hereinafter reserved, and which are bounded as follows, viz: on the east by the lands lately purchased by the United States from the Omahas; on the south by the lands heretofore ceded by the Pawness to the United States; on the west by a line running due north from the junction of the North with the South fork of the Platte river to the Keha-Paha river; and on the north by the Keha-Paha river to its junction with the Niobrara, L'eau qui Court, or Running Water river, and thence, by that river, to the western boundary of the late Omaha Out of this cession the Pawnees reserve a tract of country thirty miles long from east to west, by fifteen miles wide from north to south, including both banks of the Loup fork of the Platte river: the east line of which shall be at a point not further east than the mouth of Beaver creek. If, however, the Pawnees, in conjunction with the United States agent, shall be able to find a more suitable locality for their future homes within said cession, then, they are to have the privilege of selecting an equal quantity of land there, in lieu of the reservation herein designated, all of which shall be done as soon as practicable, and the Pawnees agree to remove to their new

homes, thus reserved for them, without cost to the United States, within one year from the date of the ratification of this treaty by the Senate of the United States, and, until that time, they shall be permitted to remain where they are now residing without molestation.

ART. 2. In consideration of the foregoing cession, the United States agree to pay to the Pawnees the sum of forty thousand dollars per annum, for five years, commencing on the first day of January, A. D. eighteen hundred and fifty-eight; and, after the end of five years, thirty thousand dollars per annum, as a perpetual annuity, at least one-half of which annual payments shall be made in goods, and

such articles as may be deemed necessary for them.

ART. 3. In order to improve the condition of the Pawnees, and teach them the arts of civilized life, the United States agree to establish among them, and for their use and benefit, two manual-labor schools, to be governed by such rules and regulations as may be prescribed by the President of the United States, who shall also appoint the teachers, and, if he deems it necessary, may increase the number of schools to four. In these schools there shall be taught the various branches of a common school education, and, in addition, the arts of agriculture, the most useful mechanic arts, and whatever else the President may di-The Pawnees, on their part, agree that each and every one of their children, between the ages of seven and eighteen years, shall be kept constantly at these schools, for at least nine months in each year; and if any parent or guardian shall fail, neglect, or refuse to so keep the child or children under his or her control at such school, then, and in that case, there shall be deducted from the annuities to which such parent or guardian would be entitled, either individually or as parent or guardian, an amount equal to the value, in time, of the tuition thus lost; but the President may, at any time, change or modify this clause as he may think proper. The chiefs shall be held responsible for the attendance of orphans who have no other guardians; and the United States agree to furnish suitable houses and farms for said schools, and whatever else may be necessary to put them in successful operation; and a sum of not less than five thousand dollars per annum shall be applied to the support of each school, so long as the Pawnees shall, in good faith, comply with the provisions of this article; but if, at any time, the President is satisfied they are not doing so, he may, at his discretion, discontinue the schools in whole or in part.

ART. 4. The United States agree to protect the Pawnees in the possession of their new homes. The United States also agree to furnish the Pawnees: First, with two complete sets of blacksmith, gunsmith, and tinsmith tools, not to exceed in cost seven hundred and fifty dollars; and erect shops at a cost not to exceed five hundred dollars; also five hundred dollars annually, during the pleasure of the President, for the purchase of iron, steel, and other necessaries for the same. The United States are also to furnish two blacksmiths, one of whom shall be a gunsmith and tinsmith; but the Pawnees agree to furnish one or two young men of their tribe to work constantly in each shop as strikers or apprentices; who shall be paid a fair compensation for their labor. Second. The United States agree to furnish farming

utensils and stock worth twelve hundred dollars per annum for ten years, or during the pleasure of the President, and for the first year's years purchase of stock, and for erecting shelters for the same, an amount not exceeding three thousand dollars, and also to employ a farmer to teach the Indians the arts of agriculture. Third. The United States agree to have erected on said reservation a steam-mill. suitable to grind grain and to saw lumber, which shall not exceed in cost six thousand dollars, and to keep the same in repair for ten years; also, to employ a miller and engineer for the same length of time, or longer, at the discretion of the President, the Pawnees agreeing to furnish apprentices, to assist in working the mill, who shall be paid a fair compensation for their services. Fourth. The United States agree to erect dwelling houses for the interpreter, blacksmiths, farmer, miller, and engineer, which shall not exceed in cost five hundred dollars each; and the Pawnees agree to prevent the members of their tribe from injuring or destroying the houses, shops, machinery, stock, farming utensils, and all other things furnished by the government, and if any such shall be carried away, injured, or destroyed, by any of the members of their tribe, the value of the same shall be deducted from the tribal annuities. Whenever the President shall become satisfied that the Pawnees have sufficiently advanced in the acquirement of a practical knowledge of the arts and pursuits to which this article relates, then, and in that case, he may turn over the property to the tribe, and dispense with the services of any or all of the employés herein named.

ART. 5. The Pawnees acknowledge their dependence on the government of the United States, and promise to be friendly with all the citizens thereof, and pledge themselves to commit no depredations on the property of such citizens, nor on that of any other person belonging to any tribe or nation at peace with the United States. And should any one or more of them violate this pledge, and the fact be satisfactorily proven before the agent, the property taken shall be returned, or in default thereof, or if injured or destroyed, compensation may be made by the government out of their annuities. Nor will they make war on any other tribe, except in self-defence, but will submit all matters of difference between them and other Indians to the government of the United States, or its agents, for decision, and abide thereby.

ART. 6. The United States agent may reside on or near the Pawner reservation; and the Pawnees agree to permit the United States to build forts and occupy military posts on their lands, and to allow the whites the right to open roads through their territories; but no white person shall be allowed to reside on any part of said reservation unless he or she be in the employ of the United States, or be licensed to trade with said tribe, or be a member of the family of such employé or licensed trader; nor shall the said tribe, or any of them, alienate any part of said reservation except to the United States; but, if they think proper to do so, they may divide said lands among themselves, giving to each person, or each head of a family, a farm, subject to their tribal regulations, but in no instance to be sold or disposed of to persons outside or not themselves of the Pawnee tribe.

ART. 7. The United States agree to furnish, in addition to the per-

sons heretofore mentioned, six laborers for three years, but it is expressly understood that while these laborers are to be under the control and subject to the orders of the United States agent, they are employed more to teach the Pawnees how to manage stock and use the implements furnished than as merely laboring for their benefit; and for every laborer thus furnished by the United States the Pawnees engage to furnish at least three of their tribe to work with them, who shall also be subject to the orders of the agent, and for whom the chiefs shall be responsible.

ART. 8. The Pawnees agree to deliver up to the officers of the United States all offenders against the treaties, laws, or regulations of the United States, whenever they may be found within the limits of their reservation; and they further agree to assist such officers in discovering, pursuing, and capturing any such offender or offenders, anywhere, whenever called on so to do; and they agree, also, that, if they violate any of the stipulations contained in this treaty, the President may, at his discretion, withhold a part, or the whole, of the

annuities herein provided for.

ART. 9. The Pawnees desire to have some provision made for the half-breeds of their tribe. Those of them who have preferred to reside, and are now residing in the nation, are to be entitled to equal rights and privileges with other members of the tribes, but those who have chosen to follow the pursuits of civilized life, and to reside among the whites, viz: Baptiste Bayhylle, Wm. Bayhylle, Julia Bayhylle, Frank Latahyee, Wm. Nealis, Julia Nealis, Catharine Papan, Politte Papan, Rousseau Papan, Chas. Papan, Peter Papan, Emily Papan, Henry Geta, Stephen Geta, James Cleghorn, Eliza Deroine, are to be entitled to scrip for one hundred and sixty acres, or one quarter section of land for each, provided application shall be made for the same within five years from this time, which scrip shall be receivable at the United States land offices, the same as military bounty land-warrants, and be subject to the same rules and regulations.

ART. 10. Samuel Allis has long been the firm friend of the Pawnees, and in years gone by has ministered to their wants and necessities. When in distress, and in a state of starvation, they took his property and used it for themselves, and when the small-pox was destroying them, he vaccinated more than two thousand of them; for all these things the Pawnees desire that he shall be paid, but they think the government should pay a part. It is, therefore, agreed that the Pawnees will pay to said Allis one thousand dollars, and the United States agree to pay him a similar sum of one thousand dollars

as a full remuneration for his services and losses.

ART. 11. Ta-ra-da-ka-wa, head chief of the Tap-pahs band, and four other Pawnees, having been out as guides for the United States troops, in their late expedition against the Cheyennes, and having to return by themselves, were overtaken and plundered of everything given them by the officers of the expedition, as well as their own property, barely escaping with their lives; and the value of their services being fully acknowledged, the United States agree to pay to each one of them one hundred dollars, or, in lieu thereof, to give to each a horse worth one hundred dollars in value.

ART. 12. To enable the Pawnees to settle any just claims at present existing against them, there is hereby set apart, by the United States, ten thousand dollars, out of which the same may be paid, when presented and proven to the satisfaction of the proper department, and the Pawnees hereby relinquish all claims they may have against the United States under former treaty stipulations.

In testimony whereof, the said James W. Denver, commissioner, as aforesaid, and the undersigned chiefs and headmen of the four confederate bands of Pawnee Indians, have hereunto set their hands and seals, at the place and on the day and year hereinbefore written.

JAMES W. DENVER, United States Commissioner.

And whereas the said treaty having been submitted to the Senate of the United States for its constitutional action thereon, the Senate

did, on the thirty-first day of March, one thousand eight hundred and fifty-eight, advise and consent to the ratification of the same by a resolution and with an amendment in the words and figures following, to wit:

IN EXECUTIVE SESSION.

SENATE OF THE UNITED STATES, March 31, 1858.

Resolved, (two-thirds of the senators present concurring,) That the Senate advise and consent to the ratification of the treaty between the United States and the Pawnee Indians, made the 24th day of September, 1857, with the following

AMENDMENT:

At the end of the 2d (second) article add: "And it is further agreed that the President may, at any time, in his discretion, discontinue said perpetuity by causing the value of a fair commutation thereof to be paid to, or expended for the benefit of, said Indians, in such manner as to him shall seem proper."

Attest: ÅSBURY DICKINS, Secretary.

By W. HICKEY, Chief Clerk.

And whereas the foregoing amendment having been fully interpreted and explained to the chiefs and headmen of the Pawnee tribe, as aforesaid, they did thereunto, on the third day of April, one thousand eight hundred and fifty-eight, and in the city of Washington, give their free and voluntary assent, in language as follows, to wit:

We, the undersigned, chiefs and headmen of the Pawnee tribe of Indians, with full powers so to do, hereby give our free and voluntary assent to the amendment made by the Senate of the United States on the thirty-first day of March, A. D. one thousand eight hundred and fifty-eight, to the treaty concluded between the United States and our tribe, on the twenty-fourth day of September, A. D. one thousand eight hundred and fifty-seven, after having the same interpreted and fully explained to us.

In testimony whereof, we have hereunto subscribed our names and affixed our seals, at the city of Washington, this third day of April, A. D. one thousand eight hundred and fifty eight.

OFFICE OF INDIAN AFFAIRS, June 2, 1858.

ESTIMATES—PRESERVATION OF PEACE IN THE NORTH-ERN SUPERINTENDENCY.

LETTER

TROM

THE SECRETARY OF THE INTERIOR.

Estimates of appropriation for the preservation of peace in the northern superintendency.

JUNE 8, 1858.—Referred to the Committee of Ways and Means.

DEPARTMENT OF THE INTERIOR, June 7, 1858.

SIR: I have the honor to transmit herewith a copy of a report, with accompanying documents, addressed to this department on the 4th instant by the Acting Commissioner of Indian Affairs, in which it is suggested that the sum of one hundred thousand dollars be appropriated to enable the department to take measures to preserve peace in the northern superintendency, now threatened with invasion by large bodies of hostile Yanctonnais Sioux.

It is within the knowledge of the department that great dissatisfaction has existed for some years among the turbulent bands of Sioux or Dacotah Indians, whose range is along the Missouri river, and this, it is stated, is now about to manifest itself in the inauguration of hostilities on a scale of alarming magnitude. The regular troops having been withdrawn, the frontier settlements are left entirely unprotected, and great alarm exists among the settlers who have appealed to the government for protection.

I feel constrained, therefore, to invite the attention of Congress to the necessity of providing the department with means of acting promptly in this emergency, and trust that suitable action will be

taken before its adjournment.

The Indian Office estimates that one hundred thousand dollars will be required, and it would be perhaps judicious to appropriate that sum, it being understood that only so much thereof shall be used as may be absolutely necessary to accomplish the object proposed.

Very respectfully, your obedient servant,

J. THOMPSON.

Secretary.

Hon. JAMES L. ORB, Speaker of the House of Representatives. DEPARTMENT OF THE INTERIOR, Office Indian Affairs, June 4, 1858.

SIR: Having received information, from various sources, of movements of some bands of the Sioux Indians, west of the State of Minnesota, endangering the peace in that part of our country, I hasten to place before you the facts as they have successively come to my knowledge. Joseph R. Brown, esq., Sioux agent, now in this city, addressed to me a letter, dated May 23, enclosing a newspaper slip, taken from the Henderson Democrat of May 12, containing a letter addressed to the editor, dated Hazlewood, Minnesota, April 21, 1858, and written by the Rev. S. Riggs.

Mr. Riggs states that reports had reached him that the Ihantonwons (Yantonnais) and the Titonwan Decotahs had taken up their line of march for the Yellow Medicine, and were now somewhere in the valley of James river, 1,000 to 1,200 lodges, which, if true, would be 8,000 or 10,000 persons; and that Inkpadoota was said to be among them. He is not of the opinion that they desire to commence hostilities; but has little doubt that they purpose visiting his part of the country in a large body this season, because those who were there last season had then declared their intentions to come again this year; that they lay the claim to the lands north and west of us already ceded by the Walpatonwans and Sisetonwans; that Superintendent Cullen informed them last year that he had the authority to settle this matter, but would lay the case before the President, and inform them of the result the coming season; that this promise would bring over a great multitude of wild Indians, and that such an event should. by all means, be prevented, and suggests that they should be met at Lake Traverse or the Two Woods, inasmuch as, if they are permitted to come to the Yellow Medicine, it was not difficult to foresee that the last summer's scenes would be re-enacted.

The editor of the Henderson Democrat, commenting upon Mr. Riggs' letter, says, that if something was not done at once we would certainly have trouble—for, of all the wild western Indians, they were, perhaps, the wildest and most reckless, and could only be brought to an appreciation of the power of the United States, and the necessity of being at peace with the whites, by such influences as an agent could bring to bear upon them.

Agent Joseph R. Brown has verbally informed me, that inasmuch as the Rev. Mr. Riggs had resided among the Sioux as a missionary for the past eighteen years; was well conversant with the condition of the several bands composing the Sioux nation; had seen the evils resulting from the annual visits of the Yanktonnais to the settlements of the annuity Sioux, and knew the necessity of preventing, if possible, a recurrence of the acts of depredation which have been attendant upon those visits, his testimony was of the utmost importance, and deserved the serious consideration of this office.

In his letter of the 23d last August, Brown says, that since the treaty of 1851 the Yanktonais had annually visited the pay ground, claiming from the Sisiton and Warpeton Sioux a portion in their annuities under the plea that the western portion of the land, ceded

by the treaty of 1851, from the Pipe-stone quarry to Kampeska lake, belonged to the Yanktonais. Not only had they claimed to participate in the annuities, but claim, also, that as they had not been consulted by the government in regard to the relinquishment of the Indian title to those lands, they still belonged to them, and were not subject to settlement by the whites. Hence they had last year burned the buildings, and had driven off the settlers at the "Hole in the that the land was now fast settling, and that he feared Mountain; the result of the proposed visit of these Indians, both on account of the annuity Sioux and the white settlers near the western line of Minnesota and along the valley of the Big Sioux river; that those Indians had no treaties with government; were jealous of the annuity Sioux, who, they believed, were receiving compensation for lands that belonged to the Yanktonais, and feel that they had been slighted by government, and their lands opened for settlement by the whites without their being consulted upon the subject. He expresses the opinion that an agency should be established among these Indians, from which he expects the happiest results. He thinks that they might be managed with but little difficulty previous to the commission of any act of open hostility on their side, but that after such an event it would be extremely difficult to restrain them.

Agent Brown also filed a letter from the head chief of the Medewakantons, now in Washington on business, who, having heard of the proposed visit of the Yanktonais to the Yellow Medicine, ask for leave to return home, because they are anxious for the safety of their wives and children. The Sisitoans expressed the same anxiety to me on

this subject during a late conference with them.

The Hon. Henry M. Rice, of Minnesota, filed, on the 1st instant, a letter in this office, addressed to him by Mr. Forbes, dated St. Paul, May 25, who states that a large body of Yanktonais and Cut-heads would be in Yellow Medicine in July—the same who were the cause of trouble last summer—claiming part of the land ceded by the Sisitoans, for the latter only ceded their rights and title to certain lands within certain boundaries, and that the balance had not been paid for; that they now came to meet the United States commissioners, as per promise, and should be met promptly with some arrangement before they reached Yellow Medicine; if not, there would be trouble.

Senator Rice endorsed Mr. Forbes' letter in the following words: "Mr. Forbes is well posted in regard to Indian matters, and I

seriously recommend his suggestions.

On June 1st a letter was referred by you to this office, from A. G. Fuller, esq., enclosing two letters which were addressed to him. The first is from J. L. Fisk, dated Medary, Dakotah Territory, May 15, 1858, who says, that news of a serious nature had reached that point, and that it seemed that we were to have a repetition of the Indian difficulties, which created so much confusion and fearful excitement on the border of Minnesota and in Dakotah last summer; that Mr. Quinn, an intelligent half-breed, had been on a buffalo hunt, accompanied by a young man named James Gorman; that on the third day they met a small party of our lower Indians, who had been through the Yanktonais country to the Missouri, from whom they

learned that the Yanktonais Indians were already on the hunt, to be enabled to procure meat enough for the season, and to get more time for their summer campaign; that they persist in claiming the lands adjoining the Big Sioux on the east, to a certain eastern boundary, which had been ceded to government by treaty by other tribes of the Sioux, who had ever since received annuities; that they would make their appearance before Medary, where they expected to find officers vested with power to conclude treaties, about the first of July; that they would demand pay from the citizens for the privilege of occupying their lands, and if the demand was not complied with, they would drive off citizens and settlers and burn down their houses; that they would then march to Yellow Medicine, or Upper Sioux agency, and demand that at least half of the annuities be henceforth paid over to them, and if this was refused, they would clear the disputed country of every soul—annuity Indians and all; that these Yanktonais were the same Indians who had harbored the followers of the fiendish Ink-pa-du-tah, and that he was still among them.

The second letter is from F. J. Dewitt addressed to Joseph E Gay, esq., at Medary, and dated Lynd, May, 1858, saying that news had arrived at Fort Ridgely "last week" that the Yanktonais were coming down on the whites; that the Sioux river settlement was the first place they intended to visit, and that Colonel Abercrombie considered the

news as reliable.

In view of the critical and dangerous aspect of our Indian affairs in the northern superintendency, as evinced by the above communications arriving here from so various points, coming from so reliable sources, and in the main points so entirely corroborating each other, our settlers and the Indians, with whom we are under treaty stipulations, being threatened with an invasion of hostile bands of reckless savages, numbering at least from twenty-five hundred to three thousand warriors, I deem it my urgent duty to propose that Congress should be requested to place without delay the sum of one hundred thousand dollars at the disposal of this department, in order to enable it forthwith to take such measures as the peace and the best interests of the country shall require—said sum, if granted, to be expended for the acquisition of provisions, agricultural implements, goods, to defray the expenses of transportation, and for the pay of an agent or agents who may be employed to carry the policy of the government into effect.

Very respectfully, your obedient servant,

Acting Commissioner.

Hon. Jacob Thompson, Secretary of the Interior.

WASHINGTON, May 23, 1858.

SIB: Enclosed please find a communication from Rev. S. R. Riggs to the Henderson Democrat, of the 12th instant, relative to a proposed visit of the Yanktonais Sioux to the reservation of the annuity Sioux,

and also suggestions of the editor of the same paper relative to the

same subject.

Both these gentlemen have long resided among the Sioux Indians; both are conversant with the condition of the several bands composing the Sioux nation; have seen the evils resulting from the annual visits of the Yanktonais to the settlements of the annuity Sioux, and know the necessity of preventing, if possible, a recurrence of those acts of

depredation which have been attendant upon those visits.

In former reports I have called the attention of the department to the fact, that since the payments have been made under the treaty of 1851 the Yanktonais have annually visited the pay ground, claiming from the Sissiton and Warpeton Sioux a participation in their annuities under the plea that the western portion of the land ceded by treaty of 1851 from the Pipe-stone quarry to Kampeska lake belonged to the Yanktonais. Not only have they claimed to participate in the annuities, but they also claim, that as they have not been consulted by the government in regard to the relinquishment of the Indian title to those lands, that they still belong to the Indians, and not subject to settlement by the whites.

As an evidence of their views upon this subject, they last year burned the buildings and drove off the settlers at the "Hole in the Mountain," and committed depredations in the valley of the Sioux

river.

The land thus claimed by the Yanktonais is now fast filling up with settlers, and I very much fear the result of the visit of those Indians, both on account of the annuity Sioux and the white settlers near the western line of the Minnesota and along the valley of the Big Sioux river.

Those Indians have no treaties with the government; they are jealous of the annuity Sioux, who, they believe, are receiving compensation for lands that belonged to the Yanktonais, and they feel that they have been slighted by the government, and their lands opened to settlement by the whites without being consulted upon the subject.

I fully concur in the necessity for an agency among those Indians. They generally hunt along the James; seldom meet an agent of the government to whom they can make known their grievances, and, in fact, feel that the government has no regard for them nor any desire

for their welfare.

Those Indians are more intimately connected in location and feeling, and are more accessible from the northern superintendency than any other. If they were attached to that superintendency, and an agent located among them, the result would be highly beneficial. If an agent cannot be provided for them at present, the Sioux agent might be instructed to visit them frequently, to make known the wishes of the government, and to give such counsel as will be proper to preserve friendly feelings towards the whites, and keep them from depredations upon the annuity Indians.

By prompt and judicious measures and the expenditure of a small amount for their agricultural improvement, those Indians can be satisfied, all depredations upon the whites or the annuity Sioux prevented, and many of them be induced to settle down as agricul-

I am well acquainted with them; I know their prejudices and peculiarities, and I am well satisfied they may be managed with but little difficulty previous to the commission of any act of open hostility to our citizens. I also know that their management will be found very difficult after they are led to place themselves in open defiance of the government, and that would most probably be the result of delay in making the necessary negotiations to prevent their visits to the white settlements, and their aggressions upon the annuity Sioux.

Very respectfully, your obedient servant,

JOSÉPH R. BROWN, Sioux Agent.

Hon. C. E. Mix,
Acting Commissioner of Indian Affairs.

I have received the enclosed letter from the head chiefs of the Medewakantons, now here on business, upon the subject of this reported visit of the Yanktonais, to be laid before you.

The position occupied by the annuity Sioux, in connexion with the Inkpadutah troubles, occasioned a distrust of the objects of this visit, and gives fears for the safety of the women and children of the Minnesota valley.

[Extract from the Henderson Democrat.]

Letter from Rev. S. R. Riggs.

MR. EDITOR: For several days past reports have been reaching us of the movements of the Ihanktonwons (Yanktonnais) of the plains, in regard to which I desire, through your paper, to communicate with the United States authorities and all whom it may concern.

It is said that a large body of Ihanktonwan (Yanktonnais) and Titonwan Dakotas have taken up their line of march for this point, and that they are now somewhere in the valley of the James river. They are reported at a thousand or twelve hundred lodges; which, if true, would give some eight or ten thousand persons. It is said that Inkpadoota is with them. One story says they are bringing him over to deliver him up to the United States authorities. Another says they are coming to fight with the white people, and that they have with them a number of cannon which the Missouri Indians have taken from white soldiers. The latter part of the story is undoubtedly an embellishment. There is, I think, no probability that they have any settled purpose or desire to commence hostilities with the United The Inkpadoota part of the story may or may not be true; but there is very little doubt that they purpose visiting this part of the country in a large body this season. How soon they will come over is uncertain. Probably not, however, before June, when the teepsinna tops are up.

Those who were over here last summer declared their intention to

come again this year. In council with Superintendent Cullen, they laid claim to this land north and west, which has already been ceded by the Wahpatonwans and Sisitonwans. With the exception of the Pipe-stone country, which has been considered as common property among the bands, this claim is without any valid grounds. Nevertheless, it will undoubtedly be better, in the event of a treaty with them for other lands, to buy out whatever claim they may regard themselves as having in this ceded part of the country. This is often done in

treating with Indians.

On the occasion referred to, Superintendent Cullen informed them that he had no authority to settle this matter, but he would lay the case before the President, and inform of the result the coming season. This, of course, they will remember, and it will bring over a great multitude of wild Indians. An effort was then made to bring about an understanding to the effect that they would be met by the superintendent somewhere near the line of purchase, or in their own country proper. Chiefly in consequence of the excitement which prevailed here then this arrangement was not effected. They evidently have a desire to come over here. But it is very manifestly the duty of the

agent and superintendent to prevent this if possible.

Last summer the presence of fifteen hundred strangers was a great injury to the Indians and white people in this upper part of the reservation. They did much more mischief than the grasshoppers. In consequence of their being here, the corn was not properly hoed and taken care of, and so, in many instances, produced only one-half or two-thirds of a crop. All improvements were stopped. The government and missionary efforts in behalf of the annuity Indians were, for the season, prostrated. Everything was thrown back. In addition to all this, uneasy, excited, and even hostile feelings were produced in many of the annuity Indians by their presence; and if they are permitted to come here this season in greater numbers, it is not difficult to foresee that the last summer's scenes will be re-enacted.

What I desire is, that this should, by all means, be prevented. Take time by the forelock. Meet them before or about the first of June, say at Lake Traverse, or at the Two Woods. Even should no appropriation yet have been made for this object, it will be better to meet the case promptly, and then trusting that, on a proper representation of the case, Congress will make the necessary arrangements hereafter, than to run the risk of such alarms and dangers as we experienced last summer.

I am not an alarmist; but I think we shall be justly blameable if we do not prevent difficulties and dangers, when their tall shadows are cast so far before them, as in the present case. I commend the matter to the attention, the promptness, and energy of the agent and the superintendent.

Yours, truly,

S. R. RIGGS.

HAZLEWOOD, MINNESOTA, April 2, 1858.

We have more than once called attention to the movements of the Ihanktonwannas, (Yanktonnas) and are glad to find our views corroborated by persons so well versed in Indian matters as Mr. Riggs. If something is not done at once to restrain them, we shall certainly have trouble. They have no agent, or worse than none, for Colonel Redfield's agency embraces so many tribes—Yanktons, Titons, Rees, Mandans, Gros Ventres, Assinnaboins, Crows, &c.—as to be only a vexation to himself and the Indians, and of no practical use whatever. We think the exigencies of the case demand that an agent be appointed at once for the Yanctonnais. Of all the wild western Indians, they are perhaps the wildest and most reckless; and they can only be brought to an appreciation of United States power, and the necessity of being at peace with the whites, by such influences as an agent of the United could bring to bear upon them.

WASHINGTON, D. C., May 22, 1858.

Sin: Having heard that the Ihanktonwans, accompanied by Inkpa-du-ta, are on their way to Yellow Medicine, we beg to say to you that we believe it is true, as we were told last winter that it was their intention to come there this spring. We do not believe that they have any intention of giving Ink-pa-du-ta up to the Americans; on the contrary, we believe they will be prepared to defend him if any attempt is made by the white people to take him. We do not like so many strangers to be near our homes, and feel anxious for the safety of our wives and children. We therefore hope, as we have now been nearly twelve weeks from home, that you will permit us to go away from here without any further delay.

We would answer that Mohpiyawicosta, principal soldier of Jagmain's band, was hunting on the Missouri all last winter, and sent a letter from there to say that the Yankton and other Indians of that quarter were gathering together to visit Yellow Medicine again this

spring.

We are, sir, yours, very obediently,

TATE + PSIN.

CETAN + WAKNAMAM.

Witness:

A. J. CAMPBELL, Interpreter.

Hon. CHARLES E. MIX, Commissioner of Indian Affairs.

St. Paul, Minnesota, May 25, 1858.

DEAR SIR: I would call your attention to a matter which may be overlooked by your Indian agents now with you: that is, that a large

body of "Yanktons" and Cut-heads (not "Yanktons") will be at Yellow Medicine in July—the same who were the cause of trouble last summer. They claim part of the land ceded by the Sessetons, &c., with justice; but the claim is against the United States by rights, for the latter only ceded their right and title to certain lands within certain boundaries, and the balance has not been paid for. "Brown understands that they, the Cut-heads," never came to meet United States commissioners, as per promise, last summer, and should be met promptly, with some arrangement with them before they reach Yellow Medicine; if not, there will be trouble between them, and that kind of thing last year did more to stop emigration than any other cause which operated against it. I write this to you, for you are the only one in Washington who I find both willing and able to keep us here, and knowing that this must be attended to in time. I again take the liberty of trespassing on your valuable time.

Mr. Riggs views this thing as I do, and I am well satisfied he is

well posted.

Now that Brigham Young has laid down his arms, we have troops enough to ferret out "Inkpadotah," who is among these prairie Indians, and is bound to do harm to the frontier if not brought to justice. Three or four troops of cavalry (I mean companies) would, by going to the different bands in the plains, very soon get him and party delivered up. For, as matters stand now, those northern Indians think we are afraid to arrest him and party, for the reason that we got our annuity Indians last summer to attend to our business. Please give a little thought to this matter, and you will save trouble. I am no "bird of ill omen." * * * * *

Your friend,

W. H. FORBES.

Hon. H. M. RICE, United States Senator, Washington.

The above letter is endorsed by Senator Rice as follows: "Mr. Forbes is well posted in regard to Indian matters, and I seriously recommend his suggestion."

Washington, D. C., June 1, 1858.

DEAR SIR: Enclosed please find communications from parties residing within the proposed Territory of Dakota, and, from the character of the parties sending them, I deem them entirely reliable.

Respectfully, yours, &c.,

A. G. FULLER.

Hon. Jacob Thompson, Secretary of Interior Department. MEDARY, DAKOTA TERRITORY, May 15, 1858.

DHAR SIR: Since writing to you on the 1st instant, news of a serious nature is whispered among us. It seems that we are to have a repetition of those Indian difficulties which created so much confusion and fearful excitement on the border of Minnesota and Dakota last summer.

Mr. Wm. Quinn, whom you may perhaps remember as being the intelligent and well educated half-breed that accompanied Colonel Nobles and party, as interpreter, across the Territory last summer, in company with a young man named James Gorman, have been established at this place during the past winter in a trading post. Three weeks ago they (Quinn and Gorman) decided upon having a buffalo hunt, and, after procuring the attendance of an Indian family from the "Acorn Plantation," with their ponies, started out northwestward, crossing the Sioux near here. They found plenty of the game they were seeking before the first day's journey was ended. On the third day out they met with a small party of our lower Indians, who had been through the Yancton country to the Missouri, with whom they camped the night, and from whom they learned the following alarming news. [I have this direct from Mr. Quinn, at a private interview, and he does not hesitate to accord his candid belief of the report:]

That the Yancton Indians are already on the hunt, and as they themselves say, to enable them to procure meat enough for the season,

and give more time for their summer's campaign.

That they still persist in claiming the lands adjoining the Big Sioux on the east, to a certain eastern boundary, and which they still assert were unjustly ceded to the government, by treaty, by other tribes of the Sioux who have ever since received bounteous annuities on the same.

They say they shall appear before this place, which is looked upon by them as the headquarters in the Territory; and where they seem to expect to find officers vested with power to conclude temporal treaties, to council with them and negotiate for the people, &c., about the first of July, when they will demand pay from us for the privilege of occupying their lands; and if the demand is not complied with they will then drive off citizens and settlers and burn down their houses.

They will then march to the Yellow Medicine or Upper Sioux agency and demand that at least half of the annuities be henceforth paid over to them; and if the be refused, they will clear the disputed

country of every soul, annuity Indians and all.

Let me here state that these Yanctons are the same Indians that assembled at Yellow Medicine last summer, and who were the only offenders in that great disturbance, on the same plea they are to make this summer.

We have, however, to doubly fear the execution of their threats in this second attack. The followers of the barbarous and fiendish Inkpadutah were harbored by these Indians last summer, and are still. That blood will mark the trail of their march, should they be per-

mitted to make it, there can be no doubt.

But without conjecturing what may, or might, be the extent or nature of the evils attending another series of these troubles, I trust it sufficeth for one to say, not as an individual only, but on behalf of an alarmed people, that effective measures should be speedily adopted, by which every calamity of which there are omens may be averted.

If we have patriotic men in the national councils, they will not turn deaf ears to calls from their countrymen for protection from impend-

ing public dangers.

I must say, however, that the strong arm of government has been too feebly felt for the past few years on the borders of civilization, most especially has the protection of our western frontiers been too

sadly neglected.

I trust that formal petitions and remonstrances, sealed with blood of innocent victims of an unnecessary war, will not be waited for as the only means of enlisting the sympathies of the government in be-

half of her unprotected border colonies.

I would not say that military force alone is all that is needed to warrant the peace and quiet of the country, nor to secure the personal safety of the people; whenever and wherever it is in the wisdom of men to devise means of amicableness for the adjustment of contentions or open disputes between nations or tribes, such action should most certainly take the preference of an encounter with the horrors of a conflict of arms.

Experienced and honest men in the various official capacities of our Indian affairs are worth all the armed forces that might be brought to bear on such a race of human beings, who are partially enlightened, or who understand, at least, the rudiments of fair dealing, and who are capable of being made to appreciate the true policy of the general government towards them.

But if the difficulties at present existing in the private control and agencies of the Indians is to remain in statu quo, then an increase of military force, and a wider distribution of the same, is indispensable

to the welfare of settlers in western Minnesota and in Dakota.

I have written in haste, as the mail is waiting on me. May you be able to effect a change in the present state of our affairs and prevent the approach of this storm.

In the meantime we shall hardly know what steps to take for ourselves, as we are a people without laws or a head, a ship without sails

or helm.

On the part of many citizens, your humble servant,

J. L. FISK

Hon. A. G. Fuller, Washington, D. C.

LYND, May 19, 1858.

DEAR SIR: Merrel Badger and your humble servant arrived here today. George Reed and the Barnes' mule team are with us; we overtook and camped with them last night; they left the agency on Monday morning; we arrived there at noon. Charles Didler and Fisk have arrived from Medary with two mule teams; they report the boys are all well, but very much frightened by an Indian demonstration that was made a few days ago. It seems that four Indians visited them and were anxious to stay all night and sleep in the house, but the boys would not let them.

The Indians showed fight; the boys succeeded in driving them away. The same four, with ten others, returned the next night and threatened to clear the boys out if they did not leave the Sioux in six suns, meaning six days. We will be there by that time and lend

them a hand, if there is any fighting to be done.

News had arrived at Fort Ridgely last week that the Yanktons were coming down on the whites, and that the Sioux river settlements is the first place they intend to visit. Col. Abercrombie says this news is reliable. Well, we will see what we will see. I hope we will get along this summer without another Indian excitement. I will write you from Medary. Don't forget to send out turnip and garden seed.

Yours, truly,

F. J. DEWITT.

Jos E. GAY, Esq.

Washington, June 3, 1858.

Sir: In a private letter of the 26th ultimo, Mr. Forbes wishes "to impress on Mr. Rice and the authorities the necessity of having a commission provided immediately to meet the 'Cut-heads' before they reach the Yellow Medicine, which will be next July, or other-

wise difficulty may be apprehended. So say the Indians.'

Having already reported upon this subject, I would not again refer to it, was I not confident that unless something is done at this session of Congress, and the Yanktonais be met and their claims satisfied this summer, the settlements in Dakota and the western part of Minnesota will be the scene of bloodshed, and the annuity Indians be compelled to sacrifice a large portion of their annuities, or go to open hostilities with the Yanktonais, perhaps both. I do hope that the administration will submit this subject to Congress, as I believe there is no subject connected with the west involving deeper interests than this.

Very respectfully, your obedient servant,

JOSEPH R. BROWN, Sioux Agent.

Hon. C. E. MIX,

Acting Commissioner of Indian Affairs.

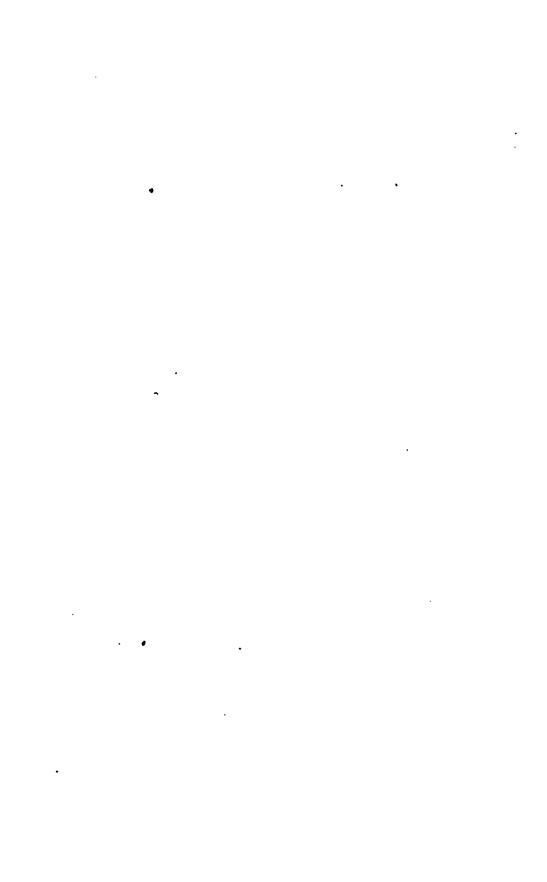

Endorsement hereon by the Indian Office.

Respectfully referred to the Hon. Secretary of the Interior, in connexion with my report of the 4th instant.

CHARLES E. MIX,
Acting Commissioner.

OFFICE INDIAN AFFAIRS, June 5, 1858.

ESTIMATE FOR PAYMENT TO CERTAIN INDIANS.

LETTER

PROV

THE SECRETARY OF THE INTERIOR,

SUBMITTING

Estimates for carrying out stipulations of agreement with the Sioux and Fort Pierre Indians.

JUNE 8, 1858.-Referred to the Committee of Ways and Means.

DEPARTMENT OF THE INTERIOR, June 7, 1858.

SIR: I have the honor to transmit herewith a copy of a report, with accompanying documents, addressed to this department on the 5th instant, by the Acting Commissioner of Indian Affairs, calling my attention to the hostile attitude assumed by the Menecongrees and Uncpapa bands of Sioux or Dacotah Indians, and suggesting that an appropriation of one hundred thousand dollars should be asked for, to enable this department to redeem the promises made by General Harney to nine bands of the Sioux, at the council held at Fort Pierre in March, 1856.

The subject has already been brought to the attention of Congress, in a special message from the President of the United States, dated July 24, 1859, accompanied by an estimate of the amount that would be required for the purpose.—(Ex. Doc. No. 130, 1st Sess. 34th Cong.)

An estimate was again submitted by my predecessor, at the opening of the second session of the 34th Congress, but no action was taken, although the Committee of Ways and Means reported in favor of the appropriation.

For this reason no estimate was submitted this year, but attention was again called to the subject in the annual report of the Commis-

sioner of Indian Affairs.

The Menecongrees, Uncpapa, Brulé and other bands of Sioux, occupying the country south of the Missouri river, are among the wildset, most turbulent, and dangerous within our limits, and in view of their present hostile attitude, of which the department has been but

recently advised, and the absence of troops, I feel constrained to call the attention of Congress to this subject, and respectfully to recommend that a sufficient sum be furnished to enable the department to fulfil the stipulations of the agreement made by General Harney with the Sioux. Good faith and sound policy alike demand it, and unless measures are promptly taken, serious disturbances will be likely to result.

Very respectfully, your obedient servant,

J. THOMPSON,

Secretary.

Hon. James L. Orr, Speaker of the House of Representatives.

DEPARTMENT OF THE INTERIOR,
Office Indian Affairs, June 5, 1958.

Sir: General Denver, in his annual report as Commissioner of Indian Affairs, page 2, says: "The agent reports that the Sioux, to whom General Harney promised presents of clothing for their soldiers, are very much dissatisfied with the non-compliance with that promise, and he recommends that Congress make provision for its fulfillment. An estimate for \$200,000, to be placed at the disposal of the department for that purpose, was presented by your predecessor to Congress at the last session of that body; but no appropriation was made. Concurring in the propriety and importance of the measure, I respectfully recommend that the amount necessary to carry it out be appropriated."

The Sioux agent above referred to is A. H. Redfield, who, in his report to the superintendent, (page 125 of Commissioner's report,) expresses himself thus: "They spoke of a promise made them by General Harney to give them certain clothing for their soldiers, and expressed great surprise that the promise had not been fulfilled. I explained this matter to them as well as I could. Congress ought, undoubtedly, to make provision at its first session for the fulfillment of that promise. It was a reasonable one, and made in good faith by the general. The government will suffer much in the estimation of the Indians, if a promise made by an officer so high in rank and character as General

Harney is long left unfulfilled."

General Harney, in his report, dated Fort Pierre, N. T., March 8, 1856, (Ex. Doc., No. 130, 1st session, 34th Congress, page 3,) says, that he "caused the Sioux nation to select and appoint a certain number of head chiefs and chiefs to govern them, and to see that they carry out the conditions to which they have consented in council." Again, on the same page he says: "That the organization of the Sioux may be more complete, I proposed to the chiefs to have a number of soldiers in each band to assist them to carry out my views. They have each given in the number which they deemed sufficient for that purpose in each band, and I recommend that these

soldiers be regularly named and receive from the government a dress or uniform, by which they will be known; and that for the time they may be doing duty under their chiefs, in their villages, they will receive their rations. The expense would be trifling, and their young men would be stimulated and encouraged to seek these positions. The dress should be durable and gaudy, particularly the head-dress; (they are fond of feathers.) The uniform of the different bands should be different, and the same should have place in the different grades of chief, sub-chief, &c. By gradually causing the interests of a portion of the nation to depend upon the wishes of the government, the remainder will be easily controlled."

The Secretary of War, reporting to the President under date of May 10, 1856, that he had received from Brevet Brigadier General William S. Harney the minutes of a council held by him with nine bands of Sioux Indians, at Fort Pierre, N. T., beginning the 1st and ending

the 5th of March, 1856, (see same document, page 8,) says:

"Brigadier General Harney, having recognized the chiefs named herein as the only head chiefs of their respective bands, and so declared in council, proposed that each chief should have a certain number of soldiers in each band to maintain order and enforce its laws, and recommends that these soldiers receive from the government a uniform dress, with badges to designate the bands and rank of each, and that, for the time they may be employed in discharging the duties appropriate to their position as a tribal police, they shall be subsisted at the expense of the government. In accordance with the proposition of Brigadier General Harney, in relation to this organization, the following list of 'soldiers' was named by the principal chiefs at the council, (here follow the names.) I recommend that the foregoing articles and stipulations be regarded as a valid compact, to be faithfully observed by all officers and agents of the United States, and that the necessary appropriations be asked to carry it into effect."

The President of the United States, in his message dated July 24, 1856, "communicating minutes of a council held at Fort Pierre with the Sioux Indians by General Harney," &c., (same document already referred to,) conclues with the following words:

"Regarding the stipulations between General Harney and the nine bands of the Sioux as just and desirable, both for the United States and for the Indians, I respectfully recommend an appropriation by Congress of the sum of one hundred thousand dollars, to enable the government to execute the stipulations entered into by General Harney."

The amount of \$100,000 was fixed in this manner: The Secretary of the Interior requested Thomas S. Twiss, Indian agent, Upper Platte, then in Washington, to make an estimate of the probable amount sufficient to carry into effect and to fulfil the conditions, stipulations, and promises made by General Harney to the Sioux bands, who, in a letter addressed to the Commissioner of Indian Affairs, dated June 24, 1856, estimated the sum necessary for that purpose at \$72,000, (see page 10 of the document above referred to,) and says:

"My experience in the Indian country, as to what Indians expect to

receive as presents when they are called to act as soldiers, has been my guide in making the estimate for uniform, clothing, arms, and provi-

sions while acting in the capacity of tribal police.

The Commissioner of Indian Affairs, in his report accompanying the above letter of Agent Twiss, dated June 25, 1856, says: "My opinion is that the estimate of the agent is below the amount that will be required to carry out the various stipulations and promises of General Harney."

The Secretary of the Interior, submitting the above report of the Commissioner, and the letter of Agent Twiss, to the President of the United States, says, in his letter dated June 26, 1856: "It is impossible, with the imperfect data now possessed by the department, to make any satisfactory estimate; but, from all the information on hand, I am inclined to think that, besides the estimate of the Indian Bureau. there should be enough added for contingencies to make the whole

amount \$100,000."—(See same document, pages 9 and 10.)

Congress did not act upon the recommendation contained in the President's message of 24th July, 1856, because it was sent in so late in the session; and before it came out of the hands of the public printer Congress had adjourned. At the beginning of the second session of the thirty-fourth Congress the Secretary of the Interior renewed his application for \$100,000 for the current year, and applied for \$100,000 more for the fiscal year commencing on the 1st July, When the matter came up the House Committee of Ways and Means reported favorably upon it; but, at the suggestion of a member that the treaty made by General Harney had not as yet been ratified by the Senate, the House took no action on that report of its committee.

The President, however, did not consider this subject in the light of a treaty requiring the confirmation of the Senate, but guardedly designated it as "stipulations," and the Secretary of War says, in his letter to the President of May 10, 1856, already referred to on page 8 of the above mentioned House document: "I recommend that the foregoing articles and stipulations be regarded as a valid compact to be faithfully observed by all officers and agents of the United States, and that the necessary appropriations be asked to carry it into effect.

The Secretary of War in his letter to the Secretary of the Interior, dated June 9, 1856, (see page 10 of the above mentioned House Doc.,) says: "It is important, as a means of maintaining peace in the Indian country, that the convention made by General Harney should be faithfully observed and fully carried into effect." This letter was referred, on June 11, 1856, to this office, with the following endorsement, signed by Geo. C. Whiting, the then chief clerk of the Department of the Interior: "As this department is now charged with the whole subject, and responsible for its whole management, it is the desire of the Secretary of the Interior that every effort should be made to carry out the within suggestions, and to preserve the friendly and peaceable relations with the Indians."

It thus appears that the "stipulations" were favorably reported on by the House Committee of Ways and Means, but that the recommendation of the President for an appropriation to carry them into effect was not responded to by the House of Representatives, on account of a misconception of facts. The stipulations were never transmitted by the President to the Senate for confirmation and ratification, because he never considered them to be a *treaty*, but merely a new system initiating a tribal police; a mere administrative regulation, requiring no ratification, but merely the necessary funds to carry it into effect.

In view of the hostile attitude which some of the Sioux tribes have assumed, as appears from the letter of Agent A. J. Vaughan, herewith transmitted, and considering the critical position of our relations with the Sioux generally, it seems to me of the utmost importance that every semblance of a grievance should be carefully removed, and the promises of General Harney to those Indians promptly redeemed. I think that the sum of one hundred thousand dollars would, at present, suffice for that purpose; and I therefore respectfully recommend that Congress be asked to appropriate that sum to enable government to execute the stipulations entered into by General Harney.

Very respectfully, your obedient servant,

—, Acting Commissioner.

Hon. Jacob Thompson, Secretary of the Interior.

Extract from a letter from Agent A. J. Vaughan, dated St. Louis, May 5, 1858, to the superintendent of Indian affairs at St. Louis, and by him transmitted to the Indian Office.

"It pains me to state the belligerent and refractory condition in which I found the Sioux in passing through their country, particularly the Menecongrees and Uncpapa bands; the past year they have been robbing indiscriminately every white man passing through their

country, and in many instances threatened their lives.

"A war party of the Menecongree band of Sioux, on the 31st of March, while passing down the river between Fort Union and Fort Berthold, fired ten shots at us while on the boat, taking deadly aim on our lives, which were miraculously preserved. The withdrawal of the troops from Fort Pierre has caused the Indians to believe the government are afraid of them, and, from their conduct and threats, I feel satisfied that no agent's life is safe in distributing the Sioux annuity without a suitable force to protect him."

•

SICK AND DESTITUTE SEAMEN AT HAVANA.

LETTER

FROM

THE SECRETARY OF STATE,

TRANSMITTING

Copies of communications relating to the expediency of making provision for the care of destitute and sick seamen at Havana.

June 10, 1858.—Referred to the Committee on Commerce.

DEPARTMENT OF STATE,
Washington, June 8, 1858.

Sin: I have the honor to transmit herewith a letter addressed to Hon. John Cochrane, chairman of the Committee on Commerce, enclosing copies of communications received at this department relating to the expediency of making provision for the care of sick and destitute seamen of the United States at Havana, to which I will thank you to give the proper direction.

I am, sir, your obedient servant,

LEWIS CASS.

Hon. JAMES L. ORR, Speaker of the House of Representatives.

DEPARTMENT OF STATE,

Washington, June 8, 1858.

Sir: I have the honor to transmit herewith; for your information and for the consideration of the committee of which you are chairman, with a view to further legislation upon the subject, extracts from dispatches received at this department from the United States consulgeneral at Havana, respecting the expenditures for the relief of sick and destitute American seamen at that place, the unhealthy location of the hospitals in which they are treated, and the exceeding mortality therein.

I am, sir, your obedient servant,

LEWIS CASS.

Hon. John Cochrane, Chairman of Committee on Commerce, House of Reps. Consulate General of the United States, Havana, May 17, 1858.

SIR:

That which I deem of primary importance is the condition of seamen overtaken by disease in this port. The voice of humanity crise earnestly in this matter. It would extend this letter to too great length were I to attempt now an exposition of a plan of relief, as I once proposed. Something must be done by our government, or we will continue, as we have done, to suffer serious injury in the loss of very many of that class of our people, who are indispensable to our commercial prosperity, and be derelict in a high moral duty. I transmit herewith suggestions on the subject, hastily made by an experienced American physician of this place, and, without endorsing the views therein set forth in all particulars, would commend them to your consideration.

As connected with the above by kindred ties, I again ask that the government make a strenuous effort to obtain the privilege of protestant worship in the island, or at least in the city of Havana. I have in another despatch, suggested that such permission is probably more desirable to be obtained for this place than any other. Great numbers of our people come here during the winter, a large proportion of whom are invalids, many with fatal diseases which terminate their

lives.

I have the honor to be, sir, with great respect, your obedient servant, A. K. BLYTHE.

Hon. John Appleton,
Assistant Secretary of State of the United States, Washington.

Memorandum accompanying a despatch, dated May 17, 1858, received from the United States Consul General at Havana.

It has long been the custom in Havana with masters of vessels to commute, or to make contracts with the proprietors of some hospital, for the medical attendance of the ships' company during their detention in port. These hospitals are situated on slight eminences, or or made land in low swamps at the borders of the bay, surrounded by marshes and stagnant water, and exposed to the action first handed of the most violent miasmas.

The deadly character of such places is too well known to need any description, and it should be understood, also, that from the unwhole-someness of the situation of these hospitals, and the numerous deaths consequent to that circumstance, the proprietors obtain a large part

of their profits—the profits of burying the dead.

The priests receive seven dollars and fifty cents for their ticket of admission of a dead body within the enclosure of the burying ground, the conveyance of the body costs one dollar, but if several bodies are ready at the same time, which is very common, the charge is less than one dollar each.

The vessel pays twenty-five dollars and fifty cents for each interment to the hospital, leaving a net profit on each one they can bury from their establishment of seventeen dollars.

If there are men who, from love of science or humanity, will use extraordinary efforts to save the life of a friendless, unknown sailor, and lose seventeen dollars by such efforts, they are not likely to be found in the lonely hospitals at these putrid swamps, remote from other habitations, and from all witnesses of the manner of treating, caring for, or of neglecting the unfortunate men prostrate and help-

less at the door of the grave.

Masters of vessels are also culpable by refusing medical assistance their men in season to be of any use to them. To save the expense to their men in season to be of any use to them. of a physician, they undertake the treatment of their sick, and boast of the large quantities of powerful medicines they give, as though skill in the treatment of yellow fever consisted in the use of substances which physicians unanimously condemn. By such means the patient is brought rapidly into the greatest danger, and it is common that physicians see patients on board vessels for the first time with black vomit or some other fatal symptom already established. These evils would be prevented by a law to require masters of vessels to pay into the consulate a certain sum as hospital money. The amount with which they voluntarily tax themselves and pay to different competitors would be sufficient to provide hospital accommodations in a healthy situation. Five dollars a man is the customary rate agreed for medical attendance during the time the vessel remains in port. Sailing vessels from Europe and from ports north of Cape Hatteras, that bring or take away cargoes, should pay five dollars for each person on the shipping articles; sailing vessels that enter and leave in ballast, not being in port over one week, and vessels that have been regular traders from ports south of Cape Hatteras for a period of six months preceding their last arrival, should pay two dollars and fifty cents for each person on their shipping articles; steamers that are in port less than one week, to pay one dollar and twenty-five cents for each person on the shipping articles. No charge whatever for expenses of interment, except what is actually paid.

This rate of paying for two years would place the hospital in a good state of organization, and after that time fifty per cent might be

deducted.

Being established in the name of some individual at the expense of the shipping interest, such individual should transfer all right and title in it to the consul for the time being, and to whoever shall be appointed to that office, or it might be conveyed in trust to any officer of the government of the United States, to remain for the use of the shipping. All of which is most respectfully submitted.

[No. 102.]

CONSULATE OF THE UNITED STATES, Havana, July 27, 1854.

SIR: Numerous complaints have been laid before me by shipmasters and others of the bad condition of the hospitals in this port, where

seafaring men must necessarily be sent when taken sick, as well as the manner in which such as have died are consigned to the grave.

There are two hospitals upon the harbor, which, although the charge the heavy rates of four dollars for a master, three for a man and two for a seaman before the mast, per day, do not afford, as a perience has shown, that treatment and care which the nature of the disease generally prevalent amongst seafaring men require.

As to the manner of burying corpses, it is sufficient to say that the are put into the grave without coffins, and very commonly a number of them are thrown into the same hole. The cost of burying a corp

in this manner is not under twenty-five dollars.

There are several other hospitals in this city, but their distant from the shipping render them of very little use to our seaman, me especially during the summer, which is the season when our seam are more liable to be taken sick suddenly.

This port is one of the foulest in the world, and where a great

number of sailors find their graves.

I feel it to be my duty to lay these facts before you, that the san if it is thought proper, be made known to Congress for the purpose obtaining a sufficient appropriation to establish a good hospital this harbor for our seamen, with a burying ground attached to it.

I have the honor to be, sir, with great respect, your obediant serva: WM. H. ROBERTSON,

Acting Consul.

Hon. WILLIAM L. MARCY,
Secretary of State of the United States, Washington.

CESSATION OF DIFFICULTIES IN UTAH.

MESSAGE

FROM THE

PRESIDENT OF THE UNITED STATES

BELATIVE TO

The probable termination of Mormon troubles in Utah Territory.

JUNE 10, 1858.—Ordered to be printed.

To the Senate and House of Representatives:

I transmit the copy of a despatch from Governor Cumming to the Secretary of State, dated at Great Salt Lake City, on the second of May, and received at the Department of State on yesterday. From this there is reason to believe that our difficulties with the Territory of Utah have terminated, and the reign of the Constitution and the laws has been restored. I congratulate you on this auspicious event.

I lose no time in communicating this information and in expressing the opinion that there will now be no occasion to make any appropriation for the purpose of calling into service the two regiments of volunteers authorized by the act of Congress approved on the 7th April last, "For the purpose of quelling disturbances in the Territory of Utah, for the protection of supply and emigrant trains, and the suppression of Indian hostilities on the frontier."

I am the more gratified at this satisfactory intelligence from Utah, because it will afford some relief to the treasury at a time demanding from us the strictest economy, and when the question which now arises upon every new appropriation is, whether it be of a character so important and urgent as to brook no delay, and to justify and require a loan, and most probably a tax upon the people to raise the money necessary for its payment.

In regard to the regiment of volunteers authorized by the same act of Congress to be called into service for the defence of the frontiers of Texas against Indian hostilities, I desire to leave this question to Congress, observing at the same time that, in my opinion, this State can be defended for the present by the regular troops which have not yet been withdrawn from its limits.

JAMES BUCHANAN.

WASHINGTON CITY, June 10, 1858.

EXECUTIVE OFFICE,
Great Salt Lake City, U. T., May 2, 1858.

SIR: You are aware that my contemplated journey was postponed in consequence of the snow on the mountains and in the cañons between Fort Bridger and this city. In accordance with the determination communicated in former notes, I left camp on the 5th, and arrived here on the 12th ult.

Some of the incidents of my journey are related in the annexed note, addressed by me to Colonel A. S. Johnston on the 15th inst.

"EXECUTIVE OFFICE, "Great Salt Lake City, U. T., April 15, 1858.

"Sir: I left camp on the 5th, en route to this city, in accordance with a determination communicated to you on the 3d inst., accompanied by Colonel Kane, as my guide, and two servants. Arriving in the vicinity of the spring, which is on this side of the 'Quaking Asp' hill, after night, Indian camp fires were discerned on the rocks overhanging the valley. We proceeded to the spring, and, after disposing of the animals, retired from the trail beyond the mountain. We had reason to congratulate ourselves upon having taken this precaution, as we subsequently ascertained that the country lying between your outposts and the 'Yellow' is infested by hostile renegades and outlaws from various tribes.

"I was escorted from Bear River valley to the western end of Echo canon; the journey through the canon being performed, for the most part, after night, it was about eleven o'clock p. m. when I arrived at Weber station. I have been everywhere recognized as the governor of Utah; and, so far from having encountered insults or indignities, I am gratified in being able to state to you that, in passing through the settlements, I have been universally greeted with such respectful attentions as are due to the representative of the executive authority of the United States in the Territory.

"Near the Warm springs, at the line dividing Great Salt Lake and Davis counties, I was honored with a formal and respectful reception by many gentlemen, including the mayor and other municipal officers of the city, and by them escorted to lodgings previously provided, the

mayor occupying a seat in my carriage.

Ex-Governor Brigham Young paid me a call of ceremony as soon as I was sufficiently relieved from the fatigue of my mountain journey to receive company. In subsequent interviews with the ex-governor he has evinced a willingness to afford me every facility which I may require for the efficient performance of my administrative duties. His course in this respect meets, I fancy, with the approval of a majority of this community. The territorial seal, with other public property, has been tendered me by William H. Hooper, esq., late acting secretary pro tem.

"I have not yet examined the subject critically, but apprehend that the records of the United States courts, territorial library, and other

public property, remain unimpaired.

"Having entered upon the performance of my official duties in this city, it is probable that I will be detained for some days in this part

of the Territory.

"I respectfully call your attention to a matter which demands our serious consideration. Many acts of depredation have been recently committed by Indians upon the property of the inhabitants—one in the immediate vicinity of this city. Believing that the Indians will endeavor to sell the stolen property at or near the camp, I herewith enclose the brand book (incomplete) and memoranda (in part) of stock lost by citizens of Utah since February 25, 1858, and two letters addressed to me on the same subject by William H. Hooper, esq., late acting secretary pro tem., which may enable you to secure the property and punish the thieves.

"With feelings of profound regret I have learned that Agent Hurt is charged with having incited to acts of hostility the Indians in Uinta valley. I hope that Agent Hurt will be able to vindicate himself from the charges contained in the enclosed letter from William H. Hooper, late secretary pro tem., yet they demand a thorough investi-

gation.

"I shall probably be compelled to make a requisition upon you for a sufficient force to chastise the Indians alluded to, since I desire to avoid

being compelled to call out the militia for that purpose.

"The gentlemen who are entrusted with this note, Mr. John B. Kimball and Mr. Fay Worthen, are engaged in mercantile pursuits here, and are represented to be gentlemen of the highest respectability, and have no connexion with the church here. Should you deem it advisable or necessary, you will please send any communications intended for me by them. I beg leave to commend them to your confidence and courtesy; they will probably return to the city in a few days. They are well known to Messrs. Gilbert, Perry & Barr, with whom you will please communicate.

"Very respectfully, your obedient servant,

"A. CUMMING, "Governor of Utah Territory.

"A. S. Johnston,
"Colonel of Cavalry, commanding Army of Utah,
"Fort Scott, U. T."

The note omits to state that I met parties of armed men at Lost and Yellow creeks, as well as at Echo cañon. At every point, however, I was recognized as the governor of Utah, and received with a military salute. When it was arranged with the Mormon officer in command of my escort that I should pass through Echo cañon at night, I inferred that it was with the object of concealing the barricades and other defences. I was therefore agreeably surprised by an illumination in honor to me. The bonfires kindled by the soldiers from the base to the summits of the walls of the cañon completely illuminated the valley and disclosed the snow-covered mountains which surrounded us. When I arrived at the next station I found the "emigrant road," over the "Big mountain," still impassable. I was able to make my way, however, down "Weber cañon."

Since my arrival I have been employed in examining the records of the supreme and district courts, which I am now prepared to report as being perfect and unimpaired. This will doubtless be acceptable information to those who have entertained an impression to the con-

trary.

I have also examined the legislative records and other books belonging to the office of the secretary of state, which are in perfect preservation. The property return, though not made up in proper form, exhibits the public property for which W. H. Hooper, late secretary of state, is responsible. It is, in part, the same for which the estate of A. W. Babbitt is liable, that individual having died whilst in the office of secretary of state for Utah.

I believe that the books and charts, stationery, and other property appertaining to the surveyor general's office will, upon examination, be found in the proper place, except some instruments, which are supposed to have been disposed of by a person who was temporarily in charge of the office. I examined the property, but cannot verify the matter, in consequence of not having at my command a schedule

or property return.

The condition of the large and valuable territorial library has also commanded my attention, and I am pleased in being able to report that Mr. W. C. Staines, the librarian, has kept the books and records in most excellent condition. I will, at an early day, transmit a catalogue of this library, and schedules of the other public property, with certified copies of the records of the supreme and district courts, exhibiting the character and amount of the public business last transacted in them.

On the 21st inst., I left Great Salt Lake City, and visited Tuilla and Rush valleys, in the latter of which lies the military reserve selected by Colonel Steptoe, and endeavored to trace the lines upon the ground from field notes which are in the surveyor general's office. An accurate plat of the reserve, as it has been measured off, will be found accompanying a communication, which I shall address to the

Secretary of War, upon this subject.

On the morning of the 24th instant, information was communicated to me that a number of persons who were desirous of leaving the Territory were unable to do so, and considered themselves to be unlawfully restrained of their liberty. However, desirous of conciliating popular opinion, I felt it incumbent upon me to adopt the most energetic measures to ascertain the truth or falsehood of this statement. Postponing, therefore, a journey of importance, which I had in contemplation, to one of the settlements of Utah county, I caused public notice to be given immediately of my readiness to relieve all persons who were, or deemed themselves to be aggrieved, and on the ensuing day, which was Sunday, requested the following notice to be read, in my presence, to the people at the Tabernacle:

" Notice.

"It has been reported to me that there are persons residing in this and in other parts of the Territory who are illegally restrained of their liberty. It is, therefore, proper that I should announce that I

assume the protection of all such persons, if any there be, and request that they will communicate to me their names and places of residence, under seal, through Mr. Fay Worthen, or to me in person, during my stay in the city.

"A. CUMMING, "Governor of Utah Territory."

I have since kept my office open at all hours of the day and night, and have registered no less than 56 men, 33 women, and 71 children, as desirous of my protection and assistance in proceeding to the States. The large majority of these people are of English birth, and state that they leave the congregation from a desire to improve their circumstances, and realize elsewhere more money by their labor. Certain leading men among the Mormons have promised to furnish them flour,

and assist them in leaving the country.

My presence at the meeting in the Tabernacle will be remembered by me as an occasion of intense interest. Between three and four thousand persons were assembled for the purpose of public worship; the hall was crowded to overflowing; but the most profound quiet was observed when I appeared. President Brigham Young introduced me by name as the governor of Utah, and I addressed the audience from "the stand." I informed them that I had come among them to vindicate the national sovereignty; that it was my duty to secure the supremacy of the Constitution and the laws; that I had taken my oath of office to exact an unconditional submission on their part to the dictates of the law. I was not interrupted. In a discourse of about thirty minutes' duration, I touched (as I thought best) boldly upon all the leading questions at issue between them and the general government. I remembered that I had to deal with men embittered by the remembrance and recital of many real and some imaginary wrongs, but did not think it wise to withhold from them the entire truth. They listened respectfully to all that I had to say-approvingly even, I fancied—when I explained to them what I intended should be the character of my administration. In fact, the whole manner of the people was calm, betokening no consciousness of having done wrong, but rather, as it were, indicating a conviction that they had done their duty to their religion and to their country. I have observed that the Mormons profess to view the Constitution as the work of inspired men, and respond with readiness to appeals for its

Thus the meeting might have ended. But, after closing my remarks, I rose and stated that I would be glad to hear from any who might be inclined to address me upon topics of interest to the community. This invitation brought forth, in succession, several powerful speakers who evidently exercised great influence over the masses of the people. They harangued on the subject of the assassination of Joseph Smith, junior, and his friends; the services rendered by the Mormon battalion to an ungrateful country; their sufferings on "the plains" during their dreary pilgrimage to their mountain home, &c. The congregation became greatly excited, and joined the speakers in their intemperate remarks, exhibiting more frenzy than I had expected

to witness among a people who habitually exercise great self-continuous A speaker now represented the federal government as desirous of nelessly introducing the national troops into the Territory, "whethe necessity existed for their employment to support the authority of civil officers or not;" and the wildest uproar ensued. I was further confirmed in the opinion that this people, with their extraording religion and customs, would gladly encounter certain death, rath than be taxed with a submission to the military power, which they a sider to involve a loss of honor.

In my first address I had informed them that they were entitled a trial by their peers; that I had no intention of stationing the arin immediate contact with their settlements, and that the militiposse would not be resorted to until other means of arrest had be tried and failed. I found the greatest difficulty in explaining the points, so great was the excitement. Eventually, however, the effort Brigham Young were successful in calming the tumult and storing order before the adjournment of the meeting. It is proper to I should add that more than one speaker has since expressed regret at having been betrayed into intemperance of language in presence.

The President and the American people will learn with gratifition the auspicious issue of our difficulties here. I regret the necess which compels me to mingle with my congratulations the announ

ment of a fact which will occasion grave concern.

The people, including the inhabitants of this city, are removed from every settlement in the northern part of the Territory. Troads are everywhere filled with wagons loaded with provisions a household furniture, the women and children, often without shoes hats, driving their flocks they know not where. They seem not or resigned, but cheerful. "It is the will of the Lord," and they reject to exchange the comforts of home for the trials of the wilderne Their ultimate destination is not, I apprehend, definitely fixed up "Going south" seems sufficiently definite for most of them, but make believe that their ultimate destination is Sonora.*

Young, Kimball, and most of the influential men have left the commodious mansions without apparent regret, to lengthen the letrain of wanderers. The masses everywhere announce to me that torch will be applied to every house, indiscriminately, throughout country, so soon as the troops attempt to cross the mountains. I st follow these people, and endeavor to rally them. Numbers whom have met appear to be in dread of the Indians, whom the distressed c dition of the whites has encouraged to commit extensive depredation I may at least quiet the apprehensions of these persons, and ind some of them to return.

Our military force could overwhelm most of these poor people, volving men, women, and children, in a common fate; but there

^{*}On the afternoon of Sunday last President Brigham Young is reported to have sp in the Tabernacle as follows:

[&]quot;I have a good mind to tell a secret right here; I believe I will tell it, anyhow. The there is a fine country down south there, Sowors is it? Is that your name for it? not speak of this out of doors, if you please."

among the Mormons many brave men, accustomed to arms and horses; men who would fight desperately as guerrillas, and, if the settlements are destroyed, will subject the country to an expensive and protracted war, without any compensating results. They will, I am sure, submit to trial by their peers, but they will not brook the idea of trials by "juries composed of teamsters and followers of the camp," nor of an army encamped in their cities or dense settlements.

I have adopted means to recall the few remaining Mormons in arms who have not yet, it is said, complied with my request to withdraw from the cañons and the eastern frontier. I have also taken measures to protect the buildings which have been vacated in the northern settlements. I am sanguine that I will save a great part of the valuable

improvements there.

I shall leave this city for the south to-morrow. After I have finished my business there, I shall return as soon as possible to the army, to complete the arrangements which will enable me, before long, I trust, to announce that the road between California and Missouri may be travelled with perfect security by teams and emigrants of every description.

I shall restrain all operations of the military for the present, which will probably enable me to receive from the President additional in-

structions, if he deems it necessary to give them.

Very respectfully, your obedient servant,

A. CUMMING, Governor of Utah.

Hon. Lewis Cass, Secretary of State, Washington City, D. C.

DEEPENING CHANNELS OF SOUTHWEST PASS AND PASS À L'OUTRE.

MESSAGE

FROM THE

PRESIDENT OF THE UNITED STATES,

TRANSMITTING

Copies of contracts for deepening the channels of Southwest Pass and Pass à l'Outre, at the mouth of the Mississippi river.

JUNE 12, 1858.—Ordered to be printed.

To the House of Representatives:

I transmit herewith a report from the Secretary of War, with the accompanying papers, in obedience to the resolution of the House of Representatives of the 2d of June, 1858.

JAMES BUCHANAN.

Washington City, June 11, 1858.

WAR DEPARTMENT, Washington, June 11, 1858.

SIR: I have the honor herewith to transmit copies of the contracts entered into between the United States and Messrs. Craig & Rightor for deepening the channels of the Southwest Pass and Pass à l'Outre, at the mouth of the Mississippi river, together with the report of the board of engineers appointed to examine the several proposals made therefor, and the reports of the officer superintending the work, with other correspondence relative to its progress under said contract; the same having been called for by a resolution of the House of Representatives of the 2d instant.

Very respectfully, your obedient servant,

JOHN B. FLOYD, Secretary of War.

The President of the United States.

Inspection report on the passes of Mississippi river, May 31, 1858, by Lieutenant Colonel Long, Topographical Engineers.

NEW ORLEANS, May 31, 1858.

SIR: During the last four weeks I have been almost constantly occupied in the inspection of the passes of the Mississippi, and of the works in progress for the removal of obstructions therefrom.

I take leave to report the result of my operations and inquiries

relating to these subjects.

Since my inspections in April and November, 1857, manifest changes have occurred in the depths of the channels leading across the tidal bars at the mouth of the Southwest Pass and of the Pass à l'Outre.

The depths in both passes have increased very materially since the dates of those inspections, as will be shown in the tabular synopsis hereinafter to be presented. The cause of these changes cannot be demonstrated with any degree of certainty. Those in the Southwest Pass may be attributed, in part, to the agency of the pile wing dam, constructed by Messrs. Craig & Rightor, while those in the Pass à l'Outre cannot have been produced in any degree by a similar cause, for they, no doubt, occurred prior to the commencement of operations in this pass by the said contractors above named.

The following synopsis will indicate the nature and extent of the more material changes that have taken place since November last:

Abstract of soundings in channel of Southwest Pass.

November, 1857.—18, 16, 17, 17, 17, 17, 17, 16, 16, 15, 15, 15, 16, 16, 16, 16, 16, 16, 15, 15, 15, 15.

May, 1858.—19, 19, 20, 21, 21, 21, 22, 21, 20, 21, 20, 19, 20, 22

21, 22, 22, 22, 21, 21.

November, 1857.—16, 16, 16, 16, 16, 16, 15, 15, 15, 15, 15, 15

15, 15, 15, 15, 15, 15, 16, 16, 16.

May, 1858.—21, 20, 20, 19, 20, 19, 18, 18, 19, 19, 19, 17, 18, 18, 19, 19, 18, 19, 19, 18, 19.

November, 1857. -15, 15, 15, 15, 16, 16, 16, 16, 16, 15, 15, 15,

15, 15, 16, 16, 17, 18, 19, 20.

May, 1858.—19, 19, 19, 20, 19, 19, 19, 19, 18, 18, 19, 19, 19, 20, 20, 18, 19, 19, 19, 20.

The soundings of the synopsis were made in the deepest channel of the pass, and through a distance of about one and a quarter mile from the site of the can buoy to the margin of the Gulf, but without any special regard to its width, direction, or straightness of courses On arriving at the crest of the tidal bar, about 200 yards from the Gulf, the main channel is divided into two narrow subordinate channels, respectively, of about equal capacity: one about 200 feet wide veering to the right or westward, and the other, about 150 feet wide to the left or eastward, which are separated from each other by a bar called the Middle Ground, composed of sundry mud lumps, which

divide the channels one from another, and on which the depths of water vary from 17 to 13 feet.

These obstructions cause the subordinate channels to diverge from each other at a point about 50 yards above the Middle Ground, and the deflections occasioned thereby divert both of these channels from

the requisite right line channel leading across the bar.

The head of the Middle Ground, as just intimated, is situated about fifty yards below the crest of the bar. The width of the main channel, as measured along the crest, is about five hundred feet, and the soundings of the crest or across the narrowest part of the channel, beginning on the east and terminating on the west side of the channel, at depths of fifteen feet below the surface of low water, are as follows, viz: 15, 18, 21, 20, 19, 19, 21, 21, 20, 21, 21, 18, 18, 17, 16, 15 feet.

From the various soundings exhibited as above, and from other operations, it is pretty evident that vessels drawing eighteen feet can pass freely across the tidal bar, whether outward or inward bound, without impinging against the bottom of the channel, but they cannot pursue a straight course to or from the Gulf by reason of the Middle Ground, above mentioned, at a considerable distance above the head of which they must sheer either to the right or left at considerable angles in order to keep clear of the Middle Ground and other obstructions. Moreover, the channels on both sides of the Middle Ground are quitenarrow, neither of them being more than two hundred feet in width.

In view of the foregoing considerations, it is apparent that the upper portions of the channel across the tidal bar, through a distance of about one and a quarter mile, viz., from the can buoy downward to the crest of the bar, requires widening and deepening in a very few places only, in order to answer the conditions of the modified contracts of Messrs. Craig and Rightor, in so far as relates to the opening of the channel of the Southwest Pass.

The opening of the residue of the channel, viz., from the crest of the tidal bar to the margin of the Gulf, about two hundred yards only in conformity to the stipulations of the contract, which call for a channel three hundred feet wide and eighteen feet deep, leading in a straight direction across the entire bar to the deep water of the Gulf, will require the reduction and removal of the Middle Ground, &c., described as above, to the depth of eighteen feet.

In connexion with the changes indicated by the soundings, &c., exhibited in the foregoing remarks, other changes and occurrences worthy of notice have taken place since my inspections of April and November, 1857. The principal changes, &c., last mentioned are,

briefly, as follows:

1st. The channel across the immediate crest of the bar has been transferred a considerable distance to the westward of the position occurried by it in the applies of 1857.

cupied by it in the spring of 1857.

2d. A mud lump on the easterly side of the old channel, which previously had a depth of eight feet on its summit, has recently risen to the height of about seven feet above the surface of the water.

3d. A mud lump near the westerly side of the contemplated new straight channel, and about one hundred and twenty yards below the crest of the bar in April, 1857, had a depth of ten feet at its summit,

but at the present time has a depth of only six feet, and appears to

still rising.

4th. The old east channel, leading across the line of the pile dand trending southeastward towards the Gulf, had a depth of al eight and a half feet across the bar in 1857, but the water upon it only now about half that depth. This change has obviously b produced in part, if not entirely, by the pile dam, which has undot edly contributed to the increase of the volume of water passing doward in the main channel of the pass.

5th. The main channel, in its passage across the entire tidal from the can buoy gulfward, has been gradually removing westw

during the last year.

6th. In February last the old can buoy (a hollow cylinder, m of boiler iron, anchored at the head of a shoal in the channel) was cidentally displaced and lost in the Gulf. A similar buoy, &c., since been procured by Captain Semmes, of the navy, and a stituted for the lost buoy in a position about 100 feet from that p viously occupied by the latter.

7th. Within the last year about two-thirds of the upper part of pile dam, viz: from the point A (see chart accompanying my instance tion report of December last) to the edge of the marsh above, ab 1,500 teet have been demolished. The lower portion of the dam, fr A to its lower end, 4,223 feet, has been ruptured in no less than

places by breaches ranging from 10 to 150 feet in width.

Notwithstanding the occurrence of these breaches, the struct which, unimpaired, contributed to check the current through the east channel mentioned in the 4th item, as above, and evidently or sioned the accumulations of mud in its wake, thus reducing the de

of water in that channel.

8th. Since the date of my inspection report of December I nothing has been done towards extending the pile dam or forming rones in the Southwest Pass. The water craft and other appara employed by the contractors remain as then reported. In March I the craft, &c., just mentioned, were removed from the Southwest Pa and are now employed in the construction of a pile dam in Pas I'Outre.

9th. The craft and machinery lately introduced into the Southw Pass for the purpose of deepening and widening the channel consist a large steam tug called the "Downs," formerly employed as a t

boat, one mud scow, one yawl, and one skiff.

The machinery, exclusive of the steam engine, boilers, &c., belowing to the boat, consists of two cast iron harrows, with scrapers, (consists of two cast iron harrows, with scrapers, (consists with the pass, in consequence of the breaking the chains with which it was manœuvred,) one set of dredging appratus, consisting of two semicircular buckets of a capacity to continue three cubic yards in both, together with a large beam to which the buckets are attached, chains and other tackle, anchors, &c., adapte to the working of the boat and machinery.

When in fair and full operation, the buckets are lifted to the surfi of the water, charged to overflowing with compact mud scooped fr

the mud lumps at the bottom of the channel.

The excavated mud is so compact and adhesive that it will often remain in the buckets, even with their discharging hatches open, till they rise to the surface of the water. The dredging done in this way, all things being favorable, amounts to three cubic yards in six to eight

minutes, or about 251 cubic yards per hour.

10th. Navigable currents leading across the bar, and especially their great rapidity during the lower stages of the tide, render it extremely difficult to guide a steamer or even a yawl to the points where dredging is required. The successive steps to be taken in prosecuting the work of dredging, are: 1st, to discover the point, position, or mud lump at which dredging must be done; 2d, to anchor the dredge-boat at a proper distance above the place to be dredged, with a length of cable sufficient to allow the boat to drop below the place; 3d, to dredge upon or against the current till the dredge buckets are filled; and lastly, to drop below the place and empty the buckets in deep water.

11th. The following manner of operations has been found equally efficacious, viz: to anchor the boat as before, and then dredge with open buckets, cutting away the tops of the mud lumps, &c. The hard crust of the lumps being thus ruptured, the mud detached from them becomes exposed to the abrasions of strong currents and the buffettings of the Gulf billows, and is soon reduced again to an im-

palpable alluvion and is washed away.

12th. The method of reducing the mud lumps by the use of a massive harrow of cast iron, armed with teeth on its sides and a scraper at its aft transom, was tried successfully for a about two weeks, but accidentally the drag chains by which it was worked failed, and the harrow was lost in the pass.

13th. The dredge buckets were substituted instead of the harrow after the accident above noticed, and proved more manageable and efficacious

in scalping the mud lumps than the harrow.

On the 7th inst., and under a conviction that the condition of the Southwest Pass justified the proceeding, I prepared and forwarded to the bureau a brief report, of which the following is a copy, viz:

"Southwest Pass, May 7, 1858.

"Sin: Having very recently inspected the work done at this pass under the modified contract of Messrs. Craig & Rightor, for the removal of obstructions therefrom, I have the honor to report briefly thereon as follows, viz:

"The dredge-boat 'Downs,' previously used as a tow-boat on the Mississippi, below New Orleans, was procured and furnished with appropriate dredging apparatus, consisting of harrows, rakes, scrapers, &c., &c., all of approved dimensions and construction, in the months

of February and March last.

"The outfit, as above, having been completed, the boat commenced operations on the tidal bar on the 22d day of March, and continued to operate successfully during a period of about three weeks, with occasional interruptions and hindrances by boisterous weather. The operations have been continued with similar success and even to greater advantage than had been anticipated to the present time, the interruptions and hindrances from stress of weather having been more frequent and formidable than before during the last three weeks.

"In addition to the employment of the boat and dredging appars as above, the blasting of the mud lumps at the bottom of the charwith heavy charges of powder has been successfully tried, and results produced thereby have been highly satisfactory. In vof the whole case, I am decidedly of the opinion that the measur relief contemplated in my report to the bureau of the 25th of Febru last may be fairly extended to the contractors, to wit: the payn of \$30,000 as the first instalment therein contemplated to be pand although the time for the payment of the second instalmer \$36,000 has not yet elapsed, I am, moreover, of the opinion, in vof the advancement made towards the fulfilment of the first branc the contract, viz: the opening of the channel, that this latter instalment may also be paid without detriment to the United States.

"Respectfully, sir, your obedient servant.

"S. H. LONG,

" Lieut. Col. Topographical Engineer

"Colonel J. J. ABERT,

"Chief Topographical Engineers, Washington, D. C."

"P. S.—It is expected that the work under the first branch of contract for the Southwest Pass, relating to the opening of the chain this pass, will be ready for final inspection in the course of a weeks, the weather continuing favorable.

"S. H. LONG, U. S. A.

The mud lumps, which are the most serious and formidable structions in the way of navigation, invariably rise and present th selves at or above the surface of the water, along the crest of the t bar, or between the crest and the open Gulf. In consequence. outflow of the Mississippi passes off through the openings betw the lumps in greater or less volumes, according to the width depth of the openings. Hence, the multiplicity of the passes through which the waters of the Mississippi are discharged The lumps commenced, and continue to rise, so long as the water, gases, d confined beneath their crusts or coverings retain a specific grav less than that of the water by which they are surrounded, and e salt water, fine mud, gases, &c., at their summits, till the supp of these light and levigated materials are exhausted; after which the lumps gradually subside, and become components, in part, of marshy ground through which the several passes convey their was

By cutting away the summits of these lumps, and reducing thickness of their crusty coverings, the discharge of their light materiand the reduction of their substance are materially accellerated. I process of blasting with heavy charges of gunpowder (50 to 150 200 pounds to the charge) has been tried, and the result produced proved satisfactory. A torpedo, charged with fifty pounds of powd has been exploded at a formidable mud lump on the easterly side the channel, near the margin of the Gulf, which, after reducing the lump, occasioned a copious and violent ebullition of gases, &c., whereontinued at least twenty minutes from and after the explosion.

The experiment, as above, would have been repeated, but the un vorable state of the weather and other untoward circumstances he prevented the repetition. This mode of operating upon the mud lum

and upon the hard bars, not only of the Southwest Pass, but upon those of Pass à l'Outre, is intended to be introduced generally, and is relied upon as the most effectual and economical means of removing the

obstructions occasioned by impediments of this sort.

The examinations of the Southwest Pass were conducted by the aid of numerous line soundings, in the direction and within the limits of the proposed new channel; and still many more random soundings were made within and at the sides of the same channel. The soundings were as follows, viz: On the 7th of May, two lines were sounded along the centre of the channel, from the can buoy to the Gulf; the depths ranging from twenty-three to eighteen feet.

On the 8th, the forces on the dredge boat were employed in repairing an accident, which occasioned the breaking of the hoisting chains of the dredging apparatus; a stronger chain was substituted. In the meantime, Captain Johnson, with his boatmen and skiff, aided me in making numerous random soundings in the extensive water field, situated above the crest of the tidal bar, the depth ranging from twenty-

two feet to two feet.

On the 9th, this being Sunday, and the weather stormy, nothing was done on the work.

On the 10th, the weather continued windy and rainy through the

day; operations were again suspended.

On the 11th, made numerous random soundings on the bar and Middle Ground, between the crest and the Gulf, and for the most part within the channel way; the depths ranging from twenty-six to fifteen and a half feet.

On the 12th, sounded across the channel at the crest of the bar, the depths ranging from nineteen and a half to seventeen and a half feet. The most formidable obstructions in the channel way are included within an area of 100 by 200 yards, embracing the Middle Ground, and situated between the crest and the Gulf. Within this area are four mud lumps, partially reduced, which are the only obstructions to be removed. On the same day made two series of line soundings and numerous random soundings below the crest in the channel way, the depths of the latter varying from twenty-seven to seventeen feet.

On the 13th, made four series of line soundings, the depths varying from twenty-two to eighteen feet; also numerous random soundings between the can buoy and the crest, and between the crest and the

Gulf, the results being similar to those of the 11th and 12th.

On the 14th, made two series of line soundings, the depths in

almost every instance exceeding eighteen feet.

On the 15th, made two series of line soundings, the results continuing equally favorable; also numerous random soundings on the Middle Ground and its lumps, the results gradually becoming more favorable.

On the 16th and 17th, the weather being unfavorable for work in the Southwest Pass, we proceeded to Pass à l'Outre and returned.

On the 18th, I proceeded to New Orleans for duties there.

On the 25th, I returned to the Southwest Pass, and resumed my examinations; made four series of line soundings in the channel, between the can buoy and the Gulf, the depths ranging from twenty-

two to seventeen feet, and obviously becoming more favorable than before; also made more than 300 random soundings in the new channel

way below the crest of the bar.

On the 26th, made two series of line soundings, 300 feet apart, for the purpose of determining the width of the channel and its depth at the sides thereof, the depths at the sides varying from 22 to 17 feet. These soundings did not appear sufficiently reliable, by reason of the deviations from the channel, occasioned by the force of the winds, the passing of tow-boats, and the action of water currents. We also made, on the same day, more than 130 soundings in the channel way below the crest of the bar, the depths varying from 26 to 17½ feet, and the weather continuing unfavorable through the day.

and the weather continuing unfavorable through the day.

On the 27th, the weather being rainy and somewhat boisterous, we proceeded to Pass à l'Outre and returned. In the atternoon, the weather becoming more favorable, we resumed our measurements of the width and depth of the channel, but were again unsuccessful, being interrupted by the passage of tow-boats and the roughness of the water below the crest of the bar. The results obtained were similar to those of yesterday. Many random soundings were also made this

day.

On the 28th, repeated the line soundings for determining the width of the channel, the weather being more favorable, and the observations being more carefully made than those of the two preceding days; the results of the line soundings will be presented in the sequel, under the head of "Tidal inspection of the channel," &c. Moreover, we made 575 random soundings in the channel way at and below the crest of the bar, the depths varying from 25 to 18 teet, the tide at the time being about three inches below the surface of ordinary low water.

On the 29th, I prepared and forwarded to the Topographical Bureau a report, of which the following is a copy:

"New Orleans, May 29, 1858.

"Sin: Two telegraphic despatches, one of which is in duplicate, have been received from the Topographical Bureau, one dated on the 22d and the other on the 26th instant, both relating to the payment of the instalments proposed in my report of the 25th February last. The

receipt of both has been duly acknowledged.

"I have the honor to report that, on a thorough inspection of the channel, and of the work done under the modified contract of Messrs. Craig & Rightor, for the removal of the obstructions from the mouth of the Southwest Pass, made and concluded on the 28th day of May, 1858, a straight channel has been opened entirely across the tidal bar, having a width of at least 300 feet, and a depth of 18 to 22 feet. The direction of the channel, from its head, near the can buoy, to its entrance into the deep water of the Gulf, is south 25° west.

"The opening of the channel has undoubtedly been effected, in part, by the work that has been done under the contract, and in part by the agency of the water currents in the pass, and by other natural causes.

"Hence, in accordance with the stipulations of the modified contract, in

so far as they relate to the opening of the channel in the Southwest Pass, the compensation to be made for the opening thereof, viz: one hundred and twenty-five thousand dollars, (\$125,000,) all payments being included, is now payable to the contractors.

"Moreover, the first branch of the contract being fulfilled, as above, the stipulations for keeping open the channel, as provided for in the same contract, will go into operation, and remain binding on the con-

tractors from and after the 28th of May, 1858.

"All necessary details relating not to the improvement of the Southwest Pass, but to that of Pass à l'Outre also, will be presented in my inspection report, which will be prepared and forwarded as soon as practicable.

"Respectfully, sir, your obedient servant,

"S. H, LONG, "Lt. Col. T. E.

"Col. J. J. ABERT, "Chief Top'l Eug'rs, Washington, D. C."

Final inspection of the channel of the Southwest Pass, as opened under the modified contract of Messrs. Craig & Rightor, in a straight direction (S. 25° W.) from the can buoy, across the tidal bar to the

open Gulf, agreeably to said contract.

Having made numerous line soundings within the channel, and countless random soundings within and near said channel, the latter for the most part having been made between the crest of the tidal bar and the open Gulf, within an area of 300 feet in width by 600 in length, we proceeded to the execution of more careful soundings and other observations for determining the width and depth of the channel opened as above, in the fulfilment of the first branch of the contract, which relates exclusively to the opening of said channel.

The means and appliances employed in determining the width and

depth of the opened channel were as follows, viz:

1. The steamer Downs, which was conducted downward into the

centre of the channel, floating with the current.

2. Two skiffs, manned with two oarsmen and one experienced leadsman in each, floating downward pari passu with the steamer, and connected to the latter by a line 300 feet long, stretching across its bow, and kept straight and above the surface of the water by rowing the skiff outward and downward in a manner to keep the line taut and square across the steamer.

3. The leadsmen were required to sound at both extremities of the

line, and to call out the soundings in a loud and distinct voice.

4. The soundings thus proclaimed were at once recorded in a note book kept by Captain William Johnson, my acting assistant. These operations were commenced on the 27th instant, but the results produced thereby proved unsatisfactory, by reason of a strong breeze, by which the surface of the pass was too much ruffled to admit of reliable observations.

On the 28th, the day following, the operation was resumed, the weather and other circumstances being much more favorable than before. The results on both occasions were similar, but those obtained

on this day were far more reliable. The latter are presented in the following synopsis:

Soundings at the easterly and westerly margin of the improved channel. Easterly margin.—18, 18, 18, 18, 19, 19, 18, 19, 19, 18, 19, 19, 19, 19, 19.

19, 19.

Easterly margin.—19, 20, 19, 19, 19, 19, 19, 20, 20, 20, 21, 21, 21, 20, 22, 21, 22, 22.

19, 19, 19, 19, 18.

Easterly margin.—23, 21, 21, 20, 21, 20, 21, 21, 19, 20, 20, 21, 21, 21, 21, 21, 20, 19, 19, 18, 22, 26.

Westerly margin.—19, 19, 19, 19, 19, 19, 19, 19, 19, 18, 19, 18,

18, 18, 19, 19, 23, 24, 18, 24.

In order to render the accuracy of the 4th sets of soundings presented near the end of the tabulation, which were much affected by the Gult billows, more than 500 random soundings were made with the utmost care, within and along the margins of the channels, (and all within the limited area of 300 by 600 feet, which embraces the sites of the four mud lumps before mentioned, all of which have been reduced by the agency of the bucket scrapers of the Downs) for the purpose above mentioned, viz., the verification of the accuracy of the channel soundings. The random soundings just mentioned varied from 28 to 18 feet, no depth indicated thereby being less than 18 feet.

The stage of water at which the soundings, as above, were made, was, as nearly as was practicable to ascertain, about three inches below mid-lunar tide, (viz: tides unaffected by winds.) This stage is rather below "ordinary low water," as inferred from a protracted series of observations by tide gauges prepared under my direction.

Hence, I have come to the conclusion that a straight channel 300 feet wide and 18 feet deep is now open entirely across the tidal bar of the Southwest Pass to the open Gulf, and that the stipulated payment of \$125,000, agreeably to the modified contract of Messrs. Craig & Rightor for opening said channel, is now due to them, jointly, as one of the parties of said contract.

I have also come to the conclusion that the other branch of the contract, which relates to the *keeping open* of the said channel in the Southwest Pass, is operative and binding upon the above named con-

tractors from and after the 28th day of May, 1858.

Abstract of soundings in channel of Pass à l'Outre.

April, 1857.—16, 15, 14 13.

May, 1858.—18, 18, 17, 17, 17, 17, 18, 16, 17, 18, 17, 17, 16, 17, 17, 17, 17, 16, 15, 15, 16, 16.

April, 1857.—12, 12, 12, 13, 12.

May, 1858.—16, 15, 16, 17, 16, 16, 16, 15, 16, 17, 17, 16, 15, 16, 15, 16, 17, 16, 16, 15, 15.

April, 1857.—14, 18, feet.

May, 1858.—18, 16, 18, 19, 18, 19, 20, 23, 24, feet.

The channel soundings made in May, as above, were commenced at a point a few hundred feet below the Pass à l'Outre light-house, and continued thence downward about 1½ mile to the open Gulf. No continuous soundings were made in the channel in April, 1857, while those exhibited in the tabular synopsis are taken from mere random soundings made on the tidal bar in that month. The soundings then made have been inserted, as nearly as practicable, in a manner to coincide with the soundings of the current months, which have been se-

lected from four distinct times of soundings.

The main channel trends downwards in a direction about south 85° west, by the compass. That portion of it requiring improvement passes over a broad shoal, on which the present depth of water is nowhere less than 15 feet, except on a spit or sort of middle ground of considerable size, the head of which is about 100 yards from the Gulf, and on which the depth, in places, does not exceed 12 feet. channel to be improved may pass either on the northerly or southerly side of the spit without materially affecting the course above given, or it may pass through the spit, should the contractors, on a careful examination, prefer to open the channel by this route. As before intimated, the distance through which, under existing circumstances, the opening of the channel must be carried is about half a mile. excavations required, therefore, will amount to about 50,000 cubic Hence, the work remaining to be done in this pass, under the modified contract, will undoubtedly occupy a much longer period than that allowed for its fulfilment.

The head of the channel to be opened commences about 600 yards below the light-house, and extends downward across the tidal bar to the deep water of the Gulf, through a distance of $1\frac{1}{4}$ mile, as above stated. Between the light-house and the head of the new channel, or commencement of the tidal bar, the old channel is some 8 or 9 hundred feet wide, and has a depth everywhere exceeding 18 feet.

From this point downward the volume of water from above spreads over a broad shoal, including the Middle Ground, before noticed, (on which last the depth is only 18 feet,) and passes off to the Gulf with the depths indicated by the soundings recorded in the table for the

month of May.

Early in April last Messrs. Craig & Rightor commenced the formation of a pile dam at a point about 120 yards below the light-house, and had extended it, at the time of my late inspection, on the 17th instant, through a distance of one hundred yards. Its direction is about south 70° east, converging towards the main channel at its mouth.

The examination of this pass was repeated on the 27th instant, and line soundings were again made in four distinct series, mostly within or near the route contemplated for the new channel. From these soundings, and from those also made on the 17th instant in the same pass, the following synopsis is prepared, from which it may be perceived that some improvement has taken place in the capacity of the channel within the ten days elapsed, as above.

Abstract of soundings made in Pass à l'Outre on the 17th and 27th May.

May 17, 1858.—18, 18, 17, 17, 17, 17, 17, 18, 16, 17, 18, 17, 17, 16, 17, 17, 17, 17, 16, 15, 15, 16, 16.

May 27, 1858.—19, 18, 18, 17, 18, 18, 17, 18, 17, 17, 17, 16, 17,

17, 17, 17, 17, 17, 17, 17, 17, 17, 17,

May 17, 1858.—16, 15, 16, 17, 16, 16, 16, 15, 16, 17, 17, 16, 15, 16, 16, 16, 17, 16, 16, 15, 15.

May 27, 1858.—16 15, 16, 17, 17, 17, 17, 15, 16, 17, 17, 16, 16,

16, 16, 17, 17, 16, 17 15, 16.

May 17, 1858.—18, 16, 18, 19, 18, 19, 19, 23, 24, feet. May 27, 1858.—17 16, 18, 18, 18, 18, 19, 21, 23, feet.

The work done on the dam since the 17th instant consists merely in the repairing of a breach formed at the head of the dam more than 100 feet in extent. On the 27th the breach appeared to have been thoroughly repaired, and the contractors were about to engage in the further extension of the dam.

In order to expedite the opening of the channel, the contractors propose to adopt the method of blasting by the use of torpedoes charged with gunpowder. In this way they will be likely to accomplish the object more effectually and economically than by persevering in the construction of pile dams, the utility and especially the stability of which are questions not yet satisfactorily answered.

Agreeably to the statements of the contractors, the materials they now have on hand ready for use consist of 500 square piles, 118,000 superficial feet of plank pilings, and 5,000 pounds of iron, in bolts

and bars.

Their large pile boat, "Fanny Fern," has been lying by for repairs in the Southwest Pass for more than two weeks, and still remained unemployed on the 28th instant. In the meantime their smaller pile boat, the "Little Fanny," has been daily employed in repairing the breach in the dam.

On the 31st instant I received a communication from Messrs. Craig

& Rightor, of which the following is a copy:

"New Orleans, May 31, 1858.

"DEAR SIR: In consequence of all our energies having been directed to opening of the Southwest Pass, at the mouth of the Mississippi river, we have not progressed with the work at Pass à l'Outre as we confidently expected; and as the time of contract for the Pass à l'Outre will expire on the 1st July next, we have made application to the War Department for an extension of the time of said contract until 1st of June, 1859, confidently believing that we will be enabled to finish the work at an earlier date.

"We will be glad to know whether the extension asked for by us

meets your approval.

"Very respectfully, your obedient servants,

"CRAIG & RIGHTOR.

"Col. Long."

My answer to the foregoing communication is as follows:

"New Orleans, May 31, 1858.

"Gentlemen: I am in receipt of your application of this date for a further extension of the period of your modified contract for the removal of obstructions from the channel across the tidal bar at the mouth of Pass à l'Outre from the 1st of July next to the 1st June, 1859.

"Being fully convinced that the work provided for in said contract cannot be accomplished within the period of the last extension granted, viz: to the 1st of July next, I cheerfully commend the application made, as above, to the favorable consideration of the War Department.

"Respectfully, gentlemen, your obedient servant,

"S. H. LONG, "Lieutenant Colonel T. E.

"Messrs. CRAIG & RIGHTOR, "New Orleans, La."

In conclusion, I take leave to observe that I know of no duties that now require my longer sojourn either at New Orleans or the passes, and that I purpose to return to St. Louis by an early conveyance.

Respectfully, sir, your obedient servant,

S. H. LONG, Lieutenant Colonel T. E.

Col. J. ABERT, Chief Topographical Engineers, Washington, D. C.

LAWS OF THE UNITED STATES.

Laws passed at the first session of the thirty-fourth Congress of the United States of America.

(Public, No. 33.)

AN ACT to remove obstructions to navigation in the mouth of the Mississippi, river at the Southwest Pass and Pass à l'Outre.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the opening and keeping open ship channels of sufficient capacity to accommodate the wants of commerce through the Southwest Pass and Pass à l'Outre, leading from the Mississippi river into the Gulf of Mexico, the sum of three hundred and thirty thousand dollars be, and the same is hereby, appropriated, to be paid out of any money in the treasury not otherwise appropriated. and to be expended under the superintendence of the Secretary of War.

SEC. 2. And be it further enacted, That it shall be the duty of the Secretary of War to apply said moneys to the opening and keeping open of the aforesaid ship channel, by contract, and at an early day

in the next session of Congress to report the progress of the work, the amount necessary to complete it, and an estimate of the annual cost of keeping said channels open, and any contract made shall be limited to the amount hereby appropriated.

IN THE SENATE OF THE UNITED STATES, July 7, 1856.

The President of the United States having returned to the Senate, in which it originated, the bill entitled "An act to remove obstructions to navigation in the mouth of the Mississippi river, at the Southwest Pass and the Pass à l'Outre," with his objections thereto, the Senate proceeded, in pursuance of the Constitution, to reconsider the same, and

Resolved, That the said bill do pass, two thirds of the Senate agree-

ing to pass the same.

Attest:

ASBURY DICKINS, Secretary of the Senate.

IN THE HOUSE OF REPRESENTATIVES OF THE UNITED STATES July 8, 1856.

The House of Representatives having been notified by the Senate that the bill entitled "An act to remove obstructions to navigation in the mouth of the Mississippi river, at the Southwest Pass and the Pass à l'Outre," had been returned by the President, with his objections, to the Senate, in which it originated, and that the Senate having proceeded, in pursuance of the Constitution, to reconsider the same, had "Resolved, That the said bill do pass, two-thirds of the Senate agreeing to pass the same," the House of Representatives proceeded. in pursuance of the Constitution, to reconsider the said bill, and

Resolved, That the said bill do pass, two-thirds of the House of

Representatives agreeing to pass the same.

Attest:

WM. CULLOM,
Clerk House of Representatives.

Proposals for deepening the outlets of the Mississippi river into the Gulf of Mexico.

Engineer Department,
Washington, August 4, 1856.

Proposals will be received at this office, until the 1st day of October next, for "opening and keeping open ship channels, of sufficient capacity to accommodate the wants of commerce, through the Southwest Pass and Pass à l'Outre, leading from the Mississippi river into the Gulf of Mexico," for which purpose there was appropriated, by act of Congress of 8th of July 1856, three hundred and thirty thousand dollars.

Bidders are requested to state the amount for which they will contract to open each of the channels specified, throughout a well defined

width of three hundred feet, to a depth of not less than eighteen feet below the level of ordinary low water, which level will be determined by a bench-mark on the shore, to be established by an officer or officers appointed by the Secretary of War; and they are also requested to state the longest period of time for which they will contract to keep each channel open to such width and depth for the residue of the appropriation, after the amount of their bid for opening, if accepted, is paid, and to state also, in separate proposals, the same particulars for opening and keeping open each channel to a uniform depth of not less than twenty feet throughout a well defined width of three hundred feet.

The means by which it may be proposed to accomplish the work, and the least time necessary for opening the channels, must be stated

in the proposal for each depth.

The right to accept the offer which, in the opinion of the Secretary of War, proposes the best method of accomplishing the object contemplated, and to accept either proposal of any bidder for either of the passes, to the exclusion of the proposals of the same bidder for the

other pass, is reserved.

above specified.

The quantity of matter necessary to be removed from the existing channels at the passes to be deepened, or the distance along either channel to which the work must extend, in order to obtain either of the specific depths, cannot, for want of accurate information as to their present condition, be stated. Persons who desire to undertake the work are expected, therefore, to inform themselves of its extent and

of the best means of accomplishing it.

After a contract has been entered into, the place and direction of the channels to be opened will be designated to the contractor by an officer or officers appointed for that purpose by the Secretary of War, and the amount which may be agreed upon for opening each will be paid after each has been completed, and found, upon examination by an officer or officers, appointed as above, to be conformable in all respects to the stipulations of the contract; but no payment will be made on account of any work done toward opening either channel until after such channel shall have been completed, examined, and approved, as

At the expiration of one-third of the time during which the channels are to be kept open, eighty per cent. of one-third of the whole amount of the contract for keeping open will be paid; at the expiration of two-thirds of the time an additional payment of one-third of the whole amount contracted for will be made; and at the expiration of the whole time during which the channels are to be kept open, the twenty per cent. retained at the first payment and the remaining third of the whole amount of the contract for keeping the channels open will be paid; but no payment will be made until after the channels have been examined, at each period of payment, by an officer or officers appointed by the Secretary of War, and found to be in all respects conformable to contract.

Proposals must be accompanied by evidence of ability to execute the work in the way and within the time proposed, and should be addressed to the "Engineer Department, Washington," and endorsed "Proposals for opening channels at outlets of the Mississippi rivex."

When the time within which proposals are to be received has expired, they will be opened and considered, and a contract will be entered into with the bidder or bidders whose plan of operations and evidences of ability to execute the work are most satisfactory to the Secretary of War.

Accounts for advertising, with two copies of paper containing ad-

vertisement, to be sent to engineer department for payment.

Engineer Bureau, Washington, October 3, 1856.

In pursuance of the orders of the Hon. Jefferson Davis, Secretary of War, dated the 2d of October, 1856, a board, consisting of Major W. H. Chase, corps of engineers, Captain A. H. Bowman, corps of engineers, Captain A. A. Humphreys, corps of topographical engineers, and Captain H. G. Wright, corps of engineers, assembled in this bureau to-day, and took "into consideration the offers received for opening and keeping open ship channels through the Southwest Pass and Pass à l'Outre, leading from the Mississippi river to the Gulf of Mexico."

The board admitted the presence of the representatives of Messrs. Craig & Rightor and of the New Orleans Towboat Association, for the purpose of receiving such explanations in relation to their respective bids and modes proposed to execute their work as they might desire to make. Neither Messrs. W. E. Stark & Co., the remaining bidders, nor their representatives, presented themselves.

The members of the board, after hearing the explanations of the parties present, and after conference amongst themselves, arrived at

the following conclusions:

1st. That the bid of W. E. Stark & Co. should be rejected as not fulfilling the requirements of the engineer department in its advertisements for proposals for deepening the outlets of the Mississippi river into the Gulf of Mexico, dated August 4, 1856, insomuch as the bid of the said W. E. Stark & Co. was unaccompanied "by evidence of ability to execute the work in the way and within the time

proposed."

and the state of t

2d. That the bid of the New Orleans Towboat Association for deepening the channel through the South Pass to eighteen feet should be accepted for the sum of one hundred and twenty-five thousand doldollars, and for keeping open such channel at the rate of seventy-five thousand dollars per annum; there being no question as to the practicability and efficiency of the modes by which the bidders propose to execute their work." Satisfactory evidence to this point being afforded of their ability to enter at once upon the work proposed, seeing that they have on hand powerful steamboats and other machinery to enable them to do so, and of the fact of a similar work having been achieved by them at the same locality, by contract with the United States in the year 1853, the board are of opinion that the acceptance of the bid of the New Orleans Towboat Association will secure the opening of a ship channel of sufficient capacity in the shortest possible

time necessary, to accommodate the wants of commerce, through the Southwest Pass.

3d. That the bid of Messrs. Craig & Rightor, for deepening the channel through the Pass à l'Outre, should be accepted for the sum of one hundred and twenty-five thousand dollars, and for keeping such channel open at the rate of forty thousand dollars for five years, for the purpose of enabling the bidders by actual experiment to prove the practicability and efficiency of the modes by which the bidders propose to do their work.

The board have great doubts of the practicability and efficiency of this mode—of the practicability of construction and of efficiency, should the work be accomplished. But an important point will have been ascertained either by its failure or success. If failure is exhibited, future projects on this score would at once be rejected. If success is exhibited, two reliable modes for future improvement will have been obtained: the one by dredging, scraping and raking, and the other by closing passes and increasing current, or by jettees; and one or the other, or both, maintained as the value of their several results may be determined.

Messrs. Rightor & Craig submitted to the board a letter addressed to the honorable Secretary of War, calling their attention to certain stipulations and requirements of the act of Congress, July 8, 1856, to remove obstructions to navigation in the mouths of the Mississippi river, at the Southwest Pass and Pass à l'Outre, and of the advertise-

ment of the engineer department, dated August 4, 1856.

Considering the points stated in this letter, the board are of the opinion that the bids of the New Orleans Towboat Association, as well as those of Messrs. Rightor & Craig, are entirely within the requirements of the act of Congress and of the advertisement inviting offers to be made under it. Each of the bidders have stated precisely the longest period of time for which they will contract to keep open each channel to such width and depth for any residue of the appropriation. The Messrs. Craig & Rightor offer to keep the channel open for five years. The New Orleans Towboat Association offer indefinitely on this score at \$75,000 per annum.

The advertisement expressly reserves the right on the part of the Secretary of War to accept any offer which, in his opinion, proposes the best method of accomplishing the object contemplated, and to accept either proposal of any bidder for either of the passes, to the exclusion of the proposals of the same bidder for the other pass.

Respectfully submitted.

WM. H. CHASE,

Major of Engineers.

A. H. BOWMAN,

Captain of Engineers.

A. A. HUMPHREYS,

Capt. Topographical Engineers.

H. G. WRIGHT,

Captain of Engineers.

Hon. JEFFERSON DAVIS, Secretary of War. H. Ex. Doc. 139——2

WASHINGTON, October 4, 1856.

SIR: I have the honor to enclose herewith the report of the board of officers appointed by your order of the 2d October, 1856, to take into consideration certain offers for the improvement of the passes of the Mississippi.

I enclose herewith the letter of Messrs. Craig & Rightor, addressed

to the Secretary of War, with the papers accompanying it.

I have the honor to be, sir, very respectfully, your obedient servant, WM. H. CHASE.

Maj. of Engineers, Chairman of Board.

Hon. JEFFERSON DAVIS, Secretary of War.

WAR DEPARTMENT, October 4, 1856.

If the mode proposed by Messrs. Craig & Rightor to open and keep open the passes of the Mississippi is sufficiently feasible to justify a contract with them for the Pass à l'Outre, as recommended by the board, it is not perceived upon what ground their bid for the Southwest Pass should be rejected, since they propose likewise to open and keep open that pass for a less sum than any other bidder. their plan be successful, the appropriation will suffice, on the terms they propose, to secure for five years a depth of twenty feet in both If their plan should prove impracticable, the experience of five or six months will probably demonstrate that fact; and if it should then be necessary to resort to other methods by new contracts, the delay could not be very injurious to the commerce of New Orleans, as the period, December 1, 1857, at which the preferred bidder for the Southwest Pass proposes to complete the channel of eighteen feet depth, is so remote and occurs so late in the season of trade at New Orleans, that the character of vessels destined for that port would scarcely be changed before the succeeding season. Neither is it bebelieved, should it be necessary to make new contracts, that any loss would be sustained by inviting new bids, as those now presented for the execution of the work by tried means are not sufficient, by any combination which can be made of them, to open the passes and keep them open for one year.

The bid of Messrs. Craig & Rightor will, therefore, be accepted for both passes, due care being taken, by the terms of the contract, to insure the prompt commencement and steady progress of the work, and sufficient guarantees will be required that the channels will be kept

open for the whole period of five years.

JEFF'N DAVIS, Secretary of War.

Washington, October 3, 1856.

SIR: We beg leave, very respectfully, to call your attention to the following propositions with reference to proposals for opening certain outlets of the Mississippi river.

The fund appropriated by the act of July 8, 1856, is to be applied to the Southwest Pass and Pass à l'Outre, and not to either, to the

exclusion or neglect of the other.

The appropriation is for opening and keeping open the passes—not

for either object alone, but for both.

No contract can be made for these objects exceeding the amount ap-

propriated by the act of July 8, 1856.

If bids of the same party for opening and keeping open both passes exceed the amount of the appropriation, they cannot be considered or become a subject of contract under section 2 of said act.

Under the regulations of your department, as shown by the printed

advertisements for proposals—

1. Each bid is an entirety and indivisible;

2. Each bid, as an entirety, must be capable of being made the subject-matter of such a contract as is authorized by said act:

3. Proposals for each object must be separate:

and as each bid, when made, is indivisible, a double bid for the same object cannot be entertained; so a single bid covering several

objects cannot be entertained.

Bidders must state "the longest period of time for which they will contract to keep each channel open to such width and depth for the residue of the appropriation," &c.; and equality amongst bidders requires that this rule should apply to all, it being not only an important consideration in fixing the amount of a bid, but in examining the means by which the object is sought to be accomplished.

No bid can be altered or modified after all the bids have been re-

ceived and opened, and the time for receiving bids has elapsed.

A regulation under which bids have been made cannot be changed at the instance of one bidder, without prejudice to the intervening rights of other bidders.

The proposals of "New Orleans Towboat Association" and of W. E. Stark & Co. do not come within the provisions of said act and

the regulation of your department.

The proposals of Messrs. Craig & Rightor do come within said provisions.

We have the honor to be, very respectfully,

CRAIG & RIGHTOR, By JOHN A. CORWIN.

3

Hon. JEFFERSON DAVIS, Secretary of War.

This contract, made between the United States of America, by Capt. H. G. Wright, corps of engineers, acting in behalf of the engineer department of the United States, of the first part, and W. P. Craig and William Russell Rightor, a firm doing business under the name and style of Craig & Rightor, of the second part, witnesseth: That the said parties have covenanted and agreed with each other as follows, to wit: 1st, the said Craig & Rightor, contract to open, through the entire length of the bar or shoal at or near that outlet of the mouth of the Mississippi river into the Gulf of Mexico known as the Pass à l'Outre. a straight ship channel having a well defined width throughout its whole extent of not less than three hundred feet, and a depth of not less than twenty feet below the level of ordinary low water, which level will be determined by a beach-mark on the shore, established by an officer or officers appointed by the Secretary of War. The place and direction of said channel shall be designated by an officer or officers appointed by the Secretary of War; and if any earth be removed by dredging, the place where it shall be deposited shall also be designated by said officer or officers.

2d. It is understood that the means by which the said Craig & Rightor propose to accomplish the work are, by stopping the minor passes or outlets of the river, and, if necessary, by constructing jettees on or near the said bar, adopting one of either or both of these alternatives, as may be found expedient, substantially after the manner explained and set forth in their proposals submitted to the engineer department in answer to an advertisement dated August 4, 1856, which proposals are made part of this contract; said mode of construction being secured to them by letters patent dated July 6, 1856.

3d. The said Craig & Rightor agree to commence the works immediately after the signing and delivery of these presents, and to complete the same within a period not to exceed fifteen months from

the date of the execution of this agreement.

4th. Whenever the said Craig & Rightor shall report the work as finished within the time above fixed for its completion, an officer or officers appointed by the Secretary of War shall inspect the work; and if, from the report of the said inspection, the said Secretary of War shall be satisfied that the work has been properly executed, and that a straight channel of the above width and depth actually exists over the entire length of said bar or shoal to the deep waters of the Gulf, then there shall be paid to them, the said Craig & Rightor, the sum of one hundred and twenty-five thousand dollars (\$125,000;) but, on the other hand, if it shall be found that the work has not been completed agreeably to this contract, then the said Craig & Rightor shall have no right to demand any portion of the above sum, or have any claim or demand upon the government, whether for compensation for work done, or for damages or losses sustained or expenses incurred by them.

5th. The said Craig & Rightor further contract to keep open the said straight channel, with the width and depth above specified, to the deep waters of the Gulf, for the term of four and a half years after the said channel shall have been accepted as above stated, for the further sum of thirty-six thousand dollars, and also to keep said channel open,

as above specified, for any additional time, at the same rate of compensation, so long as any part of the present appropriation shall remain applicable to this object. And for the faithful performance of their agreement to keep open the said channel, for the time and according to the terms of this contract, the said Craig & Rightor agree to enter into bond, with good and sufficient sureties, as hereinafter mentioned.

6th. In order to determine whether the condition of the 5th article of this contract has been strictly complied with, the Secretary of War may appoint an officer or officers to examine the work at such times as he may deem necessary; and if, from the reports of the said examinations, he shall be satisfied that the said straight channel has been constantly maintained at the width and depth above specified to the deep waters of the Gulf, then, at the expiration of one-third of the time for which said channel is to be kept open, eighty per cent. of one-third of the whole amount of the contract for keeping open will be paid; at the expiration of two-thirds of the time, an additional payment of one-third of the amount for keeping open will be made; and at the expiration of the whole time during which such channel is to be kept open, the twenty per cent. retained at the first payment and the remaining amount will be paid; but no payment will be made until after the channel has been examined at each period of payment by an officer or officers appointed by the Secretary of War, and found to be in all respects conformable to this contract.

7th. It is distinctly understood by the parties to this agreement that the United States are not to be responsible for any damages, either direct or consequential, resulting from the operations of said Craig & Rightor in the execution of this contract, nor to be a party to any controversy or suit at law that may arise on account of such operations.

Sth. It is further covenanted by the said Craig & Rightor that the means employed by them for opening the said channel shall in ne manner injure the navigation of the river, or any of the passes leading from it to the Gulf of Mexico, which the government may desire to preserve; and if it shall be found, during the progress of their operations or after their completion, that the works in course of construction, or constructed by them, tend to injure the value of said river or passes for navigable purposes, then the said Craig & Rightor agree, at their own expense, and without any charge whatever to the government, to remove such of the works constructed by them as shall be required by the Secretary of War, and to make good such damage in the way that shall be designated by said Secretary; and to secure the removal of said works, and the making good said damages to navigation, and also to secure the keeping open the said channel for the time and according to the terms of this contract, the said Craig d Rightor agree to enter into bond, with good and sufficient securities in the sum of seventy-five thousand dollars.

9th. It is understood and declared by the parties to this contract, the no member of Congress, or officer of the army or navy of the United States has any interest or concern, direct or indirect, in said agreement that said agreement, or any part of it, or any act growing out of it cannot be transferred, but shall be executed by the parties of the second part, or some person answerable to said parties, who are along

responsible for its fulfilment. It is also understood and agreed by the parties to this contract, that it is not binding upon the United States, or will go into operation till it has been sanctioned by the Secretary of War, and till the bond aforesaid shall have been executed, and have received the approval of said Secretary.

In testimony whereof, the parties to this contract have hereunto set their hands and seals, this thirteenth day of November, eighteen

hundred and fifty-six.

H. G. WRIGHT, SEAL. Captain of Engineers. WALDO PUTNAM ČRAIG. [SEAL.] WM. RUSSEL RIGHTOR.

Signed and sealed, in quadruplicate, in presence of— F. N. BARBARIN,

JAMES EVELETH,

Witnesses to signature of H. G. Wright.

WM. WALLACE WARDEN, CHARLES J. FOSTER, Witnesses to signatures of Craig & Rrightor.

The word "where," on the second page, was stricken out before the signing of these presents.

H. G. WRIGHT. Captain of Engineers.

Approved:

JEFF'N DAVIS, Secretary of War, November 14, 1856.

Know all men by these presents, that we, W. P. Craig, of the city of Newport, in the county of Campbell, State of Kentucky; William Russel Rightor, of the same city, county and State; Richard M. Corwine, John A. Corwine, and William Wiswell, jr., of the city of Cincinnati, county of Hamilton and State of Ohio, are, by these presents, held and firmly bound to the United States of America, in the sum of seventy-five thousand dollars, lawful money of the United States aforesaid, for payment of which, well and truly to be made, we bind ourselves, and each of us, and each of our heirs, executors, and administrators, for, and in the whole, jointly and severally, firmly by these presents, dated the thirteenth day of November, in the year of our Lord one thousand eight hundred and fifty-six, and sealed with our seal.

The condition of this obligation is such, that whereas the above bounden W. P. Craig and William Russell Rightor have, by a duly executed instrument of writing, dated the thirteenth day of November, in the year of our Lord one thousand eight hundred and fifty-six, contracted with the United States, through H. G. Wright, captain of engineers, the duly empowered and authorized agent of the said United States, to open a straight ship channel at the outlet of the Mississippi river into the Gulf of Mexico, known as the "Pass à l'Outre," to a depth of twenty feet throughout a well defined width of three hundred feet,

and to keep the said ship channel open to the same depth and width, as by reference to the instrument of writing aforesaid will more fully

appear.

Now, if the aforesaid W. P. Craig and William Russell Righter shall, in all things, well and truly observe and perform, fulfil and keep, all and singular the covenants, contracts, conditions, stipulations, and agreements specified and recited in the instrument of writing aforesaid, according to the true understanding, intent, and meaning thereof, then this obligation is to be void and of no effect; otherwise, to remain and be of full force and virtue.

WALDO PUTNAM CRAIG. [SEAL.]
WM. RUSSELL RIGHTOR. [SEAL.]
R. M. CORWINE. [SEAL.]
JOHN A. CORWIN. [SEAL.]
WM. WISWELL, JR. [SEAL.]

Signed, sealed, and delivered in the presence of— Wm. Wallace Warden. Charles J. Foster.

John A. Lynch, as to execution by R. M. Corwine, John A. Corwin, and Wm. Wiswell.

I hereby certify that I am acquainted with John A. Corwin and R. M. Corwine, two of the above named sureties, and, from my own knowledge, and the representations of others in whom I place implicit confidence, I further certify that I believe the said John A. Corwin, R. M. Corwine, and William Wiswell, jr., the three sureties in the foregoing bond, to be amply responsible for the penalty thereof.

JOHN H. O'NEILL, U. S. District Att'y, Southern District of Ohio.

This contract, made between the United States of America, by Captain H. G. Wright, corps of engineers, acting in behalf of the engineer department of the United States, of the first part, and W. P. Craig and William Russell Rightor, a firm doing business under the name and style of Craig & Rightor, of the second part, witnesseth: That the said parties have covenanted and agreed with each other as follows, to wit:

1st. The said Craig & Rightor contract to open, through the entire length of the bar or shoal, at or near that outlet of the mouth of the Mississippi river into the Gulf of Mexico known as the Southwest Pass, a straight ship channel, having a well defined width throughout its whole extent of not less than three hundred feet, and a depth of not less than twenty feet below the level of ordinary low water, which level will be determined by a bench-mark on the shore, established by an officer or officers appointed by the Secretary of War.

The place and direction of said channel shall be designated by an officer or officers appointed by the Secretary of War; and if any earth be removed by dredging, the place where it shall be deposited shall

also be designated by said officer or officers.

2d. It is understood that the means by which the said Craig & Rightor propose to accomplish the work are, by stopping the minor passes or outlets of the river, and, if necessary, by constructing jettees on or near the said bar, adopting one of either or both of these alternatives, as may be found expedient, substantially after the manner explained and set forth in their proposals submitted to the engineer department in answer to an advertisement dated August 4, 1856, which proposals are made part of this contract; said mode of construction being secured to them by letters patent, dated July 6, 1856.

3d. The said Craig & Rightor agree to commence the works immediately after the signing and delivery of these presents, and to complete the same within a period not to exceed ten months from the date

of the execution of this agreement.

4th. Whenever the said Craig & Rightor shall report the work as finished within the time above fixed for its completion, an officer or officers appointed by the Secretary of War shall inspect the work; and if, from the report of the said inspection, the said Secretary of War shall be satisfied that the work has been properly executed, and that a straight channel of the above width and depth actually exists over the entire length of said bar or shoal to the deep waters of the Gulf, then there shall be paid to them, the said Craig & Rightor, the sum of one hundred and twenty-five thousand dollars (\$125,000;) but, on the other hand, if it shall be found that the work has not been completed agreeably to this contract, then the said Craig & Rightor shall have no right to demand any portion of the said sum, or have any claim or demand upon the government, whether for compensation for work done, or for damages or losses sustained or expenses incurred by them.

5th. The said Craig & Rightor further contract to keep open the said straight channel, with the width and depth above specified, to the deep waters of the Gulf, for the term of four and a half years after the said channel shall have been accepted, as above stated, for the further sum of thirty-six thousand dollars; and also to keep said channel open as above specified, for any additional time at the same rate of compensation, so long as any part of the present appropriation shall remain applicable to this object. And for the faithful performance of their agreement to keep open the said channel, for the time and according to the terms of this contract, the said Craig & Rightor agree to enter into bond, with good and sufficient sureties, as hereinafter mentioned.

6th. In order to determine whether the condition of the 5th article of this contract has been strictly complied with, the Secretary of War may appoint an officer or officers to examine the work at such times as he may deem necessary; and if, from the reports of the said examination, he shall be satisfied that the said straight channel has been constantly maintained at the width and depth above specified to the deep waters of the Gulf, then, at the expiration of one-third of the time for which said channel is to be kept open, eighty per cent. of one-third of the whole amount of the contract for keeping open will be paid; at the expiration of two-thirds of the time, an additional payment of one-third of the amount for keeping open will be made; and at the

expiration of the whole time during which such channel is to be kep open, the twenty per cent. retained at the first payment and the remaining amount will be paid; but no payment will be made untiafter the channel has been examined at each period of payment by a officer or officers appointed by the Secretary of War, and found to b in all respects conformable to this contract.

7th. It is distinctly understood by the parties to this agreemen that the United States are not to be responsible for any damages, eithe direct or consequential, resulting from the operations of said Craig & Rightor in the execution of this contract, nor to be a party to an controversy or suit at law that may arise on account of such opera

tions.

Sth. It is further covenanted by the said Craig & Rightor, that the means employed by them for opening the said channel shall in n manner injure the navigation of the river, or any of the passes lead ing from it to the Gulf of Mexico, which the government may desir to preserve; and if it shall be found during the progress of their ope rations, or after their completion, that the works in course of construc tion or constructed by them, tend to injure the value of said river o passes for navigable purposes, then the said Craig & Bightor agree at their own expense, and without any charge whatever to the govern ment, to remove such of the works constructed by them as shall b required by the Secretary of War, and to make good such damage is the way that shall be designated by said Secretary; and to secure th removal of said works and the making good said damages to naviga tion, and also to secure the keeping open the said channel for the tim and according to the terms of this contract, the said Craig & Righto agree to enter into bond, with good and sufficient securities, in the sun of seventy-five thousand dollars.

9th. It is understood and declared by the parties to this contract that no member of Congress or officer of the army or navy of th United States has any interest or concern, direct or indirect, in said agreement; that said agreement, or any part of it, or any act growing out of it, cannot be transferred, but shall be executed by the parties of the second part, or some person answerable to said parties who are alone responsible for its fulfilment. It is also understoom and agreed by the parties to this contract that it is not binding upon the United States, or will go into operation till it has been sanctioned by the Secretary of War, and till the bond aforesaid shall have been

executed and have received the approval of said Secretary.

In testimony whereof, the parties to this contract have hereunts set their hands and seals, this thirteenth day of November, eighteen hundred and fifty-six.

JOHN H. O'NEILL, U. S. District Attorney, Southern District of Ohio.

LOUISVILLE, February 9, 1857.

Sin: I have the honor to be in the receipt of your several communications of the 2d and 3d instant.

Please accept my grateful acknowledgments for your kind interpo-

sition in behalf of my son.

On the receipt of "two tracings of delta of the Mississippi river, compiled from the original survey of A. Talcott, by Lieutenant T. J. Lee, Topographical Engineers, 1838," I propose to visit the mouths of the Mississippi, and inspect the work contemplated thereat, and report my views thereon to the bureau, in conformity to your instructions of the 10th instant.

Respectfully, sir, your obedient servant,

S. H. LONG,

Lt. Colonel Topographical Engineers.

Col. J. J. Abert, Chief Topographical Engineers, Washington, D. C.

NEW ORLEANS, March 13, 1857.

Sir: On the 5th instant I was notified, by a letter from the assistant treasurer at New Orleans, that two thousand dollars (\$2,000) had been deposited to my credit in the sub-treasury at that city.

On the same day I took my departure from Louisville, on a voyage

On the same day I took my departure from Louisville, on a woyage to New Orleans and to the mouth of the Mississippi, for the purpose of entering upon the river duties assigned me at the latter place.

In consequence of the serious indisposition of H. C. Long, my civil assistant, I was compelled to embark without him, but indulge the hope that he will be able to follow me in a few days.

I propose to proceed to the Balize as soon as practicable, and make a preliminary examination of the localities at which improvements are to be made, and shall report thereon as early as practicable.

Respectfully, sir, your obedient servant,

S. H. LONG.

Lt. Colonel Topographical Engineers.

Col. J. ABERT, Chief Topographical Engineers, Washington, D. C.

NEW ORLEANS, April 6, 1857.

SIR: In accordance with your instructions of January 10, 1857, I have passed an inspection of the main passes of the mouth of the Mississippi, and of the works contemplated for the removal of obstructions to the navigation thereof, at and across the tidal bars into the Gulf of Mexico, and I now take leave to present my views in relation

to these subjects in the following manner:

The report of the board of engineers, consisting of Captain A. A. Humphreys and the undersigned, organized in the fall of 1850 for the purpose of devising the best means of preventing overflows and inundations upon the alluvial grounds traversed by the Mississippi, exhibits clear and correct views of the geographical character and condition of the mighty river and its delta formations. To this document, which was submitted to the bureau late in the year above mentioned, I beg leave to refer for any desired information in relation to these topics, especially in so far as relates generally to the geography and hydrography of the valley of the Lower Mississippi.

The country at and near the passes of the Mississippi requires a more special description than that given in the report above cited and

now claims attention.

On descending the river from New Orleans, the banks by which it is bounded on both sides gradually become less elevated, while the grounds in their rear subside into flats or swamps nearly on a level with the high water surface of the Gulf. A little below Fort Jackson, about 68 miles below New Orleans, improvements in the shape of plantations, levees, &c., cease to be presented, and the surface of the ground in all directions assumes a marshy appearance a little above the level of high tide.

Arriving near the common head of the passes, about 20 miles below Fort Jackson, or 88 miles below New Orleans, the river spreads from a width of about one mile to nearly double that width; the flats on

either side becoming less elevated and more marshy.

The descent of the river from New Orleans to the Gulf, in ordinary low water, is about two feet, while in very high water, the river over-flowing its natural banks, the descent amounts to some 14 or 15 feet. Hence, the current in the former stage has a velocity of about 1½ mile per hour, and in the latter of five to six miles per hour, varying according to the stages of the water.

From this common head the river is divided into three distinct channels or passes, called the Southwest, the South, and the Northeast Passes; the first and last mentioned being of nearly equal size, and affording facilities for navigation, while the South Pass, once the most favorable for navigation, has become so much reduced in width and depth that vessels drawing only six feet are obstructed in their passage through it. As we descend in all of these, the grounds on their sides are covered with a rank growth of coarse grass and rushes, and become less and less elevated, till they present surfaces subject to inundation during the prevalence of high tides.

Southwest Pass.

This pass, as its name imports, has a direction nearly southwest, and reaches the open Gulf at the distance of about 17 miles from the head of the passes, or 105 miles below New Orleans. It varies in width from half a mile to nearly a mile, and at its passage over the tidal bar spreads to a much greater width, being divided by intermediate bars into two or three outlets navigable for craft of 10 to 17 feet draught across the bar.

For a distance of about 1½ mile across the tidal bar the navigation is restricted to vessels drawing 17 feet water, while the distance through which a channel must be opened, in order to admit the free passage of vessels drawing 20 feet, will embrace an extent of about 1½ miles.

At the present time, vessels drawing 17 feet cross the tidal bar with considerable difficulty, occasionally dragging their keels through soft mud 2 feet deep at the bottom of the channel.

Northeast Pass.

This pass appears to convey off a volume of water, much larger than that of the Southwest Pass, through a distance of about 5½ miles, where it is divided into two distinct channels, one of which retains the name of the Northeast Pass, and the other is called the Pass à l'Outre, the former much broader than the latter. The Northeast Pass thus continued is divided again into two main subordinate channels called the Northeast and Southeast Passes, beside which there are numerous other outlet passes and bayous on both sides, of inconsiderable magnitude. The deepest channels of all these passes in their passage across the bars nowhere exceeds 12 feet.

Pass à l'Outre.

This branch of the Northeast Pass leads off in a direction about northeast by east, and in a distance of about 9 miles from its head, or 14½ miles from the common head of the passes, crosses the tidal bar and enters the Gulf. This pass is also attended by numerous outlet channels and bayous, especially on its northerly side, all of inconsiderable size and depth.

The Pass à l'Outre divides itself into two channels of about equal

size, called the north and south channels, at the distance of about 2½ miles from the margin of the Gulf, presenting between them a swampy tract called the Middle Ground, on which the new light-house has been erected. The north channel widens at its mouth as it approaches the Gulf, and has a depth of only 7 or 8 feet water, while the south channel in its passage across the tidal bar has a depth of 15 feet. The distance through which this channel must be opened, in order to afford a depth of 20 feet across the bar, is about 2½ miles.

The depth of the water in the channel across the tidal bar, at this time is only about 13 feet, but vessels drawing 15 feet can pass the bar with some difficulty by dragging their keels through soft mud at the

bottom about 2 feet deep.

With regard to the numerous passes above mentioned, and various others that have not been noticed, there is no doubt that each, in its turn, has once been the most favorable channel for ship navigation; and it may, with equal assurance, be predicted that the channels now most favorable for navigation, will sooner or later give place to others somewhere else, whose future position cannot now be defined.

Nature and character of the obstructions.

The tidal bar which now exists, and has probably always existed, at the mouths of the Mississippi, is the main impediment in the way of ship navigation between the river and the Gulf. This bar is composed of the alluvious depositions that invariably occur at the points where the fresh water currents of the river meet and are intercepted by the salt waters of the Gulf, and extends entirely around the protruding delta formations that constitute the grounds over and through which the river pours its waters into the Gulf by its numerous outlets.

The bar at first is composed of recent alluvion, in a semi-liquid state, and consisting of particles exceedingly comminuted and unctuous. In time, and by the agency of the Gulf billows, it becomes more or less solidified and indurated, and resolves itself into beds and bars,

imposing serious impediments in the way of navigation.

From causes heretofore unexplained, portions of the bar, of greater or less magnitude, and in innumerable instances, are acted upon by upheaving forces from beneath, and rise vertically in various forms, mostly conical, to the height of several feet above their bases; (the greatest height observed being about twelve feet.)

The cones or mounds thus formed, in the language of the pilots, are called "mud lumps," and occur not only at the bottom and sides of the channels across the bar, but on the surface of the swamps, rising, in some instances, to the height before mentioned above that surface.

The mounds on the swamps present circular orifices at their summits many inches in diameter, and extending vertically downward to a very great but unknown depth. From these orifices are emitted streams of salt water, more or less copious, accompanied by ebullitions of inflammable gas.

The submarine upheavings or "lumps" in the passes are supposed to be analogous, in their character and formation, to those on the swamps, and in both cases they are supposed to rise and subside more or less frequently as the causes producing them continue operation during periods of greater or less duration. In some instances they appear to have a permanent existence, while in others they subside to their original level after the lapse of a few weeks; which last is true with respect to all localities remote from the tidal bar.

The lumps, in very many places near the tidal bar, rise to the surface of high tide, and become nuclei, around which the more recent deposits of the river accumulate, till at length the swamp lands are formed into delta-shaped islands, and cover the entire areas previously

occupied by the lumps at the sides of the outlet channels.

The mud lumps that rise in the channels are covered with a thick coating of fine adhesive clay, smooth and hard upon the surface, yielding slowly to the action of the strongest currents, and impracticable of removal except by the application of mechanical force. Strong iron rakes, harrows, or scrapers dragged across them by steamers, have heretofore proved efficacious in reducing and removing the lumps.

The bars in the deeper channels occasionally contain imbedded logs and trees, difficult of removal; but obstacles of this character are far more numerous on the shoals and bars at the sides of the channels.

No formidable snags are presented in connexion with any of the

passes.

With respect to the existence of reversed currents, or "undertows" of salt water beneath the fresh water volumes or sheets that pass over the tidal bar, and supposed by some to be mainly instrumental in forming the bar, Professor Forshey, late of New Orleans, has shown satisfactorily that no such undertows have any existence at any stage, either of flood or tide.

The surveys and investigations made under the direction of Captain A. Talcott, in 1838, have led to results of the highest importance, in reference to the character and condition of the passes, and to the

obstructions in the way of their navigation.

The developments subsequently brought to light in connexion with the Coast Survey, under the direction of Professor Bache, abound with accurate details in relation to the geography and hydrography of the

Gulf coast in the vicinity of the passes.

The report of the board of engineers, organized by the War Department in 1852, and composed of Captain W. R. Latimer, of the navy, and Majors Chase, Barnard, and Beauregard, of the corps of engineers, exhibits numerous valuable results derived from instrumental surveys, and abounds in representations and conclusions entitled to the highest consideration.

To the memoirs furnished on these several occasions I beg leave to refer for more elaborate and reliable information than my opportunities have hitherto enabled me to impart on the subjects to which my

attention has been directed.

Methods of Improvement.

Various projects and devices for the improvement of the outlets of the passes across the tidal bar have been entertained and put forth as the best methods of improvement, two of which only have as yet been

tested, of which the following are examples, viz:

1st. The process of dredging and the removal of the material dredged into the deep waters of the Gulf. This process was adopted in 1838, under the direction of Captain Talcott, and prosecuted with doubtful success. The results produced are represented as having had a tendency to form new bars at the outlets, and as having been injurious rather than beneficial to the navigation across the bar. With the details of the operation I have had no opportunity to become acquainted.

2d. An application of large triangular harrows, armed with strong iron teeth or coulters, protruding 15 to 18 inches below the timbers of the harrow, or with a strong iron scraper attached to the aft transum of the harrow, was made in 1853 by the Towboat Company of New

Orleans.

This machine was dragged downward along the bottom of the channel by a powerful steam tug, and proved efficacious in cutting away the mud lumps and reducing them to a semi-fluid consistency. Thus reduced, the materials of which they were composed were swept

by the current into deep water outside of the bar.

This process of removal was at first attempted in the channel inside of or above the bar, and afterwards with better success at the outlet immediately below the bar, and thence upward in the channel by successive roundings of the tug; the operations of the tug and machine on the bottom being invariably in the direction of the current. On every upward return of the tug for a new operation, the harrow was raised from the bottom of the channel by means of a derrick or crane erected at the stern of the tug for that purpose.

No doubts are entertained with respect to the utility and efficiency of this mode of operation. The work of improving the channel across the bar at the Southwest Pass was undertaken and contracted for by leading members of the Towboat Company in 1853, and was prosecuted with due diligence in that year. The contract provided for the opening of a channel at least 300 feet wide and 18 feet deep. The work having been finished and duly inspected, payment was made, therefore,

in accordance with the terms of the contract.

The method devised by Messrs. Craig & Rightor, sanctioned by the War Department, and made the subject of contracts with these gentlemen, now claims attention.

The contracts provide for the opening of a straight channel at least 300 feet wide and 20 feet deep, entirely across the tidal bar, at the outlets of the Southwest Pass and the Pass à l'Outre.

The manner of accomplishing the work consists in the application of pile dams for the purpose of intercepting the discharge of water through numerous outlets on both sides of the respective passes above mentioned.

In addition to the dams above mentioned, the method of the contractors contemplates the construction of jetties of plank piles on both sides of the Southwest Pass; commencing at points about 1½ mile above the tidal bar, and extending downward in directions more or less convergent, till they arrive at or near the bar, leaving a space of

several hundred feet between their lower extremities—the leng the jetties being a mile or more. The volume of water being the duced in breadth, is expected to move with an accelerated ve and sweep the mud lumps, &c., from the channel, and conv

across the bar into the deep waters of the Gulf.

With respect to the Pass à l'Outre, the method contemplate construction of a pile dam, about a mile long, across the head of north channel of the pass, for the purpose of diverting the fluctuation water from the north through the south channel. It moreover templates the construction of pile dams and jetties on the sout side of the pass, for purposes similar to those prescribed in refet to the Southwest Pass.

The efficacy of this method cannot be predicted with any degcertainty, but must remain for demonstration till the works have

completed according to the contracts.

Progress of the work.

The operations of Messrs. Craig & Rightor have hitherto confined to the Southwest Pass. I visited their work on the 271 time, and had the satisfaction to find that they had formed a lepiles, in a direction obliquely downward towards the deepest chacross the tidal bar, 1,064 feet long, the depth of water along the varying from 4 to 8 feet. The line consists of a series of posts or about one foot square, driven vertically into the bottom to the of about 25 feet below its surface, and at the distance of 15 feet a Longitudinal strings or streamers, 4 by 8 inches and 30 feet long spiked to the upper sides of these posts a little above the surfact the water. The strings serve as guides to the plank piling, whe composed of planks 5 inches thick at top and 2½ inches thick at tom, rebated in the manner specified in the patent.

The plank piles vary in width from 12 to 20 inches, are driven 10 feet into the ground, and fastened by iron spikes to the upper sides streamers. The spikes employed for the fastenings are about he inch square and nine inches long, and the timber of the structure sists of yellow pine and cypress. The line thus formed prese substantial and well built structure, is able to withstand a curre about two miles per hour, and is quite impervious to water. O upper side of the line the depth of the water remains as it was the piles were driven, while on the lower side sedimentary de have been made to the depth of three or four inches, the water of

side having become nearly or quite stagnant.

Since the date of the inspection, as above, I have been informed the line has been prolonged more than 500 feet, making the clength of the line about 1,600 feet. The daily progress in extens the line, the requisite materials being at hand, and the weather able, is about 150 feet.

In the present state of the work, no reliable conclusions condrawn with respect to its final efficiency in producing the de

results.

I propose to inspect the work again, for the purpose of instit

a system of triangulation and soundings, preparatory to a final inspec-

tion when the work shall have been completed.

In conclusion, I take leave to offer some of my convictions in regard to the past, present, and future condition of the outlets of the Mississippi, and their susceptibility of improvement. The history of their navigation acquainted us with the fact that, no material changes have taken place in the depths of their channels across the tidal bar, although their geographical positions have been continually subject to

changes.

The greatest depths in the channels across the bar have seldom, probably, never exceeded 19 feet. The prevailing greatest depth for the last half century has been limited to 17 or 18 feet, and such is the limit at the present time. The opening and maintenance of a permanent channel of a depth exceeding this limitare at least very doubtful, if not utterly impracticable, for a duration exceeding a single year. The frequent changes of the channels, the vast accumulation of sedimentary deposits, and the effects produced upon them by the billows of the Gulf, forbid the expectation that any permanent benefits can result from any efforts to effect such an object.

In my opinion, the only possible remedy that can be found for the evils complained of consists in the application of powerful rakes, harrows, or scrapers, propelled by steam power, for the purpose of scalping and reducing the mud lumps as often as they present themselves at

the bottoms of the deepest channels at the bar.

For this purpose an annual appropriation of \$100,000 for an indefinite series of years is deemed adequate to its accomplishment. In the meantime the commercial world, so far as it has any connexion with the navigation of the Mississippi at and below New Orleans, should be notified that vessels drawing more than 17 or at most 18 feet cannot cross the tidal bar and enter the river without serious hazard to their proprietors.

Respectfully submitted.

S. H. LONG, Lt. Col. Corps Top'l Eng'rs.

Col. J. ABERT, Chief Top'l Eng'rs, Washington, D. C.

Inspection report of Lieutenant Colonel Long, continued from April 6, 1857.

Louisville, May 5, 1857.

Sir: In my inspection report of the 6th ult. I proposed to revisit the work of Messrs. Craig & Rightor, and institute a system of triangulations and soundings for the purpose of testing, according to their contract, the result produced by their operations in furtherance of the fufillment of their contract stipulations.

Accordingly I repaired to the site of their operations on the 15th.

ult., and found them still employed on the line of piles mention my report of the 6th as having been extended about 1,600 feet. further extension of the line had been prevented by a violent now which occurred on the 5th ult., and was repeated, but with less lence, on the 12th of same month. These storms contributed to up and derange about one-third of the line previously formed left the remaining two-thirds in its original position, though a what shattered in places.

The contractors are of the opinion that the catastrophe happen consequence of their having used piles of inadequate length in formation of the lower portion of the line, the depth of water on portion varying from eight to more than nine feet. In repairin breach they have adopted piles of a much greater length and d them much deeper into the bed of the pass. By applying this ren and observing similar precautions on other portions of the work to be done, they feel sanguine in the belief that no such disaster again occur. The contractors had now two pile-driving boats in ration: one worked by steam, employed in repairing the breach a lower end of the line; and the other by manual power, at the upper of the same line. The length of the line, as repaired and extend on the 21st ult., was the same as heretofore reported, viz., feet.

I desired of the contractors a designation of the point at which proposed to cross the tidal bar and enter the open Gulf with the channel; and, in reply, was informed that they had fixed on no point, nor did they intend to do so till the changes and current duced by their works should indicate the best position and dire of the channel in question.

Triangulations and soundings.

I assumed as a prime base a line of 1,000 feet long, carefully sured along the line of piles, the direction being north 40° easouth 40° west. Signal polls, bearing red jacks at their tops, erected at the extremities of this base. At each extremity the a made by lines drawn to the light-house were carefully observe the use of a box sextant graduated by means of the vernier att to minutes of a degree.

The distance from the lower end of the assumed base to the house was carefully computed, and assumed as a secondary or base for all subsequent triangulations.

The triangulation was extended upwards about 21 miles to the servatory at the pilot's station on the easterly side of the pass, at telegraph station on the westerly side; and downward to a high and signal, on an extensive mudlump of some 50 or 60 acres, Stake island; also to a large metallic buoy, called the can buoy, ated at the bifurcation of two distinct main channels leading the tidal bar, through one or the other of which all vessels enterileaving the pass must be conveyed.

In addition to the points of triangulation above mentioned, other points were established and marked by signal poles, bearing

flags or jacks, set in mud lumps rising some eight to ten feet above the surface of the water, and presenting areas varying from about one-

eighth to three-fourths of an acre, respectively.

Two of these signals were located at the distance of two miles apart on a line crossing all the channels of the pass, nearly at right angles with the general direction of the currents of the pass, and about one mile below the lower extremity of the primary base.

The other two signals were placed at the distance of about 2½ miles apart, on a line nearly parallel to that of the two signals just before mentioned, and at the distance of about three-fourths of a mile below them. The line last mentioned is nearly coincident in direction and position with those of the crest of the tidal bar, and crosses the main navigable channel leading across the bar.

The selection of the four points indicated as above was made in conformity to the presentation of suitable mud lumps rising above the surface of the water in positions most favorable for lines of soundings leading across the channels intended to be affected by the work of

Messrs. Craig & Rightor, in the Southwest Pass.

The position and extent of the several lines having been determined, soundings are to be made and repeated as often at least as once a week on all the lines leading across the channels for the purpose of showing any changes that may take place in the positions, widths and depths of the channels. The manner prescribed for taking and applying the lines to be sounded provides for the casting of the lead at stated intervals of time, viz: once in every minute or half minute, and for noting the depth at every sounding in feet or parts.

With the data thus obtained, the lengths of the lines having been previously determined, a submarine section on each line sounded is to be prepared and delineated, the line sounded being regarded as the base, and the depth of soundings as ordinates depending therefrom at equal distances asunder, corresponding to the number of soundings made along the line. A waved line drawn through the lower extremity of the ordinates will show the inequalities of the bed of pass, its channels, &c., at the time and place of each set of soundings.

This operation being repeated once a week on every line proper to be sounded, and corresponding delineations being prepared therefor on every occasion of sounding, will clearly exhibit the nature and extent of the changes that occur from week to week in the depths and posi-

tions of the channels.

The operations detailed, as above, contemplate the preparation of a sectional diagram for each set of observations; the diagrams being numbered 1, 2, 3, 4, &c., in the order of their preparation for each line of the triangulation upon which the soundings may have been made. Each series of diagrams being referred to its appropriate line of soundings as marked and designated on the plot of triangulation.

In accordance with the foregoing representations, instructions have been furnished to Wm. Johnson, esq., who has been employed to direct and supervise the operations above considered, a copy of which instructions is as follows:

"S. W. Pass, April 18, 1857.

"Sir: You are desired to remain in the supervision of the operations of Messrs. Craig & Rightor, and of the results produced thereby, so far as they relate to the accomplishment of the objects specified in their contracts for the removal of obstructions from this pass. In the discharge of the duties claiming your attention, you will observe the following details, viz:

"1. You will make such observations as are necessary to test the accuracy of the triangulations made by us conjointly, carefully recti-

fying such errors as may be detected therein.

"2. You will repeat the soundings already made on the several lines sounded by us, and continue the operation as often, at least, as once

every week, the weather permitting.

"3. You will plot each line of soundings, as above, and all other lines of soundings you may find occasion to make, in the manner explained to you, viz: on separate strips of paper, designated and numbered as directed. The plot of each line will be attended by ordinates, depths, and a waving line, indicating the variable depths of the river channel, after the manner exemplified in our late drawings.

"4. In all your soundings, you will ascertain as nearly as practicable the elevation of the surface water above ordinary low water at the time of sounding, and make due allowances therefor in the depths

of the soundings.

"5. You will establish one or more bench-marks on a level of ordinary

low water, in the following manner, viz:

"Fix one or more tide gauges at suitable points, assume a point about an inch below extreme low water, and mark it with 0 or zero; divide the gauge rod into inches and quarters, and number the inches from zero down, and by the figures 1", 2", 3", 4", &c. Observe and note the inches and parts on the rod at extreme ebb tide daily, for one entire lunation; add the daily recorded observations together for one lunation, and divide their sum by the number of observations, and the quotient will indicate the bench-mark level for the lunation.

"Repeat the observations during a series of lunations, and divide the sum of the series, (for one year, if practicable, or six months, if otherwise,) by the number of the series, and the quotient will indicate the true level of the bench-mark, which may be fixed by driving a stake at the margin of the water, at that level, till the head of the stake

coincides exactly with the surface of the water.

"6. Keep a daily register of the observations made upon the tide gauge, from which the level of the bench-mark (or ordinary low water)

may be deduced with accuracy.

"7. Keep a diary of all your proceedings relating to the triangulations, tidal observations, soundings, &c., &c., prepared with neatness and accuracy, to be submitted in the form of field notes, at the expiration of your period of service.

7.8. You are desired to report in general terms your proceedings in all respects, as often at least as once in a month, on or about the end of every month, by letters to my address, at Louisville, Kentucky,

unless otherwise directed.

"9. Whenever Messrs. Craig & Rightor shall give notice that their work in the Southwest Pass is ready for final inspection, (or fix the date at which it will be ready for final inspection,) you are desired to apprise me thereof by telegraphic despatch, if the result of your previous observations and surveys shall render it certain, or highly probable that the work is actually ready, or will be ready for final inspection, according to contract.

"10. It is understood that the work will be ready for final inspection when a straight channel three hundred feet wide and twenty feet deep shall have been formed, clear of all obstructions, entirely across the tidal bar, from the secondary base surveyed by us into the open

Gulf.

"11. In general terms you are desired to ascertain and report all changes in the bed of the pass, below the secondary base above mentioned, and especially in the positions, depths, and widths of the channels below that line.

"12. You are authorized to purchase such articles of stationery, and to hire such boats, tools, hands, &c., as are necessary to the performance of the duties assigned to you, with the understanding that vouchers duly executed in duplicates must be taken, and rendered for

all such expenditures.

"13. Preparation having been made for the adjustment of all accounts likely to be incurred during the current quarter, you are desired to forward to the undersigned monthly estimates for each month of the succeeding quarter, in order that proper remittances may be forwarded for defraying the expenses of each month of the quarter last mentioned, (third quarter of 1857.)

"14. Your attention is particularly requested to the observance of each and every item of the foregoing instructions, by means of which I shall be kept adequately apprised of the progress of the work com-

mitted to your supervision.

"In conclusion, I would observe that your experience as an engineer, and your familiarity with nautical affairs, inspire the belief that you will be able to discharge the duties confided to your charge in a manner creditable to yourself and beneficial to the public service.

"Respectfully, sir, your obedient servant,

"S. H. LONG, "Lieut. Col. Top. Engineers.

"Captain Wm. Johnson, "Southwest Pass."

Having accomplished my inspections, triangulations, and other arrangements, as above, I communicated the following notice to Messrs. Craig & Rightor, the contractors for the Southwest Pass, viz:

"Southwest Pass, April 20, 1857.

"Gentlemen: The bearer, Captain William Johnson, having been employed to inspect your work for the improvement of the Southwest Pass, and to report its progress, and the effects produced thereby, in so far as relates to the removal of obstructions from the main navigable

channel, and to the formation of a new channel three hundred feet wide and twenty feet deep, as stipulated by contract, you are desired to receive him in the capacity above intimated during my absence, and to regard him as my agent and representative in all matters relating to the fulfilment of your contract till I return again to the

pass.

"Whenever the work shall have been so far advanced as to enable you with certainty, and to the satisfaction of Capt. Johnson, to fix on a date at which it will be ready for final inspection and acceptance, agreeably to the contract, you are desired to apprise him of such date, that I may be seasonably notified thereof by him, and return again to this place for a personal inspection and acceptance of the work, if executed in conformity with the terms of the contract.

"Respectfully, gentlemen, your obedient servant,

"8. H. LONG,

"Lieut. Col. Corps Topographical Engineers.

"Messrs. Craig & Rightor,
"Contractors Southwest Pass."

In conclusion, I take leave to present a further exposition of my views in relation to the formation and character of the tidal bar, and for this purpose I shall adopt the following hypothesis, based on the present aspect of things, and upon occurrences known to have taken place in former times.

The tidal bar is known to be composed of sedimentary matter, brought down and deposited by the waters of the Mississippi, and consisting of earthy and vegetable materials, exceedingly comminuted,

unctuous, and adhesive.

The points at which the most copious depositions have been made are those at which the currents of the river are merged into the still waters of the Gulf.

The deposits brought down in each successive year are made in advance of those of the preceding year, thus contributing to the annual

advancement of the tidal bar into the Gulf.

The deposits when first made, as before intimated, are fine, unctuous, and impalpable, and constitute a semi-liquid mass of earthy, mineral and vegetable particles, which, when brought into contact and combination with the salt water of the Gulf, are subjected to chemical and mechanical changes, the former of which have never been adequately examined or explained.

With respect to the mechanical changes, or those produced by the combined agency of the river currents and Gulf billows, they may be accounted for in part, if not altogether, in the following manner:

The annual amount of deposit is distributed along the outer margin of the tidal bar, in accumulations more or less abundant, according to the quantities of fresh, muddy water conveyed across the crest line of the bar at or near the points of deposition.

The deposits having been made, the Gulf billows begin to exercise a mechanical action upon them, which results in the formation of a

crust or indurated covering upon their surface, which continues to increase in thickness and solidity, until at last the covering of the mass becomes firm and unyielding, and at the same time impervious to the gases that are formed by the decomposition of the vegetable matter contained in the masses of deposits confined beneath the crust or covering.

In this way annual deposits, accumulations, &c., are constantly occurring; in proof of which, borings through the alluvial formations of the Mississippi delta to great depths below the surface have developed a succession of stratifications of mud and indurated clay of different degrees of hardness, alternating with one another to the full

extent hitherto penetrated.

The decomposition of the vegetable matter probably occurs annually, or perhaps less frequently, after the subsidence of the spring and summer floods of the Mississippi, when the waters, &c., adjacent to the Gulf shall have been brought to such a degree of temperature as is necessary to produce fermentation and putrefaction. At this and all higher degrees of temperature, the process of decomposition is carried on more or less rapidly, attended by the production of gases, which, in combination with the soft mud overlaid by the crust or indurated covering before mentioned, gives to the underlying mass a specific gravity materially less than that of the water, deposits, &c., lying above the crust. Hence, the crust must yield at its weaker or thinner points; an uprising of the same occurs, and those hitherto anomalous productions called "mud lumps" ensue.

The uprising of the indurated covering continues till the coverings crack open at their highest points, and the gases gradually escape through the fissures, carrying with them small streams of water, exceedingly turbid and of saline and bitter taste. The gases thus escaping are invariably inflammable, like the bubbles rising from the

bottoms of fens or stagnant pools.

The numerous mud lumps that have come under my observation have invariably presented a covering of stiff, adhesive clay, rent and

divided by fissures on almost every portion of their surface.

They assume all possible forms, those of the smaller dimensions being somewhat conical in their form, while those of the larger sizes present themselves in the shape of ridges, some of them nearly straight, while others are curved and recurved, presenting very irregular and ragged outlines. Some of them present orifices like craters, through which the salt springs and gases escape, while others present no other openings but prolonged fissures, through which their imprisoned air, mud, and water are set at liberty.

It is true of almost every mud lump, however minute or spacious, and whether above or below the surface of the water, that a pole or stake driven through the surface of their indurated covering, enters into a soft, yeilding mud, and may readily be thrust downward to a great

depth with very little resistance.

Mud lumps, of the character above described, are nowhere to be met with, except in the vicinity of the inner margin of the tidal bar, of which last, as also of the swamps in its rear, they constitute, not only the substratum, but the entire superstructure of mud, &c., erected

Respectfully, sir, your obedient servant,

8. H. LONG. Lieut. Col. Top. Engineers.

Col. J. J. ABERT, Chief Top. Eng's, Washington, D. C.

P. S.—A diagram, exhibiting the lines, &c., of the triangulations, is shortly expected, and will be forwarded to the bureau when received.

New Orleans, April 8, 1857.

SIR: Having learned that Messrs Craig & Rightor purpose to complete their works at the Southwest Pass before they commence operations at the Pass à l'Outre, I propose to visit the former again, for the purposes indicated in my report of the 6th instant, viz: for devising and directing a system of triangulations and soundings, having for its object a development of the practical results brought about as the work of improvement progresses. Arrangements have already been made for the accomplishment of this object, and after having put them in active progress, I purpose to return to my station at Louisville, via St. Louis, for the performance of sundry public duties requiring my attention at those points.

Respectfully, sir, your obedient servant,

S. H. LONG. Lieut. Col. Top. Engineers.

Col. J. J. ABERT, Chief Top. Eng's, Washington, D. C.

Louisville, June 20, 1857.

SIR: Sundry letters have been received from Captain William Johnson in relation to the operations of Messrs. Craig & Rightor at the Southwest Pass, and to the changes produced thereby in the channels across the tidal bar during the month of May last. Hence it appears that early in that month a strong gale from the southeast prevailed for several days, and contributed to the rupture of the upper portion of the line of piles through a distance of about 800 feet. Also, that at the end of the month the rupture had been repaired, and that the contractors continued sanguine in the belief that their enterprise would be crowned with ultimate success.

At the date last mentioned (May 31) the contractors had succeeded in repairing all defects in the line of piles, and in extending the same to an aggregate length of about 3,000 feet; the work thus extended remained stable and unaffected by storms at that date, no violent gales

having occurred since the protracted gale above noticed.

From the observations of Captain Johnson it also appears that no perceptible changes have been produced in the bed of the pass, except a slightly accelerated current along the upper side of the line of piles, the depths of the soundings across the pass, as also in the channel

across the tidal bar, remaining unchanged.

Captain Johnson has been directed to continue his observations in the manner prescribed in my instructions of the 18th of April last, a copy of which has been sent to the bureau, and to keep me apprised of the results produced by the operations of the contractors; while I hold myself in readiness to revisit the work whenever it shall appear that the contractors shall have got it ready for final inspection. In addition to the documentary information received from and through the bureau on the subject of the passes, I have succeeded in obtaining the manuscript reports of Captain Talcott and his assistants, Messrs. Sidell and Meade, on the same subjects, and have caused the same to be entered among the records appertaining to the improvement of the mouths of the Mississippi.

Respectfully, sir, your obedient servant,

S. H. LONG, Lieut. Col. Top'l Eng'rs.

Col. J. J. ABERT, Chief Top'l Eng'rs, Washington, D. C.

Louisville, July 30, 1857.

SIR: Agreeably to a report of Captain Johnson, received on the 28th instant, it appears that the operations of Messrs. Craig & Rightor at the Southwest Pass, during the month of June last, have been attended with serious discouragements and doubtful success. The line of piles has been extended southwestwardly only about 300 feet during the month, while the line through a distance of about 100 feet of its northeastern portion has been disrupted and driven from its moorings.

Hence the extent of the line still remaining on the 30th June is only about 3,200 feet, while as yet nothing had been done towards the formation of a counter line of piles on the northwesterly side of

the pass.

Boisterous weather had prevailed during most of the month, by which not only the progress of the work had been much retarded, but some four or five of the signals for the triangulations had been

carried away.

With respect to the improvement of the channel, no favorable changes are yet perceptible, and doubts are still entertained as to the efficiency of the mode of improvement adopted by the contractors under the sanction of the War Department.

Respectfully, sir, your obedient servant,

S. H. LONG, Lieut. Col. Top'l Eng'rs.

Col. J. ABERT, Chief Top'l Eng'rs, Washington, D. C. United States of America, State of Ohio, city of Cincinnati.

The undersigned, who are the sureties to the government of the United States for Craig & Rightor, in their contract to clear out the old structions at the Southwest Pass of the mouth of the Mississippi, bein advised that said Craig & Rightor are about to apply to the propedepartment of said government to extend the time for the completion of said work at said pass, do hereby agree and covenant, if furthe time is granted, that their liability on said bond shall in nowise be changed or altered, but shall remain and continue just as if no suc extension had been made; as they hereby request the government the grant that extension, and agree to the same when granted.

Witness our hands, at Cincinnati, Ohio, this 31st day of July

A. D. 1857.

R. M. CORWINE.
JOHN A. CORWIN.

In presence of—
(To whom the same was acknowledged.)

Taken and acknowledged before me, this first day of August A. D. 1857.

EDWARD R. NEWHALI, United States Commissioner.

Southwest Pass, Mississippi River, August 10, 1857.

Sir: Our contract with the government for deepening two of the passes of the Mississippi river requires its completion by the 13th of September next. We respectfully solicit an extension of time to the

1st of January.

In asking this indulgence, we do not desire to be understood a intending any relaxation of our efforts to finish the work within th period designated in the existing contract; our exertions will be a energetic and continuous as they have heretofore been, and favorable circumstances might even yet enable us to bring our labor to a close bear of the control of the c

We have expended a large sum of money and done a vast amoun of work; our exertions will be unremitting; and every day's expe

rience adds to our conviction that the benefits intended to commerce by the act of Congress will be accomplished to your entire satisfaction by the successful prosecution of our work. We do not think it possible that any accident whatever can prevent the completion of the work by the 1st of January. And we are quite satisfied that, should wind and weather prove propitious, we shall be able to bring it to a close before that time.

Respectfully, your obedient servants,

CRAIG & RIGHTOR.

Hon. J. FLOYD, Secretary of War, Washington.

Southwest Pass, Mississippi River, August 10, 1857.

Sir: We beg to enclose you a copy of a communication, which we have this day addressed to the Hon. John Floyd, Secretary of War, asking an extension of time to complete the works now progressing

for the deepening of the Southwest Pass.

We will be obliged to you to state whether the facts set forth in the communication referred to are true, and also ask your opinion as to the character of the work done, and as to the ultimate success of the work if carried out as contemplated by the contract with the government.

Respectfully, your most obedient servants, CRAIG & RIGHTOR.

Captian William Johnson,
Supervisor of improvements at the mouth of the Mississippi river.

Southwest Pass, August 11, 1857.

GENTLEMEN: Your letter of yesterday, enclosing a copy of your communication to the Hon. Secretary of War, requesting an extension of

time on your contract, is now before me.

I take great pleasure in adding my testimony to the correctness of all therein contained. The facts stated are in every respect true, and it is a matter of regret with myself that your works have been so much retarded, on account of the unusual prevalence of boisterous weather during the past summer.

The work, as it at present stands, is of a most solid and substantial character, forming a most complete breakwater, admirably adapted to

the purpose for which it is designed.

From the effects already produced, I have but little doubt that, if the work is continued to the point to which I understand it is your intention to extend it, the results produced upon the tidal bar will ten

greatly to the benefit of the commerce of New Orleans, and wi in accordance with the stipulated terms of your contract.

Respectfully, your obedient servant,

WILLIAM JOHNSON,
Supervisor of improvement, mouths of Mississipp
Messis. Craig & Rightor,
Southwest Pass, Louisiana.

Louisville, August 20, 185

SIR: Agreeably to a report of Captain Johnson, dated on the sultimo, and this day received, it appears that the work of Mes Craig & Rightor had advanced rather tardily during the montl July last, and that the benefits resulting from it continued doubtfut hat date.

The line of piles had been prolonged southwestwardly toward tidal bar, with a deflection of about five degrees to the right, thro a distance of about 1,100 feet, making the entire length of the l

formed at the close of the month, about 4,300 feet.

From the soundings on the lines of the triangulations, it does appear that either the depth or the width of the main navigable challeness has been increased, in consequence of the work that has a done under the contract, except in so far as relates to a percept divergence of the outflows of the water across the tidal bar, from left to the right, or northward, which appears to have been occasion by the line of piles.

The weather appears to have been less boisterous, and more fav ble for the prosecution of the work, during the month of July,

it had been during the preceding month.

Respectfully, sir, your obedient servant,

S. H. LONG, Lieutenant Volonel T.

Col. J. J. ABERT, Chief Topographical Engineers, Washington, D. C.

Louisville, August 27, 185

Sir: I have the honor to be in the receipt of your instruction the 21st instant, requiring a report on the application of Me Craig & Rightor for an extension of their contract or contracts deepening and widening the channels at the mouths of the Mi sippi. In compliance therewith, I beg leave to premise with a rence to my inspection reports of the 6th of April and 5th of May I and to my reports of the 20th of June and 30th of July last, and i of August instant, for various items of information in reference to commencement, progress, and result of the operations of Me Craig & Rightor, prior to the 1st of the present month. It sho

moreover, be premised and borne in mind, that Messrs. Craig & Rightor have entered into two distinct contracts of the same date, (November 13, 1856,) one for the improvement of the channel at the Southwest Pass, and the other for a similar improvement of the Pass à l'Outre; and that, from the terms of the application, some doubts exist whether an extension of one or both contracts is solicited by the contractors, although it may be inferred that an extension of both

contracts may be desired.

The facts set forth in the application, and corroborated by Captain Johnson, in so far as relates to the actual progress of the work of the contractors at the Southwest Pass, prior to the 31st of July last, appear to be in accordance with the monthly reports of Captain Johnson up to that date; but it does not appear that anything has yet been done by the contractors, either toward the formation of a line of piles, or breakwater, on the northerly side of the channel at the Southwest Pass, or towards the improvement of the channel at Pass à l'Outre; while from the reports of Captain Johnson, prior to the same date, it does not appear that any changes have hitherto occurred in the width or depth of the channel across the tidal bar of a character to justify the belief or expectation that the object of the contract for the improvement of the Southwest Pass is likely to be attained by the execution and completion of the work provided for in the contract.

A due consideration of the subject involves the observance of a distinction between the works actually done and the effects produced thereby, and the works remaining to be done, and the results likely to be produced thereby. In reference to the former, the statements of the contractors, in relation to the progress, hindrances, and cost of the works, are probably correct, while the beneficial results produced thereby are undoubtedly questionable. But in reference to the latter, not only the practicability of the works, but the results likely to be obtained, are altogether problematical—no sufficient proofs of their feasibility and ultimate efficiency having as yet been exhibited.

In this connexion, it is proper to observe, that the letter of Captain Johnson to Messrs. Craig & Rightor, especially in so far as relates to prospective operations and results, is not only extra official, but that its commendations are not sustained by the facts and results reported

by him for the months of May, June, and July last.

Nevertheless, in view of the alleged facts of the case as stated in the application, and with the knowledge that the lines of piles have not yet been multiplied and extended in the manner contemplated in the proposals of Messrs. Craig & Rightor, which have been recognized in their contracts as part and parcel of those instruments, I deem it reasonable and proper that the prayer of the contractors for the extension of the period of their contract for the improvement of the Southwest Pass be granted.

But with respect to the contract for the improvement of Pass à l'Outre, I am not aware that anything has hitherto been done. The contractors may have made arrangements for the requisite supply of timber for this work; but it does not appear that any materials for the work have as not been delivered at this page.

the work have as yet been delivered at this pass.

With regard to the ability of the contractors to accomplish the ob-

jects of their contracts by the 1st of January next, by any means applicable, in conformity to contract stipulations, doubts may be fairly entertained. The line of piles already formed has an extent of less than a mile. The chart on which the proposed lines have been de-lineated indicates an aggregate extent of pile lines or jetties of some four or five miles, leaving, for the extent of lines still to be formed. three or four miles. Yet the contractors "do not think it possible that any accident whatsoever can prevent the completion of the work by the first of January," "and are quite satisfied that, should winds and weather prove propitious, they will be able to bring it to a close before that time."

In view of the whole subject, I feel constrained to decline any concurrence in the opinions of the contractors, in so far as relates to the beneficial results already produced, or likely hereafter to be produced by their work as it now is, or in the belief that they will be able to accomplish the objects of their contracts by the means and appliances now employed for that purpose; yet I regard the accomplishment as a problem that can be conclusively solved by experiment only.

Respectfully submitted.

S. H. LONG, Lieut. Col. Top. Engineers.

Col. J. J. ABERT, Chief Top. Engineers, Washington, D. C.

P. S. Agreeably to directions, the papers sent are herewith returned. to wit:

The memorial of Messrs. Craig & Rightor. Extension of bond given by Messrs Craig & Rightor. Letter of Craig & Rightor to Captain William Johnson. Letter of Captain William Johnson to Craig & Rightor. S. H. LONG.

BUREAU OF TOPOGRAPHICAL ENGINEERS. Washington, August 31, 1857.

SIR: In reference to the petition of Messrs. Craig & Rightor, I respectfully refer to the enclosed report from Captain Woodruff; but, before deciding upon said petition, reference is respectfully made to the opinion of Mr. Attorney General Taney, pages 481, 482, vol. 2, Official Opinion of Attorney General, by B. F. Hall.

While on this subject, allow me again to call attention to a recommendation in a report of the 14th April last, that Lieutenant Colonel

Long be ordered to Washington.

The objects of this recommendation are:

1st. That he may have access to all maps, drawings, surveys, and

reports in relation to that work in this and other offices.

2d. That, inasmuch as great interest is felt in this measure, and large appropriations have been made, a board may be organized, of which Lieutenant Colonel Long should be the president, to furnish

final plan of mode of operating, and final estimate of probable cost. Lieutenant Colonel Long, having had much experience on the Mississippi, at its mouth and above, would give proper weight to the

opinions of such a board.

The board to consist of Lieutenant Colonel S. H. Long, president; Captain Humphreys, Topographical Engineers, member; Captain Woodruff, Topographical Engineers, member; and as member, recorder, and draughtsman, Civil Engineer S. T. Abert, at \$5 per day, to be paid out of any appropriation for the mouth of the Mississippi, upon accounts duly certified by the president of said board.

3d. Lieutenant Colonel Long, being here, can attend to his rather

complicated public accounts.

The report of the board to be made to this bureau.

Respectfully, sir, your obedient servant,

J. J. ABERT, Colonel Corps Topographical Engineers.

Hon, John B. Floyd, Secretary of War.

Endorsement on the above letter.

"Let the time for the completion of the contracts be extended as asked for.

"J. B. FLOYD,
"Secretary of War.

"WAR DEPARTMENT, September 15, 1857."

Bureau of Topographical Engineers, Washington, August 31, 1857.

Sin: Colonel Long, to whom was referred the application of Messrs. Craig & Rightor, for extension of their contract or contracts for deepening any widening the channels at the mouth of the Mississippi,

reports:

First. That there are two contracts of same date, (November 13, 1856,) one for the improvement of the channel of the Southwest Pass and the other for a similar improvement of Pass à l'Outre; and that from the terms of the application, some doubts exist whether an extension of one or both contracts is solicited by the contractors; although it may be inferred that an extension of both contracts may be desired.

Second. That it does not appear that anything has been done by the contractors, either towards the formation of a line of piles or breakwater on the northerly side of Southwest Pass, or towards the

improvement of the channel at Pass à l'Outre.

Third. That it does not appear that any changes have hitherto occurred in the width or depth of the channel across the tidal bar of a character to justify the belief or expectation that the object of the contract for the improvement of the Southwest Pass is likely to be attained by the execution and completion of the work provided for in the contract.

Fourth. That the letter (August 11, 1857) of Captain Johnson to Messrs. Craig & Rightor, especially in so far as relates to prospective

H. Ex. Doc. 139——4

operations and results, is not only extra official, but that its commendations are not sustained by the facts and results reported by him for

the months of May, June, and July last.

Fifth. That, nevertheless, in view of the alleged facts of the case as stated in the application and with knowledge that the lines of piles have not yet been multiplied and extended in the manner contemplated in the proposals of Messrs. Craig & Rightor, which have been recognized in their contracts as parts and parcel of these instruments. it is reasonable and proper that the prayer of the contractors for the extension of the period of their contract for the improvement of the Southwest Pass be granted.

Sixth. That with respect to the contract for the improvement of Pass à l'Outre, it does not appear that anything has hitherto been done, or that any materials for the work have as yet been delivered at this pass.

Seventh. That doubts may be fairly entertained with regard to the ability of the contractors to accomplish the object of their contract by the first of January next; an extent of less than one mile of the line of piles has been formed, the aggregate extent of pile lines or jetties indicated upon the chart being some four or five miles, leaving for the extent of lines still to be formed three or four miles.

Eighth. That he declines to concur in the opinion of the contractors, in so far as relates to the beneficial results already produced or likely hereafter to be produced by their work as it now is, yet he regards the accomplishment as a problem that can be conclusively solved by experience only.

Very respectfully, your obedient servant,

J. C. WOODRUFF,

Captain Topographical Engineers.

Colonel J. J. Abert,

Bureau Topographical Engineers.

Burbau of Topographical Engineers, Washington, September 16, 1857.

SIR: The decision of the Honorable Secretary of War, upon the Craig & Rightor contract for an extention of time, is transmitted for your information and government.

"Let the time for the completion of the contract be extended asked for.

"J. B. FLOYD,
"Secretary of War.

"WAR DEPARTMENT, September 15, 1857."

Respectfully, sir, your obedient servant,

J. J. ABERT, Colonel Corps Topographical Engineers.

Lieut. Col. S. H. Long, Corps Topographical Engineers, Louisville, Ky.

Southwest Pass, November 21, 1857.

SIR: Inasmuch as we, the contractors for the improvement of the Southwest Pass of the Mississippi river, are desirous of again applying to the honorable Secretary of War, for a further extension of the contract time; and inasmuch as we believe that said application must in the routine of official business be first submitted to the government officer in charge for his approbation before the same can be granted. We are, therefore, desirous of learning from you whether in such an event your report would be favorable to such extension.

The grounds upon which we should ask an extension, are as follows:

1st. The extraordinary prevalence of boisterous weather during the
past fall, not having more than ten or twelve working days, thereby

materially retarding our operations.

2d. The fact that the river has been unusually low during the past three months, and in consequence thereof, the agency we depended upon for the accomplishment of the results desired was not in existence.

3d. The fact of the past and present commercial crisis having so far prostrated the money market, that the obtaining of the necessary funds was an impossibility.

4th. That we have expended a large amount of cash which will be a total loss to us, in case the government refuses to grant us a renewed

extension.

5th. That in order to facilitate the operation of the current, and to open the pass to the required depth at the earliest date practicable, the contractors are prepared to call into play the agency of the rake, harrow and scraper, which they believe will accomplish the end desired long before the expiration of the extension time applied for.

An early answer will much oblige.
Yours, very respectfully,

CRAIG & RIGHTOR.

Lieut. Col. S. H. Long, United States Army, Southwest Pass, Mississippi river.

New Orleans, November 27, 1857.

SIR: I have the honor herewith to submit an application of Messrs. Craig & Rightor, contractors for the removal of obstructions from the mouths or outlets of the Southwest Pass and of the Pass à l'Outre, soliciting an additional extension of the term of their contracts.

The arguments urged in favor of the extension appear valid and forcible, and I take leave briefly to comment thereon in the order of

their presentation in the application.

1st. Agreeably to my own observations and inquiries, and in accordance with the reports received from time to time from William Johnson, esq., supervisor of the pass, in my employ, the statements in this item of the application appear to be fully sustained.

2d. The stage of water in the passes, during the time mentioned

in this item, appears also to have been correctly stated. No acceleration of the current appears to have occurred during the time mentioned.

3d. The late embarrassments in money affairs are too well known to need a comment.

4th. The expenditures on the work have undoubtedly been very heavy. I have been credibly informed that they have already amounted to at least \$60,000.

5th. The proposal contained in this item in reference to the adoption of the method of dredging by the use of rakes, harrows, and scrapers, in connexion with the wing dams contemplated as the means of improving the channels, is, in my opinion, not only acceptable, but advisable. The combination of the two methods, viz: the construction of the wing dams, combined with the process of dredging, will be likely to prove more efficacious than either of the methods singly adopted.

It appears manifest that the contractors undertook the work without due consideration of the numerous casualties and difficulties in the way of its successful prosecution. They seem to have been impressed with the idea that the channels could be improved by the removal of soft mud from their bottoms and sides, instead of which indurated beds of adhesive clay, called mud lumps, were the formidable obstruc-They seem to have anticipated very tions in the way of navigation. little interruption from stresses of weather, which prevail more or less violently in every month of the year at the outlets of the Mississippi into the Gulf. No injuries to the work appear to have been anticipated from the suif and lashing of the billows of the Gulf, whereas extensive breaches have frequently been made in the line of piles by agencies of this character. These and numerous other incidents, neither foreseen or provided for, have not only contributed to retard the progress of the work, but to occasion heavy outlays in repairing damages done

In view of all the circumstances of the case, and especially in consideration of the proposal to apply harrows, scrapers, &c., for the purpose of breaking up and removing the mud lumps and hard bars that occur in the channels, a method of operation which has proved successful and efficient on a former occasion, I do not hesitate to commend the application of the contractors for another extension of their contracts to the favorable consideration of the War Department.

In regard to the duration of the extension asked for no limit has been fixed by the contractors; I would therefore respectfully suggest that it be limited to the 1st of July next, which the contractors regard as an ample allowance for the fulfillment of their contracts.

I take leave to signify my belief that one of the stipulations of the contract is a hard one, viz: that requiring the excavation of the channel across the bars to the depth of twenty feet. Agreeably to the best lights I can obtain in reference to this matter, I am satisfied that this depth cannot be obtained by any means whatever without a consideration greatly exceeding that specified in the contracts. In my inspection report of April last I hazarded the opinion, that eighteen feet should be the maximum depth that ought to be aimed at in improving

the outlets of the Mississippi into the Gulf; I am still of the same opinion, and would further suggest the propriety of adopting eighteen feet below ordinary low tide (instead of the stipulated twenty feet) as the maximum depth practicable across the tidal bars at the outlets of either of the passes into the Gulf.

Respectfully, sir, your obedient servant,

Ś. H. LONG,

Lieut. Colonel Topographical Eng'rs.

Col. J. J. ABERT, Chief Top'l Eng'rs, Washington, D C.

NEW ORLEANS, December 3, 1857.

SIR: We are reluctantly compelled to ask indulgence, and to seek relief at your hands, on our contract for removing the obstructions at the outlets of the Mississippi river. Events entirely beyond our control, and some of which no sagacity could have anticipated, force us to seek such a change in our contract as will secure us from pecuniary embarrassment little short of ruin.

By the terms of our contract we were not to receive any compensation until the completion of the work at the Southwest Pass, and its approval by the proper officers of the government. Down to this time the moneys that we have expended have been out of our private fortunes, or upon the credit that our resources have enabled us to command. These means now fail us. After an actual expenditure in money of sixty-six thousand and seventy-nine dollars and twentyseven cents, (66,079 27,) we find all our resources cut off, and our credit, like the credit of everybody else, utterly unavailable. prudence could have protected us against a misfortune which is common to all. Industry, economy, integrity, are for the purpose of raising money of no use whatever, and unless the government in a liberal and just spirit advances us the amount of our expenditures, in order to furnish us the facilities for going on with the work, we can apprehend nothing but a total loss from our past outlay. In times like these, when all creditors are indulgent to their debtors, we respectfully submit that the government ought, at least, to imitate their justice, and not press with vigor contractors who are and have been acting in entire good faith. We are going on with the work, but our further progress is dependent upon the decision which you make on this application. Should you lend a favorable ear to it, we shall be able to complete the work by the 1st of July. We purpose adding scrapers and rakes to our present means, as auxiliary to the general plan, and this involves a heavy expenditure of at least \$30,000. Disappointed by a low river from that acceleration of current upon which we depended for removing the obstructions, we are bound to resort to artificial means. We believe that the additional power which we intend to apply will hasten the work to its completion. But we can do nothing without your assistance, and we trust we do not vainly count upon it

Colonel Long recommends the extension of time, and we beg to refer

you to his report. The other suggestions made as to depth of water and so favorably considered by him, we beg leave to urge upon your consideration.

We have the honor to be, very respectfully, your obedient servants, CRAIG & RIGHTOR.

Hon. John B. Floyd, Secretary of War, Washington, D. C.

> Bureau of Topographical Engineers, Washington, December 16, 1857.

SIR: I have the honor to acknowledge your direction to report upon the application of Messrs. Craig & Rightor on the 3d instant, referred to this bureau, for relief from the obligations of their contracts for removal of obstructions at the passes of the Mississippi river.

Two contracts of the same date (November 13, 1856) were entered into by the contractors, one for the improvement of the channel of Southwest Pass, and the other for a similar improvement of Pass à l'Outre.

By the terms of the contracts the works were to be completed on or before the 13th of September, 1857.

On the 10th of August, 1857, the contractors solicited an extension of time to the 1st of January next, for the fulfillment of their con-The application was referred to Lieut. Colonel Long, the engineer officer in charge, who recommended the extension. Lieut. Colonel Long remarks: "With regard to the ability of the contractors to accomplish the objects of their contracts by the 1st of January next. by any means applicable in conformity to contract stipulations, doubts may be fairly entertained. The line of piles already formed has an extent of less than a mile. The chart on which the proposed lines have been delineated, indicate an aggregate extent of pile lines or jetties of some 4 or 5 miles, leaving for the extent of lines still to be formed 3 or 4 miles; yet the contractors do not think it possible that any accident whatever can prevent the completion of the work by the 1st of January." * * " And are quite satisfied that, should winds and weather prove propitious, they will be able to bring it to a clow before that time." In view of the whole subject I feel constrained to decline any concurrence in the opinions of the contractors in so far se relates to the beneficial results already produced or likely hereafter to be produced by their work, as it now is, or in the belief that they will be able to accomplish the objects of their contracts by the means and appliances now employed for that purpose; yet I regard the accomplishment as a problem that can be conclusively solved by experiment only.

The extension of time was granted by the Secretary of War on the

15th of September last.

On the 27th of November, Lieut. Colonel Long submits an application of the contractors for a further extension of time, which is recom-

mended by Lieut. Colonel Long, and that it be limited to the 1st day July next. Lieut. Colonel Long suggests also a modification of the contract as regards the depth of the channel, from twenty to eighteen feet.

The following endorsement was made thereupon:

"Respectfully submitted. I do not recommend an agreement with the suggestions of Lieut. Colonel Long.—(See opinions of Attorney General, vol. 2, pages 481-82.)

"J. J. ABERT, "Colonel Corps Topographical Engineers."

The above application was submitted to the War Department on the 4th instant.

The contractors now solicit relief from the terms of the contract, and ask the government to advance the amount of their expenditures, (namely, \$66,079 27) to enable them to prosecute the contract. The 4th article of the contract provides for this very contingency in these words: "But, on the other hand, if it shall be found that the work has not been completed agreeably to this contract, then the said Craig & Rightor shall have no right to demand any portion of the above sum, or have any claim or demand upon the government, whether for compensation for work done or for damages or losses sustained or expenses incurred by them."

By the decision of the Attorney General, above referred to, the rights of the United States become vested according to the terms of the contract, and it is not in the power of agents to release or modify them, nor can relief be given by the executive departments; recourse

must be had to Congress.

Respectfully, sir, your obedient servant,

J. J. ABERT,

Colonel Corps Topographical Engineers.

Hon. John B. Floyd, Secretary of War.

Endorsement on the above.

"Let the time for the completion of the contracts be further extended to July 1, 1858, and the contract in regard to the depth of the channel from 20 to 18 feet be modified as recommended by Lieut. Colonel Long.

"J. B. FLOYD. "Secretary of War."

"WAR DEPARTMENT, "January 4, 1858." Inspection report of Lieutenant Colonel S. H. Long, in reference to removal of obstructions from the Southwest Pass of the Mississi, Rendered December 31, 1837.

Louisville, December 31, 1837

SIR: Pursuant to your instructions of the 31st October last, I vis the Southwest Pass of the Mississippi on the 19th of the ensuing vember, and on the 2d of December following engaged in examitions and inquiries in relation to the operations in progress for improvement of Red river, at and near the Raft; and I i have the honor to submit my views, and the results of my obsertions and inquiries in reference to the works in progress at these localities.

Southwest Pass.

The operations of Messrs. Craig & Rightor, contractors for the provement of the Southwest Pass, and of the Pass à l'Outre, hitherto been confined exclusively to the improvement of the form nothing having yet been done toward the improvement of the la

pass.

The work done in the Southwest Pass consists in the formation a single line of wing dam, 5.733 feet long, composed of square plank piles, driven firmly into the bed of the pass, and stron banded together at and near the surface of the water by mean streamers or ribands, iron spikes and bolts, in the manner herefore explained in my inspection report of the 6th of April last. I general direction of the dam is about north 40 east, or south west.

At the upper or northerly extremity of the dam the water does exceed three feet in depth; as we descend along the line of the d the depth gradually increases to about twelve feet, which is the de at the lower end of the dam.

Through a distance of about 1,500 feet, on the upper portion of dam, indurated beds of sand and clay occurred at the depth of six eight feet below the water surface. On being penetrated by the pithese beds thus disturbed resolved themselves into a sort of quicks too yielding to afford the requisite stability to the piles. In conquence, and on the occurrence of protracted boisterous weather, after this portion of the dam was built, the line of piles was a tured in many places, and in some instances thorough breaches greater or less extent, were found in it.

The residue of the dam being strongly fortified by substantial squipiles driven on both sides of the plank piling, and at intervals of common five feet asunder, successfully withstood the buffetings of storms, and the surf produced thereby, and still remains erect

stable.

The construction of the line of piles above considered comprises the work done by the contractors prior to the date of my inspect The wing dam, contemplated to be formed on the northwesterly of the pass, remains to be constructed, which is also true of the sev traverse dams across the heads of outlets on both sides of the pass, which were conditionally provided for in the contract, all these subsidiary works, together with an additional prolongation of the line of the dam already built remaining to be formed.

The materials used in the formation of the dam, exclusive of a large quantity driven away and lost in storms, amount to about 2,000,000 superficial feet of yellow pine and cypress lumber, and five tons of

iron in bolts and spikes.

The materials on hand, and applicable to the further prosecution of the work in the Southwest Pass, consists of 150,000 feet, board measure of plank piles, varying in length from twelve to thirty-five feet, of about 500 square piles, twenty-five to forty-five feet long, and of about four tons of iron in bolts, bars, and spikes, all on hand and ready for use.

The craft employed on the work includes the steamer Fanny Fern, fitted up with a double pile engine, worked by steam power; also of a pile boat, called the Little Fanny, fitted up with a similar pile engine, worked by steam, together with sundry flat boats, yawls, skiffs, &c.

worked by steam, together with sundry flat boats, yawls, skiffs, &c.

The force in the service consists of two captains, two steam engineers, two foremen, one blacksmith, one striker, two cooks, and

twenty-three laborers, in all thirty-three individuals.

Owing to the unusual prevalence of boisterous and stormy weather, during the last three months, the work of the contractors has been greatly retarded. From reliable information, it appears that during the period just mentioned only eight or ten working days have occurred, in which the work could be prosecuted to any considerable advantage.

In consideration of these interruptions and delays, and in view of the utter impracticability of accomplishing the works of their contracts, within the period of their late extension, viz: To the 1st January next, the contractors have applied for another extension of the torm of their contracts to the 1st of July next.

the term of their contracts, to the 1st of July next.

The following is a copy of the application alluded to, viz:

Southwest Pass, November 21, 1857.

SIR: Inasmuch as we, the contractors for the improvement of the Southwest Pass of the Mississippi river, are desirous of again applying to the honorable Secretary of War for a further extension of the contract time; and inasmuch as we believe that said application must, in the routine of official business, be submitted to the government officer in charge, for his approbation, before the same can be granted, we are therefore desirous of learning from you, whether in such an event, your report would be favorable to such extension.

The grounds upon which we should ask an extension are as follows:

1. The extraordinary prevalence of boisterous weather during the past fall not leaving more than ten or twelve working days, thereby materially retarding our operations.

2. The fact that the river has been unusually low during the past three months, and in consequence thereof, the agency we depended upon for the accomplishment of the results desired was not in existence.

3. The fact of the past and present commercial crisis having so far

prostrated the money market, that the obtaining of the necessary funds was an impossibility.

4. That we have expended a large amount of cash, which will be a total loss to us, in case the government refuse to grant us a renewed extension.

5. That in order to facilitate the operation of the current, and to open the pass to the required depth, at the earliest date practicable, the contractors are prepared to call into play the agency of the rake, harrow, and scraper, which they believe will accomplish the end desired, long before the expiration of the extension time applied for.

An early answer will much oblige, yours, very respectfully, CRAIG & RIGHTOR.

Lieut. Col. S. H. Long, U. S. Army, Southwest Pass, Mississippi river.

To the foregoing application the following reply was given:

NEW ORLEANS, November 27, 1857.

GENTLEMEN: Your application for a renewed extension of your contracts, in relation to the "removal of obstructions from the mouth of the Mississippi," has been received.

In reply, I take leave to inform you that the application will be at once forwarded to the Topographical Bureau, accompanied by a report thereon, setting forth my views in reference to the propriety of granting the indulgence solicited.

A copy of my report as above is herewith submitted for your use

and information.

Respectfully, gentlemen, your obedient servant,

S. H. LONG, Lt. Col. U. S. A.

Messis. Craig & Righton,
Contractors for Improvements of Passes, New Orleans, La.

The following is a copy of my report on the application made as above to my address:

New Orleans, November 27, 1857.

Sir: I have the honor herewith to submit an application of Messis. Craig & Rightor, contractors for the removal of obstructions from the mouths or outlets of the Southwest Pass, and of the Pass à l'Outre, soliciting an additional extension of the term or period of their contracts.

The arguments urged in favor of the extension appear valid and forcible; and I take leave, briefly, to comment thereon in the order

of their presentation, in the application.

1. Agreeably to my own observations and inquiries, and according to the report received of William Johnson, esq., supervisor of the pass, in my employ, the statements in this item of the application appear to be fully sustained.

2. The stage of the water in the passes during the time mentioned in this item, appears also to have been correctly represented—no acceleration of the currents appears to have occurred during that time.

3. The late embarrassments in money affairs are too well known

to need any comments.

4. The expenditures on the work have undoubtedly been very heavy. I have been credibly informed that they have already amounted to at least \$60,000.

5. The proposal contained in this item in reference to the adoption of the method of dredging by the use of the rake, harrow and scraper, in connexion with wing dams, contemplated as the means of improving the channel, is, in my opinion, not only acceptable, but advisable. The combination of the two methods, viz: the construction of wing dams combined with the process of dredging, will be likely to prove more efficacious than either of the methods singly applied.

It appears manifest that the contractors undertook the work without due consideration of the numerous casualties and difficulties in the way of its successful prosecution. They seem to have been impressed with the idea that the channels could be improved by the removal of soft mud from their bottoms and sides; instead of which, indurated beds of adhesive clay, called mud lumps, were the formidable obstruc-

tions in the way of navigation.

They seem to have anticipated very little interruption from stresses of weatner, which prevail more or less violently in every month of the year at the outlets of the Mississippi into the Gulf. No injuries to the work appear to have been anticipated from the lashings of the surf and billows of the Gulf, whereas extensive breaches have frequently been made in the line of piles by agencies of this character.

These and numerous other unfavorable incidents, neither foreseen or provided for, have not only contributed to retard the progress of the work, but to occasion heavy outlays in repairing damages done to it.

In view of all the circumstances of the case, and especially in consideration of the proposal to apply harrows, scrapers, &c., for the purpose of breaking up and removing the mud lumps and hard bars that occur in the channels, a method of operation which has proved successful and efficient on a former occasion, I do not hesitate to commend the application of the contractors for another extension of their contracts to the favorable consideration of the War Department.

In regard to the duration of the extension asked for, no limit has been fixed by the contractors, I would therefore respectfully suggest that it be limited to the first of July next, which the contractors regard as an ample allowance of time for the fulfillment of the contracts.

I take leave to signify my belief that one of the stipulations of the contract is a hard one, viz: that requiring the excavation of the channels across the bars to the depth of 20 feet. Agreeably to the best lights I can obtain in reference to this subject, I am satisfied that this depth cannot be obtained, by any means whatever, without a consideration greatly exceeding that specified in the contract. In my inspection report of April last, I hazarded the opinion that 18 feet should be the maximum depth that ought to be aimed at, in improving the outlets of the Mississippi into the Gulf. I am still of the same opin-

ion, and would further suggest the propriety of adopting 18 feet bel ordinary low tide, (instead of the stipulated 20 feet,) as the maxim depth practicable across the tidal bars at the outlets of either of passes into the Gulf.

Respectfully, sir, your obedient servant,

S. H. LONG. Lieut. Col. Top. Engineers

Col. J. J. Abert,
Top. Engineers, Washington, D. C.

With regard to the stipulation specially noticed in the conclude paragraph of the foregoing report, it is proper to advert to some the bids exemplifying the estimated probable cost of improving channels of the Southwest Pass, and of Pass à l'Outre, by different competitors for the contract. The proposals of the inexpert firm Craig & Richtor for opening the two passes, made in 1856, compared with those of the New Orleans Tow Boat Company, in the same yeard for the same work, (the latter having had great experience be in the navigation and in the improvement of the channels,) exhibits striking contrast in their prospective views of the probable cost the enterprise.

Comparsion of the two sets of proposals for opening channels 300 , wide of different depth in the passes.

| Proposals. | By Craig and Richtor. | By New Orl- Tow-Boat sociation. |
|--|-------------------------------|--|
| For channels 18 feet deep, Southwest Pass For channels 20 feet deep, Southwest Pass For channel 18 feet deep, Pass a l'Outre For channel 20 feet deep, Pass a l'Outre For channel 20 feet deep in both passes. | 125,000 125,000 125,000 | \$200,000 325,000 125,000 250,000 575,00 |

Hence it appears that no discrimination, on account of differ depths of channel, was made by Messrs Craig & Richtor in either the passes, while their more experienced competitors provided f difference of \$125,000 between the probable cost of opening a chan 18 feet deep, and that of opening a channel 20 feet deep in both the passes.

The accompanying "sketch," drawn by my civil assistant, H Long, will show the relative positions of the wing dam, the line triangulations, sundry soundings at and near the mouth of the Sor west Pass, and various other objects embraced within the limits of sketch, and including several bayous, swamps, numerous n lumps, &c.

In further explanation of the sketch, the following particushould be distinctly noticed, viz:

The scale of projection is $6\frac{1}{4}$ inches to the mile.

AB. The prime base, 1,000 feet long, as measured along the line of piles, and embracing nearly the entire length of the dam, as it existed at the time of the survey.

B C. The secondary base, 7,800 feet long, extending from the lower end of the prime base A B, across the channel of the pass, to the light-

house at C.

The other stations of the criangulations, several of which were planted on mere mud lumps, rising 8 or 10 feet above the surface of the water, and some of which, as at G. I. and K. have been since washed away, are indicated with sufficient clearness on the sketch. The distances on the lines were for the most part completed by logarithms, while the residue were determined geometrically.

With the exception of the prime base, all other lines of the trian-

gulations are indicated on the sketch by broken right lines.

The principal lines of soundings are those leading across the main channel of the pass, on which the soundings were repeated as often as the weather would permit, and are represented in the sketch by the lines BC, BE, BF, FE, EG, GH, HI, HK and JK, the computed lengths of which are exhibited in the tabulation, under the title of the sketch.

The soundings recorded along the lines above mentioned, as also those scattered over other parts of the sketch, indicate the depths in

feet below the surface of ordinary low tide.

The light wavy lines ab and cd represent the boundaries of the deepest channel across the tidal bar, the depths of which are indicated by a series of soundings in the direction of the channel, from the depth of 20 feet at the upper margin of the bar to the deep water of the Gulf. This channel is divided into two subordinate channels near the Gulf by a narrow spit of indurated mud, called the Middle Ground, as indicated by the dotted lines ef, over which the water has a depth of only 13 feet.

A similar spit or middle ground of the same depth below the water surface, but of much greater extent, occurs at the can buoy, which serves as a beacon to mark its locality. A formidable mud lump, called the East Breaker, occurs at the immediate outlet of the easterly channel into the Gulf, and has a low tide depth of only about 7 feet upon it. Several other shoals are indicated on other parts of the sketch by dotted wavy lines, and the depths of water upon them are

indicated by figures inscribed along and within the lines.

The new channel to be opened is expected to be formed in the space situated between the wavy lines ac and bd, before mentioned, the excavations for which must be carried through a distance of about $2\frac{1}{2}$ miles. The quantity of silt, including hard and soft mud, that must be removed, in order to open a channel 300 feet wide and 20 feet deep, will amount to about 460,000 cubic yards; whereas if the depth be limited to 18 feet, the quantity to be removed will be about 175,000 cubic yards, the length of the excavation being about $2\frac{1}{2}$ miles in the former, and only $1\frac{1}{4}$ mile in the latter case.

In all other respects the representations on the sketch are sufficiently

intelligible without farther explanation.

Moreover, in addition to the sketch, two sets of diagrams are here-

with submitted, one of which exhibits monthly soundings on the line of the secondary base, leading from a point about midway of the dam, across the main channel of the pass, to the light-house, and the other from the same point obliquely downward to the can buoy, and thence to Stake Island, crossing the main channel as above, at a point about 1½ miles below the intersection of the channel, by the line first mentioned.

Among the numerous soundings that have been made in connexion with the lines of the triangulation, and at other places, I have selected the sets mentioned as better adapted to illustrate the changes that have taken place in the bed of the pass during the months to which they relate, than any other selection that could be made. In further vindication of the selection, it should be observed, the line first mentioned crosses the channel at a point where the dam could not be expected to have any influence upon the channel, while the other line crosses the channel at a point where the influence of the dam would be likely to have a more sensible effect upon the channel than at any other point.

An inspection of the diagrams will show that the changes that have taken place in the channel during the eight months to which the diagrams relate, are very inconsiderable, especially in so far as they relate to the volume and depth of the water; and the slight changes observable may be attributed to the influence of violent winds and storms, and other accidents, rather than to that of the structure formed

for the improvement of the channel.

In reference to the diagrams, it should be remarked that the originals were prepared by Wm. Johnson, esq., employed as a supervisor of the pass, and that the same were transcribed by my assistant H. C. Long; also that owing mainly to the great irregularity of the ebbing and flowing of the tides (which occur only once a day) no minute discrimination has been made with respect to the particular

stages at which the particular soundings were made.

With respect to the tides at the mouths of the Mississippi, they are very irregular and quite anomalous. Their daily ebb and flow occur only once in about 25 hours and 19 minutes. Their ordinary range from low to high tide, in continued still weather, varies from 15 to 18 inches. Their extreme range from the lowest to the highest tides, in stormy or windy weather, is about 4 feet, the range being increased according to the violence of the winds as they alternately blow from the northward or from the southward. According to the best information that can be obtained, the elevation of the surface at "ordinary low water," is nearly or quite coincident with that of mean tide, the low water ranges rising above this stage of tide about as often as it falls below the same stage.

The report of Mr. Johnson, explanatory of his proceedings at the Southwest Pass under my directions, contains his views in reference to the progress and condition of the work of Messrs. Craig & Rightor; to the difficulties and delays attending to its prosecution; and to the changes that have occurred in the bed and channels of the pass during

the period of his supervision.

The following is a copy of the report:

Southwest Pass, December 10, 1857.

Sir: I have the honor to report, that since the 13th of April last I have remained at this pass, in the supervision of the operations of Messrs. Craig & Rightor, and of the effects produced by them upon the tidal bar of the pass, in pursuance of the instructions contained

in your letter to me of the date above mentioned.

The scheme of triangulations prescribed by you I have endeavored to carry out to the fullest extent practicable with the limited facilities that were at hand; a base line of 1,000 feet was measured upon the jetty dam of the contractors, from which I was enabled to form a secondary base of over 1½ mile with a direction entirely across the pass, and upon which my subsequent triangulations were based. In running these lines with a sextant corrected by theodolite, I took care to locate them in such a manner that their general direction was across the current and line of the pass, and so that the whole scope of the tidal bar was embraced within their limits.

It is unnecessary for me to detail the different lines, &c., as the same are all located and designated upon the plot of triangulated

sounding lines now in your possession.

These various lines which cross the main ship channels in many different places it has been my duty, under your orders of April 13th, to sound constantly during the past summer and fall; to plot the soundings thus taken upon cross section profiles, and to report to you any change or alteration in the bed of the river which could be attributed to the direct agency of the contractors' works. I have the honor to inform you, in relation to the frequency of sounding, that I have executed the same as often as practicable under the existing circumstances, but I have been much hindered and retarded in the execution of this duty during the spring by dense fogs, and during the latter summer and fall months by the frequent occurrence of heavy squalls and gales of wind.

In relation to any changes developed by these soundings that have taken place on the tidal bar of this pass, attributable as an effect of the works erected by Messrs. Craig & Rightor, I am sorry to inform you that as far as the *ship channels* are concerned no beneficial results are observable. True it is, that changes have taken place both in depth of water and in direction of current at various points; but these have

in no way affected the ordinary channels of navigation.

The bottom of the river upon the line BF has been gradually wearing away, and the water has consequently deepened upon both sides of the island upon which the point E is located; small channels with eleven feet of water (where there used to be only two feet,) running thence in a due west direction, have made their appearence. Another fact worthy of mention which has been developed since the construction of the jetty dam, and in my opinion attributable to its influences, is the strongly increased current with a westerly direction across the bar.

So strong has been this current that it has formed a subject of complaint with pilots, tow-boatmen, and others engaged in the navigation of the bar, who remark upon the great difficulty of keeping

inward bound ships in the proper channels. This change in curr is, in my opinion, attributable to the inclination and direction water receives after coming in contact with the jetty dam, an further believe that after a corresponding work is erected upon west shore, as contemplated by the contractors, the current will ag resume its proper course.

Behind the dam, and until the islands to the eastward are pass no current of any description is to be found; the water is perfect stagnant, and, in consequence, precipitation is rapidly going on, water having shoaled nearly two feet since my residence here.

The difference of level between the water on the north and so side of the structure at dead low ebb-tide, during calm weather equal to about three inches: at full flood-tide and low river, difference is perceptible.

These are the only changes and effects, attributable to the contract operations, which have come under my notice durign the past se

months.

In regard to the works themselves, I have the honor to inform that since the date of your last inspection in April last the stren and stability of the dam has been much augmented by the placin; strong pieces and supporting piles on the north side of the structi as well as upon the south.

There is a slight difference in the manner of driving the up r posts from that of the down stream piles; they are set at an an outward on the bottom, of about 5°, and the sharp end twirled (? such a manner that when driven the head of the pile sets fire against the string piece, and is then firmly bolted through.

By this means the strength of the dam is nearly doubled. I happy to inform you that all that portion of the work that was or nally constructed in this manner has stood unshaken all the he

gales that have prevailed during the fall.

The contractors have been much troubled in the driving any manent work at the north or upper end of the dam. For about 1, feet from the marsh, the bottom is composed of yellow sand indurwith clay, and in some spots of sand alone. The driving of the pil these places is a matter of great difficulty, and when driven have a tendency to work up and out of place, and upon the sma aperture or opening being developed, the current immediately mences to wash away the surrounding sand, and in an incred short space of time it will excavate below the bottom of the pil the immediate vicinity of the old cranny, and the work thus affe will, during the first gale thereafter, wash up and be drifted of sea.

In this section of the work I have known the current at one of t

apertures to excavate from 2 to 16 feet in 48 hours.

Several breaches of this character have occurred during the las months—have been as often repaired, and spite of every precaut still continue to break out anew. With the exception of this divi of the line, the balance of the dam, over 4,000 feet, (the whole let of the dam being 5,733 feet,) is driven in a blue clay bottom, widepth of from 7 to 15 feet, below which an indurated bed of w

sand is found, with an average thickness of some 10 feet, below which again lies a stratum of yellow clay to an indefinite depth. The work driven in this bottom is now standing in perfect order; has remained so since the date of its construction; is unshaken, and, in my opinion, is unshakable, except by the power of some irresistible tornado, or the more insidious effect of the Gulf worm. I am happy to inform you, however, that I have in vain sought for some trace of this animal in wood planted in the water last February, and which has been submerged ever since up to this date.

During the past six months the contractors have had two pile-drivers in operation for the majority of the time, with an effective force of from 16 to 30 men. They have, however, during the past three months, been much retarded in their operations by the unusual prevalence of heavy gales, which, exposed as they are to the force of the Gulf wave, rendered such a thing as active work an impossibility. I feel myself safe in asserting that, during the time referred to, they have not been enabled to work their boats to any advantage more than three weeks.

In pursuance of your orders, I also instituted a course of tidal observations, with a view to determine the level of ordinary or mean low tide at this pass. I caused three tide gauges to be constructed, and located the same at different points on the bar and above; the water recorded upon each was daily noted, together with the direction of the wind during the past 24 hours, and its approximate velocity. By taking the sum of these observations, and dividing by the number of observations made, I obtained the mean of low water for the past six months, which level I have permanently located upon a solid six-inch mark on the west shore, some distance above the bar.

I have the honor to be, sir, &c.,

WM. JOHNSON, Supervisor.

Lt. Col. S. H. Long, U. S. A.

Hence it appears, from my own personal inspections as well as from the observations and statements of Mr. Johnson, that the operations of Messrs. Craig & Rightor have hitherto produced no favorable results, in so far as relates to the widening and deepening of the channel of navigation across the bar at the mouth of the Southwest Pass.

The agency that appears to have been relied on by the contractors as the means of accomplishing their contract seems to consist mainly, if not exclusively, in the production of an accelerated current of sufficient speed and force to remove the obstructions and sweep out a channel of the required width and depth.

The accomplishment of the object in this way seems to involve numerous insurmountable difficulties, many of which have already been noticed on this and former occasions. One of the difficulties, however, which has not yet been mentioned, is entitled to some consideration at this time, and will be treated in the following manner:

No acceleration of the currents can be produced without an increased elevation of the surface of the pool from which they flow. Any elevation of the surface of the pool formed above the dams, or jetties, constructed at or near the mouth of the pass, will contribute to give an

H. Ex. Doc. 139---5

1

increased elevation of the surface of the pass at all points between mouth and its head, diminishing, of course, as we recede from pool mentioned, towards the head of the pass. Accordingly an creased elevation would be imparted to the entire water surface of pass, and this would contribute to increase the outflow, not o through all the bayous on both sides of the pass, but through all more easterly passes themselves, while it would also contribute to red the volume of water that would otherwise flow into the Gulf below pool. Hence the means in question would not only prove futile, would eventually contribute to increase the evil which it is design to cure.

The difficulty above considered may be readily obviated by adopt and applying the process of dredging the channel across the l which would have a tendency not only to enlarge the volume of war but to accelerate its speed in its passage through the channel to Gulf.

In conclusion, I take leave to advert to the inadequacy of the pres lighthouse, at C, on the sketch, to subserve the purposes for which was intended: without attempting to enlarge on the defects of its sition or structure. I venture to suggest a substitute which would of less and answer better purposes. Instead of the single lighthouse would propose the construction of two light-boats with a light on e clevated some 30 or 40 feet above their decks; one of the boats sho be suitably anchored near or a little above the can buoy, and other about a mile further up the pass, and in such a position that right line passing from its light to the main outlet of the pass i the Gulf will also pass through the light of the first or lower bo the lights being thus situated, a vessel in the Gulf bound into mouth of the pass may pursue her course till she arrives at the rai line of the lights, when she may shift her course and pursue her v age in safety along the line, and across the bar, till she reaches a anchorage in the pass. Should the channel undergo a change, (a such a change is continually in progress,) a corresponding chain may readily be made in the relative positions of the lights by cha ing the anchorage of the boats, and thus the lights may be made serve as safe and sure guides to vessels, and especially to steamers sirous of entering the pass by night, whenever the lights are vis from on board.

Respectfully submitted.

S. H. LONG, Lieut. Col. Top'l Eng'r.

Col. J. J. ABERT, Chief Top'l Eng'rs, Washington, D. C.

P. S.—My inspection report on the Red River raft. &c., wit topographical sketch, showing the position of the raft and the feat of the country in its vicinity, will be prepared and forwarded as eas practicable.

S. H. LONG, Lieut. Co

Bureau of Topographical Engineers, Washington, January 6, 1858.

Sir: I transmit herewith, for your information and government, a copy of a report from this office to the War Department of the 16th ult., relative to an extension of the time for the fulfilment of the contracts of Messrs. Craig & Rightor for the removal of obstructions at the outlets of the Mississippi river, with a copy of the endorsement of the honorable Secretary of War thereon.

Respectfully, sir, your obedient servant,

J. J. ABERT.

Col. Corps Tonographical Eng'rs.

Lieut. Col. S. H. Long, Corps Topographical Eng'rs, Louisville, Ky.

Louisville, January 11, 1858.

SIR: Your instructions of the 6th instant, in relation to the renewed extension, &c., of the contracts of Messrs. Craig & Rightor, have been received.

In conformity thereto, I have notified the contractors of the indulgence thus extended, and desired them to prosecute the work with all practicable despatch, energy, and efficiency; and have also enjoined upon them the adoption of the processs of dredging, in connexion with their previous plan of operations, as proposed in their late application for the extension.

Respectfully, sir, your obedient servant,

S. H. LONG.

Lieut. Col. Topographical Eng'rs.

Col. J. J. Abert, Chief Topographical Eng'rs, Washington, D. C.

Louisville, February 9, 1858.

SIR: By a letter this day received from William Johnson, esq., my supervisor at the Southwest Pass, I am informed that Messrs. Craig & Rightor, the contractors, have concluded an arrangement with a gentleman by the name of George Kimball, of Brooklyn, New York, an experienced operator in dredging and deepening marine estuaries, agreeably to which Mr. Kimball has engaged to furnish a suitable dredge boat and other needful apparatus to be employed in dredging the channel of the Southwest Pass, and that he is to commence operations in the pass on or before the close of the present month.

I am also informed through the same channel that the contractors are actively engaged in operations for the purpose of resuming the

construction of wing dams for the purpose of concentrating the crents of the pass into the main channel across the tidal bar.

In view of the adoption and application of the combined meast above mentioned, viz: the co-operation of wing dams and suits dredging machinery, strong hopes are entertained that a value improvement of the pass may be effected.

Respectfully, sir, your obedient servant,

S. H. LONG,

Lieut. Col. Topographical Eng're

Col. J. J. ABERT,

Chief Topographical Eng'rs, Washington, D. C.

BUREAU OF TOPOGRAPHICAL ENGINEERS, Washington, February 20, 1858

Sir: I transmit herewith a copy of a letter from the chairman of Committee on Commerce of the Senate, with a copy of a joint resction to authorize the Secretary of War to modify the contracts m with Messrs. Craig & Rightor for the removal of obstructions at mouth of the Mississippi river.

You will please report your opinion in regard to such a modificat of the contracts as would enable the War Department to pay to contractors the amount expended by them, and to pay for the worit progresses, reserving the usual per centage for the fulfilment of contracts.

Respectfully, sir, your obedient servant,

J. C. WOODRUFF,

Captain Top'l Eng's, Assistant, in charge

Lieut. Col. S. H. Long,

Corps Topographical Engineers, Louisville, Ky.

Louisville, February 25, 185

Sir: I have the honor to acknowledge the receipt of your sever communications of the 20th instant, all relating to a modification the contracts of Messrs. Craig & Rightor, having for its object tial payments for work done under their contract for removing structions from the channel of the Southwest Pass, and requiring opinion in regard to such a modification of the contracts as we enable the War Department to pay to the contractors the amount pended by them, and to pay for the work as it progresses, reserve the usual per centage as security for the fulfilment of the contract

The communications are the following, viz:

1st. A letter from the Topographical Bureau, dated on the instant:

2d. Copy of a petition of Messrs. Craig & Rightor, asking t indulged with said modification, dated December 3, 1857;

3d. Copy of a joint resolution of both houses of Congress, relating to authority for allowing the indulgence; and—

4th. Copy of a letter from the chairman of the Senate Committee on Commerce, to the Hon. Secretary of War, asking for information

respecting said resolution.

My opinions in reference to the efficiency and utility of the work done under the contract of Messrs. Craig & Rightor during the last year (1857) may readily be inferred from my inspection reports, dated April 6th and May 5th, also on December 31st of that year; the two former of which have been published in the "report of the chief topographical engineer, accompanying annual report of the Secretary of War, 1857," (see pp. 42 to 54, inclusive;) while my report of the 31st of December remains unpublished—probably on the files of the bureau. From these reports it may be seen that no perceptible improvement had been produced by the operations of the contractors during the year.

From the report last mentioned it may be seen that the contractors had applied for an extension of the period of their contracts from September 15 to December 31, 1857, and were indulged with the extension; also, that in the month last mentioned they again applied for a renewed extension from January 1st to July 1st of the current year, which was also granted, their showings in both cases having been regarded as sufficient reasons for granting the indulgences.

In view of the whole case, as reported, it is manifest that the contractors embarked in their enterprise of improving the mouths of the Mississippi without proper knowledge of the nature and magnitude of the undertaking, and with a reliance on the efficiency of their intended mode of operation far too sanguine. Also, that they have nobody but themselves to blame for any want of foresight or discretion in arranging and concluding their contracts.

Nevertheless, under existing circumstances, an important national work appears to be in danger of being seriously obstructed, if not defeated, for want of means in the hands of the contractors adequate to its further prosecution. It appears that upwards of \$66,000 have already been expended out of their private resources, without any re-

muneration to themselves or perceptible benefit to the public.

They now propose to change their mode of operation, and avail themselves of the process of dredging in connexion with the formation of wing dams, as a more effectual means of opening channels across the tidal bar into the Gulf. I am decidedly of the opinion that, by the use of suitable dredging machinery, consisting of powerful steam tugs and other proper and needful appliances, especially when employed in connexion with jetties or wing dams, will contribute to the successful accomplishment of the work as now required to be done.

The case seems to present two leading alternatives, viz: either the abandonment of the contracts at the great loss, if not inevitable ruin, of the contractors, or the reimbursement of their expenditures, in whole or in part, in order to enable them to prosecute their work to its completion. I regard the latter as the more humane and prudent course, while its adoption will be likely to contribute not only to the opening of the requisite navigable channels across the tidal bar, but

to the keeping of them open during a period of 4½ years from after they shall have once been opened as stipulated in the contractive the terms on which the contractors have stipulated to keep the chinels open during the period mentioned being more favorable than a others that have hitherto been offered for the same service

In order to illustrate this last consideration, viz: the keeping operach channel for a period of 4½ years, it should be observed that contracts of Messrs. Craig & Rightor provide for an annual charg \$8,000 for each, or of \$16,000 for both channels—equivalent to \$72, for a period of 4½ years; whereas the lowest offer made by others the same service was \$62,000 per year for each channel, or \$124, per year for both channels—equivalent to \$558,000 for a period of years. The difference of the total cost, as above, being \$486,000

favor of Craig & Rightor's contracts.

In view of all the circumstances and relations of the case, I t leave to suggest, as a safe and proper measure of relief to be exten to the contractors, an indulgence of the following import, viz: wl ever it shall be made to appear that the contractors shall have procu a good, substantial, and sufficiently powerful steam dredge, tug tow-boat, with such other craft, scrapers, appliances and machin of all kinds, as are suitable and proper for dredging the chanacross the tidal bar, and shall have tested the efficiency of the sa by at least one week's successful operation thereof in the Southy Pass, the sum of \$36,000 shall be paid to the contractors as a par remuneration for outlays actually incurred; and when the contrac shall have operated successfully with said steam dredge, craft, chinery, &c., in said Southwest Pass, during a period of at least months from the time of first applying the same successfully, the : of \$30,000 more shall be paid in like manner to the contractors: 1 of these payments being regarded as payments, in part, on accour Also, that no other payments shall be made to their contracts. contractors otherwise than in strict accordance with the stipulat of their contracts, due allowance being made in all cases for ingences duly authorized and extended to the contractors by the Department.

The difficulty, if not utter impracticability, of determining the portional quantum of work done, or, rather, of effect produced time to time, seems to preclude any reliable computation or estin for periodical payments proper to be made as the work progre Accordingly, and in conformity to the original design of putting work under contract, I would advise that no payments be mad

account of the same, except those herein before suggested.

Respectfully submitted,

S. H. LONG, Lieut. Col. Top. Enginee

Col. J. J. ABERT, Chief Top. Engineers, Washington, D. C.

Louisville, April 5, 1858.

SIR: By a telegraphic despatch, made at the instance of Messrs. Craig & Rightor, I am just informed that they are likely to be ready for an inspection of their work in the Southwest Pass in about two weeks from this time.

Accordingly, I take leave to request that I may be authorized to proceed to the mouth of the Mississippi, for the purpose of making the requisite inspection, on or about the close of the current month.

Respectfully sir, your obedient servant,

S. H. LONG.

Lieut. Col. Topographical Eng'rs.

Colonel J. J. ABERT, Chief Top. Eng'rs, Washington, D. C.

P. S.—Please answer this requisition by a communication to my address, at St. Louis.

Bureau of Topographical Engineers, Washington, April 10, 1858.

SIR: Your letters of the 15th instant have been received. By direction of the Secretary of War, you are authorized to proceed to the mouth of the Mississippi river, for the purpose of inspecting the work of Messrs. Craig & Rightor, in the Southwest Pass.

Respectfully, sir, your obedient servant,

J. J. ABERT,

Colonel Corps Topographical Eng'rs.

Lieut. Colonel S. H. Long, Corps Top. Eng'rs, St. Louis, Mo.

Southwest Pass, May 7, 1858.

Sir: Having very recently inspected the works done at this pass, under the modified contract of Messrs. Craig & Rightor, for the removal of obstructions therefrom, I have the honor to report briefly thereon, as follows, viz:

The dredge boat Downs, previously used as a towboat on the Mississippi, below New Orleans, was procured, and furnished with appropriate dredging apparatus, consisting of harrows, scrapers, rakes, &c., &c., all of approved dimensions and construction, in the months of February and March last.

The outfit, as above, having been completed, the boat commenced operations on the tidal bar on the 22d day of March, and continued to operate successfully during a period of about three weeks, with occasional interruptions and hindrances by boisterous weather.

The operations have been continued with similar success, and ϵ to greater advantage than had been anticipated, to the present ti the interruptions and hindrances by stress of weather having I more frequent and formidable than before during the last three we

In addition to the employment of the boat and dredging appara as above, the blasting of the mud lumps at the bottom of the char with heavy charges of powder has been successfully tried, and

results produced thereby are highly satisfactory.

In view of the whole case, I am decidedly of the opinion that measure of relief contemplated in my report to the bureau of the 2 of February last may be fairly extended to the contractors, to wit: payment of \$30,000 as the first instalment therein contemplated to paid: and although the time for the payment of the second instalm of \$36,000 has not yet elapsed, I am, moreover, of the opinion, in vof the advancement made towards the fulfilment of the first branc the contract, viz: the opening of the channel, that this instalm may also be paid, without detriment to the United States.

Respectfully, sir, your obedient servant,

S. H. LONG.

Lieut. Colonel Topographical Eng'r

Colonel J. J. Abert, Chief Top. Eng'rs, Washington, D. C.

P. S.—It is expected that the work under the first branch of contract for the Southwest Pass, or the preliminary stipulations lating to the opening of the channel in this pass, will be ready final inspection in the course of a few weeks, the weather continuous favorable.

S. H. LONG, U.S.

Telegraphic Despatch.

Bureau of Topographical Engineers, Washington, May 22, 185

The Secretary of War directs that you remain at the pass untiwork has so progressed that you recommend the payment of thirt thousand dollars on account of the contract. Acknowledge received

J. C. WOODRUFF, Capt. Top. Eng'rs, Assistant in Burea

Colonel Long, U. S. A., New Orleans.

[By Telegraph.]

New Orleans, May 22, 185
Your despatch of this date is received. I remain, accordingly.
S. H. LON

Captain J. C. Woodruff.

[By Telegraph.]

Southwest Pass, May 25, 1858.

Received Washington, May 25, 1858.

Both instalments proposed in my report of 25th of February last are now fairly payable to the contractors; particulars to be reported.

S. A. LONG,

Corps Topographical Engineers.

Captain J. C. Woodruff, Topographical Bureau.

[By Telegraph.]

Bureau Topographical Engineers, May 26, 1858.

The Secretary of War desires to know if you sent a despatch yester-day recommending that both instalments, proposed in your report of 25th of February last, be now paid to the contractors. Reply by telegraph.

J. C. WOODRUFF, Captain Topographical Engineers.

Lieut. Col. Long, U. S. A., New Orleans, Louisiana.

Southwest Pass, May 27, 1858.

Received at Washington 27, 1858, 11 o'clock min. p. m. I sent a despatch on the 25th instant, recommending the payment of both instalments, proposed in my report of 25th of February last, be now paid to the contractors.

S. H. LONG.

Captain J. C. WOODRUFF.

Burbau of Topographical Engineers, Washington, May 22, 1858.

SIR: Your letter of the 7th instant has been received and submitted to the War Department.

Are you not laboring under a misapprehension about the contract having been modified? Such is the impression of the bureau.

Respectfully, sir, your obedient servant,

J. J. ABERT, Colonel Corps Topographical Engineers.

Lieut. Col. S. H. Long, Corps Topographical Engineers, New Orleans.

H. Ex. Doc. 139-6

BUREAU OF TOPOGRAPHICAL ENGINEERS.

Washington, May 26, 1858

SIR: I send inclosed despatch from Lieutenant Colonel S. H. Lo As I doubt its genuineness, I respectfully recommend the waiting the "particulars to be reported."

Respectfully, sir, your obedient servant,

J. J. ABERT.

Colonel Corps Topographical Engineer

Hon. John B. Floyd, Secretary of War.

> BUREAU OF TOPOGRAPHICAL ENGINEERS, Washington, May 26, 185

Sin: I send you a copy of a telegraphic despatch and of the re thereon to the War Department.

Respectfully, sir, your obedient servant,

J. J. ABERT, Col. Corps Top. Engineer

Major S. H. Long, Corps Top., Eng. Brt. Lieut. Col. U. S. A., New Orleans, La.

New Orleans, May 29, 185

Sir: Two telegraphic despatches (one of which is in duplicate) been received from the Topographical Bureau, one dated on the and the other on the 26th instant, both relating to the payme the instalments proposed in my report of the 25th February last

receipt of both has been duly acknowledged.

I have the honor now to report that on a thorough inspection c channel, and of the work done under the modified contract of Me Craig & Rightor for the removal of obstructions from the South Pass, made and concluded on the 28th instant, a straight che has been opened entirely across the tidal bar, having a width least of 300 feet, and a depth of 18 to 22 feet. The direction o channel from its head, near the can buoy, to its entrance into the water of the gulf, is south 25° west.

The opening of the channel has undoubtedly been effected in by the work that has been done, under the contracts, and in par the agency of the water currents in the pass, and by other na

causes: hence:

In accordance with the stipulations of the modified contract far as they relate to the opening of the channel in the Southwest the compensation to be made for the opening thereof, viz: (\$125) one hundred and twenty-five thousand dollars, all payments being

included, is now payable to the contractors.

Moreover, the first branch of the contract being fulfilled, as above, the stipulations for *keeping open* the channel, as provided for in the same contract, will go into operation, and remain binding on the contractors, from and after the 28th day of May, 1858.

All necessary details relating not only to the improvement of the Southwest Pass but to that of the Pass à l'Qutre also, will be presented in my inspection report, which will be prepared and forwarded as soon as practicable.

Respectfully, sir, your obedient servant,

S. H. LONG, Lieut. Col. Top. Engineers.

Colonel J. J. ABERT, Chief Top. Engineers, Washington, D. C.

1

CONDITION OF THE TREASURY AND THE PROBABLE PROLONGATION OF THE SESSION OF CONGRESS.

MESSAGE

FROM THE

PRESIDENT OF THE UNITED STATES.

The attention of Congress to the condition of the treasury, and recommending the prolongation of the session of Congress.

June 12, 1858.—Laid on the table, and ordered to be printed.

To the Senate and House of Representatives:

I feel it to be an indispensable duty to call your attention to the condition of the treasury. On the 19th day of May last the Secretary of the Treasury submitted a report to Congress "on the present condition of the finances of the government." In this report he states that, after a call upon the heads of departments, he had received official information that the sum of \$37,000,000 would probably be required during the first two quarters of the next fiscal year, from the first of July until the first of January. "This sum." the Secretary says, "does not include such amounts as may be appropriated by Congress over and above the estimates submitted to them: by the departments, and I have no data on which to estimate for such expenditures. Upon this point Congress is better able to form a correct opinion than I am."

The Secretary then estimates that the receipts into the treasury from all sources, between the 1st of July and the 1st of January. would amount to \$25,000,000, leaving a deficit of \$15,000,000, inclusive of the sum of about \$3,000,000, the least amount required to be in the treasury at all times to secure its successful operation. this amount he recommends a loan. This loan, it will be observed. was required after a close calculation to meet the estimates from the different departments; and not such appropriations as might be made

by Congress over and above these estimates.

There was embraced in this sum of \$15,000,000 estimates to the amount of about \$1,750,000 for the three volunteer regiments, authorized by the act of Congress approved April 7, 1858; for two of which, if not for the third, no appropriation will now be required. To this extent a portion of the loan of \$15,000,000 may be applipay the appropriations made by Congress beyond the estimates the different departments, referred to in the report of the Secret of the Treasury.

To what extent a probable deficiency may exist in the trea between the 1st July and the 1st January next, cannot be ascerta until the appropriation bills, as well as the private bills contai

appropriations shall have finally passed.

Adversity teaches useful lessons to nations as well as individ. The habit of extravagant expenditures fostered by a large surply the treasury must now be corrected, or the country will be invoin serious financial difficulties.

Under any form of government, extravagance in expenditure is be the natural consequence, when those who authorize the expendified no responsibility in providing the means of payment. Such been for a number of years our condition previously to the late mone revulsion in the country. Fortunately, at least for the cause of preconomy, the case is now reversed; and to the extent of the appriations, whatever these may be, engrafted on the different appriation bills, as well as those made by private bills, over and a the estimates of the different departments, it will be necessar Congress to provide the means of payment before their adjournm Without this, the treasury will be exhausted before the first of J ary, and the public credit will be seriously impaired. This disg must not fall upon the country.

It is impossible for me, however, now to ascertain this amo nor does there at present seem to be the least probability that can be done, and the necessary means provided by Congress to any deficiency which may exist in the Treasury before Monday at 12 o'clock, the hour fixed for adjournment, it being now Satu morning at half past 11 o'clock. To accomplish this object, the propriation bills, as they shall have finally passed Congress, mu before me, and time must be allowed to ascertain the amount of moneys appropriated, and to enable Congress to provide the n sary means. At this writing it is understood that several of a bills are yet before the committees of conference, and the an

ments to some of them have not even been printed.

Foreseeing that such a state of things might exist at the close of session, I stated, in the Annual Message to Congress, of Decer last, that "from the practice of Congress such an examination each bill as the Constitution requires has been rendered impossi. The most important business of each session is generally crointo its last hours, and the alternative presented to the Preside either to violate the constitutional duty which he owes to the pand approve bills which, for want of time, it is impossible he shave examined, or, by his refusal to do this, subject the countrindividuals to great loss and inconvenience.

"For my own part, I have deliberately determined that I shall ap no bills which I have not examined; and it will be a case of exand most urgent necessity which shall ever induce me to depart from this rule."

The present condition of the treasury absolutely requires that I should adhere to this resolution on the present occasion, for the reasons which I have heretofore presented.

In former times, it was believed to be the true character of an appropriation bill simply to carry into effect existing laws and the established policy of the country. A practice has however grown up of late years to engraft on such bills, at the last hours of the session, large appropriations for new and important objects not provided for by pre-existing laws, and when no time is left to the Executive for their examination and investigation. No alternation is thus left to the President but either to approve measures without examination, or by vetoing an appropriation bill, seriously to embarrass the operations of the government. This practice could never have prevailed without a surplus in the treasury sufficiently large to cover an indefinite amount of appropriations. Necessity now compels us to arrest it, at least so far as to afford time to ascertain the amount appropriated, and to provide the means of its payment.

For all these reasons, I recommend to Congress to postpone the day of adjournment for a brief period. I promise that not an hour shall be lost in ascertaining the amount of appropriations made by them for which it will be necessary to provide. I know it will be inconvenient for the members to attend a called session, and this, above all things, I desire to avoid.

JAMES BUCHANAN.

Washington City, June 12, 1858.
